"Sir, taking the total of all these figures during the last 11 years, the Government of India have taken from the tax-payers £20,000,000 in the form of taxation more than what was required for the purposes of the administration. Taking the total of these 11 years, the net result is, that you have taken from the tax-payers £24 millions surplus *minus* £4 millions deficit, leaving a net balance of £20 millions in excess of the revenue requirements of the Government of India. Where has this money gone? This money has been utilised for the purpose of capital expenditure.

"Sir, I understand that the policy that has been followed, and to which I have referred on previous occasions in this Council, has been that these surpluses should be lent to—I will not say used for—capital expenditure. I construe it in this sense that these surpluses of revenue were lent to capital and utilised as capital expenditure. I contended before, and if my contention had been allowed, we would have had a separate statement showing the total amount of money obtained from revenue in excess of our revenue requirements and lent to capital—I am using that word deliberately—lent to capital, so that at times of deficiency a refund may be obtained out of those loans. In the meantime, during the interval that the money is needed, if it is lent to capital and taken back from capital, then a state of equitable basis of taxation could be maintained, and thus recourse to additional taxation would not become necessary.

—9

[*Sir Ibrahim Rahimtoola.*] [7TH MARCH, 1916.]

"Sir, if this system had been adopted and if the present had not been a time of war, I would have contended that the whole deficit should be obtained as a refund from capital to which our surpluses have been devoted in the past. As it is war-time, I have supported Government in their proposals for additional taxation to the tune of £2,600,000, which covers the deficit that they estimate. I say, however, that in view of the fact that during the last 11 years we have lent as much as twenty million pounds out of our surpluses to capital, no increased taxation should be levied. My case, therefore, Sir, becomes overwhelmingly strong when I stand up here and contend that no increased taxation should be allowed in the shape of income-tax and salt tax, but that Government should be content with the money they have obtained under the Tariff Act.

"Sir, there is one more point in connection with this which I should like to point out. There was one year of deficit during the 11 years I have quoted. Immediately thereupon, the Government of India resorted to increased taxation. Extra taxation was levied, and it was proved afterwards that there had been no justification for that extra taxation. Our subsequent revenue and expenditure showed that Government could well have done without extra taxation. But even then, Sir, that taxation was not remitted but kept on. As I said, under ordinary circumstances, I would have contended that Government should obtain a refund from reproductive capital works to which we have lent at least twenty million pounds during the last 11 years out of our surplus revenues, and that no recourse to additional taxation should be made. I beg to repeat that in view of these facts the case against increasing taxation to obtain a surplus is overwhelmingly strong.

"Then, Sir, I may be asked whether, even if the position I have taken up is accepted, it is possible to borrow the required sum of money. I recognise the difficulties that face Government in the matter of borrowing; but if the lucid statement which the Hon'ble the Finance Member has given us is carefully studied, we have reasonable grounds for believing that any appeal to the Indian money-market for the requirements of Government will be met. I say so because I think that the Hon'ble Member has very carefully and very sympathetically decided upon a line of procedure which is very wise. I am referring to his proposal of offering to convert an amount of $3\frac{1}{2}$ per cent promissory loan notes equal to the amount of tender which an investor may make. Sir, I understand from this statement that terms will be offered which will be reasonably inviting; and if that is so, there are reasonable prospects of his succeeding in getting not only the minimum of four millions from the public which he estimates, but that a substantial part of the margin of another four millions which he is providing for will also be made.

"Now, Sir, I appeal to the Government of India—after all we Non-official Members can only plead and appeal—I appeal to the Government of India that, in view of the financial strength of the Government of India which I am going to refer to briefly later on, recourse to additional taxation for the purposes of what I will call a small deficit, if the salt tax is also disallowed, is not necessary. In dealing with the financial strength of the Government of India, I will take into consideration what are the alternatives which may be relied upon to meet the contingencies—the probable contingencies for which this additional taxation is proposed. Now, Sir, with due deference, I will venture to submit that the principle of levying additional taxation for the purpose of getting a surplus is wrong. Assuming that the actuals turn out as anticipated, both in regard to revenue and expenditure, and that at the end of the year there is a deficit for this current year, at the time when the next Financial Statement is prepared, I submit the Council will be in a position to know whether further additional taxation is necessary or not. You will observe, Sir, that in submitting this point I am not raising any question as regards the amount of expenditure which Government have thought proper to provide for. At a time like this I do not wish to raise any question as regards the

[7TH MARCH, 1916.] [*Sir Ibrahim Rahimtoola.*]

items of expenditure that have been provided for in the Budget. We want to support the Government, and not indulge in any adverse criticism in regard to the requirements which they regard, so far as expenditure is concerned, to be necessary. At the same time you will note that we reserve to ourselves the power of criticism, and that is after all the only power we have of examining the adjustments which are taking place at present between Great Britain and India in the matter of military expenditure. At present we wish to give *carte blanche* to the Government of India to do what they may deem proper, but we should not be construed to have consented to waive our right to offer helpful criticism, when the appropriate opportunity arises, in examining the basis and the principles on which these adjustments and re-adjustments between England and India, in regard to military expenditure, may have taken place. Sir, referring to the financial position again and the strength of the Government of India, I will deal firstly with the closing balance. According to the Budget we have a closing balance of over 17 millions. I understand from the Financial Statement that a balance of 16 millions is required for working expenses. The excess over the 16 millions is 1,400,000, sufficient to meet the decrease in taxation which I am advocating, 1 million for surplus and £500,000 for deficit. It makes a difference of £100,000, but I do not wish to take up the time of Council in dealing with that. When we consider in public bodies the question of Ways and Means we have in each public body a suitable amount of working balance, closing and opening balance as they are called in the Budget, and in ordinary parlance as working balances; and every public body, including Government, requires for the purposes of unforeseen contingencies and for liquidating the expenditure during the time revenue is coming in to have a surplus balance. Well, Sir, our surplus balance would be 16 millions if my proposal was accepted; and I venture to ask the Hon'ble Finance Member whether that is not a sufficient shield, whether a matter of 16 millions is not a sufficient shield against unforeseen contingencies. Surely, Sir, when you have a balance of 16 million £ to fall back upon, when you have the probability of floating a rupee loan for 8 million £, when your deficit is only £500 000, may I ask whether there is any reason to apprehend that, in spite of unforeseen contingencies against which a provision of a million £ is now being made, the closing balance in itself is not sufficient to reassure Government of not having to face any embarrassment whatsoever. Let us examine in another way the strength of the finances. The financial condition of this country is also proved by another factor. We have our capital debt at about 280 millions, out of which only £12,800,000 is unproductive, and the rest of our debt is productive debt. We had in 1898 an unproductive debt of 73 millions. We have worked it off to 12 millions and odd, that is to say, in about 25 or 26 years we have worked off our unproductive debt by nearly 60 million pounds. Surely that is also a source of great additional strength to the financial position of Government, not justifying, I venture to submit, the taxation of the people at times like these, when every one has suffered in one way or another for the purposes of providing a surplus. Then, Sir, there is the fourth safeguard, which would also protect in case of emergency. We have the Gold Standard Reserve. This reserve was started in the year 1904, and we have worked it up recently to 26 millions. At a time of emergency the Government of India themselves withdrew 7 millions for the purposes of Government, and in the interests of the public; I gratefully acknowledge that this was done in the best interests of the public, but that they have been able to withdraw as much as 7 millions out of the Gold Standard Reserve shows that it is possible, without embarrassment, to go to that extent of withdrawals from the Gold Standard Reserve. Out of these 7 million pounds withdrawn, 3 million pounds have been repaid, and the present over-draft amounts to 4 million pounds. If we succeed in floating an additional 4 million pounds in the rupee loan, that money is ear-marked to be repaid to the Gold Standard Reserve. But I say even if I am now considering contingencies which may in every case go wrong, and even in that case, you have a margin of 3 million

pounds in the Gold Standard Reserve which you once withdrew and repaid to meet any unforeseen contingencies of the kind for which you propose to impose this additional taxation. Looking at all these points put together, am I wrong in appealing to the good sense of the Government of India not to impose upon the people additional taxation for obtaining a surplus and meeting a small deficit. Sir, I appeal again as I said against any further increased taxation, not that I am against the principle of increasing income-tax or salt-tax, but that the circumstances of the case warrant caution and care, and additional burdens on the people only to the extent which is imperatively necessary I beg to submit that no case can be made out for additional taxation for the purposes of a surplus as imperatively necessary. Unless such a case is made out, which I beg to submit has not yet been made out, there is no case for additional taxation in these two directions.

"Sir, I have shown that in making Budget estimates care is usually taken to work out by past experience the various sources of revenue and the various items of expenditure. At the same time, when unforeseen contingencies have to be provided for, other factors are examined to ascertain whether they can be met.

"Sir, I have tried to show that we have (1) in the Gold Standard Reserve, (2) in the insignificant amount of our unproductive debt, (3) in our surplus cash balances, and (4) in the cautious estimates of our revenue and expenditure, a sufficient margin for any unforeseen charges which may have to be met. I submit that there is clearly no case for additional taxation. There is one point to which I will briefly refer, and that is, the view that has been expressed that India is lightly taxed; that in view of the increased burdens which Great Britain is bearing, India ought also to bear additional burdens. As a wise financier, my Hon'ble Friend, Sir William Meyer, is utilising that sentiment, and he has seen that the Council has supported him in the Tariff Bill practically unanimously. In connection with that matter, a great point for consideration is, what is the economic condition of England as compared with that of India, and what is the estimated income per head of population per annum in England as against that of India; what, again, is the proportion of taxation per head of population in England in relation to the total income as against the same conditions in India? If I were allowed, I would have gone exhaustively into this question. I will briefly state to the Council what is the result of working out the figures from the available statistics, and I will mention them for what they may be worth. The British population is 45 millions; in 1913-14, the total revenue was 200 millions; this works out per head of population at £4-8, or Rs. 66. The income per unit of population in England is calculated at from £47 to £66; if we work it on the maximum of Rs. 1,000 per annum, it gives a percentage of taxation of 6½ per cent; assuming that it is recently increased by 25 per cent, it would work out to a little over 8 per cent of their total income. In India, our revenue is 80 millions, excluding an estimate of 6 millions for revenue drawn from Native States. This works out to Rs. 5 per head on 240 millions of the population of British India. Now, putting it in that way, it does appear that in England the people pay per head as much as Rs. 80 in the shape of taxation, whereas we, in India, pay only Rs. 5; there is a world of difference between Rs. 5 and Rs. 80; but to put it in another way, we have an income estimated at Rs. 30 per head and Rs. 5 is one-sixth, or over 16 per cent, so that we, in India, are paying nearly double the rate of taxation in relation to our income than is paid by the people in Great Britain. To put it in another way, if you put this income at a minimum of 700 and 80 is their taxation, it works out to between 11 and 12 per cent balancing with that 620 per annum per head in India we have 25. Therefore, I say that India is not lightly taxed; we say that we are prepared to provide the revenues needed for the purpose of meeting such expenditure as the Government have themselves estimated. It appears to me that our co-operation and agreement in regard to these matters ought to satisfy Government that we wish to co-operate with and meet them in this crisis to the utmost of our power, but

when it comes to the point of taxing our constituents, the people of this country, in the shape of an income-tax in order that a surplus may be provided, I submit that that is going too far. I have already dealt with the reasons advanced in favour of this, I daresay that many things may happen in the meantime, but surely that is not a contingency that has not always been present; that is a contingency that ought to be met. As I have said we have ample resources; are the Government going to get into financial difficulties and embarrassments for want of this surplus of a £1,000,000 ? I appeal to the Government, and I appeal with all the force at my command, there is no case for additional taxation in order to find a surplus; all the factors which I have taken a considerable time to explain to the Council lead me to that conclusion. In meeting the Government to the extent of the additional expenditure which they have provided in the Budget we are co-operating with them to the utmost that we can reasonably be expected to do. I trust that my appeal will prevail, and that the country will not be asked to contribute additional taxation to that extent. One word more, Sir, and I have done; to put the case conversely ; assuming that the whole scheme is carried through, and that at the end of next year the Government find they have a surplus of 3 to 4 millions instead of one million, does the Hon'ble Member give us this guarantee that he will come forward and remit both the income-tax and the salt tax ? It appears to me that in these matters we have got to proceed on the facts and information that are before us, and, having regard to all the facts and information that has been disclosed, I submit that there is not an iota of a case in favour of putting on additional taxation on the people of this country at a time like this, to secure to Government a surplus of 1 million pounds. For these reasons, Sir, I am opposed to the Bill."

The Hon'ble Mr. Dadabhoy said :—"Sir, were it not for the present exceptional circumstances, pointed out by the Hon'ble Finance Minister, I would have hesitated to accord my support to any scheme of fresh taxation. I am not in favour of additions to our taxes. But the war is responsible for a situation abnormal in the extreme and beset with difficulties of an uncertain nature. We have to yield to pressure. We Members of this Council have made it clear before now that we would be prepared to support Government in any proposal to levy imposts for the successful prosecution of this war. I for one stick to that loyal resolution, and I cheerfully support this Bill with this reservation, that the scheme of taxation it legalises should be overhauled on the complete rehabilitation of our finances. I do not lose sight of the fact that, according to the Hon'ble Finance Member's calculation, our revenues stand in danger of a permanent diminution, while our liabilities will grow in volume after the war, and that therefore permanent sources of additional revenue must be found. But I believe the Hon'ble Sir William Meyer is over-cautious. I look with confident hope to the future, and I am almost sure, after the conclusion of the war, there will be such a rebound in our finances as will render the present additional taxation superfluous. Unless heavy and extraordinary charges are debited to India as a result of the war, any possible inflation in our annual expenditure will be more than balanced by a normal increase in our existing revenue, and these additional supports will not be needed. It is also a question how far a portion of our Budget provision is unavoidable. But this is not the time for comment. The hands of Government must in no way be weakened The Bill must be supported. Large as the increase in the income-tax is, it gives me great pleasure to support the scheme, in that the principle of a graduated scale of taxation has been finally adopted. Hon'ble Members will remember that, in 1910, in connection with my Resolution in Council for raising the assessable minimum, I strongly advocated that the tax should be levied on a graduated scale. I am glad Government has at last seen the justice of the plea, and a generous effort has been made in the Bill before us to secure an equitable distribution of the tax. This is undoubtedly right. Difference of opinion may indeed exisit both about the maximum rate levied and about the minimum income assessable to that rate. But in view of the gravity of the situation, I do not quarrel about these

particulars. We ought to bear carefully in mind that in England the rate is very much higher, and there is every prospect of its going up higher still. There is thus no just ground for complaint on the score of the maximum rate in the Bill. It is only fair that we all should liberally contribute to the public finances; and it is likewise fair that the rich should pay proportionately more than their less favoured countrymen.

"Sir, *my* chief complaint about this whole business of additional taxation, however, is that it has been necessitated, to a large extent at any rate, to the wanton surrender by us of the major portion of our opium revenue. Had that productive source remained intact, we could have borne even the present financial strain without difficulty, and without burdening the country with any additional tax. It is doubtful if China has been freed from the evil habit in consequence of our forbearance, but we have for a certainty lost the bulk of the large and special revenue. That is a point on which the people might well feel sore.

"One word more with reference to what has fallen from Sir Ibrahim Rahimtoola. My Hon'ble friend has referred to £20 millions recovered from the people during the last eleven years and spent on capital expenditure. But he fully knows that a large portion of our capital expenditure is of a productive nature and brings in a large revenue to Government, which in a manner helps to diminish the burdens of the people. Consequently the figures which he has quoted are not so appalling as they seem to be.

"With these words, Sir, I support the Bill."

The Hon'ble Pandit Madan Mohan Malaviya:—"Sir, with the remarks which Sir Ibrahim Rahimtoola has made regarding the general position of our finances, I cordially agree. I think, Sir, with due deference to the Government of India, that our finances have not been as economically and carefully administered as they should have been, and I think it also my duty to say that, while we recognise and feel grateful for the retrenchments which the Hon'ble the Finance Member has brought about, I feel strongly, and there are many others who feel with me, that there is much greater room for improvement by retrenchment. I suggest, and I hope the suggestion will be carried out, that there should be a Committee of non-official and official Members of this Council appointed to scrutinise the expenditure. If this is done, I expect that we shall be able to effect a much larger reduction in expenditure than has been brought about by official scrutiny alone. It is only fair that Non-official Members, who are asked to co-operate with Government by giving their support to the proposals for additional taxation, should be given an opportunity also to point our where reduction is possible. I will not go into the figures which my friend has put before the Council in such abundance. I will not go into all those figures, I think there is enough in his speech, even if some of the figures may not be quite correct, to awaken us to a sense of the importance of having a closer scrutiny made of the expenditure side of our Budget.

"Sir, there is not the least doubt in my mind that for many years past taxation has been maintained at a high level, at a higher level than it should have been—and there is not the least doubt, too, in my mind that there is room for much retrenchment which ought to be brought about. With those contentions of my Hon'ble friend I entirely agree, but when we come to deal with the situation we find ourselves in, I feel that I cannot entirely support him. I agree that if a larger retrenchment had been taken up in right earnest, it would not probably have been necessary to put on all the additional taxation which has been put on or proposed; if the arguments of my friend are sound, as I have no doubt to a great extent they are, I would join with him in urging that some of the taxes proposed should be avoided; but I would wish that these taxes should be those that fall on the poorer classes of the community rather than that the proposal to increase the tax on higher incomes should be abandoned. I am not among those who would

[7TH MARCH, 1916.] [*Pandit Madan Mohan Malaviya.*]

vote for additional taxation merely because the tax proposed happens to be one which I regard as equitable in principle. It is perfectly reasonable to urge that, if as the result of a closer inquiry, the Government are convinced that they do not require all the revenue they have budgetted for, they should have the fairness and courage to agree to the proposal that a proportionate share of the proposed taxation shall be abandoned. But I do not expect, from my knowledge and experience of this Council and of the ways of the Government of India, that at this juncture, after the proposals have been carefully considered by the Hon'ble the Finance Member in his Department, when the Budget Statement has been laid before the Council there is going to be in the immediate present any such re-examination of the financial position as would compel the Government of India to the conclusion that they should not ask for a portion of the revenue that they have asked for. And if the amount budgetted for is the amount on which the Government of India have set their heart, if that is the amount which they must have in hand in order that the Finance Member and the Government should feel secure that during the next twelve months the finances of the Empire will not go seriously wrong, and that there would be no financial embarrassment, then I submit that the proposal for raising the income-tax, being by its nature eminently equitable and just ought to be supported.

"I think, Sir, that while there is a good deal in the proposals for new taxation which deserves commendation, that while the proposals for additional taxation generally are equitable and sound and show a great deal of considerateness on the part of the Finance Member and his Colleagues, there is no proposal which is so eminently equitable as the proposal to introduce a graduated income-tax. It is but a truism that those who receive the greatest favours from, or derive the greatest benefits under, a Government ought to contribute most largely, proportionally to their means, to the support of that Government. The Government have added to the burden of the humblest of the humble, the poorest of the poor, in enhancing the salt tax; the new or increased import duties are also nothing but an additional burden upon the general taxpayer; they will not be paid by those who manufacture the articles taxed but by those who consume them. All these are general indirect taxes. The only one direct tax is the tax on incomes. Now the Government have, with great considerateness, left alone the existing rate of income-tax where it is so far as incomes up to Rs. 5,000 are concerned. They have put on the increased rate only upon those who have incomes going above Rs. 5,000. I think that is eminently fair and reasonable. The poorer section of the community ought to be exempted from paying this tax. Those that are able to pay should be required to contribute in a manner fairly commensurate with their incomes. I may say, if I may be excused for saying it, that I have always felt a special satisfaction in contributing the income-tax to the coffers of Government. I have felt that that was a contribution which I was consciously making towards the administration under which I live and benefit, and I feel that that ought to be the feeling of every one who benefits by the system of administration under which he lives. It is true, no doubt, that there are many of us who would like not to have to pay any tax; it is true also that if all taxes could be avoided, it would be a very happy state of things. But that is not to be; and as all taxes cannot be abolished, when the happy time should come when some taxes can be remitted, I would ask the Government and the Council, to think of remitting taxation which presses upon the poor rather than of altering the proposals for a graduated income-tax which will press upon those who, thanks to the blessings which they enjoy, are well able to meet it. That being my view of the situation, I think that the present Bill ought not to be opposed. As I have said before, I join with my friend Sir Ibrahim Rahimtoola in earnestly pressing for, earnestly praying for, such a general overhauling of our expenditure side of the Budget as will enable the Government and the public to say where reduction should be made, and when that has been done, and the time arrives for remission of taxation, I would wish those taxes to be removed in the first instance which press upon the poor.

[*Pandit Madan Mohan Malaviya.*] [7TH MARCH, 1916.]

"I apprehend, however, that we are in for all this additional taxation for a long time. I cannot look forward with any hope to the time when these additional taxes will be taken off. That is not in the history of the Government of India, ordinarily speaking. We no doubt had a remission of taxation eight or nine years ago. But I do not look forward with any hope that we shall have much of a remission of taxation again in the near future. I hope, however, that these additional revenues which are being obtained should not—I speak with respect, but I speak with deliberation—should not lead to a further extravagance in expenditure being indulged in in the years that are to come. There are many temptations, there are many directions in which an increase of expenditure will be asked for. There are directions in which, I fear, even an unjust pressure will be brought to bear upon the Government of India to meet expenditure which it ought not rightly to bear. I am sorry to say that I notice one such instance in the present Budget. The Government of India have fought valiantly (and they deserve our thanks for having so fought) against sea transport charges being debited to India in the past and the present year. Every one understands that since the war began we have not incurred those charges for transporting troops; that we have not received the services for which those charges have been levied upon us. And yet the powers that be in England have ruled that we must be debited with those charges because, forsooth though we did not as a matter of fact incur them, we would have incurred them but for the war! and because if those charges were not debited to us we should be making a profit out of the war! I submit that is not a fair way of looking at the matter. If charges have not been incurred, there can be no justification for saddling India with those charges. I cannot think of any possible answer to that. I can well understand our being asked to make a humble contribution, however humble it may be, to the war fund; I can well understand our making spontaneously a humble offering to support the Government, as we have done in other ways, but I cannot see the justice of India being saddled with charges that she has never incurred, or which have never been incurred for her. I mention this as one instance of the danger to which we shall be exposed in a greater measure when there will be a surplus revenue in the hands of Government, because of the additional taxation, as I feel sure with Sir Ibrahim there will be at the end of 12 months, of that surplus being utilised for meeting charges which are either unjust or exorbitant.

"I also think that there is great force in the contention of my friend the Hon'ble Sir Ibrahim Rahimtoola against a resort to additional taxation to provide a surplus. If this taxation were being imposed to meet the wants of the people for greater education, to provide for more sanitation, to provide for the development of indigenous industries, to provide for developing the resources of the country, the case would stand on a very different footing. We might well then, deliberately, knowingly, with our eyes open, agree to additional taxation in order that additional revenues might be raised to promote national efficiency and thereby national wealth, to bring the people up to a level of civilization and prosperity with other parts of the British Empire, but it is a very different matter when additional revenue is being raised in order merely to provide a surplus, which my friend has shown (and there is great force in what he has said) may not really be required. Taking however the whole situation into consideration, and having a feeling of hopelessness that the decision which the Government have arrived at will not now be altered or modified, I think that the proposals which are now before the Council regarding the higher income-tax ought not to be disturbed. I hope that when the time comes for remitting taxation, other taxes may be remitted, but that this tax will stand, and this for two reasons: first of all because it is an eminently equitable tax; its burden falling upon those who are best able to bear it; secondly, because this tax will probably lead some of us who will have to pay it to look a little more closely into the expenditure side of our finances. I hope it may induce some of us to seriously think whether it is not possible to have the administration carried on on much cheaper, more economical lines without sacrificing efficiency; and if this

[7TH MARCH, 1916.] [*Pandit Madan Mohan Malaviya; Khan Bahadur Mian Muhammad Shafi; Mr. Rama Rayaningar.*]

hope shou'd be realised, that additional interest taken in our financial administration will, I expect, more than repay us for the loss of income we shall sustain and the hardship that some of us feel in submitting to the increased tax.

"With these remarks, Sir, I strongly support the motion which has been made by the Hon'ble Finance Minister."

The Hon'ble Khan Bahadur Mian Muhammad Shafi:—"Sir, in view of the abnormal conditions created by the world-war, I give my willing acquiescence to the imposition of an additional income-tax as proposed in this enactment, particularly because the extraordinary expenditure which the Government has to meet, is proposed to be met in a manner calculated to produce a minimum of hardship. As the Hon'ble Finance Minister explained to us in his admirable speech introducing the annual Financial Statement, the persons who, under the existing law, are exempt from payment of these taxes and those whose incomes amount to Rs. 4,999 will in no way be affected by the proposed measure. And of the 37,000 persons who will have to pay enhanced taxation, only some 3,500 persons will pay the highest rate proposed in this Bill. It is quite true, as was observed by my friend Sir Ibrahim Rahimtoola, that these well-to-do classes contribute very largely in various ways towards our public exchequer. But I, for one, feel certain that this class of persons will recognise that those who benefit most under the protecting ægis of the greatest Empire known to history ought to contribute most in times of special crisis, such as the one with which we are faced to-day. Sir, I should have been perhaps the first person to subscribe to every word of what my friend the Hon'ble Sir Ibrahim Rahimtoola has said if the question of increased taxation, as he called it, for a surplus had arisen under normal conditions: but in view of the extraordinary circumstances created by this war, and in view of the possibility of all sorts of contingencies which may arise during the forthcoming year—or as the Hon'ble Finance Minister said in view of the contingency that this war may last for another year or more—we ought to be prepared to support the Government in imposing an additional tax, the incidence of which will fall only on those classes who can afford to pay and ought not to grudge these £900,000 which the Government seeks to derive from the Income-tax Bill.

"Sir, since the introduction of the Bill into this Council, I have had opportunities of discussing its provisions with some of the leaders of public opinion belonging to various communities in the Capital of the Province which I have the honour to represent. The provisions of the Bill have further been discussed at a meeting of the Punjab Muslim League held on Sunday last. They all recognise that, under existing circumstances, the imposition of an additional income-tax is unavoidable as a war measure, and it is as such that they are all willing to give it their support. We all hope that, when the extraordinary circumstances which have necessitated the imposition of this tax have ceased to exist, this enactment will be expunged from our Statute-book and the *status quo ante* will be restored. Sir, it is in this spirit, and in this spirit alone, that we agree to the imposition of this additional income-tax."

The Hon'ble Mr. Rama Rayaningar:—"Sir, I support the Bill. The Hon'ble the Finance Member has given us as one of his reasons for adding to the permanent resources of Government that, after the war, further funds will have to be provided for such beneficent purposes as the improvement of education and sanitation. Thus the legislation, while providing for the war contingency, contemplates to make permanent provision for some of the most pressing needs of the country. The legislation therefore is desirable. It is true that the Bill legislates for enhanced taxation, payable by the few. But the few who have to pay the increased tax are the wealthy few, hitherto but slightly touched by taxation. The general scheme of the Bill is so good that one cannot but support its adoption. The Bill is an improvement over the existing law, inasmuch as it gives support in a more marked degree to the principle of graduation in rates and that that principle is applied with

judgment in working out the details. However, another principle, equally important and equitable, the principle of abatement, is ignored in this Bill. Some time back I gave notice of a Resolution recommending the principle of abatement, but, unfortunately, I could not move the Resolution. This principle has been accepted in most civilised countries, and there is no reason why it should not be introduced into the Indian law of income-tax. In all classifications of assessable income allowance should be made for the cost of maintenance, not only of the assessees but also of their dependents. I hope, after the war is over, Government will be pleased to give due effect to this salutary principle in the law.

"Sir, I have one more observation to make and that is, that when occasion arises for the application of the extra funds, which increased taxation brings in, Government should consider the claims for support of agriculture and industries, especially village industries, along with the claims of education and sanitation. The improvement of the material condition of the people is as important as the improvement of education and sanitation. Money spent on agriculture and industries is money well spent. When the people are materially better off they will themselves spend more on education and sanitation."

The Hon'ble Rai Sita Nath Ray Bahadur:—"Sir, as observed before, in the present state of the Empire, when it is involved in the greatest war known to history, and when the English people have cheerfully come forward to make the greatest possible sacrifices, it is only fair, just and equitable that India, while protected by the powerful Navy and Army of England and thus enjoying the security of life and property unmolested, should also cheerfully submit to the schemes of taxation, based on incomes the incidence of which will fall heavily on the higher classes of people, *i.e.*, people who are able to pay. I am indeed glad that the tax, while not touching all incomes below one thousand, is going to be levied on a graduated scale, the incidence of which will no doubt fall on the higher and richer classes. But while we cheerfully submit to this tax, we fervently pray that when the necessity for this additional income-tax would cease to exist, on the conclusion of peace, the additional tax will be removed and not made a source of permanent revenue. It is not a light matter that a man should be suddenly called upon to pay a tax which is two and a half times higher than what it was before.

"With these few words, I beg to support the Bill."

The Hon'ble Rai Ghanasyam Barua Bahadur:—"Sir, I think that of the two Bills which are before us to-day, this is the one which we should consider the least open to objection, as it deals with a very reasonable form of taxation, and the distribution has been carefully and equitably made. Considering the gravity of the situation, the need for additional taxation as the Hon'ble the Finance Minister has so clearly explained to us, and the very cautious and considerate way in which he has imposed the taxes, it would have been much better if we could have seen our way to pass both these Bills without much discussion. I wish we could do so. Unfortunately, we have launched into a great deal of discussion, some portion of which it would have been much wiser, I think, not to have gone into at all, as advised by His Majesty's Government and the Hon'ble the Finance Minister. I am, however, happy to see that both the Bills have received almost unanimous support, the support that they deserved, and I hope the whole country will be prepared to gladly bear the additional burden owing to the peculiar circumstances that have necessitated it. In a situation like this, I think that, instead of insisting upon the Hon'ble the Finance Member doing without additional taxation or of finding fault with him for budgetting for a surplus of one million, it would have been more reasonable to ask him simply to be cautions in spending the amount and keeping it in hand as a reserve only for particular contingencies that may arise. In a time like this, I think nobody would call it unfair or unwise for a

Finance Minister to so strengthen his hands as to be able to have something in hand for any urgent call to which he might at any moment be exposed We see that the frontier troubles going on with more or less continuity, and the call upon us in connection with the eastern theatre of the war may be more urgent at any time. Besides, there may be other deficits, *e.g.*, the railway traffic may suddenly receive a check. It is no wonder if considerations like these induce one to keep some extra money by, and we should consider it only a matter of ordinary prudence for a wise Finance Minister to keep such a margin in hand. In the peculiar circumstances of the case we might have satisfied ourselves by saying simply that the resources should be well husbanded, that where one pice would suffice two should not be spent, and that where a rupee could be saved it should be saved; and the great care which has been continually exercised by the Finance Minister in presenting the Financial Statement every year should lead us to depend very much on him for that. On all these considerations, I think we should have been much wiser in not drifting into the long and somewhat unfortunate and unpleasant discussions that have taken place to-day.

"It should have been enough for us to say that we accept the Bills as a war measure, but that if it so happens that we do not want the surplus for the purposes of the war, we shall ask him to spend it for purposes which will benefit the people from whom it has been obtained. We might ask him then to see that the proceeds of the salt tax and the income-tax go to the relief of the poor, in the improvement of education and sanitation and so forth. The war will not go on for ever; it will come to an end sooner or later. Then will be the time to press on the Government to reduce all extra taxation which the conditions of war have brought upon us. Why not let the Bills be passed without protest and depend upon the Finance Minister's calculations for the present? This is really not the time for quarrel or controversy but for smooth and united work. Since the outbreak of the war Bills to the extent of hundreds of millions have been passed in the Houses of Parliament in England, and the people of the United Kingdom have submitted without a murmur. In consideration of the part that we are bound to take in this world-wide war, and in consideration of the promise and pledge that we have already made to this effect, I think in these small matters we should have been able to do without controversy and let the Bills be passed at once, especially after what the Finance Minister said. As soon as the war is over we shall have time to readjust the accounts and ask him to reconsider these measures in more detail. I hope the Council will see the advisability of not lengthening discussions any further. I beg to give full support to the Bill."

The Hon'ble Mr. Madhu Sudan Das:—"Sir, judging from the speeches that have been made on this Bill, we are all agreed that there should be no attempt on the part of anybody to oppose the new taxation which has been necessitated by the war. But while there is a positive and marked reluctance to withhold any money which Government wants to meet the emergencies of the occasion, some Hon'ble Members have thought it fit—or rather, I should say, have considered this a proper and fitting occasion—to refer to what they would like to describe as erroneous administration in the past. If we once admit that there is need for extra taxation necessitated by the emergencies of the present moment, and that we should not withhold our acquiescence in it, I do fail to understand what good can be derived from going to the past or criticising the administration of the past. It may be that millions might have accumulated in the shape of surplus. It is true perhaps that the actual surpluses have exceeded the anticipated surpluses. But Hon'ble Members should not lose sight of the fact that these surpluses have been spent as capital outlay, which means, all those comforts, facilities and conveniences of civilised life, without which we should not have been proud as subjects of the British Empire, which we are to-day. The very fact that the actual surpluses have exceeded the estimated surpluses proves that at any rate the Government of India has not been playing

ducks and drakes with the money, but that great care has been taken in its expenditure, It may be that a closer scrutiny into the finances might have swelled the actual surplus a little more, but those are things of the past and my outlook is of the future. For the present, I am content to bear the burden that is put on my back and shoulder, but I look forward to a brighter future. That should be and is my position at any rate. And if the English nation, if the Government of India, if the Secretary of State or the India Office, if any of these do not do their duty, well, that will not be our fault. The war has awakened the world's conscience; the war has opened the eyes of all nations. Our conduct therefore will be judged by the verdict of the world and by the impartial verdict of history.

"With these words, Sir, I give my entire and whole-hearted support to the Bill."

The Hon'ble Sir William Meyer:—"Sir, I am very glad to find that there is such unanimous support of the Bill in the Council—such *almost* unanimous support of the Bill, I should say—such almost unanimous recognition of the justification for the Government proposals. The only discordant note has been struck by the Hon'ble Sir Ibrahim Rahimtoola, and I cannot pass over some misleading statements that he made.

"In the first place, in dealing with the financial expedients which we might employ to avert having to raise income-tax, he spoke of our having a reserve in the shape of our balances, which normally amount to sixteen odd millions. Well, anyone might suppose that the balance in question lay always handy, that it was a balance such as a private individual keeps at his bank and could draw upon easily at any time. Of course it is nothing of the sort. The balances of the Government of India—normally 4 millions in London and 12 millions in India itself—are scattered all over the country. They are the joint products of the balances of every tahsil and district treasury. Portions of them are held at the Presidency Banks at Bombay, Calcutta and Madras, where they are useful for trade, and so on. They are really till-money to finance the requirements of a sub-continent. When then we say that our cash balance is for instance £16⅓ millions, it does not follow that that those 16⅓ millions can be used. There is only a very small portion—in India practically the amount that we hold from time to time in our reserve treasuries—that can be promptly used; and I can assure the Council that there have been moments in this last year in which I have been rather anxious about the state of our cash balances; and have had to meditate—what I should have done with the greatest reluctance—withdrawing more money from the Presidency Banks.

"Then, the next misleading statement was that during a certain number of years—since 1903, I think, the Hon'ble Sir Ibrahim Rahimtoola said—some 20 million pounds had been paid by the taxpayer towards capital expenditure. Well, I call that statement misleading because they were not really paid by the taxpayer in the sense in which one ordinarily understands the word. Several millions of that money came from the opium revenue from huge sums that were paid during the last years of our opium trade with China by persons anxious to pass on opium at heavy cost to the Chinese. Those millions were not paid by the taxpayer in India. Then there is the money derived from the commercial undertakings of the Government. Take the railways. During the last few years the railway receipts have been rather in excess of our eventual surpluses. I would like to read the figures for the last few years. In 1912-13, the net profit from railways, after meeting interest charges, was about £4,800,000. The actual surplus was £3,100,000. In 1913-14, railways produced about £5,000,000, but the actual surplus was only £2,300,000. In 1914-15, railways produced £2,150,000, nevertheless there was a total deficit of £1,800,000.

"In the current year we now estimate for a railway profit of £3,300,000; nevertheless the final, general, deficit is £2,000,000. In the Budget, again, we have with the fresh taxes proposed, a surplus of £1,000,000, but this is after reckoning £2,500,000 of railway profits. It must also be remembered that the

[7TH MARCH, 1916.] [*Sir William Meyer.*]

Government get a good deal from opium and forests, in like manner. Well, it is not fair, it is very unfair to talk about receipts derived in that way as being derived from taxes. They represent voluntary disbursement from those who pay them, and when they are put into capital expenditure, it has been an excellent result for the taxpayer. If, for instance, Hon'ble Members will refresh their memory by turning to the last section of my Budget speech of last year dealing with the public debt in India, they will find that, partly through the reduction of our unproductive debt by the application of past surpluses we now derive some £6,000,000 of clear revenue from our great capital undertakings. Those transactions I say give you a net profit of £6,000,000 after providing for interest; and let me remind Sir Ibrahim Rahimtoola that the strong position of India which he speaks of is owing to the self-denial of our predecessors who went on through difficult periods in which there were deficits, went on paying the money and left us in this strong position in which we now are. But this does not warrant us in dissipating the capital that our predecessors obtained for us and proceeding to budget for deficits. Sir Ibrahim Rahimtoola also referred to the fact that the actual surplus of the year is generally materially in excess of the amount budgetted for. Well, it is a particularly difficult task to budget for India, which is a sub-continent. My predecessor referred to the Indian Budget, in a now classic phrase, as a gamble on rains. I should say now that it is in even greater measure a gamble in railways. Our figures may be materially altered—generally to the good, sometimes unhappily to the bad—by the character of our railway receipts. Of course, we do our best in calculating what our railway receipts will be; we consult our railway experts and so on; but we are all out sometimes. Now considering the vast scope of our railway system, the number of factors involved, and the extent to which a small percentage of difference in profit or loss will affect the railway Budget, I do not take any discredit for the fact that railways have, generally speaking, done better than was expected; though sometimes, on the other hand, they do not do so well. In 1908-09, for instance, the then Finance Member estimated for a surplus of £570,000, but got a deficit of £3,700,000, partly through agricultural distress, but very largely through a falling off in railway earnings. Similarly, in the previous year (1907-08) the surplus, as Sir Ibrahim Rahimtoola quite candidly admitted, was less than was anticipated in the Budget. Well, there being this risk, generally, of the Budget figures not working out as we anticipate, it is far better to be on the right side than on the wrong. This year, for instance, as I have already said, I was really anxious till the railways came to the rescue. If the railways had not, to the surprise of everybody, of the experts themselves, produced very much more than we had any right to anticipate, instead of the deficit this year being a million less than estimated, it would have been probably a million more. Well, I am not going to run any such risk next year; we cannot afford it. I think Sir Ibrahim Rahimtoola has had his eyes so fixed on Great Britain and the shortcomings of the Government there, as he puts it, that he has rather forgotten what the financial circumstances of India are. The Chancellor of the Exchequer at home can cut things rather fine, because he can, if things go wrong, if there is a deficit instead of a surplus, raise money by exchequer bills; and then he can, when Parliament meets, also vary taxes, and raise money in that way. In India, supposing a state of things was brought about—by a trade crisis, we will say—in which the Government of India was losing money hard, we should certainly not be able to get money from the Presidency Banks or the money-market generally. At present, again, we have not the further resource of raising money at home; nor is anybody who is really acquainted with the circumstances of the people of India anxious to subject them to perpetual alterations of taxation. There is nothing so much disliked in this country as uncertainty; we know it from the salt tax. Rumour said last year that the salt tax was about to be increased. There were unfounded and exaggerated rumours this year as to the extent to which we proposed to increase the tax, and speculators sent the price up. We do not want that state of things; we do not want people apprehensive lest a turn of the tide should impose some further taxation. We want, in imposing taxation, to do it in a definite and sound way so as to give us adequate resources.

"Sir Ibrahim Rahimtoola says that every time there is a deficit the Government of India imposes fresh taxes. Well, I do not admit that this is so at all. There was a deficit in 1907-08 which was passed by. In 1908-09, there was a further big deficit of nearly 4 millions, and next year my predecessor imposed fresh taxes to the amount of a million. Why did he do this? He did not do it merely with reference to the deficit, but with reference to the probable disappearance of the opium revenue, which has disappeared since; and as I told Council last year, the equivalent of the taxes then imposed, £1 million, has been subsequently allotted to education and sanitation. Well, what does the present Government do? There was a big deficit in 1913-14 attendant on the war. There would be another big deficit in the current year, as we know. So long as we thought we could get on without fresh taxation we did not tax; we resorted to all sorts of expedients which would not have been desirable except in very special circumstances, borrowing from the Gold Standard Reserve and so on But now that we have come to the third year of deficit, and there is the prospect that the war may go on for a long time yet, and that we shall later have to reconsider our scale of expenditure probably, it would be absolutely immoral to go on estimating for deficits. Sir Ibrahim Rahimtoola propounds a little Budget in which we shall have to scrap the salt tax and the income-tax and have a deficit of £[illegible]00,000 which is to be covered by the grace of God, I suppose. Anyhow, he hopes that things will be better than they are to-day; if they are worse then make a raid on the Gold Standard Reserve, or meet them from the cash balances, or from this or from that. I regard that as absolutely immoral finance. The Government proposes taxation so as to give, I won't say a surplus, because that suggests a normal state of things, but an adequate margin to meet a state of affairs which may be very materially worse than is anticipated at present. It may of course be better, I hope it will be. I shall be very glad if that is so. Then I am asked what I shall do if there is a larger surplus than we anticipate. There is a very easy answer to that; we have still got a very heavy temporary debt which we ought to discharge as soon as possible; we have still £4,000,000 due to the Gold Standard Reserve, and £5,500,000 due on the India Bills. If our loan operations are successful, we may get some money to pay towards reimbursing the Gold Standard Reserve, but we have still the India Bills.

"Then I have been asked what I shall do later on if peace and prosperity return and we find ourselves in an era of surpluses. I can give no pledge as to the repeal of any particular tax now imposed; when we are nearer to prosperity we shall have to consider the matter. My own personal view—I am here in sympathy with the Hon'ble Pandit—is that when we come to consider the remission of taxation generally, the taxes to be first considered are those which specially affect the poor, and I say this that when we come nearer to prosperity if I am still in office—or if I have gone I can say the same of my successor—Government will take into consideration how far the taxes which have been imposed in times of adversity need to be continued, and if remissions are thought desirable, what particular form those remissions should take.

"Lastly, I am surprised that, seeing that the Hon'ble Sir Ibrahim Rahimtoola recommended that we should budget for equilibrium or even a small deficit, he did not think less money should be obtained from Customs, and I am surprised that he should have exposed himself to misconstruction—for misconstruction I am sure it would be—by opposing a tax specially designed to make wealthy people like himself contribute to the public purse; I should have thought that in his place it would have been more altruistic to vote for the income-tax and propose a reduction of the Customs.

"With these remarks, Sir, I move that the Report of the Select Committee be taken into detailed consideration."

The motion was put and agreed to.

The Hon'ble Mr. C. Vijiaraghavachariar:—"Sir, in section 5 of the Income-tax Act there are about ten cases of exemptions from the

[7TH MARCH, 1916.] [*Mr. C. Vijiaraghavacharlar; Sir William Meyer.*]

tax; these provisions are repeated in the Bill. I propose that sub-section (*d*) be omitted. I shall read it, it runs as follows :—

'Any profits of a shipping company incorporated or registered out of British India and having its principal place of business out of India and its ships ordinarily engaged in seagoing traffic out of Indian waters.

"This is the clause of which my amendment asks the repeal or deletion; it is not capable of much argument either way; you have to look at the principle, if any, of the exemption. I looked at the Proceedings relating to the passing of this Act in 1886. I did not find any cogent reason why this exemption was introduced in the provisions of the Act of 1886. The Bill which became the Act of 1886 did not contain this exemption, but after it was referred to Select Committee, the Hon'ble Mr. Steel seems to have raised an objection on the ground that this Act would annoy the shipping agents, and it was also vaguely feared that Collectors would go to ships and ask for various particulars, etc, then the exemption was introduced. It was also said that much money did not comein from this source under the law prior to the Act of 1886. Why this was so, whether because it was not available or whether evidence could not be reached, I was unable to gather from the Proceedings. Whatever it may have been, the hope was held out that the point was capable of revision at subsequent times. Now thirty years have passed since the Act was passed; at that time the great carrying country of the world was England; there has since then been a considerable change in the commercial and carrying capacities of the world, and I see no reason why this exemption should be retained any further.

"With these remarks, Sir, I beg to move the amendment that stands in my name—

'That for clause 3 of the Indian Income-tax Amendment Bill the following shall be substituted, namely :—

'3. In section 5 of the said Act the following amendments shall be made, namely—

(*a*) clause (*d*) shall be omitted, and

(*b*) in clause (*j*) after the word 'any' the words 'company or' shall be inserted.'"

The Hon'ble Sir William Meyer :—"Sir, as I explained in my speech introducing the Financial Statement, there are a variety of matters in which the existing enactments will require revision sooner or later. We did not propose to complicate this question of additional taxation by going into all these matters; that would have taken a long time and the Council will readily imagine that we were pressed with Budget work and with the special anxieties that war brings about.

"As regards this amendment, I have looked up the point and have communicated privately with the Hon'ble Member. I find that, in 1886, the then Finance Member and the Select Committee thought that the tax on shipping would have been very difficult to collect. It would have been impossible owing to vessels going from country to country, and the cargoes being transferred from vessel to vessel, to estimate the profits derived from Indian trade separately. Similarly, it would have been impossible to estimate the profits of the ships for the period that they were in Indian waters. It was said, too, that the shipping trade at that time—this would not apply now—was in very low water. In 1912, before I assumed office, various suggestions had been made in respect of the amendment of the Income-tax Act that require consideration, and a revision of this sub-section was one of them. So if my Hon'ble friend will take it from me that when a fitting opportunity offers for a general revision of the Act, quite apart from the present emergency taxation, this question will be fully considered. I hope he will be satisfied and will withdraw his motion."

The Hon'ble Mr. C. Vijiaraghavacharlar :—"The Hon'ble Member will perhaps permit me to say that this point required no serious investigation; at the same time as he tells me that the matter will be looked into, I beg to withdraw my amendment."

[*Pandit Madan Mohan Malaviya; Sir William Meyer.*] [7TH MARCH, 1916.]

The amendment was, by permission, withdrawn.

The Hon'ble Pandit Madan Mohan Malaviya :—"Sir, I beg to move—

'That in clause (*a*), Part I, column 2, of the second Schedue set out in clause 8 of the Bill, for the figure "1,000," the figure "1,200" and for the figures "83-5-4" the figure "100" shall be substituted.'

"The reason for this amendment is very simple and very obvious. The Government have very considerately exempted incomes up to Rs. 1,000 from taxation. We feel grateful for it, but prices have risen and living has become more costly, and the great bulk of the middle class find it more and more difficult to make the two ends meet. I therefore propose that the exemption should be raised to Rs. 1,200. It will not cost the Government an excessively large amount. I have looked up the figures for 1911-12—figures for later years not being available to me. They show that in that year the number of persons who paid income-tax on incomes ranging from Rs. 1,000 to Rs. 1,250 was 98,716 That was the number of persons assessed on incomes between Rs. 1,000 and 1,250; but the total sum raised from them amounted to Rs. 19,31,213 only. So, that when nearly a lakh of persons were assessed and put through all the difficulties and hardships to which income-tax assessments expose the middle class people, the total sum realised by Government was only Rs 19,31,213. I submit, Sir, that in view of the great increase of taxation in recent years and of the proposals for additional taxation which have been before the Council during the last few days, the Government are in a position to remit Rs. 19 lakhs and to bring relief to a large body of middle class people throughout the country. If the Government will be pleased to give up Rs. 19 lakhs they will afford relief which will be substantial to a large number of men, and the finances will not much suffer.

"It may be said that it is rather strange that when Government are resorting to fresh taxation in order to raise more revenue, I should come forward with a proposal to reduce or to give up a part of the existing revenue; but I submit, Sir, that the very fact that fresh taxation is being put on, and that a large sum is being raised thereby, affords justification for the view which I am submitting to the Council. The salt tax is a tax which everybody among the middle class will pay; the import duties will also add to the burden of the general middle class people. For these reasons, I hope that my proposal will commend itself to the Hon'ble Finance Member, whose sympathy with the general middle class people and the poor is very well-known, and I do hope that the Government will see their way to accept it."

The Hon'ble Sir William Meyer :—"I regard the proposal of the Hon'ble Pandit with a good deal of personal sympathy. In fact, if I may make a confidence to the Council, one of my day-dreams when I was first taking up the post I now hold was that I hoped to be able, before my term of office was over, to enlarge the sphere of exemptions from income-tax. But fate has willed it otherwise, and instead of the peace and prosperity that marked my predecessor's *regime* I have fallen into an era—a *Kali-yuga*—of war and troubles. As matters stand at present, I am afraid I cannot accept the amendment. It would involve a considerable amount of money—£140,000 according to the rough calculations I have made. But there is a more important principle involved. This tax has been borne for 30 years. I do not think it would be right, at a time when we are asking a number of people to bear enhanced taxation in one way and another, that we should start remitting a tax which has been so sanctified by custom. It would be really inconsistent. I must therefore oppose the amendment; but I can assure the Hon'ble Mover that if a time should come at which I shall be in the happy position of considering remissions of taxation instead of impositions of taxation, this will be one of the first things that I shall then consider."

[7TH MARCH, 1916.] [*Pandit Madan Mohan Malaviya; Mr. C. Vijiaraghavachariar.*]

The Hon'ble Pandit Madan Mohan Malaviya:—"I know that when my Hon'ble friend has decided a question, his decision must be final, and so I must bow to it, though I feel that, with his sympathy with the proposal, he could have easily spared 19 lakhs when he is raising an additional revenue of 3 millions. I do not wish to take up the time of the Council any more. I thank my Hon'ble friend for the assurance he has given, and trust that, in the not distant future, this proposal will be actually carried out. I do not press my motion."

The amendment was, by permission, withdrawn.

The Hon'ble Pandit Madan Mohan Malaviya:—"The other amendments were consequential, and they will not be moved, namely:—

'That in the table in Part II, column 2 of the Second Schedule—

(*a*) entry 1 shall be omitted, and

(*b*) for the figures "1,000" in entry 2 the figures "1,200" shall be substituted.

'That in the table in Part III, column 2 of the same Schedule—

(*a*) entry 1 shall be omitted, and

(*b*) for the figures "1,000" in entry 2 the figures "1,200" shall be substituted.

'That in clause (*a*), Part IV, column 2 of the same Schedule—

(*a*) the words and figures "not less than Rs. 1,000 but less than Rs. 1,250 the tax shall be Rs. 20" shall be omitted, and

(*b*) for the figures "1,250" were they occur for the second time the figures "1,200" shall be substituted.'"

The amendments were, by permission, withdrawn.

The Hon'ble Mr. C. Vijiaraghavachariar:—"Sir, I beg to move—

'That in clause (*a*), Part III, column 1, of the Second Schedule set out in clause 5 of the Bill, the words 'by draft on any place in British India' shall be omitted.'

"This amendment needs some explanation. A distinguished friend of mine asked me, as soon as I came here this morning, what I meant by this amendment. I owe it to the courtesy of the Hon'ble Finance Minister if I proceed to give that explanation. I sent out the amendment partly in ignorance and partly from suspicion; but in the light of the lessons which I have derived this morning, I don't believe that my amendment is altogether out of order.

"Hon'ble Members will remember that our Income-tax Act is constructed very much on the lines of the English Income-tax Acts, that is to say, incomes are doubly immune from income-tax, firstly, if any income comes within one of the ten exemptions mentioned in section 5, the proprietor of that income pays no income-tax. That I shall call positive immunity, but it does not follow from this that incomes which do not come into the list of exemptions necessarily pay income-tax. Section 4 creates liability to income-tax only those incomes which can be traced to the sources mentioned in Schedule II, so that a man may negatively escape income-tax if his income is not traced to the sources mentioned in Schedule II. As far as I understand the English Acts, they are also constructed on the same principle, and I believe that once upon a time a judicial decision was reached wherein it was held that the owner of a property which did not come under any one of the items mentioned in the English Schedules, A. B. C. D. and E., was not liable to pay income-tax notwithstanding that that property did not come within the list of exempted properties. My amendment relates to this aspect of the law. My suspicion is that certain proprietors of incomes, by reason of the words which I wish to delete, escape the payment of income-tax altogether. My amendment relates to the following clause—It is repeated in the present Bill—Part III, clause (*a*), *i.e.*, interest on, 'promissory notes, debentures, stock or other securities of the Government of

India (including securities of the Government of India whereon interest is payable out of British India *by draft on any place in British India*)'. I propose to omit the words 'by draft on any place in British India'. I could not understand why liability to income-tax was restricted to this particular form of payment. I strongly suspected, as I said when I sent in my notice of amendment, that under this qualification the holders of our Sterling loans escaped income-tax altogether. I need not remind the Hon'ble Council that the income-tax under our Act, as in England, is collected in two ways One is before the income reaches the owner, by the method of what is called catching it at the source as in the case of Government promissory notes, where when the interest is paid the income-tax is deducted and then the balance is sent to the proprietor Of course, if we are not liable to pay income-tax at all, we must apply afterwards for a rebate but in any case, whether the holder of a security is liable or not liable on account of the minimum income from all sources being below Rs. 1,000 a year, if he is not liable to pay income-tax, the tax is yet deducted from the interest on the security and later on he is entitled to apply and get a refund. But in all these cases the income-tax is taken at the source and not collected afterwards from the owner of the income by proof as to what he has obtained. Now, in this particular case there is this difference between the holders of rupee securities and the holders of sterling securities as a class. The holders of our Sterling securities, unlike the holders of the rupee securities, escape paying income-tax altogether. They are not caught at the source on account of the existing wording of the clause in question, and as they are beyond the jurisdiction of the Government of India, they altogether escape as the second method of assessing and collecting the tax is not available in their case. I therefore beg that these words should be omitted in order to bring that large class into the scope of our Income-tax Act."

The Hon'ble Sir William Meyer:—"I understand, and in a way sympathise, with the Hon'ble Member's desire to get more money for us, but I am afraid that his proposal is not feasible. In the first place, he says that holders of Sterling securities escape the income-tax They escape our income-tax because they are not liable to it, but they pay at the source in London to the British income-tax Now Sterling securities have been ruled by the Law Officers of the Crown (and that necessitated an amendment to the Trust Act the other day) to be technically not Indian securities, that is not securities of the Government of India; they are securities issued in London by the Secretary of State for India. So that they are not taxable as securities under the Act, but only in the event of the proceeds being remitted out here, in which case they are taxable under section 3 (5) as incomes or profits accruing or received in British India. But as my Hon'ble friend came and spoke to me on this matter yesterday, I put it to him that, even if we had the power—which we have not—of taxing these Sterling securities, it would be very inexpedient to do so The interest on our internal loan we can tax as we think fit, but we do not borrow in London for the mere pleasure of it We borrow because we need the money, and the money is found for us by people who have often no connection with India and no desire to come to India, but just put their money into Indian investments as they might into Japanese or Australian, as a little investment. These people already pay a heavy tax to the British Government on what they get from our Sterling securities or other sterling securities which they hold. If we saddle them with a local income-tax as well, the result will be that our loans will fail; either we shall not be able to borrow, or we shall have to raise our rates and lose much more than we gain by this relatively small amount which my Hon'ble friend would like to rope in. All countries recognise the difference (Japan especially) between an internal and external debt. On your external debt you have got to treat your creditors lightly, because otherwise they will prefer to lend to somebody else.

"I may finally observe that, apart from that, a question has been raised—and I think it will have to be considered in connection with the readjustment of the fiscal relations between the component parts of the Empire

[7TH MARCH, 1916.] [*Sir William Meyer ; Mr. C. Vijiaraghavachariar.*]

which His Majesty's Government has indicated—the question of the double income-tax, as to whether it is right and expedient that profits which people have made in (say) Australia or India or Canada, which are subject to income-tax by the Governments of those countries should be taxed again in London. We should certainly weaken our case, if we were—assuming even that we had the power to do so—to start the policy of double grab and say we are going to dip our hands into pockets which have already been mulcted by the British Exchequer. For these reasons, Sir, I am quite unable to accept my Hon'ble friend's amendment."

The Hon'ble Mr. C. Vijiaraghavachariar :—" Sir, I fear that it would be very bold and perhaps impertinent of me, just a pupil who received his lessons to-day and yesterday, if I attempt to traverse the arguments of the Hon'ble the able Finance Minister, but it does strike me that, if, as his pupil, I cannot venture to criticise him, I may yet ask him some questions. It is, I believe, open to a pupil to ask questions of his teacher. So I do desire to ask him some questions. If double income-tax is paid as regards certain incomes, both in England and in the Colonies, may I know why, till a final Imperial settlement is reached, double income-tax should not be paid, both as regards India and England ? And this is my question No. 1.

" But if there should be no double income-tax, why should not England be the loser ? The money lent is ours ; why should we lose the income-tax ? It is only by a strange fiction that these Sterling securities are called securities of the Secretary of State. This fiction rests on an old remnant of, I should say, superstition of the old John Company whose principal place of business was in London. What business has the Secretary of State to call himself the 'Government of India' ? The Government of India is here ; and the Secretary of State for India is our agent for this purpose. Instead of calling those securities securities of the Secretary of State, may we not more accurately call them securities of Government of India from whom the money comes ? And instead of enfacing interest as payable at Whitehall, why not enface them as payable in Delhi and add to the prestige of new Delhi ? That is my question No. 2.

" May I ask how long is this artificial distinction between rupee loan and Sterling loan to be kept up ? By the change of currency laws in India we have dethroned the rupee from its ancient position, and it is fast becoming a mere token coin. I cannot understand then why any distinction is still kept up any further between rupee loan and Sterling loan. Are the two classes of loans necessary ? Cannot all be Sterling loans now ? Is the artificial distinction between the two sets of loans and securities desirable ? That is my question No. 3.

" Now it is said, the Hon'ble Finance Minister has said so, that if we insist upon income-tax as regards holders of Sterling securties, our loans in future would fail. Would it be altogether a disadvantage ? If loans in the foreign markets are not available for us on fair terms, may we not then learn, more and more with the co-operation of the people of India, and not as now with the help of foreign investors, how to adjust our own domestic affairs and to get our loans in India itself on such terms as may be possible ? And would not this course be a great national advantage in every interest ? I simply ask this question. That is my question No. 4.

" I would also ask you to give me an answer to one more question and I shall sit down, and that question is this :—Is not the present policy holding out a premium to moneyed people to invest their money in Sterling loans instead of rupee loans ? If Sterling security holders are immune from the Indian income-tax, if investors in this country can easily obtain Sterling securities, directly or by transfers, would they think of rupee loans with the invidious liability to pay income-tax on the interest ? Is not this a very unsound fiscal policy ? And is it not holding out a premium in favour of Sterling loans and make savings in this country shy of investment in rupee securities ?

[*C. Vijiaraghavachariar; Sir William Meyer.*] [7TH MARCH, 1916.]

"These are the questions I would put and if the Hon'ble the Finance Minister will kindly answer them satisfactorily, I will certainly withdraw the amendment, otherwise I fear I must press it."

The Hon'ble Sir William Meyer:—"It is getting late and I should prefer the alternative of voting on the amendment at once to answering the questions."

The amendment was put and negatived.

The Hon'ble Sir William Meyer:—"I now move that the Bill, as amended by the Select Committee, be passed."

The motion was put and agreed to.

The Council adjourned to Thursday, the 9th March, 1916.

A. P. MUDDIMAN,
Secretary to the Government of India,
Legislative Department.

DELHI;
The 17th March, 1916.

APPENDIX A.

(Referred to in Answer to Question No. 5.)

Statement showing the number of officers recruited in India and England for the Imperial Archæological Department since the beginning of 1902.

Year.	Name of officers recruited.	Remarks.
1902	Mr. (now Sir John) Marshall . .	
„	Mr. E. B. S. Shepherd . . .	
1904	Mr. W. H. Nicholls	
1906	Dr. Sten Konow	
„	Mr. A. H. Longhurst	
„	Mr. D. B. Spooner	
„	M. R. Ry. Rai Bahadur Venkayya .	
1907	Mr. R. F. Tucker	
1908	M. R. Ry. Rao Sahib Krishna Sastri .	
1910	Pandit Daya Ram Sahni . . .	
„	Mr. Gordon Sanderson . . .	
1911	Dr. (now Sir Aureal) Stein . . .	Before this he was only a part-time officer.
„	Mr. J. F. Blakiston	
„	Babu R. D. Banerjee	
„	Mr. D. R. Bhandarkar . . .	He was holding a temporary appointment in the Archæological Department from 1904.
1912	Mr. H. Hargreaves	
„	Mr. C. Duroiselle	He holds a temporary post in the Archæological Department.
1913	Mr. J. A. Page	
„	Maulvi Zafar Hasan	
1915	Pandit V. A. Natesan Aiyar . . .	He holds a temporary post in the Archæological Department.

APPENDIX B.

(Referred to in Answer to Question No. 6.)

Statement showing the average annual charges of the last three years for the establishment of officers of the Imperial Agricultural Department including the establishment of the Agricultural Adviser to the Government of India.

—	Gazetted Indian Establishment.	Non-Gazetted Establishment.
	₹	₹
Agricultural Adviser to the Government of India .	2,673	42,277
Imperial Agricultural Chemist	6,127	7,622

Imperial Agriculturist	3,145	12,944
Imperial Cotton Specialist	...	3,357
Imperial Pathological Entomologist . . .	...	7,409

[9TH MARCH, 1916.] [*Sir C. Sankaran Nair; Mr. Surendra Nath Banerjee; Sir R. W. Gillan; Mr. Qumrul Huda; Sir Reginald Craddock.*]

The Hon'ble Sir C. Sankaran Nair replied:—

"(*a*) The attention of Government has been drawn to the statement in question.

(*b*) The proposals for legislation for the Patna University are still under consideration. As regards the Dacca University, it is intended to introduce the legislation in the Imperial Council, and the Local Government has concurred in this procedure."

The Hon'ble Mr. Surendra Nath Banerjee asked:—

Measures taken to promote the comfort and convenience of Intermediate and Third Class Railway Passengers.

4. "(1) Will the Government be pleased to make a statement showing the measures that have been taken from 1905 to 1915 to promote the comfort and convenience of Intermediate and Third Class Railway passengers?

(2) Will the Government be pleased to state what further measures they propose to take in the same direction in the immediate future?"

The Hon'ble Sir R. W. Gillan replied:—

"A statement* is laid on the table showing the measures which have been adopted by the Railway Board, from the constitution of a Board in March 1905 up to the present time, for securing the greater comfort or convenience of 3rd class passengers, and of passengers generally where passengers of the 3rd and Intermediate classes are mainly affected, and showing also the action immediately proposed with the same object. No steps have been taken especially for the benefit of Intermediate class passengers."

The Hon'ble Mr. Qumrul Huda asked:—

Censorship of Newspapers.

5. "(1) Have any Indian newspapers been placed under Government censorship since the Defence of India Act, 1915, was passed? If so, will the Government be pleased to lay on the table a list of such newspapers giving the places of their publication?

(2) Are any instructions issued to the persons conducting such newspapers regarding matters which it is desired that they should not publish?

(3) Is it a fact that the printers and publishers of such newspapers are directed not to allow anything to appear in them unless it has been previously submitted to a censor, and its publication has been approved by him?

(4) If the answer to (3) is in the affirmative, will the Government be pleased to state under what circumstances and on what grounds such action is deemed necessary?

(5) Will the Government be pleased to state the names of newspapers, if any, which were once censored, but in regard to which the order placing them under censorship has been withdrawn?"

The Hon'ble Sir Reginald Craddock replied:—

"So far as the Government of India are aware, orders under the Defence of India Act have been passed against two papers—the *Hamdard* and *Zamindar*—requiring them, prior to publication, to submit matter of certain kinds for the scrutiny of a Government officer. This action was necessitated by the manner in which these papers were being conducted. So far as is known, the orders have not been withdrawn."

The Hon'ble Mr. Qumrul Huda asked:—

Qualifications of, and instructions to, Censors.

6. "(1) Is a Government censor required to possess any general and journalistic qualifications for the satisfactory and fair discharge of his duties? If so, what are these qualifications?

* *Vide* Appendix B.

[*Mr. Qumrul Huda; His Excellency the Commander-in-Chief; Khan Bahadur Mir Asad Ali Khan; Sir Reginald Craddock; Maharaja Ranajit Sinha of Nashipur; Sir C. Sankaran Nair.*] [9TH MARCH, 1916.]

(2) Are any instructions given to a censor to guide him in the discharge of his duties? If so, will Government be pleased to lay on the table a copy of such instructions?"

His Excellency the Commander-in-Chief replied:—

"(1) No definite qualifications are laid down for the members of the Deputy Chief Censor's staff. They are however carefully selected with regard to their suitability.

(2) The instructions issued for their guidance are, for obvious reasons, confidential, and the Government of India do not propose to lay them on the table."

The Hon'ble Khan Bahadur Mir Asad Ali Khan asked:—

Compilation showing classification of holders of all appointments on Rs. 200 and over.

7. "(*a*) Was a compilation showing the classification of holders of all appointments carrying a monthly salary of Rs. 200 and over prepared at the instance of the Public Service Commission?

(*b*) If so, has the compilation been published for the use of the general public?

(*c*) If the compilation has not been published, do Government propose to publish it at an early date?"

The Hon'ble Sir Reginald Craddock replied:—

"Such a compilation was made for the use of the Public Services Commission. It has not been published, and the question of its publication can best be considered when the report of the Royal Commission becomes available."

The Hon'ble Maharaja Ranajit Sinha of Nashipur asked:—

Financial powers of Provincial Sanitary Boards.

8. "Will the Government be pleased to state if any Provincial Sanitary Board has been entrusted with financial authority and responsibility?"

The Hon'ble Sir C. Sankaran Nair replied:—

"So far as the information at the disposal of the Government of India shows, Sanitary Boards in certain provinces have been entrusted with financial authority and responsibility. For example, in Bombay, the United Provinces and Punjab certain sums are placed by the Local Government every year at the disposal of Sanitary Boards for distribution."

The Hon'ble Maharaja Ranajit Sinha of Nashipur asked:—

Sanitary Boards.

9. "Will the Government be pleased to state in which provinces non-officials have been included as members on Sanitary Boards?"

The Hon'ble Sir C. Sankaran Nair replied:—

"So far as the information at the disposal of the Government of India shows the provincial Sanitary Boards in Bombay, Bengal, the United Provinces and Punjab contain one or more non-official members. In Burma, where there are divisional Sanitary Boards, a non-official may be added at the discretion of the Commissioner."

[9TH MARCH, 1916.] [*Sir Fazulbhoy Currimbhoy; Mr. C. E. Low; Mr. Madhu Sudan Das; Sir William Meyer.*]

The Hon'ble Sir Fazulbhoy Currimbhoy asked :—

Organisation of the economic strength of the Empire.

10. "(*a*) Has any communication been received by the Government of India from the Secretary of State for India regarding a Resolution of the House of Commons relative to the organisation of the economic strength of the Empire with a view to secure economic superiority over enemy countries ?

(*b*) Has the attention of Government been drawn to a report to the effect that Mr. Bonar Law recently stated in the House of Commons, in reply to a question by Mr. Hewins, that the Overseas Dominions had been approached by the Imperial Government on the subject of the Resolution referred to in (*a*) ?

(*c*) If so, do the Government of India propose to make efforts to co-operate with the Imperial Government and the Dominion Governments for the attainment of the objects in view ?"

The Hon'ble Mr. C. E. Low replied :—

"The answer to part (*a*) of the question is in the negative.

The answer to part (*b*) of the question is in the affirmative.

With regard to the third part of the question, the Government of India have throughout the war been in the closest co-operation with the Imperial Government in respect of rendering available the economic and industrial resources of India for the purposes of the war. The manufacture of munitions and the export of such important articles as manganese, saltpetre, sandbags and wheat, as well as numerous others of less importance have, whether at the request of the Imperial Government or on the initiative in many cases of the Government of India, been organized, controlled and directed, with the view of giving the utmost possible assistance to Great Britain and the Allies. The Imperial Government, therefore, are well aware both of the nature and extent of the resources of India, and of her willingness to co-operate in any way in which they may desire"

The Hon'ble Mr. Madhu Sudan Das asked :—

Money advanced from the Paper Currency Reserve to Presidency Banks in India.

11. "(*a*) What sum of money (if any) was lent to the several Presidency Banks in India from the Paper Currency Reserve during the last calendar year (1915) ?

(*b*) Did the Presidency Banks re-advance to other Banks the amount thus lent to them ? If so, will the Government be pleased to state the terms of such re-advance as regards the rate of interest and the purpose for which this money was to be used ?

(*c*) Were any firms or individuals financed out of this money with a view to help industries ? If so, will Government be pleased to state the names of such firms or individuals ?"

The Hon'ble Sir William Meyer replied :—

"No money was lent to the Presidency Banks from the Paper Currency Reserve in 1915."

FINANCIAL STATEMENT.

FIRST STAGE.

The Hon'ble Sir William Meyer :—"I beg, Sir, to open the first stage of the discussion on the Financial Statement for 1916-17."

[*Sir Ibrahim Rahimtoola.*] [9TH MARCH, 1916.]

RESOLUTION *RE* REDUCTION OF SALT ESTIMATE.

The Hon'ble Sir Ibrahim Rahimtoola:—"Sir, I beg to move—

'That the estimate of Revenue from salt be reduced by £600,000 (six hundred thousand pounds) and be passed at £3,400,000, so that the rate of taxation may be retained at the rate of one rupee per maund as during the current year.'

"Sir, in view of the several discussions which have already taken place in the Council, it is not my intention to speak at any great length on this subject. On the present occasion I am, personally, safe from any criticism because the object of my Resolution is that the poor may be relieved of this additional burden. I want to make it perfectly clear that I have never been opposed to the imposition of fresh taxation to meet the requirements of the Government of India. I have clearly disclaimed any intention of opposing increased taxation from any one of the three sources proposed by Government, if the money was needed for the purposes of administration to cover in full the estimated expenditure prepared by Government themselves. My objection has throughout been that at a time like this when, in consequence of the war and the effects thereof, the people of India have suffered as have all the other component parts of the British Empire, that fresh taxation should be imposed for the purpose of obtaining a surplus.

"Sir, the financial position has now become clear. In consequence of the passing of the Indian Tariff (Amendment) Bill and the Income-tax Bill, the result of the next year's Budget so far has been clearly established as follows: The total deficit estimated in the Financial Statement of £2,000,000 has been more than covered because the estimated additional revenue will now yield £3,000,000—£2,100,000 from the Tariff Act and £900,000 from the Income-tax Act. This additional revenue of £3,000,000 places the position of the Budget as follows: the full estimated expenditure is now financed and there is a surplus of £400,000.

"On the present occasion, therefore, my object in moving this Resolution is to appeal to the Government to consider whether, having regard to the fact that they have already obtained a surplus of £400,000, they should obtain a further £600,000, estimated to be obtained from the salt tax, and swell the surplus from £400,000 to a million pounds.

"Sir, I clearly recognise that the salt tax is regarded by Government—and rightly too—as a reserve. For the purposes of administering a vast country like India, it is necessary that certain sources of revenue, certain sources of taxation, should provide a reserve to be called up in case of emergency; and I recognise that the salt tax lends itself to that kind of reserve. At the same time, there is this thing to be borne in mind, that that reserve should only be tapped when it is absolutely necessary—especially so because the incidence of this tax largely falls upon the poor. If, as I said, a case is made out for additional taxation, I am quite prepared to accept the position which the Government of India have taken up, namely, to take all the revenue they can get from the increase in the tariffs, the second source to be tapped being the income-tax, and the last source being the salt tax. Now, Sir, the first two sources have been tapped, and they give not only the entire revenue that is required for the purpose, but they provide a surplus of £400,000. Under these conditions, Sir, I would appeal to the Government of India to consider whether, in view of these facts, they should persist in carrying out their intention of obtaining an additional revenue of £600,000 from salt or, at all events on this occasion, leave salt alone, reserving it for next year if circumstances then necessitate increased taxation.

"Sir, there is an additional reason why I make this appeal. As a consequence of small increases and decreases in the salt tax considerable dislocation is caused in retail prices, and there is a strong body of opinion to show that the actual rates charged to the poor are in many cases in considerable excess of the actual additional revenue obtained by Government. Sir, taking that into consideration, would it not be better not to have this increase of four

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

PROCEEDINGS OF THE INDIAN LEGISLATIVE COUNCIL ASSEMBLED UNDER THE PROVISIONS OF THE GOVERNMENT OF INDIA ACT, 1915 (5 & 6 Geo. V, Ch. 61).

The Council met at the Council Chamber, Imperial Secretariat, Delhi, on Thursday, the 9th March, 1916.

PRESENT:

The Hon'ble Sir WILLIAM CLARK, K.C.S.I., C.M.G., Vice-President, *presiding*, and 57 Members, of whom 50 were Additional Members.

QUESTIONS AND ANSWERS.

The Hon'ble Mr. Surendra Nath Banerjee asked:—

Progress of Local Self-Government.

1. "(*a*) Will the Government be pleased to indicate the progress of Local Self-Government in India by giving for each year province by province for the last five years the number of elected members for each Municipality, District Board and Local and other Boards under the Local Self-Government Acts?

(*b*) Do the Government propose to direct that such statements should be published in future year by year?"

The Hon'ble Sir C. Sankaran Nair replied:—

(1) "The figures asked for by the Hon'ble Member are given by provinces for Municipalities and District Boards, respectively, in the statement* which I put on the table. Further details will be found in the statement appended to the various Provincial Reports.

(2) The figures are already published annually in the Provincial Reports."

* *Vide* Appendix A.

[*Mr. Surendra Nath Banerjee; Mr. C. H. A. Hill.*] [9TH MARCH, 1916.]

The Hon'ble Mr. Surendra Nath Banerjee asked:—

Prohibition of the export of wood pulp by the Swedish Government

2. "(*a*) Has the attention of the Government been drawn to the action of the Swedish Government in prohibiting the export of wood pulps for the manufacture of printing paper?

(*b*) Is it a fact that paper made from wood pulps is at present largely imported into India for printing purposes?

(*c*) Is it a fact that paper-making materials are to be had in abundance in many parts of India and Burma. Will the Government direct an inquiry into this matter, and state what action, if any, it proposes to take in this connection with a view to foster the growth of the indigenous paper industry?"

The Hon'ble Mr. C. H. A. Hill replied:—

"(*a*) The Government of India have no information on the subject other than that which has appeared in the Press.

(*b*) The Government of India believe this to be the case, but have no definite information as to the extent to which the paper imported into India is manufactured from wood pulp.

(*c*) The answer to the first part of the question is in the affirmative. The possibility of fostering the paper pulp industry in India has formed the subject of detailed inquiry, both by the Government of India and by Local Governments for some years past; an expert in the manufacture of paper pulp having been employed by the Government of India for this purpose. The results of these inquiries have been published, from time to time, by the Forest Research Institute. Concessions for the manufacture of pulp from wood, bamboos and savannah grasses have been given in several provinces, while the Government of India have reason to believe that in one province the Local Government has under consideration a project for the erection of a small pulp factory in order to test thoroughly the commercial possibilities of savannah grasses for the manufacture of paper pulp. In these circumstances, the Government of India do not consider it necessary to direct any further special inquiry into the matter, more particularly as they understand that, under present conditions, little progress can be expected owing to the difficulty of procuring the necessary machinery and chemicals."

The Hon'ble Mr. Surendra Nath Banerjee:—

"May I ask the Hon'ble Member, as a supplementary question, to state, if he thinks fit, the name of the Government which is making these arrangements?

The Hon'ble Mr. C. H. A. Hill:—

"There is more than one Local Government at present making inquiry into the matter."

The Hon'ble Mr. Surendra Nath Banerjee:—

Is the Bengal Government one of them?"

The Hon'ble Mr. C. H. A. Hill:—

"No, I think not, so far as my recollection goes at the moment."

The Hon'ble Mr. Surendra Nath Banerjee asked:—

Dacca and Patna University Bills.

3. "(*a*) Has the attention of the Government been drawn to the statement which has appeared in the newspapers to the effect that it is improbable that the Dacca University Bill will be taken up in the Imperial Legislative Council before next autumn at the earliest, and that the Patna University Bill will also be delayed?

(*b*) Do the Government propose to instruct the Local Governments to introduce these Bills into the local Legislative Councils and dispose of them in those Councils?"

[9TH MARCH, 1916.] [*Sir Ibrahim Rahimtoola; Mr. Surendra Nath Banerjee; The Vice-President.*]

annas in the maund now till a strong justification is made out for additional revenue for administrative purposes, and then to regulate this tax in a manner so that it may be maintained at that rate for a considerable number of years. The constant changing of this tax leads to dislocation in retail prices, and it is to my mind eminently desirable that that should be avoided as far as possible.

"Sir, it is not my intention on the present occasion when we are dealing with the surplus in the Budget—whether that surplus be £1,000,000 or only £400,000—to go over the ground of moral or immoral budgetting, of finding a definition of taxpayer, or whether 3 or 4 per cent of the working balance can be easily dispensed with, or, again, whether the railway revenue is profits out of trade or indirect taxation, as I have repeatedly contended in this Council. These are points which may well be left alone on the present occasion. At a time like this it is desirable to avoid controversies and contentions as far as possible, and I do not therefore propose to go into those questions and occupy the time of the Council by any discussion about them. My only object on the present occasion is to appeal to the Hon'ble the Finance Member and the Government of India—knowing full well how keenly sympathetic the Finance Member is towards the interests of the poor—I appeal to him once again on behalf of those poor whether he should not be content on the present occasion with the surplus of £400,000 that he is going to get from other sources. As I said before, I am not satisfied that any justification exists for levying additional taxation in order to obtain an additional surplus. Well, Sir, a part of that surplus has already been obtained, and I now appeal to the Government to consider whether they will insist upon getting their full surplus of a million pounds, or, in the interests of the poor, be content with a surplus of only £400,000. Sir, with that appeal, I will conclude my observations."

The Hon'ble Mr. Surendra Nath Banerjee.—"Sir, I have a Resolution, the first part of which is identical with the Resolution moved by my Hon'ble friend, Sir Ibrahim Rahimtoola. Sir, my submission is, that it would simplify matters if you would permit me either to move that Resolution or speak in support of this, and if I do speak in support of my friend's Resolution, you will, I hope, relax somewhat the time-limit, which is 15 minutes."

The Hon'ble the Vice-President.—"I think the latter course would be the most convenient for the Council and would save time; but I trust the Hon'ble Member will not abuse the relaxation of the rule which is permitted to him."

The Hon'ble Mr. Surendra Nath Banerjee:—"Sir, I am sure the Resolution which has been moved by my Hon'ble friend and the Resolution which stands against my name must strongly appeal to the sympathies of my Hon'ble friend the Finance Minister, for his Budget, despite exceptions here and there—and the most notable of these exceptions is the enhanced duty on salt—is the poor man's Budget, instinct with living sympathy for the poor man and his lot. Could I be persuaded that fresh taxation was necessary, I would give my wholehearted support to his proposals of taxation, save and except perhaps an item here and an item there and the proposed enhancement of the salt duty. But, Sir, my submission is that no case has been made out for fresh taxation, and if it was necessary to impose taxes for the purposes of raising money, it should be confined to the raising of the amount of the actual deficit. In that case the £600,000 which it is intended to obtain by the enhancement of the salt duty would automatically disappear. My position, therefore, is this—that taxation is unnecessary. And, Sir, I desire to consider for a moment the surpluses and the deficits for a period of 20 years extending from 1894 to 1914.

"During these 20 years we had 17 years of surpluses and 3 years of deficits. The surpluses came up to £40·9 million; the deficits of the three years came up to £8·4 million; and deducting the deficits from the surpluses we have

for a period of 20 years the huge surplus of £32·5 million. Nor is this all. This surplus does not include £1 million of the Famine Insurance Fund which is charged off the accounts. When famine occurs expenditure is incurred and is shown in the accounts. However that may be, there is the outstanding fact that in the course of 20 years extending from 1894 to 1914 the Government of India were able by their taxation to accumulate a surplus of £32½ million which they have rightly, as I think, applied to the reduction of the debt. And how does the debt stand to-day, or rather on the 31st March 1915? The permanent debt of the country is £1·5 million. The statement might seem to be surprising; it may even be viewed with an air of incredulity, but I am prepared to prove it. The total debt of the country on the 31st March, 1915, amounted to the sum of £276 million; the exact figure is £276·5 million. The debt contracted for the purposes of railway construction amounts to 233·2 million £. Debt for the purposes of irrigation amounts to £41·1 million. ·9 million £ represents Delhi construction. Therefore deducting these amounts from the total debt, we have the national debt reduced to the figure which I have just mentioned, *viz.*, £1 3 million. Sir, I am entitled to hold that these debts for railway and irrigation are in the nature of an investment, and they must not be regarded as part and parcel of the permanent national debt. In 1912-13 and in 1913-14, irrigation and railways gave us a clear income of £5·9 million after paying all working charges and interest. In 1914-15, despite the war, they gave us a profit of £3·1 million. I do not indeed overlook the fact that we have temporary debts, unfunded debts, such as Provident and Saving Banks deposits; but against these we have to bear in mind the advances which the Government of India have made to the Presidency Corporations, to Municipalities and District Boards, to Native States and to private landholders. Therefore, Sir, here we have this fact that our national debt at the present moment, barring the investments to which I have referred, stands at the ridiculously small figure of £1·3 million; and my submission is that, having regard to the abnormal situation in which we find ourselves at the present moment, the proper way to meet that situation would be by contracting a loan. My Hon'ble friend will probably say that you cannot get money at the present moment in the present condition of the market without a high rate of interest. Perfectly true. We may contract a temporary loan, renew it from time to time and merge it in a permanent loan in an improved market. And, Sir, there is another fact which has to be borne in mind, and which is very pertinent to the considerations I am now placing before this Council, namely, that the Government of India have always been exceedingly cautious in the framing of these estimates. A perusal of the Financial Statement will show that the actual surpluses have generally, if not always, exceeded the estimates, and the estimates of expenditure have generally, if not always, fallen short of the actuals. And the result has been that the huge surpluses of the Government of India have been kept down by doles to the Provincial Governments. My Hon'ble friend the Finance Minister, as a member of the Decentralisation Commission, remarked that these doles were wasteful and demoralising, but the Government of India have been indulging in the luxury of granting these doles, and at the same time having large accumulations of surpluses for themselves. I will give figures to show that we have been overtaxed in the past, and that we should not commit the same mistake again. Immediately after the taxation imposed by Sir Guy Fleetwood Wilson, I think in 1910, we find in 1911-12, £2 million given as doles to Provincial Governments, and in 1912-13, £3·7 million was given to the Provincial Governments. At the same time in 1911-12, the Imperial surplus was £3·9 million and in 1912, the Imperial surplus was £3·1 million; and the Provincial balances stood at the enormous figure of £7 million, the prescribed minimum being only £1 million. Therefore, it seems to me that we ought to avoid taxation by contracting a loan; and of course if that were done, the enhanced salt tax would disappear.

"Sir, the Hon'ble the Finance Minister has made a statement in the course of which he gives the reasons for the imposition of the new taxes. It occurs

at page 10 of the Financial Statement (paragraph 32). The statement is written with that brevity, conciseness and force which distinguish the utterances of Sir William Meyer. After having stated the difficulties experienced by the Secretary of State in raising loans in the English market, the Financial Statement says—

'We have also to recollect that the termination of the war, when it comes, will leave us with heavy financial demands upon us. We shall still, in all probability, have a large amount of temporary debt to pay off, and must also prepare for the liquidation of the rupee loan raised this year, which has to be repaid by 1923. We shall likewise have to surrender nearly £2 million which we shall have received in connection with the liquidation of hostile firms and the employment of captured enemy vessels. On the revenue side again, we must recognise that the experiences and lessons of the war must also add in some directions to our permanent military charges; and, lastly, it is desirable that we should be in a position when peace returns, or as soon after as may be, to provide further funds for such beneficent purposes as the improvement of education and sanitation.'

"Sir, let us consider in seriatim the various points which have been urged by the Finance Minister. There is the debt contracted this year which has to be paid off in 1923. Sir, I venture to submit that 7 or 8 years are a long time to look forward to in the financial history of India. 'Sufficient unto the day is the evil thereof' is a maxim which administrators and even financiers may take note of. It is risky to take long views of things. The imagination comes into play, it distorts our vision and magnifies our difficulties. We have to pay off this debt in 1923, but we may raise a loan, it may be at an unfavourable market; but the market will not always remain unfavourable; the market will change, improve for the better. Renew the loan in a favourable market, merge it into the permanent loan, and in that way discharge the debt. And in the same way that £2 millions which have to be paid to the enemy may be dealt with. Then we are told that there are these great problems of sanitation and education which have to be faced and grappled with. I have the greatest sympathy with all the beneficent efforts which the Government may make in that direction; but these are more or less Provincial charges. Undoubtedly the Government of India supplies the money; but in any case the Provincial balances have reached the huge figure of £7 millions.

"Sir, my difficulty has been, and I speak as a Member of a Provincial Council, that we cannot get the Provincial Governments to disburse them. They are not always able to get ready their schemes for the purpose of spending the money, and the sanction of the Government of India has to be obtained. Therefore what I say is this, the market is bound to improve, our resources are elastic, and will grow and expand. Having regard to these facts and that the permanent debt is only 1·3 million pounds, we invite the Government to give up 90 lakhs by the surrender of this salt revenue. I venture to think that, as a question of ways and means, this may be found by reducing the closing balances of 1916-17; the closing balances of 1916-17 is estimated at 24·2 million pounds, the closing balance of 1915-16 according to the revised estimate is 23·8 million pounds."

The Hon'ble Sir William Meyer:—"Where does the Hon'ble Member get these figures, I do not recognise them?"

The Hon'ble Mr. Surendra Nath Benerjee:—"I think they are correct; I have not got the books here, but I think they may be found to be correct. The surrender would reduce the closing figure to very much what it was last year. There is another point which I desire to submit for the consideration of the Hon'ble the Finance Minister, it is this; even before the increased tax was levied, the price of salt had been doubled, and that was due to the shortage of imported salt from Liverpool and the cessation of trade with the enemy countries. The effect of an enhanced tax would be to make the price more than double what it was. I would suggest that the Government should take palliative measures, measures which would afford facilities, for the manufacture of salt in this country. We had in Bengal large manufactories, in Orissa and in Midnapore

they have been given up; revive this industry which will put money into the pockets of the poor and into the coffers of the Government I desire to associate myself with my Hon'ble friend's appeal that Government should reconsider the matter, and if it is impossible to give up the whole of the tax, at least to surrender one-half of it. This will be a *via media*, a reasonable compromise, if the Government should surrender 45 lakhs of rupees that would not make any material difference in the financial situation. With these words I support the motion."

The Hon'ble Pandit Madan Mohan Malaviya:—"Sir, it would seem almost profitless to discuss this Resolution after we heard the remarks of the Hon'ble the Finance Member the other day on the amendment of the Hon'ble Mr. Dadabhoy. But the fact that, in spite of that discussion, two of my Hon'ble friends have thought it right to appeal strongly to Government to reconsider the situation, is evidence of the strong feeling that is entertained on the subject. I will not take up the time of the Council by repeating the arguments that have been used by my predecessors. I will invite the Government to look at the matter from another point of view. This year controversial questions are, by a wise ruling of His Excellency the President, to be avoided in this Council. The Budget proposals for additional taxation to the tune of £3,000,000 have been received by this Council, save with the exception now before us, with unanimity. Not only here but outside also, as is evidenced from the comments of the Press, the proposals put forward by the Hon'ble the Finance Member, excepting the one relating to salt, have met with general approval Might I ask the Government, might I ask the Hon'ble the Finance Member, to look at the question from this point of view; at this time of pressure when other controversial subjects have been put aside, when even legislation pending before the war which was regarded as of a controversial nature has been put aside for the time, in order that controversies may not be heard in this Council, may I ask my Hon'ble friend to consider whether, in view of what has been said, and in deference to the opinions expressed in this Council and outside, he will not reconsider the matter and be content with a surplus of £400,000, which the taxation imposed has already secured to the Government. My Hon'ble friend is aware, and the Council is aware, that numerous comments have been made against the increase of the salt tax; that complaints that the salt tax should be enhanced are general. There may be here and there some man who might express his acquiescence in the proposal that that tax should be raised. There may be some blessed with plenty, who are not able to appreciate the fact that an increase of 4 annas in the salt duty will really press upon the poor. But when we take into account all that the poor have to pay and the general rise in prices, the proposed addition will not appear to be inconsiderable. I submit that, in view of the fact that the general public, including the poor, have through the additional import duties come in to pay their increased share of taxation, Government may be pleased to do without the enhanced duty on salt.

"There is another aspect of the matter to which I will invite the attention of the Government of India and of the Hon'ble the Finance Member. In this Council it has been our complaint, and I am sorry to say that that complaint has been well founded, that never once are we able to bring about by our most unanimous, by our most earnest, by our most pathetic appeals, an alteration in the Budget proposals when they have been decided upon by the Government. We feel grateful that the Government invite us to take a part in discussing the financial affairs of the country.

"We have been contributing in our own way of time and of service to such discussion. But it seems hard, it seems unjust that non-official members who are called upon to vote on the Government proposals, and are expected to support them, should not be given the smallest opportunity of having a say in determining what taxation shall be imposed and what shall not be. I mean no disrespect to the Government and none to the Hon'ble the Finance Member,

[9TH MARCH, 1916.] [*Pandit Madan Mohan Malaviya; Sir William Meyer.*]

whose courtesy we acknowledge with pleasure; but the fact is that, when Budget proposals are considered, not one member of the non-official body is taken into confidence and asked to make suggestions or asked to express an opinion as to the propriety or otherwise of the various proposals which may be under the consideration of the Government. That places us, the non-official members, in a disadvantageous position. The unsatisfactory character of the existing arrangements is accentuated when it happens to be the case, as it is now, that we are able and willing to render our loyal, enthusiastic and firm support to the major part of the proposals contained in the Budget, but we feel strongly at the same time that some other proposals are open to grave objection. We feel that if we had an opportunity of discussing the matter with the Hon'ble Sir William Meyer before the proposals were announced possibly, probably, we might have been able to persuade him not to enhance the duty on salt, and to be content with the surplus of £400,000 which the taxation already agreed to would bring to him.

"But finding ourselves in the position we are, I invite the Hon'ble the Finance Member, and I invite the Government of India, to initiate a new departure in this year of war, which also happens to be the last session of His Excellency the Viceroy's administration. Let there be this new departure initiated that, after proposals for taxation have been made public, after even a Notification has been issued, enhancing the duty on salt, the Government of India, in gracious deference to the public opinion expressed in this Council and outside it, withdraw that Notification and be content with the additional taxation that has been imposed. The adoption of such a course will not lead the Government into a false position, for there is no proposal at this moment before the Government to alter or amend the Indian Salt Act, and under the provisions of that Act, His Excellency the Governor General can, at any time, by a mere Notification, increase the duty on salt not only by four annas, but up to the extent of Rs. 3 per maund. That is a power which few Governments possess, and that is a power the existence of which affords very strong support to the appeal which I make. It is not likely that the Budget, which has been carefully prepared under the direction of the Hon'ble the Finance Member and the Hon'ble the Finance Secretary—it is not at all likely, I say it is very improbable, that the Budget will be found to be overestimated so far as revenue is concerned. I agree with my friends who have spoken before me that the chances are that the Budget will be found to be, as many previous Budgets of India have been found to be in the last many years, over cautiously prepared, and that at the end of twelve months, we shall find that a much larger revenue has been derived from the various sources than has been estimated in the Budget. That being so, there is no reason to apprehend any embarrassment, I will not say disaster, for that is utterly out of the question, there is no reason to apprehend any financial embarrassment to the Government of India if the Government will be pleased, as I earnestly hope it will be graciously pleased, to accede to the prayer which has been made in the interests of the poorest of the poor."

The Hon'ble Sir William Meyer :—"Sir, I wish to acknowledge the very moderate and friendly spirit in which the Hon'ble Sir Ibrahim Rahimtoola has brought forward his Resolution. At the same time, I still think that to bring it forward at all was unnecessary, seeing that we had the matter out fully at the last sitting. It was perfectly legitimate for Sir Ibrahim to table his Resolution when he did, but in the meantime the wind had been taken out of his sails, so to speak, by my friend Mr. Dadabhoy who had brought up the question of the salt tax in the discussions we had at our last sitting on the Tariff Bill. Therefore, I say, it seems to me to be taking up the time of the Council to little purpose to revive a discussion which was carried out fully and seriously the day before yesterday.

"My Hon'ble friend's main argument is, that it is undesirable that we should have an estimated surplus of one million pounds in 1916-17. The

enhancement of the salt tax is estimated to give us £600,000, and he argues that we can do quite well with £400,000. If I may say so, he has advanced in financial virtue, for at the last sitting he wanted to have no surplus at all, or even a deficit of £500,000. I hail this moral progress; and I hope that in the course of time the logic of facts will convince my Hon'ble friend that in the present state of things a surplus of one million pounds is not too much. I quite admit that, if in a time of peace we had, by reason of unfavourable financial circumstances, to increase taxation, we ought not to increase the taxation more than would be necessary to meet our expenditure estimates and leave a small margin. But, as I reminded the Council at the last sitting, the times are very different now. We are living in a period in which our revenue estimates may be badly dislocated, in which expenditure may go up to an extent which we cannot foresee at present. As I said on the last occasion, this year it was necessary that we should meet an unexpected increase in our military expenditure, and we were only saved from having a much bigger deficit than we anticipated by the quite unforeseen way in which the railway receipts came in. We cannot gamble on a recurrence of those favourable circumstances at a time like this, which has very peculiar anxieties, and which may produce unforeseen events. I should think that I was failing in my duty to Government and to the people if I were content to work on narrow margins. It must be remembered, too, that if our surplus should be less than we expect; if, indeed, as may quite possibly happen, the estimated surplus should disappear altogether, we cannot reasonably have recourse to the London market. We do not want to embarrass His Majesty's Government in obtaining all the money they can for the war by making demands in the home market for India.

"Then, my Hon'ble friend, observed, and two other speakers I think argued, that the small addition of four annas a maund to the salt tax was undesirable as leading to a dislocation of retail prices. My Hon'ble friend, I think being a man of wide ideas, if he did increase the salt tax at all, would like to raise it a good deal more than four annas. Well, I am content with small things. I think myself that a four-anna increase, while it brings an appreciable revenue to Government, a revenue which we cannot safely forego in these times, will not hit the poor very much: to a certain extent no doubt, but not to the full extent that the small increase of duty might in itself warrant. I think, it is not unlikely, that a part of the extra tax will be paid by the trade, the wholesale dealers, and to a certain extent, possibly, the retailers too.

"I have had naturally—the Finance Minster in every country does, I suppose—a variety of communications in regard to this Budget, and I was very pleased to find that two very eminent Indian economists hold the same view as I do, and think that this taxation will not inflict any material hardship on the poor.

"The Hon'ble Mr. Banerjee, having, unfortunately for us, been absent from the last sitting, proceeded to retail a number of statistics which Sir Ibrahim Rahimtoola had already made play with the day before yesterday. I will not go into these matters again. My friend, I believe, is a careful student of the works of Dickens, and when he was speaking, I recalled to myself the immortal Mr. Micawber. My friend professed to object only to the salt tax, but it was clear as he warmed to his subject that he objected to any taxation at all, so long as he could borrow. 'Let us borrow', he says; 'it is true that some day or other the loan may come in and the creditor may demand payment, well let us then borrow again at a higher rate of interest'. That is Micawber finance, but it is hardly suitable, I think, for the serious—"

The Hon'ble Mr. Surendra Nath Banerjee:—"I said, Sir, our credit would improve and we should be borrowing at a lower rate of interest in an improved market."

[9TH MARCH, 1916.] [*Sir William Meyer.*]

The Hon'ble Sir William Meyer:—"Mr. Micawber always thought that 'something was going to turn up,' and so does my friend. I do not share his views. As I said at the last sitting, the Budget is already, perforce, a gamble on rain and a gamble on railways, but I am not going to make it a gamble on something going to turn up.

"My Hon'ble friend also made a very interesting statement as to the Provincial balances. He says the Provincial balances are inordinately swollen. I rubbed my eyes because I find that he has got two Resolutions down on the present day's agenda inviting extra grants from the depleted Imperial treasury to his own province of Bengal I take it that these Resolutions were tabled in a fit of absence of mind, and that my Hon'ble friend, having now studied the state of the Provincial balances, will promptly withdraw them.

"I took him up while he was speaking in regard to our closing balances. I think he took the figures from an abstract statement, which includes moneys which belonged to the Gold Standard Reserve and other funds. The actual closing balances which the Government of India have ordinary control over and the character of which I explained at the last sitting will be, as far as I can now estimate, £17,700,000 in India and England together on the 31st of March and £17,400,000 at the end of 1916-17.

"The Hon'ble Pandit has asked us to avoid controversy and to yield to the 'unanimous wish' of the non-official members of Council. Well, I cannot find that there is any such unanimous wish, because at the last sitting two of the non-official members of Council, my friend Mr. Das and my friend Mr. Shafi said that they approved of the salt tax in present circumstances. I rather think, too, that the Hon'ble Sir Fazulbhoy Currimbhoy said the same. Therefore, there was no unanimity among the non-official members of Council. Then, he says, drop the salt tax in order to avoid controversy. Well I am afraid we cannot import that axiom of avoiding controversy into financial affairs, because it would be so easy for anybody to say that he objected to a tax and that it would lead to acute controversy to proceed with it, and then we should have to drop it. The salt tax has no doubt been disapproved in some quarters; while in other quarters it is regarded as necessary. But similarly, in some quarters the increase of income-tax is not looked on entirely with happiness. Are we to drop that because it will raise controversy? One Calcutta newspaper, I think, objected to the Budget lock, stock and barrel. Is the whole Budget therefore to be scrapped? I am sure my Hon'ble friend will see that we cannot adopt this axiom of dropping taxation which, after very careful consideration, we thought to be necessary, merely to obtain unanimity.

"Then he speaks of the desirability of consulting non-official opinion before framing budget proposals It is always open to any non-official member of this Council or any non-official member of the public, to put his views before me as to what taxes might or might not expediently be imposed. Certain members of this Council did so before the Budget was framed, or while it was under consideration. I was very glad to have their views; but to go further than this, to admit the non-official members to a share in the framing of the Budget would be going far beyond what the Chancellor of the Exchequer does at home. He tries to frame a Budget that will be in consonance with the opinions of his party and the country; but he certainly does not take independent members into counsel as to the details of his scheme, nor does he modify his Budget in principle when he has once tabled it. If a Government at home is defeated on an important Budget proposal, it resigns. So that I think my Hon'ble friend is looking to a Uptopian state of things that does not prevail even in the classic land of Liberty and Parliaments.

"There is only one more point I need notice, and that is the argument that we might go on with a modest surplus of £400,000, and that if things go wrong, we could use the executive power we have got to raise the salt tax. As I said at the last sitting, I deprecate doing that except in the last resort. We know how uncertainties affect trade, and to my mind such alterations in prices as have taken place in salt are largely due to speculation with reference

to Budget proposals, to withdrawal of stocks or to holding them up and so forth. I should be very sorry indeed to look forward to a state of things in which the trade would remain in this state of uncertainty, with people scanning the railway returns, the land-revenue returns, and the various signs by which they think they can read the financial position of the Government of India looking out for this information, and then having gossip in the bazaar as to whether the salt tax is to be raised or is not to be raised. That would hurt the people in the long run far more than the definite and small increase of a small amount which we have now proposed and to which we think it our duty to adhere.

"I hope my Hon'ble friend the Mover, having regard to my speech and his desire to avoid needless controversy, will now withdraw his Resolution. If he cannot see his way to do so, I can only oppose it."

The Hon'ble Sir Ibrahim Rahimtoola:—"Sir, I had hoped that the manner in which I placed my Resolution before the Council would have some restraining effect upon the great fund of humour which the Hon'ble Finance Member undoubtedly possesses. Whether the humour brought forward to-day so far as my remarks are concerned is good, bad or indifferent, I will not trouble the Council with discussing, but I will say this, that if his desire was that no further time should be spent in the discussion of this subject, he might have abstained from covering points which provoke a retort. Sir, I was told in that great humourous way that I am making rapid and substantial moral progress in my ideas of economics and finance. Sir, I have been a humble student of these subjects for close upon a quarter of a century, and I will candidly confess that I am obliged to revise various ideas which I had formed from that study by sitting at the feet of so great and overwhelming a master of economics and finance as our esteemed Finance Member is.

"Sir, for the first time I have learned that the Chinaman in buying our opium is the taxpayer, and not the Indian producer or the cultivator of poppy. I have further learned that when you have a substantial balance and overwhelming reasons in other directions, that it is immoral to state that a Budget with a small deficit caused by the attitude of Government themselves is an immoral Budget. I am also beginning to learn that though Government have a monopoly of railways and regulate the minima and maxima rates, that that revenue is not indirect taxation but is profits on business transactions made owing to Government holding a monopoly, and that Government can by regulating rates bring about results in the matter of railway revenue yielding what I have now learnt to call enormous profits to the State. Sir, these are all the lessons that I am repeatedly learning, and I daresay that, within a short time hereafter, I shall have revised all the lessons I have learned in the past, sitting at the feet of the great master, as I have already stated.

"Sir, I wish it to be clearly understood that I am not opposing the Budget, I am not objecting to Government having a surplus of one million pounds. Sir, the time I have taken in explaining my position to the Council is sufficiently warranted because of the misapprehension which the remark of the Hon'ble Member leads me to believe he is labouring under, namely, that I object to a surplus in the Budget of one million pounds. I do not object to this surplus. I say that no one will be better pleased than myself to have a larger surplus in the Budget at a time like this. What I do object to, and object to most strongly, is that additional taxation should be specifically imposed to obtain a surplus. Sir, I cannot make my meaning clearer than I have tried to do and am trying to do. I say it is absolutely wrong in principle—of course I mean the principle as I have learnt to understand it better, not the principle that I am now revising. The principle that I learnt was that it is wrong to impose additional taxation in order to enable Government to have a surplus, especially in view of the fact that there are absolutely strong, undisputed safeguards in the great financial strength of the Government of

[9TH MARCH, 1916.] [*Sir Ibrahim Rahimtoola.*]

India which I tried to indicate by a great number of statistics and facts which I placed before the Council on the last occasion. Sir, I do not object to a surplus, I would be pleased to have a surplus; but I most strongly object to additional taxation for that purpose, especially when it is imposed on the poor and that it should be levied in order that a surplus of 60 lakhs of rupees should be converted into a crore and a half. That is the point.

"Then, Sir, I was told that it was unnecessary, in view of the previous discussion, to have moved this Resolution. Sir, I regard it not only as not unnecessary but, consistently with my duty, as essentially necessary on the present occasion to move it. In speaking on the Hon'ble Mr. Dadabhoy's motion on the 7th instant, I clearly pointed out that that was not an opportune time to raise the question of the salt tax, because the Tariff Act and the Income-tax Act had not been settled. This most appropriate case for which I am representing is overwhelmingly strong now, because a surplus of £400,000 has been absolutely secured. If that is so, I ask whether there is any justification for imposing a tax on the poor and obtaining £600,000 more for adding to and swelling the surplus.

"Sir, it was only during one of the years to which I referred the other day that the Budget estimates of the Government of India opened with a surplus of less than £400,000. If the then Finance Member—I think it was Sir Guy Fleetwood Wilson—was content to open his Budget statements for the next year with a surplus of less than £400,000, I should like to know why the same thing should not occur again to-day. Sir, the Hon'ble Member charged me with playing with figures. I think I might retaliate and say that he was playing with my arguments when it was urged that I objected to a four-anna increase in the salt tax, and that it should be considerably more. I never did anything of the kind. I said that in view of the fact that the salt tax was a reserve, and that a dislocation would be caused to retail prices by a sudden increase or decrease in an article like this, it was all the more necessary to exercise great caution and discrimination in frequently raising or reducing a tax of this description. A tax of this description should be raised on only such justification as would, in looking forward to the future, lead one reasonably to expect that that tax will be maintained at a given standard. Any frequent increase or decrease is objectionable, because it takes a long time, when the reduction comes, to reach the small consumer. It is for that reason, Sir, and stating again the principles that I have learned, that I say that any tax like this with constant variations ought to be avoided. If there had been a case for this increase, if the money was needed for expenditure estimated for by the Hon'ble the Finance Member, I would have warmly supported it. I am not opposed to this tax in principle; I have said that repeatedly. I repeat that I would have been quite willing to agree to it if there had been any justification for it. I submit that there is no justification for it. I therefore submit that this and this alone is the proper time, when a surplus is absolutely assured, to urge upon Government that this additional taxation should not be levied. And if I have thought proper to bring it forward at this stage, it is because it is an appropriate opportunity for so doing.

"In conclusion, I again ask, in spite of what the Hon'ble Member has suggested, that my appeal on behalf of the poorer classes will lead to its consideration by the Government of India. Whatever may be the fate of my Resolution, I trust that, in view of the pathetic appeal made by the Hon'ble Pandit Madan Mohan Malaviya, the Government, in a meeting of their Executive Council, will very carefully and dispassionately consider the reasons which we have urged against this increase to the salt tax, and that they will, just as by an executive order they imposed an additional duty, also do away with it by an executive order.

"Sir, feeling as I do in the matter of levying fresh taxation for a surplus, I do not propose to withdraw this Resolution."

The motion was put and rejected.

[*Mr. Surendra Nath Banerjee.*] [9TH MARCH, 1916.]

RESOLUTION *RE* INCREASE OF THE PROVINCIAL GRANT FOR ANTI-MALARIAL OPERATIONS.

The Hon'ble Mr. Surendra Nath Banerjee:—"Sir, I have the honour to move the following Resolution :—

'That this Council recommends to the Governor General in Council that the grant to the Province of Bengal be increased by six lakhs or such other suitable sum as may be deemed necessary for carrying on anti-malarial operations in selected areas.'

"Sir, this is a necessary corollary to the Resolution which I had the honour to move in this Council in February last, and which the Government graciously accepted. I moved that the Government would be pleased to issue instructions to Local Governments to take vigorous measures for the prevention of malaria. The Government of India, in accepting that Resolution, issued prompt instructions in accordance with its terms. But, Sir, the adoption of vigorous measures necessarily implies the expenditure of money for the purpose. Questions of administration after all, when analysed, resolve themselves into questions of finance, and none in a greater measure than the question of the prevention of malaria. The American Government spent a mint of money in reclaiming the tract of land about the Panama Canal. I cannot indeed invite the Government of India, in the present circumstances, to emulate the generosity of the American Government, but something has to be done. Government cannot sit still when people are dying in their thousands and tens of thousands through a preventible cause, and when the Government has instructed subordinate administrations to take vigorous measures for the removal of that cause.

"The chief obstacle in this, as in many other measures, is money. We want large sums of money for anti-malarial operations, and I will quote the authority of Dr. Bentley, the Sanitary Commissioner to the Government of Bengal, in this respect. This is what he says in his report on antimalarial operations in the Dinajpur district—

'The chief obstacle is the inability of the country at the present time to meet the enormous expenditure required for carrying out the measures with the necessary completeness in places which are not favourable for such work.'

"We take it therefore that where the circumstances are less unfavourable, an enormous expenditure of money might be avoided. Some money however has to be spent if prompt measures are to be taken for the prevention of malaria; and, Sir, I will say this that the public funds could not be applied to a more useful or a more righteous purpose than the saving of human life and the alleviation of human suffering. Measures for the public health constitute the first charge upon the public funds. That, I take it, is the fundamental creed of all civilised Governments. Expenditure in other directions might be curtailed, but not in a supreme question like this affecting the life and the happiness of millions of people. And, Sir, I make a very moderate demand. All that I want is six lakhs of rupees to be applied to anti-malarial purposes in selected areas. Our efforts in the past have been spasmodic, without system, and therefore futile. What I would recommend is, that a definite plan of campaign should be organised, applicable to a particular area and carried out in a thorough and business-like manner. The proper thing to do would be to take up two or three districts where malaria is most prevalent and where the circumstances that conduce to the success of anti-malarial operations, are more or less well-known to the authorities I have in my mind three districts: the district of Burdwan, the district of Murshidabad, (from which my two Hon'ble friends here come), and the district of Nuddea Malaria has decimated these districts My Hon'ble friends can testify to that fact. The birth-rate has decreased and the death-rate has increased. The country is full of wild jungle. I think these districts ought to be taken up, and the knowledge that would be acquired by the application of a particular method to a particular area would be useful in anti-malarial operations elsewhere.

[9TH MARCH, 1916.] [*Mr. Surendra Nath Banerjee; Sir C. Sankaran Nair.*]

"I know the difficulties of the Government; the finances press; but the question is one of supreme importance. I hope and trust that no technical grounds will be permitted to interfere with the acceptance of this Resolution by the Government. Various arguments against it may be adduced. I might be told 'go and apply to your own Government about this matter.' Further, I might be told 'you are a friend of provincial autonomy: this is inconsistent with the principles of provincial autonomy.' I think we ought to brush aside all these technicalities in view of the supreme need that exists in Bengal and elsewhere for the prevention of malaria. I hope and trust that my Hon'ble friends, when replying to this motion, will not take their stand on these grounds, but will deal with the question in the broad spirit of liberal statesmanship which ought to distinguish the Government of India in approaching a question of life and death affecting the happiness of millions of my countrymen. For these reasons, I beg to lay this Resolution before the Council."

The Hon'ble Sir C. Sankaran Nair:—"I oppose this proposition. My Hon'ble friend wants the Government of India to grant to the Province of Bengal a certain sum of money. But the Government of Bengal have not asked us for anything. They have not told us that they are going to take any anti-malarial measures for which they want money. If they have anything in contemplation, they have not told us what those measures are likely to cost. Without knowing all that, it is almost impossible for us to say whether we should grant any money, and what amount we should grant. The Resolution, on the face of it, seems premature.

"My Hon'ble friend is a member of the local Legislative Council. All the arguments that he put forward here should be addressed to the Government of Bengal in order to persuade them to put forward anti-malarial measures for the consideration of the Government of India, and to ask us for any money if they might want it. It has to be remembered that the Government of Bengal have also got a large balance, though they cannot now draw upon it except under special conditions. While, therefore, that is the state of things, and while we have to meet a heavy deficit by fresh taxation, it is out of the question to make such an anticipatory grant as my Hon'ble friend suggests. I have therefore to oppose this Resolution."

The Hon'ble Mr. Surendra Nath Banerjee:—"I take it, Sir, from the observations which have fallen from my Hon'ble friend, the Member in charge of the Department, that he is in sympathy with the main objects of this Resolution. His objection is to the *modus operandi* which I have thought fit to follow in this case. My Hon'ble friend says that the Government of Bengal has not asked for any money, and that he does not know what the intentions of the Government of Bengal are in regard to this matter. Well now, suppose the Government of Bengal were to ask for some money, would the Hon'ble Member be prepared to give it?"

The Hon'ble Sir C. Sankaran Nair:—"That matter would be considered on its merits."

The Hon'ble Mr. Surendra Nath Banerjee:—"I am very pleased to hear it. The difficulty of the situation is that the Government of Bengal cannot spend their money, as my Hon'ble friend has just pointed out. They have been instructed not to spend any Imperial grant without the previous sanction of the Government of India. I am not permitted to disclose the secrets of my prison-house, and I certainly am not going to do so in the presence of an official of the Bengal Government sitting here But, as a matter of fact, I know—I may say so without revealing any secrets at all—that the Government of Bengal is most anxious to start anti-malarial operations. I believe they are willing to start those operations in connection with two or three districts; but the money is wanting, and I am glad to have the assurance

of my Hon'ble friend opposite that if the Government of Bengal were to ask for money, and if they were to communicate to him their schemes in regard to anti-malarial operations, he would consider, and I take it favourably consider, them and sanction the expenditure. May I have that assurance ?"

The Hon'ble Sir C. Sankaran Nair :—" I did not say all that. "

The Hon'ble Mr. Surendra Nath Banerjee :—" No, but I want an assurance from the Hon'ble Member. I take it from the silence of my Hon'ble friend that he is inclined to accept this view of the matter. Under those circumstances, I withdraw my Resolution."

The Resolution was by permission withdrawn.

RESOLUTION *RE* INCREASE OF THE PROVINCIAL GRANT FOR THE EQUIPMENT OF THE CALCUTTA UNIVERSITY COLLEGE OF SCIENCE.

The Hon'ble Mr. Surendra Nath Banerjee :—" Sir, I have the honour to move the following Resolution —

'That the grant to the Province of Bengal be increased by three lakhs for meeting the cost of equipping the Calcutta University College of Science.'

" Sir, the Calcutta University College of Science owes its birth to the philanthropy of two distinguished men, two of the most illustrious Bengalis of the present generation, the late Sir Tarakanath Palit and Sir Rash Bihari Ghose. Their benefactions in this connection have shed a lustre upon their province, and I have no doubt will stimulate philanthropic efforts among our countrymen in all parts of India. Sir Tarakanath Palit gave away the whole of his fortune—his princely fortune—of 15 lakhs of rupees, built up by himself, for he was not born with a golden spoon in his mouth, for the spread of higher scientific education in Bengal. Sir Rash Bihari Ghose followed his example by making a gift of 10 lakhs of rupees. I believe that the nation is the heir to what remains of the fortune of Sir Rash Behari Ghose and what he may still accumulate by his earnings. The proceeds of Sir T. Palit's endowment are to be applied to the creation of two chairs, one of Chemistry and the other of Physics in the new College of Science and of a number of research scholarships. The proceeds of the endowment of Sir Rash Behari Ghose are to be applied to the founding of four chairs of Botany, Applied Mathematics, Physics and Chemistry, and eight research scholarships. The University of Calcutta, on receipt of this grant, proceeded to construct a building for the College out of its own funds at a cost of 3 lakhs. The building is now nearly complete. In December, 1912, the University of Calcutta applied to the Government of India for a non-recurring grant of 15 lakhs of rupees, with a full statement of the endowment and of the responsibility which the endowment imposed upon the University. In October 1913, the University of Calcutta again approached the Government with an application for a recurring grant of Rs. 84,000 a year, so that the College of Science may be in a position to commence its full career of work and open the departments of Botany, Zoology, Physics, Chemistry and Applied Mathematics. The Government replied saying that it was impossible to make a grant at that time, but that the question would be considered. In June, 1915, the University of Calcutta laid an exhaustive statement of its financial position before the Government, and also a scheme for organising the College of Science upon a satisfactory footing.

[9TH MARCH, 1916.] [*Mr. Surendra Nath Banerjee; Sir C. Sankaran Nair.*]

The University pointed out that the arrangements made in Bengal for the spread of higher scientific education were inadequate. The Presidency College had M.A. classes which taught only Physics and Chemistry. The Dacca College had M. A. classes only in Chemistry. They also observed that the College of Science would be an institute for research, and that the professors would be in a position to carry on research work unburdened from the exacting duties of their routine professorial work in College. In July 1915, the University out of its own funds made a small grant of Rs. 15,000, and partially fitted up the laboratory of the College. M Sc. classes were opened with 8 students. Sir, this is the work that has been done by private philanthropy aided by the resources of the University, and I appeal to the Government to come forward with adequate funds for the purpose of placing the College of Science upon a satisfactory footing. I have got a statement to show the actual needs of the College at the present moment. It is a statement which has been drawn up by an expert acquainted with all the facts of the case. He says that a sum of 3½ lakhs of rupees would be required as a non-recurring expenditure; the detailed items being as follows :—

Rs. 75,000 for the physical laboratory;
Rs. 75,000 for the chemical laboratory;
Rs. 75,000 for the biological laboratory,
Rs 10,000 for the experimental psychological laboratory,
Rs. 25,000 for the workshop,
Rs 50,000 for the library,

and Rs. 40,000 for the completion of the building, fencing, etc., making altogether Rs. 3½ lakhs. My Resolution recommends a grant of only Rs. 3 lakhs. These items might be revised or the grant for the library might for the present be suspended. I do hope that Government will come to the help of this institution. The Government of India have always been the generous patron of learning. During the Viceroyalty of His Excellency Lord Hardinge scientific education has received a stimulus all its own. Our great scientist, Doctor J. C. Bose, has been furnished with ample funds through the beneficence of the Government, so that he may carry on those researches which have extended the bounds of human knowledge, and have shed lustre upon the Indian name. Sir, I think it is right and proper that this College of Science, which owes its origin to the philanthropy of two distinguished Indian gentlemen, and in which the University of Calcutta has taken such a keen interest, should receive the generous and practical support of the Government of India. With these observations, I beg to move this Resolution."

The Hon'ble Sir C. Sankaran Nair.—" Sir, I have to oppose this Resolution for reasons very similar to those which I advanced in opposition to the last Resolution. I am not concerned now either to accept or to deny the various facts or arguments which have been put forward by my Hon'ble friend. I shall only say for the present that there is no application either by the University or by the Government of Bengal pending before the Government of India for any grant of money. My friend knows a good deal about the facts and about the correspondence that passed between the Government of India and the University or the Government of Bengal; but he is apparently not informed of a fact which is subsequent to all that he has referred to, and that is, that we have asked for certain information in October 1915, information which we have not yet obtained. We shall consider the request when made by the Government of Bengal on its own merits. We may then reject the application *in toto*, or we may see reasons to grant it either in whole or in part. About that I can for the present make no promise. But it has also to be noticed as I said

[*Sir C. Sankaran Nair; Mr. Surendra Nath Banerjee; Mr. C. H. A. Hill.*] [9TH MARCH, 1916.]

before that the Government of Bengal have got their own large balance, though it might be true that they are not entitled to draw upon it except under special circumstances. In these circumstances at this stage the Government of India, when they have to meet a deficit by taxation, do not see their way to make any promise or to make any grant."

The Hon'ble Mr. Surendra Nath Banerjee:—"Sir, it is news to me that the University has not applied; but as a matter of fact from the statement which I have just placed before the Council it will have been seen that the University applied more than once, in 1912 for a non-recurring grant of 15 lakhs and again in 1913 for a recurring grant of Rs. 84,000 annually, for the Science College, and the Government of India said in reply to one of these requests that the matter would be considered, as at that time funds were not available. Therefore, although the University might not have made a recent application, the fact remains that, since the foundation of the college, the University has again and again been coming to the Government of India for grants. I shall certainly ask the University authorities to make a further application in this connection in accordance with the suggestion which has just been thrown out by the Hon'ble Member.

"If the University is able to make out that a grant is necessary in order that the College may be placed on a satisfactory footing, I hope the money will be forthcoming. I hope my Hon'ble friend is able to give us that assurance, not a promise, I do not ask for a promise, but for an assurance, a sympathetic assurance of a benevolent attitude in regard to the College of Science. Unless the money is forthcoming, I am afraid the College cannot carry out its work satisfactorily; Rs. 25,00,000 are practically locked up, the University building is not finished, the laboratory is not what it should be, there is no library—all these are essential conditions for the successful working of the College of Science. Unless the Government of India comes to our help, I am afraid it will not be possible to fulfil the high objects which the illustrious donors had in view, and which inspired their generosity. I hope when a scheme has been made out and is supported by the Government of Bengal, my Hon'ble friend will see his way to issue instructions for unlocking the funds of the Government for this purpose. I beg to withdraw the Resolution."

The Resolution was by permission withdrawn.

FINANCIAL STATEMENT.

SECOND STAGE.

The Hon'ble Mr. C. H. A. Hill opened the second stage of the discussion on, and introduced the following heads of, the Financial Statement for 1916-17:—

Revenue.	*Expenditure.*
Land Revenue.	Land Revenue.
Provincial Rates.	Provincial Rates.
Forest.	Forest.
Scientific and other Minor Departments.	Scientific and other Minor Departments.
Irrigation.	Famine Relief.
Civil Works.	Protective Works, Irrigation.
	Irrigation.
	Civil Works.
	Capital outlay on Irrigation.

He said:—"I now beg to introduce the heads of Revenue and Expenditure standing against my name. The subjects of Land Revenue and Famine Relief have been so fully set forth in the Financial Statement that I have nothing to add regarding them. As has already been explained by the Hon'ble the Finance

[9TH MARCH, 1916.] [*Mr. C. H. A. Hill.*]

Member, expenditure has had to be so rigorously curtailed, both during the current and in budgeting for the coming year, whether on Agriculture or Forests, that there is, perhaps, less to explain than usual this year. I may observe, however, that this fact has not prevented Government from endeavouring in connection, specially with Agriculture, to pave the way for the time when funds will again be available for well-devised expenditure. We are, in fact, utilising the time during which expenditure must be restricted, by preparatory and experimental work, as will appear a little further on.

"In regard to Forests, the revenue which is almost entirely provincial, has continued, as was the case last year, to suffer from the prevalence of war, but we have been able to provide, from Imperial revenue, funds for the services of a Tannin expert, who has been engaged for two years, to investigate and report on the feasibility of promoting the industry on a large scale hereafter. The appointment of Forest Engineer, which was sanctioned for two years in 1913, has been extended for a further period of three years, and the Engineer is now employed in the United Provinces. In Bombay and the United Provinces, a Chief Conservator has been sanctioned, while a large increase of the controlling staff in the United Provinces, involving the addition of 10 Imperial officers, 2 Deputy Conservators, and 16 Extra Assistant Conservators, has also been sanctioned. The reorganisation of the controlling staff sanctioned for Assam will have to be deferred until Budget provision can be made.

"As instancing the work of preparation which is going on in anticipation of the recurrence of more favourable financial conditions, I may mention that three important Conferences connected with Agriculture have been held during the current year. The first of these was the Inter-Provincial Jute Conference, held in Calcutta in August, 1915, the recommendations of which are now under the consideration of Government in consultation with the Local Governments concerned. It is hoped that, in due course, good results will ensue from the deliberations which then took place. The second Conference was the one recently held to discuss the subject of Agricultural Education, just before the meeting of the Agricultural Board at Pusa last month. Considerable interest has recently been displayed in various quarters on the subject of agricultural education generally, and, as there seemed to be a certain amount of confusion of thought on the subject, it was considered desirable to convene representatives from most of the provinces to discuss the subject, mainly from the Agricultural standpoint. Government are still awaiting the report of the proceedings of the Conference, and it would, of course, be premature to say anything committal on the subject at the present moment. It may, however, be useful to those interested in the matter if I mention that the Conference, in the course of its proceedings, took into consideration a good deal of literature on the subject from America and from elsewhere, and approached it primarily from the point of view of the promotion of improved agricultural methods throughout the country and a consequential advance in its economic resources. In view of what has already appeared in the Press, it will also be permissible to remark that the Conference came to the general conclusion that the direct teaching of Agriculture in the ordinary schools of India was impracticable, although it was desirable, so far as possible, to adapt the text books of rural schools to the ordinary surroundings and occupations of the pupils. In regard to the direct teaching of Agriculture, the Conference was very favourably impressed with the results achieved in the course of the experimental vernacular schools for Agriculture in the Bombay Presidency, and suggested that the question of extending these should be considered.

"The third important Conference was the ordinary periodic meeting of the Board of Agriculture at Pusa. There, one of the most important matters discussed was a paper, prepared by the Agricultural Adviser, outlining a scheme for improving the cattle of India from the dairying point of view, and the Board, in considering this paper, also discussed at some length the question of measures for the improvement of the breeds of plough cattle also. The importance of this subject cannot be overstated in its relation to the general Agricultural resources of the country.

[*Mr. C. H. A. Hill.*] [9TH MARCH, 1916.]

"Another matter of importance to India, which is receiving attention, is the possibility of reviving the indigenous silk industry. For this purpose, we have obtained the services for one year of Mr. Maxwell-Lefroy, who had done eminent service in research work as Imperial Entomologist at Pusa. Mr. Maxwell-Lefroy is at present touring through India on his mission, and we hope to receive his report before the close of the current calendar year.

"Not the least important subject which is receiving special attention at the present time is the possibility of reviving the natural indigo trade. As Hon'ble Members are aware, German manufacturers have succeeded in producing, by chemical processes, a paste of uniform composition admirably suited to the needs of dyers all over the world. The problem that presents itself to India is, in the first place, how to improve the cultivation of indigo in such a way as to increase the output of Indican in the natural plant, and, secondly, how to standardise the product, so that it shall be able to compete in the matter of convenience as well as economy with the synthetic article. The question of appointing an expert chemist to study the matter from the point of view of the manufacture of the natural produce is at present under consideration. It is, however, recognised that no permanent advantage can accrue from an attempt to resuscitate this industry unless it is found possible to establish it on a permanent basis after the war is over. It is essential, if this end is to be attained, that planters should make some arrangement to bulk their products and to adopt some form of co-operation both in manufacture and marketing. Government have indicated their preparedness to help planters with the expert advice of the chemist, provided they receive the assurance that the planters on their part will co-operate and assist Government in the matter. Without their help and without having reached an understanding that they will spare no endeavour so to prepare their product as to be able to compete, in convenience and quality, with the synthetic paste, it would be futile for Government to undertake the investigation into the possibility of bringing this about.

"Apart from these special investigations, which have for their object permanent improvements after the war is over, the general work of agricultural research is making steady and very satisfactory progress, and the results promise to be very far-reaching. Hon'ble Members are probably aware—at least those of them who are interested in Agriculture—that research work in Pusa has already resulted in the selection of more than one new variety of wheat which have been found to give a larger and better milling yield than the local varieties. One in particular, known as Pusa No. 12, promises to give results which will be of the greatest possible value in promoting the betterment of the economic condition of agriculturists over a large area in India. We hope in process of time to establish a regular grade for this wheat in the English market, and to secure for the farmer higher prices than are paid for the ordinary Indian wheats. A small provision was included in the Budget for the current year for this purpose, and a similar sum is being repeated in the Budget for 1916-17. Investigation into the varieties of cotton, sugar-cane, and so forth, is also being pushed on at Pusa, Coimbatore, and elsewhere, and I think I may say that, within the limits of an all too small establishment, the work not only at Pusa, but in the provincial agricultural institutions, is now proceeding on well-considered and more hopeful lines. The administration of the results of research, whether conducted in the laboratories at Pusa or in the laboratories of Local Governments, is entrusted of course to the Governments of the provinces interested, and I do not propose to say more on this head.

"At the present moment, it is not only finance which hampers the development of the Provincial Departments of Agriculture, but also the difficulty of procuring suitable officers. The large scheme of reorganisation which has been sanctioned for the Madras Presidency will have to be brought into operation very gradually and the additional expenditure involved, which amounts to about 2¾ lakhs a year, cannot be incurred immediately. Additional posts of Deputy or Assistant Directors, which have been sanctioned for Burma, Assam,

[9TH MARCH, 1916.] [*Mr. C. H. A. Hill.*]

the Central Provinces, and the Andamans, have not yet been filled owing to the continuance of the war.

"Before concluding my remarks on the subject of Agriculture, I think I ought to advert to the fact that the Department will shortly be losing the services of Mr. Coventry, who has been connected with it since its inception, and has for 12 years now performed with energy and success the important duties of Director of the Agricultural Research Institute, and for the past four years has combined these duties with the work of Agricultural Adviser to the Government of India. Mr. Coventry's services will not, however, be lost to India, as he is taking up another appointment connected with Agriculture in Central India, and we shall hope to continue to benefit by his valuable experience.

"Of the Departments classed as 'Scientific' and 'Miscellaneous,' I need only refer to the Survey Department, whose work has been restricted by the reversion of a number of Imperial officers to military duty and by the employment of many provincial officers on military work. The curtailment of programmes of field work has been inevitable, but the Department has managed to keep up its scientific investigation, and the results of its observations with the plumb line, which were recently explained by Sir Sidney Burrard in his interesting lecture at Lucknow, promise to make an important addition to our knowledge of the earth's crust. The mapping offices have had to meet large demands for the supply of new maps for military purposes, and I believe that these offices have fully risen to the occasion. Maps have also been published of nearly the whole frontier between Turkey and Persia as a result of the labours of the detachment under Colonel Ryder, which accompanied the Commission to that frontier. Computations are now being made at Dehra Dun of the valuable observations taken by Major Wood when accompanying Cavaliere Filippo de Filippi's expedition to Karakoram, and the Survey Department has recently published a most interesting account of a remarkable achievement in linking up the triangulations of India with those of Russia. It may be doubted whether the labour involved in such achievements is generally appreciated. But in the last named instance, it has been emphasised by the sad loss which the Department sustained in the death of Lieutenant Bell of the Royal Engineers.

"The Meteorological Department has recently arranged for the distribution of information regarding the weather by broadcast wireless messages from various Indian ports. Such information should be of great value to ships in the Bay of Bengal and on the Arabian Sea.

"The important subject of Co-operative Credit Societies has recently been exhaustively examined by a strong committee under the presidency of the Hon'ble Sir Edward Maclagan. As many of the questions—and they were very numerous—raised by that Committee are still under consideration, I do not propose to go into them to-day, but I think it will be agreed that the manner in which Co-operative Credit Societies have withstood the severe shock to credit caused by the outbreak of war the year before last, is admirable evidence of their stability, and justifies the hope that the co-operative movement has, despite some possible failings, now been established upon a thoroughly sound basis.

"I have mentioned the loss which the Agricultural Department is sustaining in the retirement of its head, Mr. Coventry, and I should like here also to express our acknowledgment for his good work to Mr. Mercer, who, for the past 8 years, has presided over the Forest Research Institute and College at Dehra Dun. That Institution, within its own sphere, has, in the same degree as the Institute at Pusa, done, under his efficient guidance, much extremely valuable work.

"I now turn to the operations of the Public Works Department, and will refer first of all to 'Irrigation.' During the year now drawing to a close, productive irrigation works, after meeting all charges for maintenance and repairs, as well as interest on capital, returned a net profit to the State of 272¾ lakhs, or slightly less than the corresponding figure of last year, which was 281 lakhs. For the ensuing year, we anticipate

a net revenue of 274½ lakhs, which closely approximates to the actuals anticipated for the current year. Now that the triple canal project of the Punjab has come to completion with the inauguration of the Jhelum Head Works at Mangla, performed by His Excellency last January, an appreciable increase of irrigation revenue will, it is hoped, be realised in the near future.

"In the course of the discussion on the Budget for 1915-16, the Hon'ble Pandit Madan Mohan Malaviya suggested this time last year that the allotments for irrigation might all be shown in one place in future, and Sir Robert Carlyle promised to consider the matter in regard to the ensuing year's Budget. I am glad to say that it has been found feasible to give effect to this suggestion, and that the allotments will be shown together in one place in the Budget which will be presented to Council on the 21st of March, and the figures will be shown in the memorandum explaining the details of the estimate.

"The provision made for capital outlay for major irrigation works during the ensuing year is, under '49—Productive Works,' Rs. 135·75 lakhs and under Protective Works Rs. 62·10 lakhs—Total 197·85 lakhs. This total shows a decrease of 17·25 lakhs as compared with the provision for new major works in the revised estimates for the current year, which stands at 215·10 lakhs, and this reduction is, of course, necessitated by the general policy of curtailing expenditure as far as possible.

"The Hon'ble the Finance Member, in his introductory speech, has already briefly alluded to the present phase of some of the large irrigation projects which are under consideration. I may perhaps be allowed to make a few observations in supplement to his remarks. As Hon'ble Members are aware, the great Sukkur Barrage scheme was submitted to the Secretary of State some three years ago, but was returned for reconsideration by the Government of India, in consequence of the advice tendered to the Secretary of State by a Committee convened by him that there was not sufficient evidence that irrigation in Sind had suffered in the past, or would be likely to suffer in the future in consequence of further withdrawals of water from the Punjab rivers, and, further, that it seemed doubtful whether the project as designed would prove to be a productive work. The scheme has since been reinvestigated by the Irrigation Engineers of the Government of Bombay in consultation with the Inspector-General of Irrigation, and a revised project resulting from all this consideration is now about to be drawn up for approval. The Sukkur Barrage project presents many problems of considerable difficulty, and it is possible that considerable advantage may accrue from the further investigation to which the original project has now been submitted. In any event, in view of present financial circumstances, it is improbable that any money could possibly have been spent upon it, even if the project had met with approval on its first submission.

"Another large scheme to which reference has been made is that for the utilisation of the waters of the Sarda river. The original scheme provided for a division of the available water-supply between the United Provinces and the Punjab. In regard to the Punjab, the design was to augment the supply of the Eastern Jumna Canal by means of a feeder channel from the Ganges river which in turn was to be replenished by the water from the Sarda river. By this arrangement, it was intended that the Western Jumna Canal in the Punjab should be able to draw more largely upon the waters of the Jumna, and thus to extend irrigation to the dry tracts in the Rohtak and Hissar districts lying within its command. So far as the United Provinces were concerned, the project only provided for the irrigation of the western districts and none for Oudh. Considerable difficulties, both of a technical and administrative character, were inherent in this scheme, and the Government of the United Provinces have recently submitted an alternative which aims at the utilisation of the Sarda water within the confines of the province and the extension of irrigation to Oudh. The original exclusion of the province of Oudh from the benefits of the earlier scheme was due to the belief that the Talukdars of Oudh were strongly opposed to the introduction of irrigation. Not only, however, have circumstances recently altered but the cost

of well irrigation has considerably increased, and it is now clear that there is a keen desire on the part of the province of Oudh to participate in the irrigation from the Sarda. This alternative proposal, now before the Government of India, is only a part of the complete scheme, and does not preclude the possibility of extension in accordance with the original design.

"In the matter of the division of the waters of the Cauvery river between the Government of Madras and the Mysore Darbar, both disputants have been given and have exercised the right of making representations, regarding the arbitration award and of replying to each other's observations. The case is now before the Government of India, and it is hoped that final orders will be passed during the current month.

"As regards Civil Works, I have nothing to add to what is stated in the Financial Statement regarding Capital expenditure on the New Capital at Delhi. The total Imperial grant provided for '45—Civil Works,' exclusive of sums allotted for expenditure to be incurred in the Civil Department mostly in the several minor administrations and in the administrations of the North-West Frontier Province and Baluchistan, is 80 lakhs as compared with 100 lakhs provided in the Budget for 1915-16. The purposes to which the grant of 80 lakhs mentioned above will be applied are the following :—

(*a*)	9·74	for the Delhi Province Ordinary, *i.e*, apart from New Delhi.
(*b*)	1·00	Archæological expenditure.
(*c*)	5·93	Payments in England on account of stores, furlough allowance, etc.
(*d*)	27·33	Original works new, and in progress.
(*e*)	31·86	Repairs, Establishment and Miscellaneous charges.
(*f*)	4·14	Reserve for unforeseen expenditure.
	80·00	

The Hon'ble Sir C. Sankaran Nair introduced the following heads of the Financial Statement for 1916-17—

Revenue.	*Expenditure.*
Education.	Medical (Sanitation). Education.

He said :—"Sir, I introduce the following heads of the Financial Statement, that is, Education and Sanitation details of which will be found in the Explanatory Memorandum, paragraph 98, from which the Hon'ble Members will see that the Budget estimate for expenditure in 1916-17 is about 13½ lakhs in excess of the revised estimate for 1915-16, that is the one being 475 lakhs and odd, the other being 488 lakhs and odd. I have no doubt the Hon'ble Members will consider this satisfactory, considering the financial position.

"There is nothing else of any great interest to which I need refer. I will, however, draw the attention of Hon'ble Members to the fact that out of the estimate for 1915-16, ·44 lakhs has lapsed, and that out of the estimate for 1916-17, Government have been able to keep in reserve only a sum of 1·81 lakhs.

"With reference to Sanitation, I have very little to add to paragraphs 108, 109, 110, 111, 114 and 234 of the Finance Secretary's Memorandum, which explain the details of the estimates. In regard to the estimates for 1915-16, out of a reserve of 7·70 lakhs, one lakh has been allotted to the United Provinces for the improvement of the pilgrim route from Kedarnath to Badrinath, two lakhs to the North-West Frontier Province for the benefit of the Peshawar Municipality in aid of their scheme of drainage and water-supply, and ·70 lakhs to Delhi for sanitary improvements. The balance of the reserve, which comes up to four lakhs, has lapsed in view of the need for economy. Out of the five lakhs which were allotted to the Indian Research Fund in 1915-16, we have spent Rs. 2,52,216 for anti-malarial schemes in Delhi and the United Provinces; to the Bombay School of Tropical Medicine, we have

[*Mr. C. Sankaran Nair; Mr. Sharp; Sir William Clark.*] [9TH MARCH, 1916.]

allotted a lakh of rupees and we have given Rs. 80,000 to carry out a scheme of experimental research in Lucknow. I might also bring to the notice of Hon'ble Members that the Research Association has conducted various inquiries at its own expense into cholera, water analysis, plague, diabetes and tuberculosis. For the year 1916-17, no fresh grants have been made for Sanitation. We have allotted three lakhs to the Indian Research Fund, two lakhs to the Peshawar Municipality, and the residue of four lakhs will be temporarily resumed in view of the financial situation. It will be made available for expenditure on Sanitation later on, on a return to normal conditions.

"I do not think there is anything else of interest which I have to bring to the notice of the Council."

The Hon'ble Mr. Sharp:—"Sir, in connection with the head 'Education,' I lay on the table the annual narrative of educational progress. It is important to notice that, in the general tables which it contains, an anomaly has been removed whereby, in previous years, the figures for certain Native States were included. This fact has to be remembered in comparing the general tables of 1913-14 with those of 1914-15. If the figures for these States be excluded from the general tables of both those years, then we find that in 1914-15 the number of educational institutions increased by over 4,000, pupils by 260,000 and expenditure by about 120 lakhs. These figures of increase may be taken as probably under-estimates; for it has been impossible to get precise figures for some of the areas which have now been excluded, and I have therefore made an estimate for them which probably errs on the side of moderation. These figures suffice to show that the effect of the large educational grants which were made by the Government of India are by no means cancelled by war conditions, and that progress is steadily maintained. The details of this development and of the various improvements carried out will be found in the narrative."

At this stage the Hon'ble **Sir William Clark** left the Chair, which was taken by **the Hon'ble Sir Reginald Craddock.**

The Hon'ble Sir William Clark introduced the following heads of the Financial Statement for 1916-17:—

Revenue.	*Expenditure.*
Salt.	Salt.
Excise.	Excise.
Posts and Telegraphs.	Customs.
Stationery and Printing.	Posts and Telegraphs.
State Railways.	Stationery and Printing.
Subsidised Companies.	Protective Works, Railways.
	Subsidised Companies.
	Miscellaneous Railway Expenditure.
	Capital outlay on State Railways.

He said:—"Sir, I beg to introduce the heads, Salt, Excise, Customs, Post Office and Telegraphs, Stationery and Printing and Railways. As in previous years, I will ask my Hon'ble friend the President of the Railway Board to deal with Railways, and in discussing the other heads, I will confine my remarks to matters of general interest, detailed explanations of the estimates being already before Hon'ble Members in the memorandum.

"The total revenue of the Post and Telegraph Department for the year 1914-15 was £3,499,800. According to the Revised Estimate the amount for the current year will be £3,627,100 representing an increase of £127,300, and we anticipate that, unless there is a material alteration in the conditions

[9TH MARCH, 1916.] [*Sir William Clark.*]

prevailing at present, there will be further increase of £137,500 during the coming year.

"The total expenditure for the year 1914-15 amounted to £3,178,900, and we hope to keep within £3,191,700 for the current year.

"In the matter of capital outlay on the Telegraph service, the Budget Estimate for 1916-17 is £277,900 exclusive of the share of establishment charges, as compared with a Revised Estimate of £151,600 for the current year and a sum of £166,000 actually spent during 1914-15. Since the commencement of the war, every effort has been made to keep down capital expenditure, and the anticipated increase is due mainly to the rise in the prices of English stores and the replacement of material supplied to the Army Department for issue to the Expeditionary Forces.

"As regards Salt, Hon'ble Members will be interested to learn that, in the salt areas under the control of the Commissioner of the Salt Revenue in Northern India, widespread and successful efforts have been made to stimulate the export of saltpetre, which is urgently required by Great Britain and her Allies for the manufacture of explosives. The result of these efforts has not only been to afford a substantial degree of assistance to the Allied cause, but has also incidentally given a fresh stimulus to the industry of saltpetre which is carried on by the poor and hard-working class of Nunias.

"In regard to Customs, I can add nothing to what my Hon'ble Colleague the Finance Member has already said regarding our customs revenue, and the various causes which have affected it during the past year. Freights were already high during the first portion of the year, and in consequence of the large demands subsequently made upon the British and Allied mercantile marine for the movement of troops in the Mediterranean theatre of war, they rose in the latter portion of the year to heights altogether unprecedented. That there has not been a greater falling-off in Indian exports is no doubt due to the fact that a large number of these are in such demand outside India, that importing nations are ready to pay the very greatly increased prices which the rise in the freights has caused. Recently, however, there has been a most welcome decline from the high pitch which was latterly reached, although there is no ground for hope of a return during, at any rate, the period of war to anything like the normal freights previously prevailing. The demands on the care and vigilance of our customs staff have continued to increase, with the closer watch which is being maintained on goods destined for neutral ports and on dealings with enemy firms in neutral countries. The grip of the British blockade upon the very slender volume of commerce which still finds its way to the enemy, grows ever tighter; the fresh expedients which are constantly being devised on the part of enemy importers, are being met with ever increasing precaution. Last year I paid a well-deserved tribute to the customs staff on whom a very heavy burden was thrown by our war trade policy, and to the mercantile public for their ready acquiescence in these necessary restrictions. I again desire to renew my appreciation of the work of the Customs Department and to express our thanks to the commercial community for the way in which they have seconded our efforts.

"Among the more important activities of the Commerce and Industry Department during the past year, have been certain incursions which it has been necessary for us to make into a sphere which is generally considered somewhat outside the scope of a Government department. Chief among these was the scheme for the Governmental control of the purchase and export of wheat. I need not go into details about the working and results of this scheme, since it was dealt with fully by my Hon'ble Colleague the Finance Member in his Financial Statement. At present, owing to the nature of the past season, shipment by Government is in abeyance, but the prohibition on export is still in force and will continue to be so, and the machinery created last year remains ready for employment against the time when circumstances may warrant a resumption of our exports.

"There have also been other commercial activities which are important, not only from the assistance which they have given to the Allied cause, but

also in their economic aspect in this country. The great jute manufacturing centre of Calcutta has been called upon, under an arrangement made through the Commerce and Industry Department, to supply vast quantities of sandbags and cloth to Great Britain and the Allies for use in military operations. The arrangement entered into with the Calcutta mills has now been in operation for nearly six months, and the smoothness with which it has worked has drawn from His Majesty's Government a warm appreciation of the zeal and patriotism of the Calcutta manufacturers. His Majesty's Government have also invited the Department to express their thanks to the Calcutta shipowners for the handsome reductions which they made in the then high level of freights in favour of jute manufactures shipped for military purposes to the United Kingdom.

"The resources of the Indian manganese and wolfram fields have become of the very greatest importance in the provisions of munitions of war The former industry was fully organised and required little stimulation or assistance from Government, otherwise than in the provision and regulation of railway transport. The wolfram mining industry, however, is carried on in the comparatively undeveloped country of Lower Burma, where it was necessary for Government to give a large measure of direct assistance by the provision of labour, the improvement of communications, the temporary relaxation of the mining rules and the furnishing of the advice and assistance of mining and geological experts, in all of which matters, the Burma Government have taken a vigorous and important share. The result, it is hoped, will be not only to furnish valuable assistance to Great Britain and her Allies in the conduct of the war, but also to stimulate the growth of an important industry and the development of the resources of the province."

The Hon'ble Sir Robert Gillan:—"Sir, in the Railway Department, as in every Department of the Government and every private concern throughout the country, there is one word that recurs on every page and every paragraph of current history, and that word is 'war.' I wish to develop this in three directions—as regards railway finance, as regards congestion, and as regards the manufacture of munitions.

"In the matter of finance, the effects of the war were very plain from what the Hon'ble Sir William Meyer told us the other day. On the capital side in the current year, for instance, against an original grant of 8 million pounds we now propose to spend only £4,900,000; and for next year the provision is no more than £3,000,000. But it will be clear that a very large restriction of expenditure was in any case inevitable, both because we were precluded from going to the Home market for money, and because materials were not available, even if we could have got more money. The second point is very important; indeed, only the other day the Secretary of State informed us that he was very doubtful whether we should be able to get materials for even a three million programme. The Council will be interested, however, to know that in view of this difficulty, we have definitely reserved a certain sum in our Budget to enable us to purchase rolling-stock if available in India, and that no indent goes home without a special examination to satisfy us both that the materials are absolutely necessary, and that no part of the manufacture involved can be carried out in this country. Thus, we hope to give a little assistance to Indian industry, and at any rate we avoid interference with the important work of manufacture of munitions at home. On the Revenue side, the position this year is that we now hope to make £2,370,000 more than the Budget estimate, without exceeding the Budget grant of expenditure. This of course is not a result that would normally have been expected. Normally, if railways earned £2,370,000 in additional traffic, they would spend a proportion of that sum—perhaps 25 per cent or £600,000—more in working expenses. The actual result has been secured by the efforts made by railways, which the Railway Department wish to acknowledge, in order to secure the utmost possible economy in working. In the Revenue Budget for next year, we have still to aim at the same great object of contributing the maximum net revenue to the Empire. But here some

[9TH MARCH, 1916] [*Sir Robert Gillan.*]

special factors come into play. For instance, the price of materials and stores will be very much higher. Then, of course, on the supposition that the war continues throughout the year, we shall have again to carry a large proportion of military and coal traffic, the cost of working which is high in proportion to the receipts. But the main point is that, under the conditions of railway working, restriction of expenditure becomes more difficult the longer it is continued. Thus, to meet an emergency, we may postpone expenditure on maintenance of ways or repairs to engines, but as engines continue to be laid up and the condition of the permanent-way declines, a point comes at which expenditure is absolutely essential or the capacity of the line is affected. This will explain why the percentage of working expenses to receipts, as estimated for next year, is 53·60 against 52·68 in the revised estimates of the current year; and it is interesting to observe that in the last normal year—1913-14—this percentage was 52·13. But of course in considering these figures the special factors I have mentioned have to be taken into account.

"Next as regards congestion. This too is the result of the war, because it has arisen from the great shortage of tonnage. The coal carried by sea from Bombay to Calcutta alone was well over a million tons a year, and all this has been thrown on to the railways in addition to their ordinary traffic. What has to be said on this subject, I think, is, first, that no railways could possibly be expected to be so equipped and organised as to carry, without some dislocation and delay, new traffic of this description, that the Railway Department and Railway administrations have co-operated to improve, where possible, and everywhere to make the fullest possible use of the facilities by all existing routes, that we have not been unsuccessful so far, we have at any rate carried on and hope to continue to do so. But about the prospects of the next busy season I do not know what advice our commercial friends would give us. Is the pressure then going to be more severe than it has been recently? Probably the factors are so indeterminate as to make it very difficult to give an answer to this question

"Then I come to the manufacture of munitions. This is a new thing for railways, and some people were very doubtful whether we could do it. Well we have done it. And it is not only a railway business. It is a business in which a number of private concerns have co-operated very energetically and successfully. I suppose it would scarcely be proper for me to give out the exact number of shells we are turning out every week, but it is a considerable number and it is increasing from week to week. And it is surely a matter for great congratulation to every one of us that these products of Indian hands, made out of Indian materials—because we rely on the enterprise of Messrs. Tata for our raw materials—are being employed against the common enemy. They are a weighty and a striking proof of the devotion of India to the cause of the Empire.

"Naturally, Sir, the railways of India have had much to do with India's share in the war. They have had, for instance, heavy work in connection with the movements of troops, and they have been very proud to receive the commendations of His Excellency the Commander-in-Chief on the way in which this work has been carried out. They have given a number of their officers for active service. They have not only contributed something in the way of munitions themselves, but they have done what they can to avoid interference with the manufacture of munitions at home.

"I have been asked, is this policy, involving as it does a restriction of expenditure, a sound policy from the railway point of view? But it seems to us that in these days railways cannot afford to have a separate policy of their own. The improvement of their property is a matter of the highest importance, but the first thing to provide for is its security, and the primary object of railways, as of every other interest in the Empire, must be the successful prosecution of the war."

At this stage, the **Hon'ble Sir Reginald Craddock** left the chair, which was taken by the **Hon'ble Sir William Clark.**

[*Sir Reginald Craddock.*] [9TH MARCH, 1916.]

The Hon'ble Sir Reginald Craddock introduced the following heads of the Financial Statement for 1916-17 :—

Revenue.	*Expenditure.*
Registration.	Registration.
Jails.	General Administration.
Police.	Courts of Law.
Medical.	Jails.
	Police.
	Medical.

He said :—"Sir, the departments with which the Home Department is concerned, are departments which are extremely useful and necessary to the State, but are generally accepted, as they are, without much discussion, and I propose to make only a very few remarks on this occasion. Under 'General Administration' I should just like to notice that, in spite of the financial difficulties that prevail, the scheme for the revision of ministerial establishments and improvement of their pay in district and other offices in the United Provinces, involving an actual cost of Rs. 5,73,000 a year, was given effect to from April 1st, 1915. It will be very satisfactory to Council, who have by their Questions and Resolutions shown their interest in the pay of the humbler ministerial servants of Government, that this long desired improvement of the prospects of the ministerial employés of the United Provinces was not postponed in spite of the financial difficulties prevailing.

"Under Police, as I have in previous years remarked, a steady rise in the expenditure has continued and is bound to continue. I do not think that any member of this Council will dispute the expediency of ensuring that the pay of the subordinate police constitutes a living wage. It has constantly been a complaint in the press and among the public generally that the humbler policemen, constables and head-constables, are not given enough to live upon, and you cannot expect that they will always keep their hands clean and do their duty as they ought to if their pay is inadequate. Several schemes have been sent up by the Provinces; some have been sanctioned, and some of them put into force, or will very soon be put into force, for improving the pay of constables and bringing them more into accordance with the increased cost of living. The recommendations of the Police Commission, it is true, brought about certain progress in the pay of these humble servants, but by the time that the recommendations had come into force, the cost of living had already risen to such an extent, that the recommendations themselves did not go as far as had been anticipated. Consequently, in the present and subsequent years, we may expect a small increase, at all events, under this head. I have in previous years taken this opportunity of paying a tribute to the great value that the police services are to this country, and of deprecating any exaggeration of their defects which people are sometimes prone to make, forgetting that the few cases where they fail are brought much more prominently before the public than the vastly more numerous cases in which they render the most faithful and honourable service. During this year the police have been called upon, more especially in the Punjab and in Bengal, to cope with anarchy and increase of crime, and I would like to say on behalf of the Government of India how greatly the Government of India appreciate the way in which the police have responded to the extra call, in those Provinces especially, and generally all over India.

"Under 'Medical' a great part of the expenditure falls under the head 'Sanitation.' Perhaps I may be able to persuade my Hon'ble Colleague, the Finance Member, to break up the figures so that I may have some entirely my own to speak about. At present this has not been done, and under this head I only mention that, as in other branches of the public service, important schemes have had to be kept in abeyance, and anticipated progress has not been found possible. One of these schemes is the large Central Lunatic Asylum at Ranchi, the expenditure on which has been curtailed; and in the case of the School of Tropical Medicine in Calcutta, financial stringency

[9TH MARCH, 1916.] [*Sir Reginald Craddock; Sir William Meyer; Dr. M. N. Banerjee.*]

has made it necessary to delay the progress of the scheme that we had hoped might have been made by this time.

"Under 'Jails' I have only to renew the expression of regret I made last year that the promised Jail Commission remains in abeyance; but at all events we may hope that the time will not be long before that inquiry will take place, and that on a thorough examination of the jail system many anticipated improvements may be brought into realisation."

The Hon'ble Sir William Meyer introduced the following heads of the Financial Statement for 1916-17 :—

Revenue.	*Expenditure.*
Opium.	Refunds.
Interest.	Opium.
Mint.	Stamps.
Receipts in aid of superannuation.	Income-tax.
Exchange.	Interest on obligations other than the Public Debt.
Miscellaneous.	Mint.
	Civil Furlough and Absentee allowances.
	Superannuation Allowances and Pensions.
	Exchange.
	Miscellaneous.
	Reduction or Avoidance of debt.

He said :—"Sir, I need not add anything to what has been said on these matters in my opening speech introducing the Financial Statement and in the Secretary's Explanatory Memorandum."

RESOLUTION *RE* VERNACULAR MEDICAL TRAINING.

The Hon'ble Dr. M. N. Banerjee :—"Sir, the question of supplying sufficient men, trained in the western methods of treatment, for the civil and military administration of the country and for supplying the medical needs of the people, has engaged, from time to time, the attention of the Government since the commencement of medical education. As far back as 1839, Hindustani classes were opened in connection with the Calcutta Medical College to train a class of men called the native military assistants for military service. In 1852, Bengalee classes were opened to supply Hospital Assistants for civil administration. In 1873, the number of students in these classes numbering over 800, it was thought desirable to form them into a separate school at Sealdah. Vernacular medical schools of the same standard were also started in other parts of Bengal and in other Provinces. We have now fifteen such medical schools in all India—2 in Bengal, 2 in Bihar and Orissa, 1 in Assam, 3 in Bombay, 3 in Madras, 2 in the Punjab, 1 in the United Provinces and 1 in Burma.

"The course of study and standard of examination in the other Provinces are more or less the same as in Bengal. The idea underlying the constitution of these schools was briefly a lower preliminary education, a shorter course and a lower standard examination, the higher standard being reserved for the five Medical Colleges at Calcutta, Bombay, Madras, Lahore and Lucknow.

"But though the theory of a lower standard for obtaining the maximum number of trained medical men has been accepted and acted on by Government for such a long time, it has not been properly developed, as the object aimed at is often lost sight of. The students in the schools are not trained for the special purposes for which they are required, but are made to go over nearly the whole course of medicine as in the colleges, and to waste a great portion of their time and energy in acquiring such knowledge and doing such work

which can be of no use to them in after-life. The result is they are fitted neither for the higher nor for the lower standard of medical practice.

"Sir, in 1878, a Committee was appointed by the Bengal Government for the purpose of reporting on medical institutions and medical expenditure generally. The members of the Committee were J. O'Kinealy, C. Macaulay, A. G. Payne, J. Jones, S. C. Mackenzie, A. S. Lethbridge, R. Harvey. The following extracts from their report will illustrate my point :—

'In the opinion of the Committee, it is distinctly proved that, in spite of the elaborate education offered, they fail to become practitioners, and are by no means always useful assistants.'

'The teachers at Sealdah are able men, especially selected for the post. Why then is the result so unsatisfactory? The Committee would answer, because it aims too high, is too theoretical and too little practical for the class of men who have to be taught. The men leave the school with a minute book-knowledge of anatomical details, which they will not apply in practice and which are soon forgotten, but who cannot extract a tooth or set a fracture; men who will glibly run off pages of description of diseases of the heart and attempt to diagnose them by placing a stethoscope on the right nipple, who will pass an examination in Chemistry, but cannot test a specimen of urine, etc, etc.'

'Several medical officers consulted by the Committee deprecate any lowering of the standard of education. There seems to be some confusion of ideas,' however, between the standard aimed at and that actually realized or realizable. The former is a complete medical education; the latter is probably the lowest achieved by any medical school. The object of medical education is to train men to battle with disease; but this great end is often in danger of being overlooked in a misapprehension of the means to gain it. We turn out pretended chemists and anatomists instead of doctors, and a student's time is so taken up with the encyclopædic details of the many subjects in which he has to satisfy his examiners, that he has nothing left for that practical work by which alone he can learn to apply his theoretical knowledge to the relief of disease, etc., etc.'

'The Committee believe that under a more practical system of education the realisable standard may be very greatly raised without increasing the length of the curriculum from 3 years to 4 as has been proposed, etc, etc.'

'The experience of the medical members of the committee lead them to the belief that Hospital Assistants educated at schools at Agra, Nagpur and Lahore, are as a rule much better qualified than those educated at Sealdah, although none of these schools have so large a teaching staff or is so well supplied with appliances for teaching as in the Sealdah School.'

'It cannot be too frequently repeated that the object of the school is to train Hospital *Assistants* and humble village practitioners who are expected to be satisfied with incomes ranging from Rs. 10 to Rs. 60 a month.'

"Sir, nothing could have made clearer the intention of the Government or the object to be aimed at. And no words of mine can put more strongly the reasons for the present Resolution, the concluding paragraph being its very essence.

"But in spite of the intention of the Government, and in spite of the clear definition of the aim given by the Committee, the vernacular schools, impelled by the force of advancing western medical science and by a natural desire to improve themselves, have continued to raise their standards and have come to a point when they can scarcely be called vernacular schools. The local Acts of Medical Registration have completed the transformation. Lectures were already being given in English. The examining bodies appointed by the Acts have now ruled that the examinations also are to be conducted in English, and have raised the preliminary qualification to Matriculation. These rules about lectures and examinations have already affected the private institutions which have come into existence during the last quarter of a century to supply the demand for more medical education, and which followed the same standard as the old vernacular school. One of them has ceased to exist, and another is, I understand, going to wind up in April next. The inevitable result of all this will be to reduce still further the number of trained men, which has never been great, for the purposes of ordinary practice. In Bengal, in spite of its facilities for medical education, for it had the largest number of medical institutions (including the four private), the number of men with registrable qualifications is under 3,000. Is it not appallingly small for a population of 50 millions, in comparison with 30,000 qualified men for a population of 30 millions in England? It seems strange that with so few qualified

[9TH MARCH, 1916.] [*Dr. M. N. Banerjee.*]

men for the medical register, the passed students of the private medical institutions should be excluded from it. I venture to think it was neither wise nor just. It was not wise, as their inclusion would have more than doubled the number of registrable medical men, and it was not just as, when the Medical Acts passed in England, all those who were practising before the enactment were included in the register.

"So while the standard of medical education is being raised and the practising medical men are being weeded out, the dumb millions are entirely forgotten and allowed to die without medical treatment or left at the mercy of the quacks. It may be said that there are the *Kavirajes*, *Hakims* and practitioners of other methods. But times are changed and the majority of the population are for the western method of treatment, being impressed with its efficiency.

"What is the remedy? Sir, I humbly suggest that the only remedy lies in going back, if possible, to the old standard for medical schools, or, if that is not possible, to start new institutions with the humbler aim of training humble village practitioners. These institutions should have the same distinguishing features, *viz.*, a lower preliminary qualification, medium of instruction chiefly vernacular, and a short course. The first and second will be the same as for the old Hospital Assistants. But as regards the third, a thorough revision of the course of study is necessary.

"This is not a place for going into details. But the main principle is this. The students should have a thorough practical training which will make them efficient country practitioners. They must not waste their time in learning the details of such subjects as Chemistry, Botany, Anatomy, Physiology and Pathology. They should have a general knowledge of medicine, surgery and midwifery, and a thorough practical knowledge of diseases they will have to treat. Their hospital practice should be mainly at the out-door, as there they will find most of these cases. A hospital consisting of 25 to 50 beds, admitting those cases only with which they are concerned will be good enough for their in-door practice. Cases of unusual occurrence, or those requiring great surgical skill, such as appendicitis, hernia, cataract, ovarium tumours, etc., are out of place in such hospitals.

"These institutions are expected to turn out men who can set a fracture or reduce a dislocation, or do some minor surgery, men who can cure or give relief in diseases which prevail in this country, such as cholera, dysentery, bronchitis, pneumonia, tuberculosis, malaria, kala-azar, enteric and fevers.

"The modern methods for the treatment of some of these diseases are striking in their effects. Sir, I have seen cholera patients snatched away from the very jaws of death by intravenous saline injections. Antitoxin has taken away the horrors of diphtheria. Ayurvedic medicines have given way to injection of emetin in dysentery. Diabetic gangrene which was, in the early days of my practice, considered as universally fatal, has yielded to Staphylococus vaccine The effects of Salvarsan are a marvel. For kala-azar, which is as much a curse in this country as malaria, we have at last found a cure in the intravenous injection of antimony.

"Will our benign Government deny the benefit of all these modern methods of treatment to the dumb millions by not supplying men who can make use of them? Thousands can be saved if these men are supplied. The lives of the people are a valuable asset to the State. Will not the State be richer by rendering these treatments accessible to the people?

"The question then is not as to the necessity of institutions which will supply such men, but as to how far it is within the range of private politics. I have already said, and it has been admitted by the Bengal Committee mentioned above, that elaborate equipments and hospital arrangements are not necessary for them. With our very moderate equipments at Belgatchia, we have passed out from our vernacular classes a number of capable men who, though outside the Register, have been useful as country practitioners and as medical

assistants in the service of Government and of the various industries, such as tea, jute, mining and shipping. Our house physicians, selected from the same class, are quite competent to give intravenous injections or use other modern methods and appliances, and are entrusted with those duties at our hospital. I, therefore, feel confident that a school with moderate equipments and with a hospital of 25 beds and an out-door department attached to it, will serve the purpose. It will not be very costly, and when a few model schools of this description are started by Government, and the main difficulty of the medical institutions, the maintenance of a large hospital, is removed, private enterprise will follow the example, and, as it has done in the Arts and Sciences, numbers of private institutions will spring up to supplement the work of Government and supply the country with the much-needed medical help on a large scale.

"When these institutions come into existence, the question of examination will come up for consideration. A lower standard examination may be instituted either by the examining bodies now existing, or by any examining boards specially appointed for the purpose The passed students need not have degrees or diplomas, they may be called medical assistants, native doctors, or by any other name. But one thing is certain They must be recognised by the Government as qualified practitioners, or the scheme is bound to fail.

"I have read with interest a scheme proposed by the Mysore Government which is apposite to the point I am discussing With your permission, Sir, I will read a few extracts from the statement of the Financial Secretary :—

'The facts of the case are simple. Thousands of men in the rural parts of the State die every year for want of medical treatment even of the simplest kind The country is poor. We cannot maintain highly qualified medical men in every *hobli*. Under these circumstances, should we adhere with fatal pride to a high ideal of professional efficiency and leave the rural population to suffer and to die with no medical help? The problem stares us in the face and cries out for solution, etc., etc.'

'The Sub-Assistant Surgeon, as he is now trained, is useless for the object we have in view, *viz.*, the provision of village doctors. He is much above it.'

'We must revert to something like the native doctors of the old times. We must have a set of men who, while able to render useful medical help, will be satisfied to live as villagers among villagers on a modest income, etc., etc.'

'I think if we get hold of students who have read up to the lower secondary standard, and train them in a special institution for a period of two years, we may have the desired type of men.'

'Lieutenant-Colonel F. H. Foulkes, I.M.S., who has been consulted about this proposal, writes—I have been thinking of your scheme, and I like it the more I think of it. At first sight it does not seem sound, but it grows.'

"From this paper I also learn that a class of persons very much like the village doctor, and discharging the same functions, and called Practicantes exists in Spain. After an entrance examination they have a course of medical study for two years, at the end of which there is an examination for the diploma. If such a system is found necessary and useful in Spain, how much more necessary is it for India which is a much poorer country?

"These are facts which strengthen my case. I have taken pains to ascertain the views, in my Province, of the unofficial medical profession and of representative men outside the profession, and I can assure the Council that my Resolution has the hearty approval of all I consulted.

"In conclusion, may I be permitted to suggest, though the suggestion is not covered by the terms of my Resolution, that, if the Government takes a favourable view of my Resolution, they may advise the Local Administrations to appoint Committees consisting not only of medical experts but others who are not experts who will leaven expert knowledge with larger considerations and a wider knowledge of human affairs. Expert knowledge, in association with close grasp of actual needs and free from prejudices which technical knowledge is apt to engender, will, I hope, provide a solution of this difficult problem which will satisfy the needs of the country and the demands of public opinion.

[9TH MARCH, 1916.] [*Dr. M. N. Banerjee; Sir Pardey Lukis.*]

"With these words, Sir, I beg to move the Resolution which stands in my name, namely :—

'That this Council recommends to the Governor General in Council that Local Governments be asked to consider the advisability of establishing institutions for the purpose of giving medical students a special course of training conducted in the vernaculars so as to qualify them for ordinary medical practice in rural areas, and of encouraging and assisting deserving private enterprise to provide such medical education.'

The Hon'ble Sir Pardey Lukis:—"Sir, I have listened with much interest to the able speech of the Hon'ble Dr. Banerjee—a speech which raises a most important question in connection with the general medical education of Indian students, and one which must be regarded from an Imperial standpoint and not merely from a Provincial standpoint. As my Hon'ble friend has pointed out formerly, in the Government medical schools all over India, Sub-Assistant Surgeons (or Hospital Assistants, as they were then called) received their instruction in the vernacular of the province concerned, and it is only within the last few years that English has been adopted as the teaching medium. This change to the English language was necessitated by the paucity of vernacular works on scientific and medical subjects. I understand, however, that this dearth of suitable text-books is not as important a factor now-a-days as it was a few years ago, and I have it on the authority of the Editor of the 'Calcutta Medical Journal' that at any rate, so far as Bengal is concerned, several vernacular works now exist which are suitable for the lower standards of medical education. I am informed, moreover, that especially in Bengal there is a steady and increasing demand for medical men of a somewhat lower standard than that of the Sub-Assistant Surgeon, and it has been suggested that new medical schools should be started for imparting medical education in the vernacular, the object being to secure for the rural areas a class of practitioner corresponding very closely to the old type of Native Doctor, which has now practically disappeared. In support of this demand it is urged that the income obtainable from private practice in a village is not sufficient to attract either an Asssistant Surgeon or Sub Assistant Surgeon or at any rate not a highly trained one, but that it would probably prove sufficiently attractive to a passed student of a vernacular medical school who would be content to settle down there for the whole of his professional life.

"This is, I take it, the demand which the Hon'ble Dr. Banerjee has in view in proposing the Resolution now before the Council. If so, I am glad to be able to say that he has my most cordial support, even though I could not agree to the lowering of the standard of existing medical institutions. In giving this support, however, I should like to lay down three conditions which, personally, I consider essential to the success of the scheme. In the first place, it must be clearly understood that these vernacular schools should be entirely separate institutions. There must be no attempt to graft vernacular education upon any English teaching school which either is, or is about to be, affiliated to a recognised Indian University, or to a State Medical Faculty, or to any other duly authorised examining body, such as the College of Physicians and Surgeons of Bombay. One reason for this reservation is obvious. Any educationalist of experience will, I think, agree with me that there are grave objections to any attempt to combine in one and the same institution two grades of instruction, the objects and the medium of which are entirely different. But there is another reason which may possibly not occur to laymen and which is peculiar to medical schools, and does not affect the ordinary lay teaching institution. As Hon'ble Members are aware, every medical school has its attached hospital, the wards of which are filled by patients of the poorer class who, in return for gratuitous treatment, allow themselves to be regarded as teaching material, and who have to submit to examination by the students, to enable the latter to obtain practical skill in diagnosis. There is, however, a limit to physical endurance, and, in the interests of the sick and suffering, it is impossible to allow more than a limited number of students to examine a given patient I ask Hon'ble Members to consider, for instance, what would be the condition of a patient suffering, let us say, from heart-disease, after his chest had been auscultated and percussed, first by the University

[*Sir Pardey Lukis; Sir Reginald Craddock; Mr. Surendra Nath Banerjee.*] [9TH MARCH, 1916.]

students; then by those going up for the membership or License of the State Medical Faculty; and finally, by the vernacular class. One feels inclined to add—last of all the man died also. Now, this is to my mind the strongest reason why these vernacular schools should not be grafted upon any of the existing institutions. The next condition I should like to lay down is, that these vernacularly trained village practitioners should only be allowed to practise in rural areas. They are not wanted in the large towns from which I constantly receive complaints that there are already far too many practitioners, and that the income of these gentlemen is diminishing every day as a result of competition by retired compounders and men of that class. The advent, then, in the large towns, of yet another competitor in the shape of the village practitioner would not be welcomed by the members of the independent medical profession. My third and last condition would be, that Government, whilst encouraging and assisting deserving private enterprises, should insist on some form of outside control and inspection so as to ensure strict adherence to whatever standard might ultimately be decided on. This is, I consider, essential in the interests of the public, for it must be remembered that, even as regards the proposed class of village practitioner, there is, as I pointed out in Council the other day, a limit below which it is not safe to go without incurring the risk of bringing into discredit the western system of medicine. With the reservations, however, which I have mentioned, and on the distinct understanding that this new class of medical man will be introduced for a definite object, and with a limited sphere of action, I consider that he will serve a useful purpose, and for that reason, it gives me great pleasure to support the Resolution which, I trust, the Government of India will be able to accept."

The Hon'ble Sir Reginald Craddock:—"Sir, the Resolution of the Hon'ble Dr. Banerjee has been worded in general terms, and we are therefore able to accept that Resolution, and as the Hon'ble Surgeon General Lukis has stated, there are many reasons why we should feel sympathy with the objects which Dr. Banerjee has in view. I think most of us remember men of the hospital assistant class, as they were called, who had been trained in a vernacular school and who had no knowledge of English, and I know that some at least of these men, had obtained the confidence of the public, were very well regarded by their Civil Surgeons, and certainly made considerable private practice. We have not had time in the interval, since Dr. Banerjee proposed his Resolution, to look up the whole history of the subject and to find out exactly why, in the several Provinces, vernacular instruction has dropped, and whether there were at that time reasons other than financial for not continuing schools of this type.

"This history we shall now be very glad to investigate, and in the meantime we are perfectly ready to ask the Local Governments to consider the advisability of establishing such institutions for the purposes mentioned, and of encouraging and assisting deserving private enterprise to provide such medical education, if full and complete examination of the subject shows that that course is both desirable and feasible. We, of course, cannot commit ourselves further than this. The Hon'ble Surgeon General Sir Pardey Lukis has mentioned certain reservations which would limit any practical recommendations to which he would be prepared to subscribe, and it is possible that the Local Governments may find other reasons or other reservations that they would like to make on this subject. But we are perfectly willing to address Local Governments in this sense, and to do anything that we can in order to see that the subject is thoroughly examined and is not summarily rejected by those consulted.

"I have much pleasure, therefore, on behalf of the Government, in accepting this Resolution of Dr. Banerjee."

The Hon'ble Mr. Surendra Nath Banerji:—"Sir, I just want to say a word or two with reference to this Resolution. I beg to support the Resolution, which is in accordance with Bengal public opinion, as my friend the

Mover has observed, and as I have been able to ascertain in consultation with medical friends. The need of medical practitioners of the kind who will be *alumni* of these schools is obvious. The other day the Magistrate of Bankura reported that in his district 30,000 people died without medical aid of any kind whatsoever. That is an official statement made by a district officer upon his own responsibility and after inquiring into the facts of the case In the same district we have another telling fact The doctor was ill—I think he was in charge of a sub-divisional dispensary—and he could not get any medical aid at all. It was a case of 'physician heal thyself.' That being the state of things, it is obvious that a Resolution of this kind, if accepted by Government and given effect to, will do a great deal of good.

"But, Sir, I have a word or two of comment with regard to the reservations and the qualifications which have been suggested by the Hon'ble the Surgeon-General. With reference to one of these qualifications I find myself in complete disagreement with him. He says that the graduates of these colleges—call them graduates or call them *alumni*, as you please, it does not matter—ought to be debarred from practising in the towns I do not think, Sir, that any disqualification of that kind ought to be imposed upon them. It is a case of the survival of the fittest. Some of these doctors may turn out to be eminent medical practitioners, gifted with a genius for diagnosis, born physicians or born surgeons who might be able to do a lot of good. And why should you exclude them from practising in the towns ? Why should you deprive the urban population of the benefits of their skill, whatever that may be ?

"It seems to me that that is a disqualification, a reservation, which cannot commend itself to public opinion, and I for one am not in favour of it. There ought to be no disqualification of that kind. Let the public make their choice. If they want one of these rural doctors, why should they not be allowed to avail themselves of his services ? I do hope that that disqualification will not be insisted on, and that it will be withdrawn after mature consideration.

"Subject to these comments, and having in view that the public opinion of the Province which I have the honour to represent in this Council is entirely in favour of this Resolution, I beg to accord my cordial support to it."

The Hon'ble Pandit Madan Mohan Malaviya:—"Sir, I beg to support this Resolution. It has not been brought a day too soon before Government for consideration. The want of sufficient medical assistance has been a matter which has again and again been brought to the notice of Government ; even in moving this Resolution the Hon'ble Doctor Banerjee has pointed out how small is the number of medical men qualified to render assistance to people who need it. I hope, however, that the proposal before us will not be regarded as any excuse or as any reason for not endeavouring to multiply the number of medical men of the higher type who ought to be available to the country. The need for such medical men is great, and the number of medical institutions which exist in the country for turning out men of University qualifications in medicine is small. The restrictions that have been imposed, and are being imposed, are regarded as creating difficulties in the way of people obtaining even the medical assistance which is available to them at present. But apart from that, I think that there is room and great room for a step in the direction which has been recommended. Such a step ought to have been adopted long ago, but it is a matter of thankfulness that the Government is now going to recommend it to the consideration of the Local Governments. The vernacular ought to be the medium of instruction for every subject, except a language, and in no subject could this medium be more usefully employed than in giving instruction in medicine. I agree that this matter ought to be taken up by Local Governments, and I hope that when it is, all the questions which have been raised here, and others which may suggest themselves, will be carefully gone into before a scheme is devised.

"One thing I wish to add. I join with my friend the Hon'ble Babu Surendra Nath Banerji in the view that the reservations as to the area in

students; then by those going up for the membership or License of the State Medical Faculty; and finally, by the vernacular class. One feels inclined to add—last of all the man died also. Now, this is to my mind the strongest reason why these vernacular schools should not be grafted upon any of the existing institutions. The next condition I should like to lay down is, that these vernacularly trained village practitioners should only be allowed to practise in rural areas. They are not wanted in the large towns from which I constantly receive complaints that there are already far too many practitioners, and that the income of these gentlemen is diminishing every day as a result of competition by retired compounders and men of that class. The advent, then, in the large towns, of yet another competitor in the shape of the village practitioner would not be welcomed by the members of the independent medical profession. My third and last condition would be, that Government, whilst encouraging and assisting deserving private enterprises, should insist on some form of outside control and inspection so as to ensure strict adherence to whatever standard might ultimately be decided on. This is, I consider, essential in the interests of the public, for it must be remembered that, even as regards the proposed class of village practitioner, there is, as I pointed out in Council the other day, a limit below which it is not safe to go without incurring the risk of bringing into discredit the western system of medicine. With the reservations, however, which I have mentioned, and on the distinct understanding that this new class of medical man will be introduced for a definite object, and with a limited sphere of action, I consider that he will serve a useful purpose, and for that reason, it gives me great pleasure to support the Resolution which, I trust, the Government of India will be able to accept."

The Hon'ble Sir Reginald Craddock:—"Sir, the Resolution of the Hon'ble Dr. Banerjee has been worded in general terms, and we are therefore able to accept that Resolution, and as the Hon'ble Surgeon General Lukis has stated, there are many reasons why we should feel sympathy with the objects which Dr. Banerjee has in view. I think most of us remember men of the hospital assistant class, as they were called, who had been trained in a vernacular school and who had no knowledge of English, and I know that some at least of these men, had obtained the confidence of the public, were very well regarded by their Civil Surgeons, and certainly made considerable private practice. We have not had time in the interval, since Dr. Banerjee proposed his Resolution, to look up the whole history of the subject and to find out exactly why, in the several Provinces, vernacular instruction has dropped, and whether there were at that time reasons other than financial for not continuing schools of this type.

"This history we shall now be very glad to investigate, and in the meantime we are perfectly ready to ask the Local Governments to consider the advisability of establishing such institutions for the purposes mentioned, and of encouraging and assisting deserving private enterprise to provide such medical education, if full and complete examination of the subject shows that that course is both desirable and feasible. The restrictions that have been imposed, and are being imposed, are regarded as creating difficulties in the way of people obtaining even the medical assistance which is available to them at present. But apart from that, I think that there is room and great room for a step in the direction which has been recommended. Such a step ought to have been adopted long ago, but it is a matter of thankfulness that the Government is now going to recommend it to the consideration of the Local Governments. The vernacular ought to be the medium of instruction for every subject, except a language, and in no subject could this medium be more usefully employed than in giving instruction in medicine. I agree that this matter ought to be taken up by Local Governments, and I hope that when it is, all the questions which have been raised here, and others which may suggest themselves, will be carefully gone into before a scheme is devised.

"One thing I wish to add. I join with my friend the Hon'ble Babu Surendra Nath Banerji in the view that the reservations as to the area in

[*Pandit Madan Mohan Malaviya; The Vice-President; Mr. Vijiaraghavachariar.*] [9TH MARCH, 1916.]

which such practitioners should practise ought to be removed. Apart from every other consideration, such a reservation will most certainly defeat the object which the scheme has in view. Once announce that students who have been trained in the proposed institutions shall not be permitted to practise their profession except in rural areas, and you will shut out a number of students who would otherwise be willing to join them. This is an aspect to which full consideration should be given I hope that when the matter comes before the Provincial Governments and Committees are appointed, as has been suggested, they will go thoroughly into the question.

"There is one other point to which I should like to invite attention for a moment, and that is the great need, the insistent need, for the Government to recognise, even at this day, the justice of providing means for imparting instruction in the indigenous systems of medicine. The Mover of the Resolution has said a great deal in regard to the need for promoting instruction in western medical science. I do not yield to anybody in my admiration for the triumphs which that science, and particularly modern surgery, have made. I feel thankful, as much as any other member, to those who have brought about those results for the amelioration of human suffering. But I know how vast is the service, how immeasurable is the service, which the indigenous systems of medicine have rendered to mankind in this ancient land and this extensive Empire. Even to-day these systems attract and serve a much larger number of the population than the western system of medicine, and I think it is only right that the Government should consider whether it ought not to help and encourage these systems."

The Hon'ble the Vice-President:—"Order, Order. I must ask the Hon'ble Member to keep strictly to the Resolution. This does not arise on the present Resolution, which deals with the ordinary system of medicine and not with the indigenous systems."

The Hon'ble Pandit Madan Mohan Malaviya:—"I bow to your ruling, Sir. I will take another opportunity to say what I wish on this point. I hope that the need for supplying the country with men trained in the medical systems which are best suited to serve the people of this country, will be much more carefully looked into and much better provided for than it has been in the past."

The Hon'ble Mr. Vijiaraghavachariar:—"I have only one word to say, Sir. I do not quite understand the Resolution nor its scope. I do not very well understand the nature of support given to it by the Hon'ble the Surgeon General Sir Pardey Lukis, and the Hon'ble the Home Member on behalf of the Government.

"I view this Resolution altogether with suspicion. It is a sorry device invented by those who want to support the Bogus Medical Degrees Bill. I said so at the time when it was mentioned to me. I am not a believer in 'born surgeons.' We occasionally hear of a born poet or a born singer, but not of a born architect or a born surgeon. I am one of those who believe that in the matter of medicine, the saying—'Drink deep or taste not the Pierian spring'—applies. The Hon'ble Mr. Surendra Nath Banerjee told us that a large number of people at Bankura died for want of medical aid; but he has not told us whether medical aid, such as is contemplated by this Resolution, would add to the mortality or diminish it. What is the good of a Resolution like this? It is better to leave things to nature, to pure water and pure air and even to grandmother's cures than to trust to medical men of this kind, ill-equipped, ill-taught—taught in a language in which they could not exactly understand the words translated. May I know the words in general vernaculars for oxygen, or hydrogen? May I know what the word for kidney is? What are the exact words for white corpuscles and coloured corpuscles of blood, and what are the particular vernacular words for the various glands? What is the good of putting forward a Resolution without first realising the

[9TH MARCH, 1916.] [*Mr. Vijiaraghavachariar; Rai Ghanasyam Barua Bahadur; Mr. Madhu Sudan Das.*]

consequences of that Resolution? I believe that vernacular education in western medical science would be a huge farce—a very huge farce. What is here contemplated is, if we can, to catch hold of some poor students and to give those students a travesty of lessons in western medicine and western surgery. A far better position would be to catch hold of institutions for Unani and Ayurvedic systems of medicine, and there to impart in English language, instruction in Physiology and Anatomy and Chemistry. Where there is such real education, with some substantial knowledge of Physiology and Chemistry, the students would know where and how to look for more knowledge. Ayurvedic and Unani students might then be so equipped with the necessary elementary knowledge—elementary but accurate knowledge so far as it goes—in western science as probably to be able to dress the wounds of a man fairly well. And therefore I am obliged to say frankly and freely that I suspect this Resolution, I am bound to oppose it and I oppose it."

The Hon'ble Rai Ghanasyam Barua Bahadur:—"Sir, the Resolution has already been accepted by the Hon'ble Surgeon General Sir Pardey Lukis and the Government, and there is no need of speaking any more in support of it I have no doubt there is great force in the reasons advanced by the Hon'ble Dr. Banerjee that such a class of medical practitioners will be useful, and that there is room for them. I am sorry I do not quite follow the Hon'ble Mr. Vijiaraghavachariar in the objections he has put forward. Even if such a class of practitioners happen to kill men, they will certainly kill less than the ordinary run of untrained quacks, and I think they will be very good auxiliaries to the higher classes of practitioners. I have risen simply to associate myself with my friend the Hon'ble Mr. Surendranath Banerjee in the protest he has made against the third condition laid down by the Hon'ble Member who replied to the Resolution. I would point out that, in addition to the reasons which have been given by the Hon'ble Mr. Banerjee, there is another strong reason why that condition should not stand. What are the poor of the towns going to do? These practitioners are meant for the poor. The bigger practitioners in the towns of course cannot be approached by these poor people, and it cannot be that all these poor people will be able to get the necessary aid from the hospitals. Some of them will require medical aid in their homes, and if they are to get it, we must let these practitioners practise in towns too. There is not much reason for the apprehension that the superior classes of practitioners will be injuriously affected by them; if any body is capable of interfering with them, it will only be by virtue of superior natural talent. In many cases I think they will rather be very useful assistants to the better qualified grades of the profession. I, therefore, say that there is very strong force in the reasons put forward by the Hon'ble Mr. Surendranath Banerjee against the third condition proposed by the Hon'ble Sir Pardey Lukis, and I hope he will be pleased to omit it. With those remarks, I support the Resolution."

The Hon'ble Mr. Madhu Sudan Das:—"Sir, I did not expect that there would be any opposition to a Resolution of this kind This is a Resolution which aims at ameliorating the condition of suffering humanity of the poorer class. Objection has been made on the ground that these men would not have sufficient scientific education, and by way of illustration reference was made to certain organs of the human body, and it was said that vernacular students would not be familiar with the English names for these things. Does the quack who administers medicine which he has learnt from his grandmother understand what is the meaning of the word 'kidney'; does he know the location of the kidney in the human body? Perhaps he would look for it in the head. These are the people who are now entrusted with the precious lives of millions who constitute the backbone of the nation. The Hon'ble Sir Pardey Lukis, with his experience of the country and with his sympathetic attitude towards Indians, has supported this Resolution. The poor people under this

[*Mr. Madhu Sudan Das; Pandit Madan Mohan Malaviya; The Vice-President; Dr. M. N. Banerjee*] [9TH MARCH, 1916.]

arrangement would have doctors whose services would be available to them within their means. The object of this Resolution is not to increase mortality in the villages, but to improve public health, and it is because I believe in that object, that I support this Resolution.

"There is one point, however, Sir, that I do not understand. It may be that sitting here as I do at a distance I could not follow the speeches. In the matter of speeches, distance does not lend enchantment, as the poet says. The Hon'ble Mover said—and I understood the Hon'ble Mr. Banerjee said—that so far as Bengal was concerned, books were available; but there are other parts of India where books in the vernacular are not available."

The Hon'ble Pandit Madan Mohan Malaviya:—"Are you sure?"

The Hon'ble Mr. Madhu Sudan Das:—"I said 'other parts'?"

The Hon'ble Pandit Madan Mohan Malaviya:—"Are you sure of the other parts?"

The Hon'ble Mr. Madhu Sudan Das:—"'Other parts' does not mean the part you know."

The Hon'ble the Vice-President:—"Order, order."

The Hon'ble Mr. Madhu Sudan Das:—"Well in that case, I suppose when the Resolution is accepted, I hope it is the intention of Government that every effort shall be made to introduce books,—to invite men to write books in the vernacular. The Government have to do something in that direction if this Resolution is to have any practical effect. One thing I should like to say, and that is, that it is not impossible to teach in the vernacular, because I have come across lady students in the Cuttack Middle School—which teaches up to the standard of Sub-Assistant Surgeon—who do not know a word of English, but who have passed successfully and are doing useful work. Of course we have to import into the vernacular certain English terms. With these remarks, I beg to give my most hearty support to the Resolution."

The Hon'ble Dr. M. N. Banerjee.—"Sir, I am pleased to find that Hon'ble Members have all spoken in support of my Resolution, with the exception of one, Mr. Achariar. With regard to what Mr. Achariar has said, I should like to say one or two words. I think it is rather late in the day to question whether medicine can be taught in the vernaculars, because it is an actual fact that, in Bengal at least, it was being taught for over half a century. As I said in my speech, in 1852, vernacular classes were started in the Calcutta Medical College. And until 4 or 5 years ago medicine was being taught in the vernacular languages, and the students who passed out of those vernacular schools were the hospital assistants who have been very serviceable not only to Government, but also to the people at large. They were the regular doctors in rural areas and in villages. So that we have not to go on theories, but on what is an established fact. As regards the medical literature, I can say this, that an application was made to the Government of Bengal by the 'Bangiya Sahitya Parishad' praying that teaching of medicine in vernaculars be not done away with. It was about a year ago, and the Government sent this for consideration to the State Medical Faculty of which I am a member. I took with me medical books in Bengali in all the subjects and showed them to the members of the Faculty. The books were good, and the illustrations in some of them were exceptionally good and attracted the attention of the members. One member thought that the only disqualification was, that the illustrations were from German plates. The question was

[9TH MARCH, 1916.] [*Dr. M. N. Banerjee.*]

discussed and the outcome of the discussion was that Dr. S. P. Sarbadhikari and myself, who were for reverting to vernacular teaching in the schools, were outvoted by the majority of officials, but not on the ground that there are no books in the vernacular.

" Then as regards Mr. Achariar's statement that the passed students of the lower standard schools would add to the mortality, I can assure him that they would reduce the mortality by nearly 50 per cent., from my experience of the students of the vernacular schools elsewhere and at the institution at which I have been teaching for the last 25 years, I can tell him that even if they do not reduce it by 50 per cent., they would reduce it materially. I will remind Mr. Achariar of a proverb which we have in Bengal that 'a blind uncle is better than no uncle.' One would like to have, when ill, a doctor who, though not highly qualified, will serve his purpose than to have no doctor at all.

" I am very grateful to Sir Pardey Lukis for having accepted my Resolution with certain reservations. As regards the reservation about the lowering of the standard in existing institutions, I think he is right, because it appears that there is need for all those institutions, which have assumed a higher standard of education. As regards control and inspection by Government, of course that is quite essential. Otherwise, there will be one standard for one school and another for another school, as we have at present in the existing private institutions, and there will be great confusion. The standard of medical education of the proposed institutions should be uniform, and Government ought to be responsible for maintaining that standard. But as regards the condition which he imposes that those passed students should not be allowed to practise in urban areas, I think it is undesirable and very difficult of application. For, when the law allows any quack to practise in towns, why should a trained man be disallowed by law from practising in town areas. I think it will go against the success of the whole scheme. I hope Sir Pardey Lukis will reconsider the matter. As for the other restrictions I accept them without any reservation; and I express my thanks to Government for having accepted this Resolution."

The Resolution was put and accepted.

The Council adjourned to Wednesday, the 15th March, 1916.

A. P. MUDDIMAN,

Secretary to the Government of India,
Legislative Department.

DELHI:

The 17th March, 1916.

APPENDIX A.

(Referred to in Answer to Question 1.)

Statement showing the number of elected members as compared with the total number in the Municipalities and the District Boards of the different Provinces of India from 1910-11 to 1914-15.

Province.	Year.	NUMBER OF MEMBERS.			
		Municipalities.		District Boards.	
		Elected.	Total.	Elected.	Total.
Madras	1910-11	466	940	314	696
	1911-12	449	896	359	765
	1912-13	490	947	356	770
	1913-14	492	961	354	772
	1914-15	504	980	362	779
Bombay	1910-11	897	2,183	248	544
	1911-12	913	2,130	242	544

APPENDIX B.

(Referred to in Answer to Question 4.)

Memorandum of measures taken by the Railway Board since 1905 to promote the comfort and convenience of Intermediate and 3rd class passengers.

Immediately after assuming charge of their office in 1905 the Railway Board issued a special letter to all the principal railway administrations calling their attention to the desirability of making early provision in respect of the following matters :—

(*a*) Facilities for passengers to obtain their tickets a longer time before the departure of the trains by which they intend to travel.

(*b*) Facilities for examining the tickets of 3rd class passengers, both at terminal and roadside stations, to enable them to have ready access to the proper platforms and take their seats without the crush which is liable to occur.

(*c*) Adequate sitting accommodation for 3rd class passengers in carriages so as to prevent the overcrowding of trains.

The Consulting Engineers were asked to watch the progress made by railways under their control in regard to the provision of the several facilities, and the reports received indicated that a great deal had been done to give effect to the wishes of the Railway Board.

Section 62 of the Railways Act gives Government power to require any railway administration to provide and maintain in proper order, in any train worked by it which carries passengers, such sufficient means of communication between passengers, and the railway servants in charge of the train as they approve. Special action was taken by the Railway Board in 1906 to ensure that wherever practicable such means of communication should be provided. Appendix 20 of the Administration Report for the year 1914-15 shows for each of the more important systems the number of mail, passenger and mixed trains which had been so fitted up to the 31st March 1915 and the total number of trains run. Instructions have also been issued by the Railway Board for the fixing of a notice in each carriage indicating the method of using the means of intercommunication provided.

The Railway Board have issued orders directing that boards should be attached to the outside of each compartment reserved for women indicating, in English and the vernacular of the districts in which the carriage is run, that these compartments are for women only. A suggestion has recently been made that a figure of a woman painted on the doors of carriages reserved for women would prove of advantage as an indication to illiterate women of the carriages which have been specially reserved for them. Experiments are at present being made on the North Western Railway to ascertain whether this method of distinguishing women's reserved compartments will serve a useful purpose.

Another matter which has engaged the attention of the Railway Board is the improvement of the supply of refreshments for Indian passengers. Special enquiries were undertaken by the Board to ascertain the nature and efficiency of the arrangements made by various railways for the inspection of licensed refreshment vendors. The practice of railway administrations is not uniform, but in each case means have been adopted for inspecting the wares offered for sale by these vendors, and for ensuring, so far as possible, that they shall be clean and wholesome.

Some years ago the Madras and Southern Mahratta Railway Company introduced special cars fitted with conveniences for the sale of refreshments for Indian passengers and accommodation for washing before taking food in accordance with caste requirements. These carriages are run on all important mail and passenger trains on the system. The Railway Board brought this to the notice of all the principal railway administrations, supplying them with

a note showing in detail the arrangements made by the Madras and Southern Mahratta Railway. As a result, several of the more important administrations have experimented with the running of dining cars for Indian passengers The experiment, owing it is understood to the caste prejudice of passengers, has proved a failure on the East Indian, Bengal Nagpur, and Eastern Bengal Railways. In the Punjab, on the other hand, it has proved eminently successful, and the North Western Railway propose to build a number of refreshment cars for Indian passengers. At present the Railway Board are in communication with railway administrations regarding the further improvement of the arrangements made for supplying refreshments to Hindu and Mahomedan passengers.

In 1909 the Railway Board, as an experimental measure, authorised the appointment on the North Western and Oudh and Rohilkhand Railways of a number of officials of a new class designated "Passenger Superintendents." These officers were recruited from among retired Indian officers of the Indian Army. They were given a distinctive uniform and placed under the charge of a special officer of the Traffic Department. Their duties were—

(*i*) to attend to the complaints of the humbler class of passengers and to assist them to find room in trains by directing them to carriages where accommodation was available;

(*ii*) to supervise the supply of refreshments by platform vendors, and generally to do what is in their power to secure the greater comfort and convenience of passengers at railway stations.

The experiments having proved successful, the appointment of these Passenger Superintendents has become permanent on the railways on which they were first introduced and similar appointments have been created on several other railways.

It is impossible to give in detail a statement of all the works which have been carried out during the last decade with a view to increasing the comfort and convenience of 3rd class passengers, but it may be stated that a great deal has been done in the following general directions:—

(*i*) The construction of enlarged and improved waiting shed accommodation.

(*ii*) The substitution of high for low level platforms at the more important passenger stations.

(*iii*) The substitution of new and improved 3rd class passenger carriages generally of the bogie type and of the same dimensions as those used for passengers of the higher classes. These modern carriages are fitted with latrines, upper berths and racks, while the roofs are of improved design with greater heat-resisting properties.

(*iv*) The provision of passenger instead of mixed trains on all the more important routes and the introduction of 3rd class express trains running at practically the same speed as mail trains.

(*v*) The introduction of improved lighting, mainly electric, in 3rd and intermediate class carriages.

(*vi*) The improvement of the arrangements made on special occasions at places of pilgrimage or fairs. Of what has been done in this direction, the account recently communicated to the press, of the arrangements made by the Oudh and Rohilkhand Railway on the occasion of the Kumbh Mela at Hardwar in April last, is an indication.

Any further improvement in the immediate future in the direction of the provision of more 3rd class accommodation is at present rendered extremely difficult, apart from the necessity for economy imposed upon railways by the war, on account of the impracticability of obtaining raw material required for the building of coaching vehicles. What is possible will, however, be done during 1916-17 by the rebuilding of obsolete stock.

The Railway Board have recently arranged for a special census of the actual number of passengers in each train daily on the routes regarding which

there have been most complaints of overcrowding. The reports received show that, though there has undoubtedly been serious overcrowding on occasions, overcrowding is the exception even on these routes specially selected for examination on account of complaints received.

The results are at present being examined by the Railway Board with a view to seeing whether by any re-arrangement of train service the overcrowding can be reduced A special report has recently been received on the conveyance of pilgrim traffic, and is now under the consideration of the Railway Board. They propose to adopt immediately such of the recommendations contained in this report as are found on enquiry to be practicable.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall Summary for the seven days ending at 8 hrs. on Thursday, the 16th March 1916, based on the Indian Daily Weather Reports of the period.

1. Unsettled conditions prevailed along the northwest frontier, and towards the end of the week resulted in light local rainfall in north Baluchistan and the hills of the North-West Frontier Province. Thunderstorms gave a few showers in the extreme south of the Peninsula, but over the rest of the country the weather was dry.

Temperature was very high and the air unusually dry over most of northern India.

2. *Burma.*—No rain fell.

Northeast India, including Orissa.—Dibrugarh had a light fall of rain.

The United Provinces, Central India and the Central Provinces.—Weather was dry.

Northwest India.—Local falls of rain occurred on the 15th in north Baluchistan and the North-West Frontier Province.

The Peninsula.—Light thunder showers were reported from Trivandrum and Tinnevelly.

3. The amounts recorded were all below half an inch except in the case of Trivandrum (0·55″).

4. The week was rainless except in Baluchistan and Malabar, but while the total fall was equal to the small normal amount in the latter division it was 75 per cent in defect in the former. Ordinarily no rain falls at this time of year in Rajputana East, Gujarat, Central India West, the Konkan and the Bombay Deccan, but in Assam and Kashmir three-quarters of an inch may usually be expected.

The rainfall from 3rd December to date is 20 per cent or more in defect over by far the greater part of the country, the deficiency amounting to about three inches in the Punjab East and North, and between two and three inches in Kashmir, the Punjab Southwest, Chota Nagpur, Orissa, Bengal, Assam, Madras Southeast and Madras Coast North. There has been no rain whatever in Sind, Rajputana, Gujarat, Hyderabad South, the Madras Deccan and the Konkan, but no rain usually falls during this period in the Konkan. The deficiency is also large in the North-West Frontier Province, Baluchistan, Central India East, the United Provinces, Bihar, the Central Provinces East and Malabar. The rainfall of the period is 20 per cent or more in excess in the Bay Islands, Burma, Central India West and the Bombay Deccan, and differs from the normal by less than 20 per cent in Berar.

Division.	Rainfall data for week ending on 16th March 1916.			Rainfall data from 3rd December 1915 to 16th March 1916.			Percentage departure from normal.	
	Actual rainfall in inches.	Normal rainfall in inches.	Excess or defect in inches.	Actual rainfall to date in inches.	Normal rainfall in inches.	Excess or defect in inches.	This week.	Last week.

Dated the 16th March 1916.

R. A. MANT,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 11th March 1916.

Burma.—Two districts report light rain. Threshing and winnowing of winter rice has been nearly completed in Upper Burma. Cultivation of spring rice and harvesting of miscellaneous crops are proceeding. Sowing of summer rice has commenced. Standing crops are in satisfactory condition. Cattle are generally healthy. The price of unhusked rice at Rangoon has fallen slightly to Rs. 107 per hundred baskets and is still above normal.

Assam.—The weather is dry and hot. Rain is generally wanted for agricultural operations. Harvesting of mustard has been practically finished. Pressing of sugarcane, preparation of land for *jhum* cultivation and hoeing and pruning of tea still continue. Ploughing of land for and sowing of autumn rice and jute are going on. The outturn of mustard and sugarcane is fair. Scarcity of fodder is reported from Cachar and Kamrup and of water from the latter district. Cattle disease is reported from five districts. The price of common rice is stationary.

Bengal.—No rain fell during the week. Preparation of fields for jute and other autumn crops continues but the progress of the operations is retarded for want of rain. Harvesting of potatoes, oilseeds and of other spring crops is proceeding and that of sugarcane is nearing completion. Sowing of jute and autumn paddy is going on in low lands in certain districts. Prospects of the spring crops are not very satisfactory on account of the prolonged drought. Scarcity of fodder is being felt in Bankura. Cattle disease is reported from seven districts. The average price of common rice for the Province has fallen slightly as compared with that of the preceding week.

The weekly report on scarcity is as follows :—In the Bankura district distress is tending to increase. Fodder is getting scarce Private charitable funds are giving assistance. Loans continue to be given freely. The price of rice is 9 seers per rupee. The number of persons on relief works was 13,642 and on gratuitous relief 19,182, total 32,824. The number of persons relieved on private works was 6,302. In the Tippera district considerable distress prevails in the affected areas in the north of the Brahmanbaria sub-division but it is not acute in the Sadar sub-division. Rain is wanted for ploughing. Distribution of loans continues. The Sarail Wards Estate is giving assistance. But for sporadic cholera cases the public health is good. The price of rice is 7½ seers per rupee. The number of persons on relief works was 4,469 and on gratuitous relief 5,579, total 10,048.

Bihar and Orissa.—There was no rain during the week. Harvesting of spring crops and preparation of lands for the next season's crops are in progress. Pressing of sugarcane continues and planting of the crop for the next season has commenced. Standing crops are doing well. The average price of common rice has remained almost stationary as compared with that of the preceding week. The supply of fodder and water is sufficient except in parts of Hazaribagh where the water supply is reported to be poor. Cattle disease is reported from twelve districts. The attendance of persons on test works in Manbhum was 2,713 and in Singhbhum 2,630. Gratuitous relief was given to 272 persons in Manbhum. The condition of standing crops in the Feudatory States of Orissa is good.

United Provinces.—No rain fell during the week and the need for more rain is still reported from some north-western districts where unirrigated crops are suffering. Harvesting and threshing of spring crops, sowing and pressing of and preparation of land for sugarcane, sowing of extra crops, irrigation of poppy and extraction of opium are in progress. Standing crops are doing well. Agricultural stock is in good condition and very little cattle disease now exists. Fodder and water are ample everywhere though the former still continues dear in places. Markets are well supplied. Prices are falling practically everywhere except in the hill districts.

Punjab.—The weather is dry. Rain is urgently wanted everywhere. The condition and prospects of wheat and other crops on irrigated areas are generally fair and on unirrigated areas bad in the south east and poor elsewhere. Unirrigated crops are withering for want of rain. Sowings of extra spring crops and sugarcane continue in some districts and are generally normal. Cattle are generally healthy but are weak in some districts owing to general scarcity

of fodder. Water for drinking and canal irrigation is generally sufficient. Prices show a slight downward tendency and are generally between warning and scarcity rates. Price of wheat:—Ambala and Rawalpindi 9½, Ferozepur and Lahore 10 and Lyallpur 11 seers per rupee.

North-West Frontier Province.—The week was rainless. The weather is clear and temperate. Rain is badly required in Dera Ismail Khan. Standing crops are average in Peshawar and in irrigated areas of Dera Ismail Khan, above average in Bannu and poor in unirrigated areas of Dera Ismail Khan. Harvesting of sugarcane is still proceeding in the Bannu tahsil with outturn below average. Sowings of sugarcane in the Bannu tahsil and of sugarcane, tobacco, onions, melons, *moth*, maize, *chari* and vegetables in Peshawar continue. The condition of cattle is good except in unirrigated tracts of the Lakki tahsil of the Bannu district where it is bad. Fodder is sufficient except in the Nowshera tahsil of the Peshawar district and in unirrigated areas of the Lakki tahsil of the Bannu district and dear in Dera Ismail Khan. The public health is good. Prices are high but are generally stationary.

Jammu.—No rain fell during the week. Prices are fluctuating. Wheat sells from 8 to 10 and maize from 12 to 18 seers per rupee. The condition of standing crops is average. There is no cattle disease. Fodder is sufficient except in a few places.

Kashmir.—The rainfall during the week was insignificant. The condition of standing crops is fair. Cattle are generally healthy. Fodder is insufficient in Barramulla. Prices are high.

Rajputana.—The weather is growing hot. Harvesting of spring crops has commenced in most places. Standing crops on wet areas are in fair to good condition. Fodder is generally scarce. Cattle are generally in a weak condition and are becoming more emaciated owing to the deficiency of fodder in the affected areas. Cattle disease prevails in Banswara and Kotah. The water supply is generally sufficient except in Kotah and Tonk. Prices are generally stationary. The number of persons on test works in Merwara was 2,418 and in Kishengarh 1,495. The number of persons on relief works in Karauli was 727. Gratuitous relief was given to 2,149 persons in Merwara.

Central India.—No rain fell during the week. Rain has been insufficient in the northern districts of Gwalior, in some parganas of the Mehidpur and Rampura-Bhanpura districts of the Indore State and in the Orchha, Baoni and Beri States of the Bundelkhand Agency and sufficient elsewhere. Sugarcane is being sown in Gwalior and watered in Malwa. Harvesting of spring crops is in progress almost everywhere. Standing crops are generally in good condition except in dry tracts of the northern Gwalior. The probable outturn is fair in Indore and generally good elsewhere except on unirrigated lands in Gwalior where it is much below the mark Damage to crops by frost has been reported from Kothi in the Baghelkhand Agency and from Datia in the Bundelkhand Agency. Agricultural stock is generally good except for cattle disease in parts of Gwalior, Indore, Bundelkhand and the Southern States. The fodder supply is generally good except in parts of Gwalior. Prices are high in Baghelkhand, normal in Bhopal and steady elsewhere. The condition of the opium crop is good in Indore and Bhopal and unsatisfactory in Gwalior.

Central Provinces.—No rain fell during the week. The weather has been warm with some cloud but the nights and the mornings are still cool. Standing spring crops are mostly in good condition and their harvesting is in progress. Preparation of land for the ensuing season has commenced in some districts. Agricultural stock is in good condition. The supply of fodder and water is sufficient. Prices of wheat and grain continue to show a distinct downward tendency. Fluctuations in prices of other crops are unimportant.

Feudatory States.—The condition of standing spring crops is satisfactory.

Bombay.—Standing crops are generally in good condition. Cotton picking continues in Gujarat, West Khandesh, Bijapur, Dharwar, Baroda, Cutch, Kolhapur, Kathiawar and Rewa Kantha. Harvesting is generally progressing. The fodder supply is deficient in parts of five districts of Sind and in Cutch, Kathiawar, and Baroda. Agricultural stock is sufficient. Cattle are in good condition except in Hyderabad, Poona, Ahmedabad and Palanpur. Drinking water is generally adequate. Water for irrigation is deficient in Kaira, Ahmedabad, Dharwar, Kathiawar and Baroda. Prices of food grains have fallen slightly in the Carnatak and the Deccan generally and are steady elsewhere. Gratuitous relief was given to 141 persons in Kathiawar.

Hyderabad.—No rain fell during the week. Spring crops are generally in fair to good condition but they have been damaged somewhat by rats in parts of the Usmanabad district. Late rice crop is in fair to good condition and is being weeded. Sowings continue

in a few parts. Cattle disease prevails in five talukas. Prices of grains are almost stationary. Coarse rice is selling at 9 and white *juar* at 14 seers per rupee in Hyderabad city. The highest price of *juar* in districts is 10 seers per rupee in Gulbarga, Medak and Warangal and the lowest 24 seers per rupee in Adilabad.

Mysore.—No rain fell during the week. The price of rice has fallen in Hassan. Markets are well supplied. Standing crops are in good condition. The outturn of the harvested paddy *ragi*, sugarcane, cotton and wheat is fair to good. Planting of sugarcane is in progress in parts. Prospects of the season are good. Cattle are generally healthy. Water and fodder are available.

Coorg.—Report not received.

Madras.—The rainfall during the week was light in Ramnad, Tinnevelly, Malabar and Cochin and *nil* elsewhere. Standing crops are in fair to good condition generally except in parts of Bellary, Chingleput, South Arcot and Tinnevelly and require more rain in parts of North Arcot, Tanjore and Madura. Harvesting of paddy, sugarcane and dry crops is proceeding with outturn fair to normal generally. Sowings of paddy, sugarcane and dry crops are proceeding or are nearing completion normally. The condition of cattle is generally good. The water supply is sufficient except in parts of Bellary, Anantapur and the Carnatic and the southern and the central parts except Coimbatore. Pasture is generally sufficient but it is scanty in Kurnol, Bellary and Malabar and in parts of nine other districts. Fodder is generally available but it is scarce in parts of three districts. Prices are stationary.

A. T. STOWELL,
Assistant Secretary, Railway Board.

REGISTERED No. L. 848.

The Gazette of India.

EXTRAORDINARY.

PUBLISHED BY AUTHORITY.

DELHI, TUESDAY, MARCH 21, 1916.

GOVERNMENT OF INDIA.

FINANCE DEPARTMENT.

Speech of the Honourable Finance Member

INTRODUCING THE

BUDGET FOR 1916-17.

I rise to present the Budget of the Government of India for 1916-17. The preliminary estimates which I laid before the Council on the 1st March have been revised in the light of our latest information. The Financial Secretary's Explanatory Memorandum has also been checked and brought up to date.

2. The final figures of the Revised Estimate for 1915-16 and of the Budget Estimate for 1916-17 are given in the statements which I have to-day laid before the Council. The broad results of the revenue account are brought out in the table below, in which I have also shown, in brackets, for convenience of comparison, the figures now superseded, which were given in the corresponding table appearing in paragraph 61 of my speech introducing the Financial Statement.

[In millions of pounds]

	Budget, 1915-16.			Revised, 1915-16.			Budget, 1916-17.		
	Imperial.	Provincial.	Total.	Imperial.	Provincial.	Total.	Imperial.	Provincial.	Total.
Revenue . .	49·650	30·750	80·400	52·594 (51·982)	30·732 (30·638)	83·326 (82·620)	55·925 (55·651)	30·603 (30·548)	86·528 (86·199)
Expenditure . .	52·607	31·828	84·435	54·388 (53·968)	31·297 (31·296)	85·685 (85·264)	55·099 (54·599)	30·956 (30·913)	86·055 (85·512)
Surplus (+) or deficit (—).	—2·957	—1·078	—4·035	—1·794 (—1·986)	—·565 (—·658)	—2·359 (—2·644)	+·826 (+1·052)	—·353 (—·365)	+·473 (+·687)

3. The effect of our corrections in the Revised Estimate for the current year is to reduce the Imperial deficit previously announced by £192,000 and the Provincial

deficit by £93,000. On the Imperial side, there are three alterations of some importance. The Railway revenue has shown a still further improvement in February, and we have raised our estimate of gross receipts by £400,000. On the other hand, we have had to allow for an increase of £175,000 in Opium expenditure, owing to the circumstance that our payments for the Malwa opium which we purchase in the spring are being effected for the most part just at the close of the financial year instead of at the opening of the following year. This is due to our beginning our purchases a little earlier than in previous years, and it seems likely that the same thing will happen next year, so that the advancement of payments on this occasion will not relieve us in respect of the corresponding expenditure in 1916-17. The third material increase is one of £200,000 under Military Services, which is due to the possibility of our having to raise our contribution adjustments in favour of the Home Government for reasons which I will explain presently. These larger corrections almost counterbalance one another: and the comparatively small net change in both the Imperial and Provincial deficits is attributable to minor improvements under Customs, Land Revenue and other heads.

4. As regards the Budget of next year, the effect of the changes made is to reduce the Imperial surplus by £226,000, and the Provincial deficit by £12,000. There is no important change on the Provincial side, and I need not refer to that further. On the Imperial side, we have allowed, as in the Revised Estimate, for an improvement of £400,000 on our previous estimate of gross Railway receipts, but in this instance we have to make a proportionate increase under working expenses also, so that the improvement in net receipts is £233,000 only. The only other important change occurs under the Military estimates, which have been raised by £500,000, this being due partly to provision for further urgent military requirements which have matured since the Financial Statement was presented; and partly to allowance being made for the possibility of a higher total contribution to the Home Government. The extra provision of £300,000 included on the former account will enable us to undertake a further development of the mechanical transport service, to increase the provision of motor ambulances, and to establish in India a factory for the manufacture of acetone—an industrial development of considerable interest and importance.

5. As regards the contribution, the additional provision proposed is £200,000 in the Revised and £200,000 in the Budget. As I pointed out in paragraph 27 of my speech introducing the Financial Statement, and further emphasised in replying to a recent question in Council, the adjustment of charges between the Home Government and ourselves in respect of the many units of our expeditionary forces is a very complicated matter, and the questions which arise are not yet completely settled. Since the Financial Statement was presented, the point has been prominently raised whether, in calculating the "normal cost" of a unit, allowance should be made for the fact that in ordinary peace-time conditions a certain number of British officers are absent on leave and draw furlough allowances instead of their full sanctioned pay and allowances; or whether India's contribution should not be based on the assumption that, in present circumstances, even if the units in question had remained here, prudence would have required the recall of officers from leave, as in the case of certain Civil services. As I explained in this Council the other day, all such questions must be finally settled with reference to the terms and spirit of the Resolutions of the Houses of Parliament. Meanwhile we have thought it prudent, without prejudice to the eventual decision, to include provision in our Budget and Revised Estimates, in case it should be decided that India should fairly pay the higher amount.

6. These very recent instances of additional requirements and of the points of difficulty which arise in calculating our share of the expenditure of the expeditionary forces, emphasise the necessity of maintaining a reserve for unforeseen Military expenditure. We have therefore retained the reserve at its original amount, namely, £$1\frac{1}{2}$ million, while making specific provision for the requirements and contingencies mentioned. The gross Military budget for 1916-17 will thus stand at £23·7 million and the net budget at £$22\frac{1}{2}$ million, instead of £22 million provided in the Financial Statement.

7. Turning to Ways and Means, we now expect the total cash balance in England and India at the end of the current year, exclusive of the amount held in the Home Treasury on account of the Gold Standard Reserve, to be about £18·1 million or £460,000 higher than the figure taken in the Financial Statement. This is due to the reduction already mentioned in the Imperial and Provincial deficits, and to a further improvement in the position in regard to withdrawals of post office savings bank

deposits, which we are now able to take at £133,000 less than was previously estimated. There has also been a small further lapse under railway capital expenditure.

Next year however there is a worseness of £298,000, principally caused by the reduction of the Imperial surplus which I have already explained. On the whole, therefore, combining the corrections of both years, we expect the closing balance on the 31st March 1917, exclusive again of the holding of the Gold Standard Reserve, to be about £17·6 million or some £160,000 better than we anticipated in the Financial Statement.

8. Since I presented the Financial Statement, the Secretary of State's sales of councils have continued to be very large in view of the requirements of trade, a matter which I shall deal with more fully, presently, in connection with a Bill that I have to introduce, and are now estimated for the whole year at £20·1 million Of these drawings our Treasury balances will meet £4·1 million, as compared with £3·7 million previously estimated. Our estimates of recoverable military expenditure in this and the following year have also been raised by £200,000 and £500,000, respectively.

9. These changes *pro tanto* diminish the extent to which it will be necessary for the Secretary of State to draw on us next year, and accordingly, we now estimate the amount to be met from Treasury balances in 1916-17 at £3·9 million or £1,200,000 less than the figure taken in the Financial Statement. But, as I said in my speech on that occasion (paragraph 104), this must for the present be regarded as a purely provisional announcement.

W. S. MEYER.

J. B. BRUNYATE, *Secretary to the Government of India.*

DELHI,

MEMORANDUM EXPLAINING THE DETAILS OF THE ESTIMATES.

Introductory.

1 In this memorandum the variations between the Budget and the Revised estimates of the current year, and between the latter and the Budget estimates of next year, are explained in detail for the major heads of account. Under most of the heads details by provinces have been given, and it may be explained that the figures shown against "India General" represent the transactions of the Central Government, including all expenditure directly controlled by it, of the minor administrations of Ajmer-Merwara and Coorg, and of the convict settlement in the Andamans. The Budget estimates of Provincial and "Divided" expenditure in 1916-17 generally represent the allotments proposed by the several Governments and Administrations with whom regular provincial settlements have been concluded. More detailed information regarding the figures will be found in the Financial Statements presented by the Local Governments to their respective Councils.

2. The figures for the province of Delhi have been entered separately and explained under each major head of account. A *pro formâ* account of expenditure on Delhi and the Delhi province is also appended to this memorandum (Appendix I), together with a prefatory note explaining the scope of the *pro formâ* account and the relation between it and the regular accounts.

General results.

3. The broad totals of revenue and expenditure for the last year, the current year and the ensuing year, are as follows:—

	Accounts, 1914-15.
	£
Revenue	81,157,663
Expenditure charged to Revenue	82,942,936
Imperial deficit	1,785,270

	Revised, 1915-16.
	£
Revenue	83,325,800
Expenditure charged to Revenue	85,120,000
Imperial deficit	1,794,200

	Budget, 1916-17.
	£
Revenue	86,528,600
Expenditure charged to Revenue	85,702,900
Imperial surplus	825,700

These figures exclude all capital, debt, and remittance transactions.

Accounts, 1914-15.

4. The Accounts of 1914-15 are not discussed in this memorandum, but according to our usual practice in the past a brief explanation is given below of the principal divergences between the Revised estimates of revenue and expenditure as submitted to the Council twelve months ago, and the actual accounts of the year as closed, audited and compiled by the Comptroller and Auditor-General.

5. The broad results are brought out in the following table :—

	Revised, 1914-15.			Actuals, 1914-15.		
	Imperial.	Provincial.	Total.	Imperial.	Provincial.	Total.
	£	£	£	£	£	£
Revenue . . .	49,929,200	30,228,400	80,157,600	50,769,000	30,388,700	81,157,700
Expenditure . . .	52,715,000	32,483,400	85,198,400	52,554,300	32,578,800	85,133,100
Deficit . .	2,785,800	2,255,000	5,040,800	1,785,300	2,190,100	3,975,400

6. The Imperial revenue proved to be £839,800 higher, and the Imperial expenditure £160,700 less than the Revised estimate, with the result that the deficit was £1,000,500 smaller than was anticipated. The principal items contributing to this improvement are mentioned below. The net receipts of Railways advanced by £529,600. The effect of the unfavourable economic conditions created by the war on the earnings of railways in March was less marked than had been anticipated, and there was an increase of £464,600 in the gross traffic receipts on the Great Indian Peninsula, East Indian, Bombay Baroda and Central India and certain other lines. There was also a net saving of £65,000 in the grants for working expenses and payments of surplus profits to companies, etc. The Salt revenue showed a rise of £138,800 owing mainly to heavy payments of duty in Northern India in advance of actual clearances. There was an increase of £108,900 in the Marine receipts due to larger recoveries from the Imperial Government in connection with the fitting up of transports at the Indian dockyards. The revenue of the Postal and Telegraph Department improved by £77,700 in consequence of a rise in receipts in India and an advance payment by the Home Government under the Morley award in connection with the Eastern Mail Service The reduction of £160,700 in the Imperial expenditure was mainly due to savings in the grants for salaries, etc., of Civil Departments and Miscellaneous Civil charges. The improvement in the Provincial section resulted chiefly from higher collections of Land Revenue in Burma in March than had been anticipated in the Revised estimate.

Authors of Memorandum.

7. Paragraphs 200 to 227 of this memorandum have been communicated by the Honourable Mr. G. B. H. Fell, C.I.E., Financial Adviser, Military Finance, and paragraphs 157 to 167 and 236 to 239 by Mr. H N. Heseltine, Accountant General, Railways; the rest of the memorandum has been drafted by Mr. Bhupendra Nath Mitra, C.I.E., of the Indian Finance Department.

8. The Imperial expenditure shown against "Other Provinces" in the table at page 21 represents the cost of survey and record-of-right operations on a large scale in Bengal and in Bihar and Orissa, undertaken more for administrative than for fiscal purposes. The expenditure is of a temporary and varying character and was accordingly not considered suitable for inclusion in the financial settlements with the two provinces. Three-fourths of the charges are eventually recovered from landlords and tenants for the protection of whose rights the operations are primarily undertaken; and the recoveries are shown in the table as Imperial revenue against "Other Provinces."

REVENUE.

(a) *Wholly Imperial.*

Revised, 1915-16.

9. The Revised estimate for 1915-16 is less than the Budget by R4·48 lakhs. There is a reduction of R4·17 lakhs in the recoveries of survey and settlement charges in Bengal owing to less rapid progress with the programme of operations; but, on the other hand, there is an increase of R1·50 lakhs in the receipts on the same account in Bihar and Orissa. There is also a decline in the Land Revenue collections in Baluchistan, Ajmer-Merwara and the North-West Frontier Province in consequence of unfavourable agricultural conditions.

Budget, 1916-17.

10. The Budget estimate for 1916-17 is taken at R17·79 lakhs more than the Revised for 1915-16. An increase of R17·03 lakhs is anticipated in the receipts on account of survey and settlement charges in Bengal and in Bihar and Orissa. Provision has also been made for a rise of R·66 lakh in Baluchistan on the basis of normal collections.

(b) *Divided and wholly Provincial.*

Revised, 1915-16.

11. The total collections in 1915-16 are likely to fall short of the Budget estimate by R43·74 lakhs. There will be a large deficiency of R22·65 lakhs in Bombay, due chiefly to scanty rainfall in Gujarat and low inundation in Sind and the grant of larger suspensions and remissions than were anticipated. There will also be shortages of R6·71 lakhs in the Punjab, R5·28 lakhs in the United Provinces, R2·31 lakhs in Bihar and Orissa and R1·86 lakhs in Assam, mostly in consequence of the damage done to the crops in certain districts by deficient or excessive rainfall; of R5·82 lakhs in the Central Provinces, due chiefly to the remission of certain outstanding arrears and to the postponement of the introduction of revised assessments in some of the districts; and of R3·06 lakhs in Madras and R1·61 lakhs in Burma owing mainly to improved collections in 1914-15 and a consequent reduction in the balance of the land revenue demand which remained outstanding at the end of that year. In Bengal alone, an improvement of R4·96 lakhs is expected over the Budget estimate, owing mainly to higher collections from Government estates in consequence of the improved prospects of the jute trade and to the sale of Government lands to the Calcutta Improvement Trust.

Budget, 1916-17.

12. The total Budget for 1916-17 is less than the Revised estimate for 1915-16 by R9·57 lakhs. The estimates have been framed as usual on the basis of normal monsoon conditions in the ensuing year. An important increase over the Revised estimate of the current year is assumed in Bombay (R24·21 lakhs) where provision has been made for the recovery of a large slice of the revenue suspended in previous years. A rise in revenue is also anticipated in Assam (R3·08 lakhs), Burma (R3·01 lakhs), Bihar and Orissa (R1·93 lakhs) and the Central Provinces (R1·29 lakhs) in consequence of growth in the revenue demand, the absence of remissions and suspensions required in the current year, and larger recoveries of outstanding arrears. On the other hand, the collections in 1916-17 are likely to fall short of those in the current year in the Punjab (R20·99 lakhs) and the United Provinces (R18·36 lakhs), where allowance has been made for remissions and suspensions necessitated by a deficiency in the winter rainfall of the current year; and in Bengal (R3·32 lakhs) and Madras (R·42 lakh) where the Budget provides generally for normal receipts.

EXPENDITURE.

(a) *Wholly Imperial.*

Revised, 1915-16. *Budget, 1916-17.*

13. The saving of R3·97 lakhs in the Budget estimate of 1915-16 is chiefly due to lapses in the grant for survey and settlement expenditure in Bengal and Bihar and Orissa. The Budget estimate for 1916-17 has been taken at R3·78 lakhs less than the Revised for the current year. The reduction is wholly due to a smaller provision for the same item of expenditure in consequence of a curtailment of the programme of operations.

(b) *Provincial.*

Revised, 1915-16.

14. The total expenditure in the current year will fall short of the Budget estimate by R17·79 lakhs. The reduction is distributed over all the provinces, considerable savings being expected in Madras (R6·84 lakhs), Burma (R2·58 lakhs) and the Punjab (R2·56 lakhs). The improvement is generally due to a partial relaxation of the restrictions on the grant of leave out of India to members of the Indian Civil Service, the temporary transfer of several of these officers to military duty, and the curtailment of expenditure in view of the pressing need for economy. A portion of it is also derived from (1) larger recoveries in Madras from private estates for surveys made on their behalf; (2) the total or partial non-utilisation of lump provisions for the revision of certain establishments in Madras and the Punjab and for the creation of a new district in the latter province; and (3) the reversion to military duty of the junior military members of the Burma Commission.

Budget, 1916-17.

15 The total Budget estimate for 1916-17 exceeds the Revised for 1915-16 by R5·97 lakhs. The increase is distributed over all the provinces with the exception of Bengal and Burma. Provision has generally been made on the basis of existing sanctions and commitments. Special allotments have been made in Madras for the revision of village establishments; in the United Provinces for the re-settlement of the Bulandshahr district and for the introduction of a further instalment of the scheme for the reorganisation of the cadre of deputy collectors; and in the Punjab for the payment of compensation in connection with the afforestation of certain tracts.

REVENUE.

(i) *Bengal opium.*

Revised, 1915-16.

16. The Budget estimate for 1915-16 provided for a revenue of ₹222·78 lakhs from the sale of 13,480 chests of Bengal opium, the bulk of which would be disposed of at the monthly auctions held at Calcutta while a certain number was to be supplied to the Government of the Straits Settlements or sold in England for medicinal purposes. 10,020 chests have been sold by public auction during the year and they have fetched a revenue of ₹172·24 lakhs, *i.e.*, an average of ₹1,719 a chest, the upset price having been raised from ₹1,600 to ₹1,800 a chest from 1st January 1916. Taking into account opium supplied to the Governments of Hong Kong and the Straits Settlements and sold in England for medicinal purposes, it is expected that about 13,660 chests will be disposed of in the current year, the proceeds amounting to ₹237·49 lakhs.

17. The Budget estimate for 1916-17 anticipates a revenue of R284·82 lakhs from a sale of about 15,600 chests of Bengal opium, of which about 9,840 chests will be sold by public auction and the balance will be supplied to the Governments of Hongkong and the Straits Settlements or sold in England for medicinal purposes. *Budget, 1916-17.*

(*ii*) *Excise opium and other revenue.*

18. The decline of R1·35 lakhs in the revenue in the current year, as compared with the Budget estimate, is mainly due to a heavier fall in the consumption of opium in Bengal than had been allowed for in the Budget. Only the amount charged to Local Governments on account of the cost of production of opium consumed in India is credited under this head, the difference between the actual price of issue and the cost of production forming an item of excise revenue. Owing to an increase in recent years in the price paid to cultivators for crude opium and to a rise in the charges of manufacture, it has been decided to raise the rate or cost price at which the opium is charged to Local Governments from R8·5 to R11 a seer, with effect from 1st April 1916. This accounts for the increase of R12·65 lakhs in revenue in the Budget for 1916-17 as compared with the Revised estimate for 1915-16. *Revised, 1915-16.* *Budget, 1916-17.*

EXPENDITURE.

19. The Revised estimate for 1915-16 exceeds the Budget provision by R28·90 lakhs. The increase is mainly due to additional purchases of Malwa opium undertaken towards the close of the current year The Budget estimate for 1916-17 also includes a special provision for purchases in Malwa to supplement the supply of Bengal opium. *Revised, 1915-16.* *Budget, 1916-17.*

(*a*) Chiefly excise on local manufacture. (*b*) Chiefly duty on imported Salt.

REVENUE.

vised, 1915-16.

20. The Revised estimate for 1915-16 exceeds the Budget by ₹23·25 lakhs. The increase is mostly due to speculative clearances in January and February in the expectation of an enhancement of the salt duty.

litional taxation.

21. It has been decided to raise, with effect from the 1st March 1916, the duty on imported salt, and on locally produced salt generally, from ₹1 to ₹1¼ a maund. The duty on Mandi salt will be raised proportionately from 3 annas to 3¾ annas a maund; but no change will be made for the present in the duty (1) on salt locally manufactured in Aden and locally consumed or exported by land, and (2) on salt locally manufactured in Burma, the question of enhancement of the duty on the latter being reserved for separate consideration.

lget, 1916-17.

22. In view of the speculative clearances in the current year, and the enhancement of duty, the total issues of salt in 1916-17 have been taken at a moderate figure of 466 lakhs of maunds. Owing to the operation of the credit system of payment of duty, the revenue to be realised in 1916-17 will however consist of (1) duty mostly at the old rate on about 110 lakhs of maunds of salt cleared in 1915-16, (2) duty at the enhanced rate on 356 lakhs of maunds to be cleared in 1916-17, and (3) sale proceeds of Government salt and other miscellaneous receipts aggregating about ₹43 lakhs. The Budget estimate of revenue for 1916-17 has accordingly been placed at ₹598·14 lakhs.

EXPENDITURE.

vised, 1915-16.

23. The Revised estimate for the current year is less than the Budget by ₹·99 lakh. The decrease is mainly due to a lapse in the grant for the purchase of salt from private manufacturers in Madras. In the Budget estimate for 1916-17, provision has been made for the charges of sanctioned establishments, and for a larger outlay on the local manufacture of salt in Madras in consequence of a shortage in the Government stocks.

dget, 1916-17.

Revenue.

(*a*) *Wholly Imperial.*

ised, 1915-16. 24. The Revised estimate for 1915-16 exceeds the Budget by R·71 lakh. The bulk of the improvement occurs in the revenue from judicial *get, 1916-17.* stamps in the North-West Frontier Province. The Budget for 1916-17 does not differ materially from the Revised estimate of the current year.

(*b*) *Divided.*

ised, 1915-16. 25. The total Revised for 1915-16 is R45·40 lakhs higher than the Budget estimate. The latter provided for a moderate growth only on the revenue of the preceding year, in view of the uncertainty as to the effects of the war on trade and litigation generally. There has, however, been a partial revival of internal trade and business in most of the provinces; and the improvement in Stamp revenue is shared by all of them with the exception of Bihar and Orissa and Assam. Of the total rise of about R45 lakhs, R30 lakhs are expected in the revenue from court-fee stamps, and R15 lakhs in that derived from non-judicial stamps.

get, 1916-17. 26. The Budget for 1916-17 provides for a further moderate growth in revenue in almost all the provinces, and is taken at R10·31 lakhs higher than the Revised estimate for 1915-16.

Expenditure.

27. The cost of all stamps and stamp paper supplied from England is charged under this head, and an adjustment is made in India transferring to Posts and Telegraphs the cost of stamps used for postal and telegraph purposes Similarly the cost of revenue stamps supplied to Local Governments and Administrations is debited to them in the Provincial section of the accounts by *per contra* credit in the Imperial section under this head. The credits on both these accounts are shown against item 1 (*ii*) under expenditure in the table on page 27.

(*a*) *Wholly Imperial* (*including outlay in England*).

sed, 1915-16. 28. The Revised estimate for 1915-16 exceeds the Budget by R·87 lakh; *get, 1916-17.* and the Budget for 1916-17 is R1·41 lakhs less than the Revised estimate for the current year. These variations occur mostly in the credits mentioned in paragraph 27 and in the outlay in England on the purchase of stamps.

(*b*) *Divided.*

ed, 1915-16. 29. The Revised estimate for 1915-16 does not differ materially from the *et, 1916-17.* Budget. The increase in expenditure provided in the Budget for 1916-17 is a necessary concomitant of the growth in revenue.

V AND 7.—EXCISE.

REVENUE.

(*a*) *Wholly Imperial.*

30. The figures do not show any important variation. The Budget estimate for 1916-17 provides for R 20 lakh of extra revenue which is likely to be obtained in Baluchistan from the enhancement in taxation referred to in paragraph 32.

(*b*) *Divided and wholly Provincial.*

Revised, 1915-16.

31. The set-back in prosperity caused by the war, the unfavourable conditions of agriculture, and the high prices of food grains have depressed the Excise revenue in 1915-16 more heavily than had been allowed for in the Budget estimate; and the Revised estimate is less than the Budget by R37·18 lakhs. The decline is shared by all the provinces excepting Bombay and Burma, where some improvement is expected.

Budget, 1916-17.

32. The total Budget for 1916-17 exceeds the Revised estimate for 1915-16 by R1·24 lakhs. An additional revenue of R2·80 lakhs is expected from the enhancement in taxation which Local Governments will enforce as a corollary to the increased tariff rates on beer and spirits, the amount being distributed as shown below:—

Madras	·35	lakhs.
Bengal	·50	„
United Provinces	·40	„
Punjab	1·10	„
Burma	·45	„
	2·80	„

Otherwise, the estimates allow generally for a continuance of the adverse conditions created by the war; and in the Punjab a decline of about R6 lakhs, as compared with the probable collections in 1915-16, has been assumed in view of the failure of the winter rains in the current year.

EXPENDITURE.

(*a*) *Wholly Imperial.*

33. The figures show little variation.

(*b*) *Divided and wholly Provincial.*

Revised, 1915-16.
Budget, 1916-17.

34. The expenditure in 1915-16 is expected to fall short of the Budget by R1·93 lakhs owing to lapses in grants in several provinces. The Budget estimate for 1916-17 provides generally for normal charges of sanctioned establishments. Provision has been made in Bihar and Orissa and in the Central Provinces for a contemplated revision of the excise staff.

Imperial.

35. The figures show little variation.

Provincial.

36. The Revised estimate for 1915-16 exceeds the Budget by R1·28 lakhs. The increase is mainly due to the recovery in Bengal of arrears of the public works cess which remained outstanding on the 31st March 1913, when the revenue was surrendered to district boards. The Budget estimate for 1916-17 provides for normal collections in the various provinces.

Revised, 1915-16.

REVENUE.

Additional taxation.

37. It has been decided to enhance, with effect from the 1st March 1916, the customs duties now levied on certain articles and to impose duties on others which are now exempt from the payment of customs revenue. The principal

changes proposed, and the amount of revenue expected therefrom in the two years 1915-16 and 1916-17, are shown in the following table :—

[Thousands of Rs.]

Items.	Change proposed.	Yield of additional taxation included in	
		Revised Estimate, 1915-16.	Budget Estimate, 1916-17.
I.—Special import duties.			
(1) Arms and ammunition	To be doubled, *i.e.*, raised to 20 per cent *ad valorem*	15	2,84
(2) Liquors—			
(*a*) Ale, beer, etc.	To be raised by 50 per cent, *i.e.*, to 4½ annas per gallon	15	1,78
(*b*) Spirits and liqueurs	To be raised by 20 per cent, *i.e.*, to R11¼ per proof gallon in the case of potable spirits and all spirits tested ; and by 50 per cent, *i.e.*, to 7½ per cent *ad valorem* in the case of denatured spirits ; with special rates for liqueurs, cordials and toilet preparations untested and perfumed spirits	1,10	14,00
(*c*) Wines	To be raised by 16⅔ per cent, *i.e.*, to R1¾ per gallon for still wines and R4⅜ per gallon for other classes	...	60
(3) Tobacco	The quantitative rate on cigars and cigarettes to be replaced by an *ad valorem* rate of 50 per cent ; and the rate on manufactured tobacco, other sorts, to be raised from R1⅛ to R1½ per lb	37	4,55
II.—General import duties.			
(1) Articles of food and drink (excluding sugar)	To be raised by 50 per cent, *i.e.*, to 7½ per cent *ad valorem*	88	10,60
(2) Sugar	To be raised by 100 per cent, *i.e.*, to 10 per cent *ad valorem*	4,90	59,00
(3) Chemicals, drugs, etc.	To be raised by 50 per cent, *i.e.*, to 7½ per cent *ad valorem*	41	5,00
(4) Metals (excluding silver bullion and coin) and manufactures thereof.	To be raised generally by 50 per cent, *i.e.*, to 7½ per cent *ad valorem*, the duty on iron and steel being raised from 1 to 2½ per cent *ad valorem*	1,04	12,50
(5) Oils (excluding petroleum)	To be raised generally by 50 per cent, *i.e.*, to 7½ per cent *ad valorem*	5	58
(6) Manufactured articles	Ditto ditto	3,80	42,50
(7) Raw materials and unmanufactured articles	Ditto ditto	39	4,70
(8) Articles now free—			
(*a*) Grain and pulse; tea chests and lead sheets used in their manufacture and tea racks ; firewood ; printing and lithographing materials ; machinery other than cotton spinning and weaving machinery ; railway material ; and ships	To be taxed at 2½ per cent *ad valorem*	2,00	24,00
(*b*) Coal, coke and fuel	To be taxed at 8 annas per ton		
(*c*) Fresh fruits, vegetables, fishmaws, bamboos, bristles and fibres, horn, raw jute, oilcakes, plants, precious stones and pearls, gum olibanum, motor cars for goods, earth, common clay and sand	To be taxed at 7½ per cent *ad valorem*		
III.—Export duties.			
(1) Tea†	To be taxed at R1½ per 100 lbs.	1,50	45,00
(2) Jute, raw†	To be taxed at R2½ per bale of 400 lbs., with special rates for cuttings and rejections.	...	87,00
„ manufactures†	To be taxed at R10 per ton for sacking and R16 per ton for hessians.*		
IV.—Land customs	Equivalent changes	37	4,50
	Total	17,11	3,19,15

* Exports under specific demand from His Majesty's Government will be exempted.
† All forward contracts entered into before 1st March will be exempted.

In calculating the yield of the additional taxation, due allowance has been made for a possible contraction in imports consequent on the enhancement of existing duties and the imposition of duties on articles which have hitherto been free.

Revised, 1915-16.

38. Apart from the yield of the additional duties, the Revised estimate of Customs revenue in 1915-16 amounts to R856·69 lakhs or R34·76 lakhs less than the Budget estimate. The latter provided for a substantial decline of revenue as compared with the actuals for 1914-15, so as to allow for the effects of war conditions throughout the year; but the fall under some of the tariff heads has been more serious than was anticipated. The largest deficiency occurs under the duty on the export of rice (R44·63 lakhs), which has declined heavily owing to the closure of the trade with the enemy countries, the absence of increased demands from other foreign markets, and a large demand for Burma rice for internal consumption in India. Considerable shortages are also anticipated under metals (other than gold and silver) and manufactures thereof (R10 lakhs), petroleum (R8·75 lakhs) and import duty on cotton manufactures (R7·75 lakhs); but these and also the less important losses under some of the other tariff heads will be more than counterbalanced by substantial improvements under manufactured articles (R17·21 lakhs), sugar (R15·28 lakhs) and by smaller increases under a few other heads.

Budget, 1916-17.

39. On the existing basis of taxation, the Budget estimate of Customs revenue in 1916-17 is taken at R835·55 lakhs or R21·14 lakhs less than the Revised estimate for 1915-16 calculated on the same basis. It is assumed that, but for the enhancement of taxation proposed, the revenue under several of the tariff heads in 1916-17 would be practically the same as in the current year, the important variations being as follows:—

(1) A decrease of R12·25 lakhs under import duty on cotton manufactures, of R10 lakhs under silver, of R5·37 lakhs under export duty on rice, and of R2·50 lakhs under excise duty on cotton goods.

(2) An increase of R11·72 lakhs under sugar, with reference to the new tariff valuation which came into force from January 1916, and which is based on the high prices that have ruled since the outbreak of the war.

EXPENDITURE.

Revised, 1915-16.

40. A saving of R1·68 lakhs is expected in the Budget provision for the current year, owing mainly to lapses in grants and a reduction in the payments of overtime allowances consequent on the slackness of the import trade.

Budget, 1916-17.

The Budget estimate for 1916-17 provides for normal charges of sanctioned establishments.

REVENUE.

(a) *Imperial.*

sed, 1915-16. 41. The Revised estimate for 1915-16 falls short of the Budget by R1·62 lakhs. The decrease is mainly due to the non-recovery of the tax from the large body of military officers employed with the Indian Expeditionary Forces.

get, 1916-17. The Budget estimate for 1916-17 exceeds the Revised for 1915-16 by R11·97 lakhs, the increase representing wholly the yield of the additional taxation mentioned in paragraph 44.

(b) *Divided.*

sed, 1915-16. 42. The revenue in the current year has not suffered so seriously from the effects of the war as was anticipated in the Budget estimate, and the Revised estimate exceeds the Budget by R27·12 lakhs. The improvement is distributed over all the provinces excepting Bihar and Orissa; but the bulk of it occurs naturally in Bombay and Bengal.

get, 1916-17. 43. On the existing basis of taxation, the Budget estimate for 1916-17 is taken at R274·38 lakhs, *i.e.*, R5·29 lakhs less than the Revised for 1915-16. The estimates for next year are generally based on the probable collections in the current year; in Bombay and Bengal, decreases of R4 lakhs and R2 lakhs respectively are expected as compared with the favourable collections of the current year, while some allowance has been made for a normal growth in the Punjab (R·60 lakh) and the United Provinces (R·50 lakh).

tional tax- 44. It has been decided to enhance, with effect from the 1st April 1916, the existing rates of income-tax to the extent indicated below:—

(1) Incomes from R5,000 to R9,999 a year will pay 6 pies in the rupee instead of 5 pies.

(2) Incomes from R10,000 to 24,999 a year will pay 9 pies in the rupee instead of 5 pies.

(3) Incomes of R25,000 a year and above will pay one anna in the rupee instead of 5 pies.

(4) The enhanced rates will apply generally to profits of companies and interest on securities, which will be taxed initially at the highest rate subject to abatement or reduction in the case of persons who can show that their total income is such as to warrant a lower rate of taxation or is below the taxable limit.

An extra sum of R123 lakhs is expected in 1916-17 from the additional tax (in addition to R12 lakhs which will be recorded in the accounts as wholly Imperial revenue), the amount being distributed as shown below:

	Lakhs of R.
Madras	12·50
Bombay	36·80
Bengal	40·80
United Provinces	8·00
Punjab	4·50
Burma	12·30
Bihar and Orissa	4·80
Central Provinces	2·30
Assam	1·00
Total	1,23·00

EXPENDITURE.

45. The figures show little variation.

REVENUE.

(a) *Imperial.*

Revised, 1915-16. 46. The increase of R·59 lakh in the revenue in the current year, as compared with the Budget estimate, is mainly due to higher sales of sandal-

Budget, 1916-17. wood in Coorg and of padouk in Port Blair. The Budget estimate for 1916-17 does not differ materially from the Revised for 1915-16.

(b) *Provincial.*

Revised, 1915-16. 47. The Revised estimate for 1915-16 is less than the Budget by R15·61 lakhs. There is a large decrease of R9·74 lakhs in Burma where the timber market has been disturbed in consequence of the war and the monthly auctions of Government timber at Rangoon have been restricted considerably so as avoid a heavy fall in prices. The slump in the timber market has affected the revenue in some of the other provinces also. On the other hand, an improvement is expected in the Punjab (R2 lakhs), owing to larger sales of trees and firewood in certain tracts, and to a smaller extent in the Central Provinces, in Bombay and in Bihar and Orissa.

Budget, 1916-17. 48. The estimates for 1916-17 are generally based on the revenue likely to to be realised in the current year. The total Budget exceeds the Revised by R4·89 lakhs only, the bulk of the increase being expected in the United Provinces (R3·85 lakhs) mainly in connection with a scheme for the supply of sleepers to State railways.

EXPENDITURE.

(a) *Imperial (including outlay in England).*

Revised, 1915-16. 49. The expenditure in 1915-16 is expected to fall short of the Budget grant by R2·04 lakhs, owing mainly to the non-utilisation of an allotment for the construction of quarters for students in the Forest College at Dehra Dun

Budget, 1916-17. and to savings in other directions. The Budget estimate for 1916-17 does not differ materially from the Revised for 1915-16.

(b) *Provincial.*

Revised, 1915-16. 50. The Revised estimate for 1915-16 is less than the Budget by R1·18 lakhs. The decrease is mainly due to a curtailment of expenditure on works which are not immediately remunerative, in pursuance of the policy of economy. It is shared by all the provinces with the exception of Bombay and Burma. In these two provinces, the expenditure will exceed the Budget provision by R1·80 lakhs and R2·99 lakhs, respectively, owing chiefly to outlay on famine fodder operations in Bombay, and the payment in Burma of certain charges connected with the purchase of elephants which were expected to be disbursed in 1914-15.

Budget, 1916-17. 51. The Budget estimate for 1916-17 exceeds the Revised estimate for the current year by R1·58 lakhs. There is an increase of R2·15 lakhs in the United Provinces, mainly in connection with the scheme for the supply of sleepers to State railways; and of R1·37 lakhs in the Central Provinces, due chiefly to the provision for certain urgent works. On the other hand, there is a decrease of R2·17 lakhs in Burma, owing to the absence of the payments made in the current year for the purchase of elephants. The estimates provide generally for the charges of sanctioned establishments and for normal working expenses, allotments for special outlay on the development of forests being restricted to measures which are urgent or are expected to prove immediately remunerative.

REVENUE.

Imperial.

52. The figures show little variation.

Provincial.

Revised, 1915-16.

53. The total Revised estimate for 1915-16 does not differ materially from the Budget forecast. There is an improvement of ₹1 lakh in Bengal, where agricultural distress in certain districts has increased registrations; but it is more than counterbalanced by minor reductions in Madras, Bombay and certain other provinces. The estimates for 1916-17 are generally based on the revenue expected to be realised in 1915-16. The total Budget exceeds the Revised for the current year by ₹1·11 lakhs, owing mainly to provision for normal growth in Madras.

Budget, 1916-17.

EXPENDITURE.

54. The figures show little variation.

55. The revenue recorded under this head represents tributes received from the protected States, in several cases as a result of exchanges of territory and settlement of claims, and contributions made chiefly in lieu of former obligation to supply or maintain troops. The figures do not ordinarily show any important fluctuations from year to year except for advance payment of sums falling due in the ensuing year, or arrears and their recovery. The Revised estimate for the current year is less than the Budget by R1·21 lakhs, the decrease being mainly due to the postponement of recoveries in Kathiawar in consequence of deficient rainfall. The Budget estimate for 1916-17 provides for normal receipts.

(*a*) *Imperial.*

56. The wholly Imperial expenditure shown against "Other provinces" represents refunds and drawbacks in respect of wholly Imperial revenue (*e.g.*, Opium, Salt, Customs and Tributes). The increase of R·92 lakh in the Revised estimate over the Budget for 1915-16 is mainly due to larger issues of duty-free salt and to special remission of tributes in Burma. The Budget estimate for 1916-17 provides for normal charges.

d, 1915-16.

t, 1916-17.

(*b*) *Divided and Provincial.*

57. The expenditure fluctuates considerably from year to year, and is difficult to estimate. In 1915-16 the Budget will be exceeded by R2·08 lakhs, owing chiefly to higher refunds of excise revenue in several provinces. For 1916-17, a normal expenditure has been assumed.

d, 1915-16.

t, 1916-17.

(a) *Imperial.*

58. The wholly Imperial expenditure shown against "Other Provinces" represents Opium, Salt and Customs compensations paid to Native States and Foreign Governments, as well as Miscellaneous compensations (*i.e.*, those of a general character and not intended to indemnify against loss of a particular kind of revenue) in provinces other than Bombay. The variations between the Budget and Revised estimates of the current year, and between the latter and the Budget of next year are due to the fact that the salt royalty payable to Jaipur and Jodhpur, and the customs compensation payable to Travancore and Cochin, fluctuate respectively with reference to the actual sales of salt and the actual realisations of customs revenue.

(b) *Provincial.*

59. The Revised estimate for 1915-16 is less than the Budget by R1 49 lakhs. The decrease is mainly due to the record under other heads of account of payments of *kadim* cash allowances in Bombay for which provision was made in the Budget under "Assignments and compensations." The Budget estimate for 1916-17 does not differ materially from the Revised for 1915-16. *Revised, 191.* *Budget, 191*

(*a*) *India—Imperial.*

Revised, 1915-16.

60. The Revised estimate for 1915-16 is less than the Budget by R1·21 lakhs, the decrease being mainly due to smaller receipts of interest in the Punjab in respect of the unpaid balance of the sale price of Government lands.

Budget, 1916-17.

61. The total Budget for 1916-17 is taken at R1·28 lakhs less than the Revised estimate of the current year. The fall is mainly due to a decrease in the interest recoverable from Native States, consequent on a reduction in the outstanding balances of loans taken by them from Government.

(*b*) *India—Provincial.*

Revised, 1915-16.

62. The Revised for 1915-16 is R2·12 lakhs higher than the Budget. An increase of R4 lakhs is expected in the United Provinces in consequence of a prompter recovery of arrears; but this will be counterbalanced partly by a fall of R·80 lakh in Bombay, and of R·79 lakh in Bihar and Orissa, owing to the deficient rainfall in certain tracts, and by smaller reductions in some of the other provinces. The Budget estimate for 1916-17 provides generally for normal recoveries based on the current demand.

Budget, 1916-17.

(*c*) *England.*

Revised, 1915-16.

63. The receipts in England in 1915-16 are likely to exceed the Budget estimate by £32,800 mainly owing to an increase in the interest realised from investment of the cash balances of the Home treasury, which have proved to be larger and have earned a higher rate of interest than was anticipated. The Budget estimate for 1916-17 shows a rise of £121,200 over the Revised for 1915-16. A sum of £150,400 will be obtained from the additional investment of £3 million of the Paper Currency Reserve made in the current year. On the other hand, there will be a reduction in the interest realised from the investment of the cash balances of the Home treasury, which are not expected to remain as high as in 1915-16.

Budget, 1916-17.

Interest on ordinary debt.

Revised, 1915-16.

64. The expenditure in 1915-16 on account of interest payable on the public debt as a whole will fall short of the Budget estimate by R1·51 lakhs (£10,100). There will be a saving of R15 lakhs in India, mainly in the provision made in the Budget for discount on the rupee loan to be raised in the year; but this will be partly counterbalanced by an excess of R13·49 lakhs (£89,900) in England, due chiefly to the payment of a higher rate of discount on India Bills. In the Budget for 1916-17 necessary provision has been made for a full year's interest on the rupee loan of R5 crores raised in the current year, and on the temporary loan of R6 crores from the Gold Standard Reserve which will remain unpaid at the end of the year, as well as for the service of the further borrowing in India which is contemplated in the ensuing year. The reduction in the charges, as compared with the current year, is mainly due to the contemplated discharge of £1½ million India bills and repayment of £3 million of the temporary loan from the Gold Standard Reserve.

Budget, 1916-17.

Transfers to Railway and Irrigation Accounts.

65. The amount of interest transferred to the Railway and Irrigation sections of the accounts depends, firstly, on the capital expenditure; secondly, on the actual payment of interest on that portion of the debt which has been incurred specifically on account of the construction or purchase of railways or irrigation works; and, thirdly, on the rate at which interest is charged on that portion of the debt which has not been specifically raised for the above purpose. Our practice is to adopt, for this adjustment, the average rate of interest actually paid in respect of the whole of the non-specific debt in the latest year for which complete accounts are available. The result is that the rate adopted in calculating the Revised estimate for a year is generally different from that used for the Budget estimate: and this usually leads to a difference between the two estimates apart from that caused by a variation in the capital expenditure itself.

Revised, 1915-16.

The large increase of R52·80 lakhs (£352,000) in the Revised estimate of total interest to be transferred in 1915-16, as compared with the Budget, is due partly to an increase in the rate, and partly to an increase in the capital at charge at the end of 1914-15 caused by certain adjustments made with reference to a recent contract with the Bengal Nagpur Railway Company.

Budget, 1916-17.

The increase in the total amount of interest to be transferred in 1916-17, over the Revised estimate for 1915-16, is almost wholly due to the progress of capital expenditure.

Transfers to Provincial.

66. A portion of the interest on Ordinary Debt appears in the Provincial section of the accounts. Provincial Governments are authorised to grant advances to cultivators (as well as to certain other people in special cases) under various Acts, to native states, to landholders and notabilities apart from the provisions of any law, and to municipalities and local bodies (other than Presidency Corporations), out of amounts annually placed at their disposal by the Government of India. The interest actually levied on such advances is credited as Provincial revenue. But interest at 3½ per cent a year is charged to the Local Governments on the mean between the outstanding balances of the Provincial Loan Accounts at the commencement of the year and at its close; and this is done by transferring the amount so calculated from the Imperial to the Provincial section under Interest on Ordinary Debt. The differences between the Budget and the Revised estimates of the amount to be so transferred in the current year, and between the latter and the Budget estimate of 1916-17, are explained by the variations in the outstanding balances of the Provincial Loan Account as shown in the table at page 44.

Interest on other obligations.

Revised, 1915-16.

67. The total expenditure in 1915-16 is likely to exceed the Budget provision by R3·21 lakhs (£21,400). There will be a rise of R4·54 lakhs in the interest payable on the Savings Bank balance owing mainly to a reduction in the anticipated withdrawals from Post Office Savings Banks; but on the other hand, a portion of the interest payable on certain special loans is not likely to be claimed during the current year. The Budget estimate for 1916-17 provides for an increase of R3·50 lakhs (£23,300) over the Revised for 1915-16 chiefly in consequence of a further growth anticipated in the deposits in the State Provident funds.

Budget, 1916-17.

REVENUE.

(a) *Indian Postal and Telegraph Department.*

Revised, 1915-16.

68. The Revised estimate for 1915-16 exceeds the Budget by R14·07 lakhs (£93,800). An improvement of R24·42 lakhs is expected in India owing to the more satisfactory conditions of internal trade. But there is a decrease of R10·35 lakhs in the receipts in England, as the Home Government will not make any payment in the current year under the Morley award in connection with the Eastern Mail Service.

Budget, 1916-17.

69. The Budget estimate for 1916-17 provides for a further moderate advance of R17·63 lakhs in the collections in India and for a receipt of R3 lakhs in England in connection with the Eastern Mail Service.

(b) *Indo-European Telegraph Department.*

Revised, 1915-16.

70. The rise of R13·77 lakhs (£91,800) in the revenue in the current year, as compared with the Budget estimate, is due to the diversion of traffic from foreign lines to those of the Indo-European Telegraph Department in consequence of interruptions on the former, as well as to an increase in the traffic owing to the war.

Budget, 1916-17.

The Budget estimate for 1916-17 provides for a fall of R3·81 lakhs (£25,400) in the receipts, owing mainly to a reduction in rates in the Persian Gulf section.

EXPENDITURE.

(a) *Indian Postal and Telegraph Department.*

Revised, 1915-16.

71. The expenditure in 1915-16 is likely to fall short of the Budget grant by R12·69 lakhs (£84,600). The reduction is mainly due to heavy credits for the value of stores supplied to the Indian Expeditionary Forces, the curtailment of expenditure with reference to the policy of economy, a smaller payment in connection with the Eastern Mail subsidy owing to the discontinuance of mail sorting at sea, and a lapse in the provision for payments to the Marconi Company.

Budget, 1916-17.

72. The Budget grant for 1916-17 exceeds the Revised estimate for 1915-16 by R31·63 lakhs (£210,900). The credits on account of the value of stores supplied to other departments will be less by R7·5 lakhs in consequence of smaller supplies to the Indian Expeditionary Forces, while the outlay on the purchase of stores in England will be higher by R8·63 lakhs mainly owing to the replacement of stores issued to the Forces in the current year and a rise in prices. A provision of R6 lakhs has also been made for certain payments to the Marconi Company which are being postponed in the current year. Apart from these special items, the Budget estimate provides for sanctioned establishments and normal working expenses, together with a margin for the development of the operations of the department which are generally remunerative in character.

(b) *Indo-European Telegraph Department.*

Revised, 1915-16.

73. The Revised estimate for 1915-16 exceeds the Budget by R1·68 lakhs (£11,200), the rise being mainly due to the re-construction of the line north of Karachi and the increased cost of stores.

Budget, 1916-17.

The Budget estimate for 1916-17 is taken at R10·74 lakhs (£71,600) more than the Revised for the current year. Provision has been made for an increase of R11·34 lakhs (£75,600) in the capital outlay, in consequence of a rise in the cost of stores and the contemplated reconstruction of a line in Persia; and for a normal growth of R·60 lakh (£4,000) in the working expenses. On the other hand, the net receipts in England in 1916-17 in connection with the Joint Purse arrangement, etc., will be R1·20 lakhs (£8,000) more than in 1915-16.

REVENUE.

74. The figures do not show any important variation.

EXPENDITURE.

Revised, 1915-16.

75. The decrease of R2·41 lakhs in the expenditure in 1915-16, as compared with the Budget provision, is due partly to savings in establishment charges and in the grant for the purchase of stores, and partly to a reduction in the loss on the recoinage of uncurrent silver coin consequent on a fall in the withdrawals of such coin.

Budget, 1916-17.

The Budget estimate for 1916-17 provides for normal operations.

*The figures have been corrected to include the charges of the Audit Office, Delhi.

(*a*) *India—Imperial.*

Revised, 1915-16.

76. The expenditure in 1915-16 is likely to exceed the Budget grant by R1·31 lakhs. The increase is wholly due to a rise in the charges of the Secretariats (R1·30 lakhs) in consequence of the re-organisation of the Education Department and the employment of additional establishments in the Commerce and Industry and other departments to deal with questions arising out of the war. The Budget estimate for 1916-17 provides generally for sanctioned establishments and normal charges, and follows closely the Revised for the current year.

Budget, 1916-17.

(*b*) *Provincial.*

Revised, 1915-16.

77. The total Revised for 1915-16 falls short of the Budget estimate by R1·13 lakhs. Savings of R1·01 lakhs and R1 lakh are expected in the United Provinces and in Bihar and Orissa respectively, owing to the non-utilisation of the provision for the creation of an Executive Council in the former province and for railway saloons for the Lieutenant-Governor in the latter. On the other hand, there will be an excess of R·93 lakh over the Budget grant in Madras, due mainly to the employment of additional staff in the Secretariats and the purchase of furniture for the Government House. Unimportant variations from the Budget grants will occur in the other provinces.

Budget, 1916-17.

78. The total Budget estimate for 1916-17 is R·67 lakh more than the Revised for the current year, the more important variations being: (1) an increase of R·88 lakh in Bihar and Orissa due mainly to provision for furniture required for the Government House at Bankipore, and (2) a reduction of R·51 lakh in Madras caused by the absence of certain items of special expenditure which have been incurred in the current year.

(*c*) *England.*

Revised, 1915-16.

79. The Revised estimate for 1915-16 is less than the Budget by £29,100. There is an increase of £11,700 in the charges of the Home establishment owing to an increase in staff, a rise in the wages of labourers at the store depôt and the payment of overtime allowances; but it will be more than counterbalanced by a saving of £40,800 in the grant for the purchase of stores, etc., due chiefly to smaller requirements for stores and to a change in the system of submission of claims under which payment will be made in 1915-16 in respect of three quarters only and not for a full year.

Budget, 1916-17.

80. The Budget estimate for 1916-17 exceeds the Revised for 1915-16 by £15,100 mainly owing to a higher provision for outlay on stores.

EXPENDITURE.

(a) *Imperial.*

81. The figures show little variation

(b) *Provincial.*

Revised, 1915-16.

82. The Revised estimate for 1915-16 exceeds the Budget by R9·96 lakhs. There is an increase of R4·16 lakhs in Bengal and of R2·78 lakhs in the United Provinces, chiefly in consequence of (1) special expenditure in connection with political cases, and (2) the payment of grain compensation allowance for which provision was made in the Budget under "Miscellaneous"; of R3·47 lakhs in Bihar and Orissa, mainly due to expenditure connected with the High Court at Bankipore for which no allowance was made in the Budget; and of R·93 lakh in Bombay owing to the grant of time-scale pay to those Joint and Assistant Judges who are members of the Indian Civil Service, the revision of pay of Judicial Commissioners, and a larger payment of leave allowances. In the Punjab also, there will be some excess over the Budget provision in consequence of special expenditure connected with political cases and the payment of grain compensation allowance, which will be met partially from savings in ordinary grants and in the allotment for the revision of clerical establishments. On the other hand, the expenditure will fall short of the Budget estimate in Burma (R1·07 lakhs), owing mainly to the temporary return to military duty of the junior military members of the Burma Commission; and in the three remaining provinces owing to unimportant lapses in various grants.

Budget, 1916-17.

83. The total Budget for 1916-17 is R3·24 lakhs less than the Revised estimate for 1915-16. There is a reduction of R5·20 lakhs in Bengal, owing to: (1) the creation of a new High Court at Bankipore; and (2) the absence of (*a*) special expenditure incurred in the current year in connection with political cases, and (*b*) specific provision under this head for the payment of grain compensation allowance. There is also a decrease of R1·35 lakhs in the United Provinces, due to the second of the causes mentioned above. On the other hand, there is an increase of 3·85 lakhs in Bihar and Orissa, where the Budget provides for a full year's charges on account of the new High Court at Bankipore. Provision has generally been made in all the provinces for the normal charges of sanctioned establishments.

REVENUE.

(a) *Imperial.*

Revised, 1915-16.

84. The Revised estimate for 1915-16 does not differ from the Budget.

Budget, 1916-17.

The Budget estimate for 1916-17 is taken at R1·65 lakhs less than the Revised for 1915-16, as it is unlikely that any sums will be transferred in the ensuing year by the Administrator General, Bengal, to credit of Government under Section 52 of Act III of 1913.

(b) *Provincial.*

Revised, 1915-16.

85. The total revenue in the current year is likely to fall short of the Budget estimate by R1·19 lakhs. The reduction is mainly due to smaller receipts on account of magisterial fines in the Punjab, Bengal, Burma and several other provinces, which are partly counterbalanced by increased recoveries on this account in Madras, Bihar and Orissa and the United Provinces and by a rise in the revenue from kurk-amins' fees and process-servers' fees in the last named province. The Budget for 1916-17 provides for normal receipts in all the provinces.

Budget, 1916-17.

EXPENDITURE.

(a) *Imperial.*

Revised, 1915-16. 86. The increase of R2·33 lakhs over the Budget grant for 1915-16 is mainly due to higher outlay on commissariat supplies, required for the convict settlement at Port Blair, in consequence of a rise in prices. The *Budget, 1916-17.* Budget estimate for 1916-17 does not differ materially from the Revised for 1915-16.

(b) *Provincial.*

Revised, 1915-16. 87. The total expenditure in 1915-16 is likely to exceed the Budget grant by R4·08 lakhs. The excess is wholly due to a rise in the dietary charges owing to the high price of food-stuffs and also to an increase in the jail population in some of the provinces. The cost of dietary is likely to exceed the Budget provision in almost every province; but in some of the provinces, it will be possible to meet the extra expenditure from savings in the grant for jail manufactures and in other directions.

Budget, 1916-17. 88. The Budget for 1916-17 is higher than the Revised estimate for 1915-16 by R2·03 lakhs. The grants are generally based on the sanctioned scales of establishment, the probable jail population and normal outlay on raw materials.

REVENUE.

(a) *Imperial.*

89. The figures show little variation.

(b) *Provincial.*

Revised, 1915-16. 90. The decrease of R1 04 lakhs in the revenue in the current year, as compared with the Budget estimate, is due to a reduced demand for jail-made articles in most of the provinces. Bengal is the only province in which a material improvement in the receipts (R1·73 lakhs) is expected, in consequence of heavy supplies of jail manufactures to the Military Department. *Budget, 1916-17.* The Budget estimate for 1916-17 provides generally for normal receipts.

EXPENDITURE.

(*a*) *Imperial* (*including outlay in England*).

ised, 1915-16. 91. The Revised estimate for 1915-16 is higher than the Budget by R1·98 lakhs. There is an increase of R1·44 lakhs under "India—General," owing mainly to a rise in the charges of the Central Criminal Investigation Department; and of R1·09 lakhs in the North-West Frontier Province, due to the grant to the frontier constabulary of increased rates of pay, and of certain special concessions necessitated by the present conditions of service on the frontier. On the other hand, there is a lapse in the provision made in the Budget for police reforms in Baluchistan.

lget, 1916-17. 92. The Budget estimate for 1916-17 exceeds the Revised for 1915-16 by R2·62 lakhs. The bulk of the increase occurs in the North-West Frontier Province and is due to provision for a full year's cost of the increased rates of pay and special concessions sanctioned for the frontier constabulary in the current year.

(*b*) *Provincial.*

ised, 1915-16. 93. The Revised estimate for 1915-16 exceeds the Budget by R4·73 lakhs. There is an increase of R1·91 lakhs in Bengal and of R1·91 lakhs in the United Provinces, due partly to measures adopted to cope with the increase in political crime and partly to the payment of grain compensation allowance for which provision was made in the Budget under "Miscellaneous"; of R3·16 lakhs in Burma, owing to special precautionary measures necessitated by the war; and of R1·03 lakhs in the Punjab, caused chiefly by a higher payment of grain compensation allowance. On the other hand, there is a decrease of R5·01 lakhs in Bombay and of R2·17 lakhs in Assam, owing to lapses in ordinary grants and in special allotments for police reorganisation, and to the transfer of funds in the former province to the Public Works Department for the construction of police buildings. Less important savings in the Budget provision are also expected in Madras, Bihar and Orissa and the Central Provinces.

dget, 1916-17. 94. The Budget estimate for 1916-17 is taken at R15·17 lakhs higher than the Revised for the current year. The estimates provide generally for the full cost of sanctioned establishments and of the various schemes already introduced. Some allotments have also been made for other urgent improvements. But no specific provision has been made under this head in the United Provinces and in Bengal for the payment of grain compensation allowance in the ensuing year, a lump allotment for this purpose being entered under "Miscellaneous" (see paragraph 146); this accounts for the apparent reduction of expenditure in the former province in the Budget for 1916-17 as compared with the Revised estimate for 1915-16, while the decrease in Bengal due to the same cause is more than counterbalanced by the provision made for certain urgent schemes.

REVENUE.

(*a*) *Imperial.*

95. The figures show little variation.

(*b*) *Provincial.*

evised, 1915-16. 96. The Revised estimate for 1915-16 does not differ materially from the

udget, 1916-17. Budget. The Budget estimate for 1916-17 exceeds the Revised of the current year by R·97 lakh, the increase being mainly due to higher recoveries in the Punjab on account of punitive police.

EXPENDITURE.

97. The total Revised estimate for 1915-16 does not differ materially from the Budget provision. There is an increase of R1·12 lakhs in Burma, due to a rise in prices of coal and marine stores; but it is counterbalanced largely by a saving of R·71 lakh in Bengal, caused by a reduction in the charges of pilot establishments consequent on the dislocation of trade. The Budget estimate for 1916-17 is taken at R2·56 lakhs less than the Revised for the current year. The reduction is mainly due to the absence of any provision in Burma for the construction of new launches.

Revised, 1915-16.

Budget, 1916-17.

REVENUE.

98. The falling of R3·16 lakhs in the revenue in 1915-16, as compared with the Budget estimate, is chiefly due to the unfavourable conditions of sea-borne trade. The Budget estimate for 1916-17 does not differ materially from the Revised for the current year.

EXPENDITURE.

(a) *Imperial—(India and England).*

Revised, 1915-16.

99. The Revised estimate for 1915-16 is less than the Budget by R1·83 lakhs. A portion of the saving is nominal and is caused by (1) the assignment to Provincial Governments of R·90 lakh out of the reserve for educational requirements, for which Budget provision was made under Education, and (2) the record under other heads of account of a grant of R·09 lakh made from this reserve for the improvement of Army schools. The balance of the decrease is due to lapses in the reserve and in ordinary grants.

100. Of the reserve of R2·19 lakhs provided in the Budget for 1915-16 out of the recurring appropriation of R124 lakhs from Imperial revenues for the improvement of education, R1·75 lakhs will be utilised as shown below, and R·44 lakh will lapse:

		Lakhs of Rupees.
(*i*) Assigned to Provincial Governments	Recurring	·04
	Non-recurring	·86
(*ii*) Allotted for non-recurring expenditure on Army schools		·09
(*iii*) Allotted for recurring expenditure in minor administrations		·01
(*iv*) Allotted for non-recurring expenditure in minor administrations, etc.:—		
(*a*) Delhi	·22	
(*b*) Other tracts	·53	
		·75
Grand Total		1·75

Budget, 1916-17.

101. The Budget estimate for 1916-17 exceeds the Revised for the current year by R2·49 lakhs, the increase being mainly due to the provision of R·42 lakh for grants to certain schools in Bangalore, and a reserve of R1·81 lakhs. Of the special appropriation of R124 lakhs mentioned in paragraph 100, R120 31 lakhs have already been distributed among the various provinces, etc., to meet recurring expenditure. The balance of R3 69 lakhs has been allotted as follows in the Budget estimate for the ensuing year:—

	Lakhs of Rupees.
(*i*) Assigned to Provincial Governments for non-recurring expenditure	1·74
(*ii*) Non-recurring expenditure in minor administrations, etc.	·14
(*iii*) Reserve	1·81
	3 69

(b) *Provincial.*

Revised, 1915-16.

102. The total expenditure in 1915-16 is expected to be R30·88 lakhs less than the Budget estimate. The latter included special allotments under this head, aggregating about R151 lakhs, from the recurring and non-recurring assignments made from Imperial revenues in recent years for the development and improvement of education. Out of these allotments, the expenditure expected in 1915-16 is about R139 lakhs only, of which R122 lakhs will be recorded under Education, while the balance will appear under Civil Works. Under the former head, there is thus a decrease of about R29 lakhs, as compared with the Budget provision, in the outlay from special Imperial grants; and the expenditure from other Provincial resources will accordingly fall short of the corresponding budget provision by about R2 lakhs only. This decrease is due to lapses in ordinary grants in almost all the provinces and in the special allotment of R1 lakh made in Assam for educational reforms.

Budget, 1916-17.

103. The Budget estimate for 1916-17 exceeds the Revised for the current year by R10·98 lakhs. The expenditure in 1916-17 from the special assignments made from Imperial revenues in recent years will, however, be about 9 lakhs less than in 1915-16, the provision made in the Budget under

Education for expenditure from these contributions amounting to R113 lakhs against a probable outlay of R122 lakhs in the current year. The provision in the Budget for 1916-17 for expenditure from ordinary Provincial resources is thus about R20 lakhs more than in the Revised of the current year. The increase is distributed over all the provinces excepting Burma. Provision has generally been made for the sanctioned scale of expenditure and for pressing requirements.

104. The following table shows the progress made by the Provincial Governments in utilising the various non-recurring grants given from Imperial revenues in recent years. To simplify the position, it has been assumed that the whole of the recurring grant for any year is fully utilised before any expenditure is debited against the non-recurring grant.

Owing to the need for economy, no material progress with the spending of these grants is likely to be made in the ensuing year. The *minus* figures against some of the provinces indicate that it will not be possible to utilise fully the recurring grant from Imperial revenues for educational expenditure.

Revenue.

(*a*) *Imperial.*

105. The figures show little variation.

(*b*) *Provincial.*

Revised, 1915-16. 106. The increase of R2·65 lakhs in the Revised estimate over the Budget for the current year is mainly due to special receipts in Bombay from the sale of securities belonging to the Gujarat college and from a private donation for the Ahmedabad College of Science. *Budget, 1916-17.* The Budget estimate for 1916-17 provides for normal receipts.

EXPENDITURE.

(*a*) *Imperial* (*India and England*).

Revised, 1915-16.

108. The total Revised estimate for 1915-16 is less than the Budget by R9·27 lakhs, owing mainly to a decrease of R10·34 lakhs in India General and increases of R·67 lakh and R·85 lakh respectively in Delhi and the North-West Frontier Province. The decrease in India General is due (1) to the fact that no portion of the expenditure which is being incurred from the reserve of R7·70 lakhs entered in the Budget (see paragraph 109) will appear in the India General accounts; (2) to a reduction from R5 lakhs to R2·80 lakhs of the grant for the Indian Research Fund Association, in view, as regards R1·20 lakhs, of a grant of that amount from Imperial revenues made to the Government of the United Provinces for sanitary improvements in Lucknow, while a lapse also results from the temporary transfer to military duty of officers of the Indian Medical Service employed on research work; and (3) to lapses in ordinary grants. The increases in Delhi and in the North-West Frontier Province are caused by expenditure against the special allotments of R·70 lakh and R2 lakhs respectively which have been made to them from the reserve of R7·70 lakhs referred to above; and apart from this special expenditure, there will be a saving of R1·15 lakhs in the Budget provision in the latter province due to heavy lapses in ordinary grants.

109. The Budget estimate for 1915-16 included a reserve of R7·70 lakhs for the improvement of sanitation, being the portion of the special appropriation of R51 lakhs made for this purpose from Imperial revenues in recent years which had not been distributed among the provinces. From this sum, non-recurring allotments aggregating R3·70 lakhs have been made, *viz.*, (*i*) R1 lakh to the United Provinces for the improvement of the pilgrim route to Kedarnath and Badrinath, (*ii*) R2 lakhs to the North-West Frontier Province for the payment of a contribution to the Peshawar Municipality in aid of its scheme of drainage and water-supply, and (*iii*) R·70 lakh to Delhi for sanitary improvements. The balance of the reserve, amounting to R4 lakhs, will lapse in view of the need for economy, as no further allotments are required in connection with schemes of pressing urgency.

Budget, 1916-17.

110. The Budget estimate for 1916-17 exceeds the Revised for the current year by R3·63 lakhs. Provision has been made for the cost of sanctioned establishments and for normal charges generally; for a grant of R3 lakhs to the Indian Research Fund; for a further non-recurring contribution of R2 lakhs to the Peshawar Municipality in connection with its scheme of drainage and water-supply; and for a reserve of R3·70 lakhs. The reduction of R·68 lakh in the expenditure in Delhi is due to the absence of the special outlay mentioned in paragraph 109.

111. Out of the special appropriation of R51 lakhs referred to in paragraph 109, R38·30 lakhs have been assigned permanently to Provincial Governments or allotted for recurring outlay in minor administrations. From the balance of R12·70 lakhs, R3 lakhs will be paid in 1916-17 to the Indian Research Fund and R2 lakhs to the Peshawar Municipality; and R3·70 lakhs will be held in reserve to meet pressing demands that may come forward during the ensuing year. The residue of R4 lakhs will be temporarily resumed, in view of the financial situation, and will be made available for expenditure on sanitation later, on the return of normal conditions.

(*b*) *Provincial.*

Revised, 1915-16.

112. The Revised estimate for 1915-16 exceeds the Budget by R18·03 lakhs. The increase is wholly nominal and is due to a change in the classification of accounts, according to which grants to local and private bodies are recorded not under Civil Works, as used to be done in some of the provinces, but under the heads of service most closely connected with the objects for which the grants are given. In consequence of this change, expenditure amounting to about R25 lakhs* in Madras and R6 lakhs* in Burma for which provision was made in the Budget under Civil Works appears in the Revised under

* These figures include respectively R17 lakhs and R3 lakhs on account of outlay from special Imperial grants.

Medical. Eliminating this abnormal disturbance, the expenditure in 1915-16 is, therefore, likely to be less than the Budget estimate by about R18 lakhs. The Budget included special allotments in provinces other than Madras and Burma, aggregating about R34 lakhs, for outlay under Medical from recurring and non-recurring appropriations made from Imperial revenues for the development of sanitation. The amount of corresponding expenditure is now estimated at about R18 lakhs, *i.e.*, R16 lakhs less than the Budget provision. The Revised estimates also include a special grant of R4 lakhs to the Madras Corporation in connection with its water-supply and drainage scheme for which there was no provision in the Budget. Apart from the change in classification referred to above and excluding outlay from the special Imperial grants, and the grant to the Madras Corporation, the expenditure in 1915-16 will thus fall short of Budget allotments by about R6 lakhs. The saving is distributed over several provinces and is generally due to lapses in the ordinary grants and to a curtailment of expenditure with reference to the policy of economy.

Budget, 1916-17.

113. The Budget estimate for 1916-17 is less than the Revised for 1915-16 by R9·16 lakhs. Part of the decrease is explained by the absence of provision in the estimates for the next year for the grant to the Madras Corporation mentioned above, and the balance occurs in the outlay from special Imperial grants for which a provision of about R34 lakhs has been made in the Budget under Medical, against a probable expenditure of about R38 lakhs under the same head in the current year (inclusive of amounts likely to be spent in Madras and Burma). Provision has generally been made for the full cost of sanctioned establishments as well as for necessary outlay in other directions

114. The following table shows the progress made by the Provincial Governments in utilising the various non-recurring grants made from Imperial revenues in recent years (beginning from 1911-12) in aid of sanitation. To simplify the position, it has been assumed that the recurring grant is fully utilised before any expenditure is debited against the non-recurring grant; and the *minus* figure in 1915-16 and 1916-17 against some of the provinces indicates that the recurring grant will not be spent in full during the year.

[In lakhs of R]

Province.	Grants to end of 1916-17.	Expenditure.					Balance.
		To end of 1914-15.	In 1915-16 (Revised) recorded under		In 1916-17 (Budget) recorded under		
			Medical.	Other heads.	Medical.	Other heads.	
Madras . . .	39·25	23·49	10·93	...	3·93	...	·90
Bombay . . .	37·95	19 95	—1·18	...	—4·20	...	23·38
Bengal . . .	40 55	1z 35	—2·00	...	—2·50	...	32·70

Burma . . .	21·50	12·67	...	...	...	...	8·83
Bihar and Orissa .	17·82	12·90	—1.43	...	...	...	6·35
Central Provinces .	16 50	6·16	·71	...	1·99	...	7·64
Assam . . .	6·96	6·49	—·36	...	—·38	...	1 21
Total .	2,60·70	1,44·76	5·79	...	—2·66	...	1,12 81

The need for economy and the shortage in the superior medical staff will lead to a considerable curtailment of expenditure. Only three of the provinces expect to utilise in 1916-17 a portion of the unspent balances of the non-recurring grants; while in four others, the recurring grants will not be spent in full.

Revenue.

115. The figures of both Imperial and Provincial revenue do not show any important variations.

116. The Imperial outlay shown against "Other Provinces" consists of the charges of the Political Residency at Aden and certain other expenditure—mainly in connection with political refugees and State prisoners—in several provinces.

(*a*) *Imperial—India and England.*

117. The expenditure in 1915-16 is likely to exceed the Budget provision by R11·34 lakhs, owing mainly to special expenditure in connection with the diplomatic and consular services in Persia. The total Budget for 1916-17 is less than the total Revised estimate for 1915-16 by 6·77 lakhs, an expected reduction in the special expenditure in Persia being partly counterbalanced by an increase in the North-West Frontier Province, due to the grant of certain concessions to the frontier militia with reference to the present conditions of service on the frontier. *Revised, 1915-16.* *Budget, 1916-17.*

(*b*) *Provincial.*

118. The total expenditure in 1915-16 is expected to fall short of the Revised by R8·30 lakhs, while the Budget estimate for 1916-17 exceeds the Revised for 1915-16 by R7·05 lakhs. These variations occur mostly in the special expenditure in Burma and Assam in connection with the administration and proper control of the North-East frontier. *Revised, 1915-16.* *Budget, 1916-17.*

EXPENDITURE.

(*a*) *Imperial* (*India and England*).

119. The total expenditure in 1915-16 is likely to fall short of the Budget provision by R·89 lakh, owing to lapses in ordinary grants and the non-utilisation of the lump allotment for the creation of a separate Veterinary department in the North-West Frontier Province. The Budget estimate for 1916-17 provides generally for sanctioned establishments and repeats the lump allotment in the North-West Frontier Province. The absence of any provision against "Other Provinces" in the table on page 68 is due to the fact that the charges of the Camel Specialist in the Punjab will be recorded in the Provincial section of the accounts with effect from the ensuing year.

Revised, 1915-16.

Budget, 1916-17.

(*b*) *Provincial.*

120. The total Revised estimate for 1915-16 does not differ materially from the Budget, lapses in grants in some of the provinces being nearly counterbalanced by unimportant excesses in others. The Budget estimate for 1916-17 exceeds the Revised for 1915-16 by R3·01 lakhs owing to special allotments in the Punjab and in some of the other provinces for a necessary expansion of the operations of the agricultural and allied departments

Revised, 1915-16.

Budget, 1916-17.

REVENUE.

(*a*) *Imperial.*

121. The figures show little variation.

(*b*) *Provincial.*

122. The Revised estimate for 1915-16 does not differ materially from the Budget. The Budget estimate for 1916-17 provides for a growth in the revenue in most of the provinces consequent on the opening of new experimental farms, etc.

Revised, 1915-16.

Budget, 1916-17.

TOTAL R	46,69,734	45,90,116	43,77,913	46,32,000	43,02,000	42,84,000

EXPENDITURE.

123. The figures shown against "Other Provinces" in the table at page 70 represent expenditure incurred in the several provinces in connection with ethnographical surveys and census operations, as well as the cost of the Archæological Department in Burma.

EXPENDITURE.

(*a*) *Imperial—India and England.*

124. The total expenditure in 1915-16 will fall short of the Budget estimate by R4·11 lakhs, owing mainly to lapses in the grants of the Survey of India and Geological Survey Departments, consequent on a curtailment of operations, and in the provision for the purchase of stores in England. *Revised, 1915-16.*

125. The Budget estimate for 1916-17 is higher than the Revised estimate for the current year by R1 lakh. The increase is wholly due to a higher provision for the purchase of stores in England. *Budget, 1916-17.*

(*b*) *Provincial.*

126. The Revised estimate for 1915-16 does not differ materially from the Budget provision. The Budget for 1916-17 is taken at R2·96 lakhs higher than the Revised estimate for the current year. The increase occurs mostly in Bengal (R1·80 lakhs) and Madras (R·71 lakh) and is chiefly due to lump provisions for the development of local industries. *Revised, 1915-16.* *Budget, 1916-17.*

Revenue.

(*a*) *Imperial.*

127. The figures show little variation.

(*b*) *Provincial.*

Revised, 1915-16.

Budget, 1916-17.

128. The improvement in revenue in 1915-16 over the Budget estimate occurs mainly in the receipts from the cinchona plantations in Bengal and Madras. The Budget estimate for 1916-17 anticipates a further rise of R·94 lakh in the revenue, owing chiefly to higher receipts in Madras from fisheries and other sources.

132. The figures of Imperial revenue shown against "Other Provinces" represent the receipts of certain abolished funds, the assets and liabilities of which were taken over by the Government, as well as the subscriptions paid by members of the Indian Civil Service for securing certain pensionary benefits for their families. The charges on account of such pensions as well as of the pensions of the abolished funds are recorded in the accounts as Imperial expenditure.

EXPENDITURE.

(*a*) *Imperial—India and England.*

133. The figures show little variation.

(*b*) *Provincial.*

vised, 1915-16. 134. The Revised estimate for 1915-16 is less than the Budget by ₹8·59 lakhs, owing to a smaller growth of pension charges, and reduced payments in connection with the commutation of pensions mostly in Bengal, the Punjab and the United Provinces. The Budget estimate for 1916-17 provides for the normal growth of the retired list.

dget, 1916-17.

REVENUE.

(*a*) *Imperial—India and England.*

vised, 1915-16. 135. The Revised estimate for 1915-16 exceeds the Budget by ₹2·02 lakhs, mainly owing to receipt of higher subscriptions towards Indian Civil Service family pensions. The Budget estimate for 1916-17 does not differ materially from the Revised for 1915-16.

dget, 1916-17.

(*b*) *Provincial.*

vised, 1915-16. 136. The Revised estimate for 1915-16 exceeds the Budget by ₹1·60 lakhs, the increase occurring mainly in the receipts of contributions from local bodies to secure pensionary benefits from general revenues for their servants. The Budget estimate for 1916-17 does not differ materially from the Revised for 1915-16.

dget, 1916-17.

EXPENDITURE.

(*a*) *Imperial, India and England.*

Revised, 1915-16.

137. The total Imperial expenditure in 1915-16, exclusive of the charges of the commercial departments, is likely to exceed the Budget provision by R2·09 lakhs, the increase being due to a higher outlay in England on the purchase of stores consequent on a rise in prices. The Budget estimate for 1916-17 anticipates a reduction in the expenditure on the purchase of stores in England in view of the need for economy.

Budget, 1916-17.

(*b*) *Provincial.*

Revised, 1915-16.

138. The Revised estimate for 1915-16 does not show any important variations from the Budget. The Budget estimate for 1916-17 anticipates a reduction of R·82 lakh in the total expenditure, as compared with the current year, this being the net result of a number of unimportant variations in the several provinces.

Budget, 1916-17.

REVENUE.

139. The figures do not show any important variation. The Imperial revenue shown against "Other provinces" represents recovery of the value of stationery supplied to railways and to municipalities and other local bodies.

Expenditure . . ₹	...	...	...	...	...	...
Equivalent in Sterling £	...	...	...	...	...	...

140. This head records the comparatively small sums which have to be brought to account owing to the fact that the remittances from India to England by means of council bills and transfers, and the remittances in the opposite direction by sterling bills and transfers, are not effected exactly at the rate of 16 pence to the rupee. It may be mentioned that any gain derived from remittances on account of the Gold Standard Reserve is credited to the Reserve and not to general revenues.

141. In the current year, the average rate to be obtained on the net remittance of funds from India to England is estimated at £1=₹14·92, and there is accordingly a gain of ₹13 lakhs under this head. In the Budget estimate for next year, it is assumed, in accordance with the usual practice, that remittances will be effected at an average rate of par. *Revised, 1915-16.* *Budget, 1916-17.*

142. Charges in connection with the remittance of Government treasure are Imperial in all provinces; so is the discount paid, or the premium levied, in connection with the sale of bills at treasuries and currency offices to facilitate trade remittances of funds. Extraordinary items of revenue realised, or of expenditure incurred, under this head in the various provinces are also treated as Imperial, if they exceed R10,000 in amount.

EXPENDITURE.

(*a*) *India—Imperial.*

143. The Revised estimate for 1915-16 falls short of the Budget by R7·59 lakhs. Out of the reserve of R10·5 lakhs (including R·5 lakh for Delhi) for unforeseen charges, which was provided in the Budget under Miscellaneous, only R4·09 lakhs will be used to meet expenditure falling under this head, *viz.*, (1) a payment of R3·05 lakhs to the Mysore Durbar on account of surplus revenues of the Bangalore Assigned Tract, and (2) an outlay of R1·04 lakhs, in excess of the Budget allotment, on books and publications. The balance of the reserve, amounting to R6·41 lakhs, has been appropriated to meet sanctioned outlay under other heads of account. There is also a saving of R1·47 lakhs in the charges for the remittance of treasure, due to smaller movements of coin. *Revised, 1915-16.*

144. The Budget estimate for 1916-17 provides for normal charges; for miscellaneous expenditure connected with the war likely to be incurred in the ensuing year; and for a reserve of R15·5 lakhs for unforeseen expenditure, of which R·5 lakh is for Delhi. *Budget, 1916-17.*

(*b*) *India—Provincial.*

145. The Revised estimate for 1915-16 is less than the Budget by R6·07 lakhs. The decrease is mainly due to the record under other heads of account of most of the expenditure incurred against the lump provision for grain compensation allowance and against the various other reserves which were included in the Budget estimates of several provinces under Miscellaneous; and to a lapse in the allotment made in the Punjab for the general introduction of the new copying agency rules. A certain amount of unforeseen expenditure has been incurred in Bombay in connection with famine fodder operations; and in Bengal, Assam and the United Provinces, for relief of distress caused by floods, etc. *Revised, 1915-16.*

146. The Budget estimate for 1916-17 provides generally for normal charges and for the usual reserve for unforeseen expenditure in most provinces. In Bengal and the United Provinces, lump allotments have again been made for grain compensation charges. *Budget, 1916-17.*

(*c*) *England.*

147. The Revised estimate for 1915-16 does not differ materially from the Budget, an increase of £5,600 in the charges of the Public Services Commission being partly counterbalanced by a fall in the miscellaneous expenditure connected with the supply of stores to India. The Budget estimate for 1916-17 is taken at £20,200 less than the Revised for the current year, owing to a further probable decrease in the latter item of expenditure and the absence of the charges of the Public Services Commission. *Revised, 1915-16.* *Budget, 1916-17.*

REVENUE.

(*a*) *India—Imperial.*

148. The Revised estimate for 1915-16 is less than the Budget by R2·80 lakhs. The decrease is mainly due to a reduction in the special receipts from the sale of town sites in the Punjab, smaller recoveries of departmental charges in connection with the supply of stores to Provincial Governments and local bodies, and a fall in the revenue derived from premium on bills. The Budget estimate for 1916-17 provides generally for normal receipts. *Revised, 1915-16.* *Budget, 1916-17.*

(*b*) *Provincial.*

Revised, 1915-16.

149. The total revenue in 1915-16 is likely to fall short of the Budget estimate by R2·51 lakhs. The decline is mainly due to the postponement of the general introduction of the new copying agency rules in the Punjab, and to smaller receipts on account of unclaimed deposits in this province and also in Bengal, Bihar and Orissa, and Assam. The Budget estimate for 1916-17 provides generally for normal receipts.

Budget, 1916-17.

(*c*) *England.*

150. The figures show little variation.

151. The expenditure in the current year under the head Famine Relief is now estimated at R6 lakhs, the principal items being an outlay of (1) R4 lakhs in the Punjab in connection with fodder concessions, and (2) R1·20 lakhs in Bihar and Orissa on relief operations in certain districts. *Revised, 1915-16.*

152. The amount available for famine insurance in 1915-16 accordingly amounts to R144 lakhs, of which R75 lakhs will be spent on protective works and R69 lakhs will be appropriated for the reduction or avoidance of debt.

153. In the Budget estimate for 1916-17 provision has been made, as usual, for a total grant of R150 lakhs under this group head. Out of this amount, a sum of R6·94 lakhs will be required to meet expenditure debitable to the head Famine Relief, in connection with relief operations and fodder concessions mainly in the Punjab, Bihar and Orissa and Ajmer-Merwara; and R64·90 lakhs have been allotted for the construction of protective works. The remainder, *viz.*, R78·16 lakhs, will be utilised for the avoidance of debt. Of the last named sum, R14·48 lakhs will appear in the Provincial section of the estimates as a result of the arrangements explained in the Financial Statement for 1907-08 (see also paragraph 231). *Budget, 1916-17.*

CONSTRUCTION OF PROTECTIVE RAILWAYS.

154. The small *minus* figures entered in the Revised estimate for 1915-16 and in the Budget for 1916-17 represent the value of surplus stores of the Dharmapuri-Hosur extension of the Morappur-Dharmapuri Railway. No outlay on the construction of Protective railways is contemplated in either of the two years.

CONSTRUCTION OF PROTECTIVE IRRIGATION WORKS.

155. In the Budget estimate for 1915-16, an allotment of R75 lakhs was made for outlay on Protective Irrigation works, the whole amount being met from the Famine Insurance grant. The probable expenditure, according to the Revised estimate, will amount to R78·30 lakhs, owing mainly to more rapid progress of work on the Ghaggar canal. R75·05 lakhs of the outlay will be recorded in the Famine Relief and Insurance section of the accounts; and the remaining 3·25 lakhs will appear in the Irrigation section. *Revised, 1915-16.*

Budget, 1916-17.

156. In the Budget estimate for 1916-17 the allotment for Protective Irrigation works has been reduced to R65 lakhs, with reference to the policy of retrenchment, the whole amount being met from the Famine Insurance grant. The distribution of the grant of R65 lakhs is given in the table below.

* The figures against this line include contribution by the Jaipur Darbar towards Capital outlay on the Nagda Muttra Railway, as follows:—

£ 66,667	£ 266,667	£ 333,333	£ 400,000	£ 400,000	£ 466,667

† The overdraft of, and advances to, the Bengal Nagpur Railway Company amounting to £13,451,400 on the 31st December 1910 have been transferred in the accounts of 1914-15, from "expenditure by companies" to "expenditure by Government".

157. The Gross Receipts and Working Expenses of State Railways include the following figures on account of the Jorhat State Railway in Assam. This is the only line the transactions of which are recorded in the Provincial section of the accounts:—

	Accounts, 1912-13.	Accounts, 1913-14.	Accounts, 1914-15.	Budget, 1915-16.	Revised, 1915-16.	Budget, 1916-17.
	R	R	R	R	R	R
Gross Receipts . . .	1,22,589	1,23,805	1,27,545	1,20,000	1,40,000	1,40,000
Working Expenses . . .	84,546	89,499	1,27,109	96,000	1,05,000	1,08,000

Revised, 1915-16.

Gross Receipts.

158. The Budget estimate of Gross Receipts for 1915-16 was taken at 53·01 crores, or 45 lakhs lower than the probable receipts of the previous year as then estimated. It was assumed that war conditions would continue to be operative throughout the year and would gravely prejudice the revenue. This anticipation has not been fully realised. The recovery in earnings which set in in March last has continued in a greater or less degree throughout the year and the Revised estimate is now placed at 57·15 crores. The improvement, which is shared in by all the principal railways—notably the Great Indian Peninsula, Bombay Baroda and Central India, Madras and Southern Mahratta and Bengal-Nagpur—is partly attributable to large movements of cotton and manganese ore, to diversion of coal traffic from over-sea routes to rail routes owing to scarcity of freight and to improved coaching receipts from the transport of troops

Working Expenses.

159. The Revised estimate of Working Expenses for 1915-16 stands at 7·92 lakhs below the Budget estimate, a remarkable result for a year in which the estimate of receipts is expected to exceed the Budget anticipation by over 4 crores. The principal causes of this are the restriction of expenditure, and especially outlay on special renewals, to the amount which is imperative or immediately remunerative, and the increasing difficulty of obtaining railway material from the United Kingdom.

Surplus Profits.

160. The increase of 16·03 lakhs in the provision for payment of surplus profits to companies follows on the improvement in their net traffic receipts in the last quarter of the preceding year.

Budget, 1916-17.

Gross Receipts.

161 The Budget estimate of Gross Receipts for 1916-17 is taken at 56·37 crores, or about 80 lakhs less than the Revised estimate for the current year. It is not considered safe to assume that, with the further continuance of the war, the record earnings of this year will be fully maintained, though necessary allowance has been made for development of traffic on new lines and extensions.

Working Expenses.

162. The grant for Working Expenses in 1916-17 is more than the Revised for the current year by 34·16 lakhs and provides for a further rise in the price of imported materials required for railway working.

Surplus Profits.

163. Under Surplus Profits paid to companies there is an increase of 3·74 lakhs due to profits earned in the second half of the current year, payment of which will be made next year, being larger than those of the second half of 1914-15.

Interest Charges, etc.

Revised, 1915-16.

164. The excess over the Budget estimate of 1915-16 under Interest on debt is explained in paragraph 65. The decrease under Interest on capital deposited by companies is due mainly to the Great Indian Peninsula Railway not having raised Debenture Stock as provided for in the Budget and to the East Indian Railway having issued Debenture Stock later in the year than was anticipated.

Budget, 1916-17.

165. The increase in the total Interest charges in 1916-17 is a result of the continued growth of capital outlay on railways.

Other Receipts.

166. The receipts shown under this head represent recoveries from the Travancore Darbar of its share of the loss on the Travancore Branch of the

South Indian Railway; the Government share of the surplus profits of the Rohilkund and Kumaon, Southern Punjab and Amritsar Patti Railways, payable under the terms of their respective contracts; and dividends on certain shares of the Ahmedabad Dholka Railway allotted to Government in repayment of expenditure incurred by it on behalf of the railway. The improvement of R·53 lakh (£3,500) on the Budget estimate of receipts in the current year and the decrease of R1·10 lakhs (£7,300) provided in the Budget of 1916-17 are mainly due to the variation in the Government share of surplus profits of the Southern Punjab Railway Company.

Other Charges.

167. These consist of cost of land required by certain Companies, the contracts with which provide for the free supply of all land wanted for the purposes of the railways undertaken by them, and of miscellaneous items such as surveys and controlling establishments (including the Railway Board). A share of the cost of control is charged to the working expenses of each railway company and the recoveries thus made are adjusted by deduction from the miscellaneous expenditure. The details are :—

	Accounts, 1914-15.	1915-16.		1916-17
		Budget.	Revised.	Budget.

TOTAL . £	185,215	254,700	215,700	261,300

Land.—A lapse of R3·50 lakhs is expected in the Imperial Budget grant for the current year, due chiefly to short outlay on the Ahmedpur Katwa, Chaparmukh Silghat, Kalighat Fulta and Tinnevelly Tiruchendur Railways and to the postponement of acquisition of land for the Dindigul Palghat Railway, partly counterbalanced by increases on the Mymensingh Bhairab Bazar, Sara Serajgunj and Guzerat Railways. The principal allotments made in 1916-17 are for the Kalighat Fulta, Sara Serajgunj, Mymensingh Bhairab Bazar, Ahmedpur Katwa, Jaijou Extension, Katakhal Lalla Bazar and Mayavaram Tranquebar Railways.

Miscellaneous Expenditure.—The lapse of R2·45 lakhs in the Revised estimate for 1915-16 is due chiefly to survey operations being restricted in consequence of officers having been placed on military duty and to realization of unanticipated credits. The Budget for 1916-17 is made up as follows :—

	R
Allotment for surveys	5,81,000
Charges for Railway Board and other establishments . .	14,57,000
Deduct—Recoveries from Railway Companies on account of cost of supervision	*16,38,000*
TOTAL .	4,00,000

General Result.

Major Irrigation.

168. Taking India as a whole, the net revenue derived from Major Irrigation works in 1915-16 will be less than the Budget forecast by £151,300 (R22·69 lakhs). There will be a fall of R·13 lakh in the Direct Receipts and of R1·33 lakhs in the share of Land Revenue. There will also be a large increase of R21·23 lakhs in the expenditure, *viz.*, R15·08 lakhs under Working Expenses and R6·15 lakhs in the interest charges. An improvement of £14,600 (R2·18 lakhs) is expected in the net revenue in 1916-17. This allows for a rise of R8·29 lakhs in the gross revenue, made up of an increase of R14·34 lakhs in the Direct Receipts and a fall of R6·05 lakhs in the share of Land Revenue, and a small reduction of R·67 lakh in Working Expenses. But provision has been made for a growth of R6·78 lakhs in the interest charges, in consequence of the considerable outlay now being incurred on new projects in the Punjab and elsewhere the benefits of which will not be realised for some time to come.

Minor Irrigation.

The net result under Minor Irrigation works in 1915-16 is better than the Budget estimate by £28,900 (R4·34 lakhs), a decline of R2·36 lakhs in revenue being more than counterbalanced by a saving of R6·70 lakhs in expenditure. The estimate for next year provides for a rise of R1·85 lakhs in the receipts and for a reduction of R2·63 lakhs in expenditure.

169. The figures for Land Revenue due to Irrigation have already been examined in paragraphs 11 and 12 along with those for Land Revenue proper. The details of the other heads are exhibited in the following tables

Direct Receipts.

(a) *Imperial.*

ised, 1915-16. 170. The total Revised estimate for 1915-16 does not differ materially from the Budget, a fall of R·72 lakh in the revenue of the Upper and Lower Swat River Canals being more than counterbalanced by an improvement in the collections in the United Provinces (R·79 lakh), owing to an increased demand for irrigation from the Betwa Canal, and in Burma and in the Central Provinces.

get, 1916-17. 171. The Budget estimate for 1916-17 provides for normal receipts, and is R1·76 lakhs higher than the Revised estimate for the current year, chiefly in consequence of an expected development of irrigation on the Upper Swat River Canal and on the canals in Burma and the Central Provinces.

(b) *Divided and wholly Provincial.*

ised, 1915-16. 172. The Revised estimate for 1915-16 does not differ materially from the Budget. There is a fall of R6·98 lakhs in the Punjab, due to a smaller supply of water during the *kharif* season from the Sirhind and the Western Jumna Canals in consequence of scanty rains, a contraction in the area under cotton and the grant of larger remissions; and of R·92 lakh in Bombay, owing chiefly to a reduced demand for water from the Godavari Canal consequent on favourable rainfall. On the other hand, there are improvements of R5·70 lakhs and 1·50 lakhs respectively in the United Provinces and Bihar and Orissa, where deficient rainfall in certain parts has led to a more extensive use of canal water.

get, 1916-17. 173. The total Budget for 1916-17 exceeds the Revised estimate for the current year by R12·58 lakhs. It is based generally on the demand for *rabi* irrigation in the current year and on normal requirements in connection with next year's *kharif*.

Working Expenses.

(a) *Imperial.*

ised, 1915-16. 174. The total expenditure in 1915-16 is likely to exceed the Budget provision by R·57 lakh, the increase being wholly due to higher outlay on the canals in the North-West Frontier Province. Excesses over the Budget grants are also expected on the Imperial canals in other provinces; but they will be met from the reserve of R·63 lakh entered in the Budget for unforeseen requirements.

get, 1916-17. 175. The Budget estimate for 1916-17 provides for normal charges in all the provinces, and is less than the Revised estimate of the current year by R1·57 lakhs.

(b) *Divided and wholly Provincial.*

ised, 1915-16. 176. The Revised estimate for 1915-16 exceeds the Budget by R14·51 lakhs. There is a large increase of R11·59 lakhs in the Punjab due to special expenditure, which could not be postponed without serious danger and a considerable loss of revenue, in connection with training works on the Lower Chenab Canal and the up-keep of the banks of the Triple project canals. Smaller excesses are also expected in Madras (R1·65 lakhs), Bihar and Orissa (R1·26 lakhs) and Bombay (R1·03 lakhs), chiefly in consequence of outlay on repairs of damages caused by floods and on certain pressing works for which no provision was made in the Budget. On the other hand, there will be unimportant lapses in the Budget grants in Bengal and in the United Provinces.

dget, 1916-17. 177. The Budget estimate for 1916-17 provides generally for a normal scale of expenditure and for outlay on certain special works urgently required in the Punjab.

REVENUE.

(*a*) *Imperial.*

179. The figures do not show any important variation.

(*b*) *Divided and Provincial.*

180. The total Revised estimate for 1915-16 is less than the Budget by R2·06 lakhs. The decrease is mainly due to a fall in the revenue from certain canals in Burma. The Budget estimate for 1916-17 provides for normal collections in all the provinces. *Revised, 1915-16.* *Budget, 1916-17.*

EXPENDITURE.

(*a*) *Imperial—India and England.*

181. The Budget estimate of the current year included a grant of R5 lakhs in aid of special expenditure entailed by the recommendations of the Irrigation Commission. R1·75 lakhs out of this grant are being spent on the Surkhab River project in Baluchistan, while R1·15 lakhs have been allotted to the Government of the United Provinces for tank restoration works and placed at its credit by an assignment of Imperial revenue (*vide* paragraph 235). The balance of the special grant will lapse. Savings are also expected in the grants for ordinary expenditure in some of the minor administrations. These causes account for the decrease of R3·48 lakhs in the Revised estimate for 1915-16 as compared with the Budget. *Revised, 1915-16.*

182. The Budget estimate for 1916-17 exceeds the Revised estimate for the current year by R·97 lakh. Provision for new works has been curtailed as far as possible, and no specific allotment has been made for the Surkhab River project in Baluchistan; but a reserve of R2·89 lakhs has been entered to meet pressing requirements which cannot be foreseen at present. *Budget, 1916-17.*

(*b*) *Divided and Provincial.*

183. The Revised estimate for 1915-16 falls short of the Budget grant by R3·22 lakhs. The decrease is mainly due to the curtailment of programmes in Madras, Bihar and Orissa, and certain other provinces, in view of the need for economy. On the other hand, an excess of R1·74 lakhs over the Budget grant is expected in the United Provinces, due mainly to expenditure on tank restoration works which is being financed largely by a special assignment from Imperial revenue (*vide* paragraph 181). *Revised, 1915-16.*

184. The Budget estimate for 1916-17 is taken at R3·60 lakhs less than the Revised for the current year. Provision has generally been made for sanctioned establishments, for necessary repairs and for urgent works. *Budget, 1916-17.*

6. The Imperial revenue and expenditure shown against "Other Provinces" represent the transactions in connection with the buildings of the various departments, *e.g.*, Salt, Customs, etc., the receipts and charges of which are wholly Imperial.

EXPENDITURE.

(*a*) *Imperial—India and England.*

Revised, 1915-16.

187. The total expenditure in 1915-16 is expected to fall short of the Budget provision by R6·68 lakhs. The reduction is generally due to the curtailment of the expenditure programme in pursuance of the policy of retrenchment. There will, however, be an excess over the Budget estimate of R1·90 lakhs in Delhi owing to unforeseen outlay on land acquisition and other items; and of R4·02 lakhs in England due to a higher payment of leave allowances and a rise in the cost of stores.

Budget, 1916-17.

188. In 1916-17 the total Imperial grant has been fixed at R80 lakhs, exclusive of R4·36 lakhs allotted for expenditure incurred in the Civil Department, mostly in the several minor administrations, and of sums aggregating R31·34 lakhs to be spent by the administrations of the North-West Frontier Province (23·19 lakhs) and Baluchistan (8·15 lakhs). A large curtailment of grants has been made everywhere in view of the financial position, and the total Budget for 1916-17 is less than the Revised estimate for 1915-16 by R15·87 lakhs and less than the Budget grant for the latter year by R22·55 lakhs.

189. The purposes to which the grant of R80 lakhs mentioned in the preceding paragraph will be applied are shown below :—

[In lakhs of Rupees.]

(*a*) Ordinary Grant—		
(1) Establishment and Miscellaneous charges	12·30	
(2) Repairs	18·60	
(3) Works in progress	14·71	
(4) New Works—		
(*a*) Costing up to R5,000	6·30	
(*b*) Costing more than R5,000	6·21	
(5) Payments in England for Stores, furlough allowances, etc.	5·93	
(6) Reserve for Archæological expenditure	1·00	
(7) Reserve for other unforeseen expenditure	4·14	
		69·19
(*b*) Delhi Province—		
(1) Works in progress	0·63	
(2) New Works—		
(*a*) Costing up to R5,000	·06	
(*b*) Costing more than R5,000	0·46	
(3) Repairs	6·60	
(4) Establishment and Tools and Plant	1·76	
(5) Archæological expenditure	·18	
(6) Reserve for unforeseen expenditure	1·12	
		10·81
		80·00

190. Out of the ordinary grant mentioned in paragraph 189, allotments of R1 lakh or more will be made to carry on work already in progress on the following projects; and it is not proposed to start any important new work in the ensuing year.

Province.	Name of work.	Amount of grant.
		R
United Provinces .	Erection of certain buildings for the Imperial Bacteriological laboratory at Bareilly, including fencing, roads, drainage and water-supply . .	1,20,000
Bombay . .	New Customs House at Karachi	2,00,000
„ . .	„ „ „ „ Bombay	3,00,000
Burma . . .	„ Telegraph Office at Rangoon	1,24,000

191. The Budget grants for 1916-17 proposed for Baluchistan and the North-West Frontier Province do not differ materially from the Revised estimates for 1915-16.

(*b*) *India—Provincial.*

Revised, 1915-16.

192. The total Revised estimate for 1915-16 is less than the Budget by R46·97 lakhs. The Budget provided for an outlay of about R30½ lakhs on Civil Works from the special Imperial assignments made in recent years for education, sanitation and other beneficial services; but the total expenditure of this class in the current year, to be recorded under Civil Works, is now estimated at about R26½ lakhs. Eliminating this special expenditure as well as the Budget provision made for it, and making allowance for the fact that about R11 lakhs of ordinary expenditure for which provision was made in Madras and Burma under Civil Works will be recorded under Medical (with reference to the change in classification mentioned in paragraph 112), the Revised estimate under Civil Works falls short of the corresponding Budget grant by about R32 lakhs. The real saving is larger, for a portion of the expenditure against some of the ordinary grants provided in the Budget under Education, Medical and other heads is recorded in the accounts under Civil Works. Considerable lapses in the grants provided under the latter head, otherwise than from the special appropriations from Imperial revenues referred to above, are expected in almost all the provinces, owing to a further curtailment of the programme of construction contemplated in the Budget, which has become necessary in consequence of the financial situation. In Assam alone, the expenditure is likely to exceed the Budget grant, owing to outlay on relief works, and on the repair of flood damages, in the Surma Valley.

Budget, 1916-17.

193. The table below compares the details of the grants for 1916-17 in the various provinces, so far as settled at present, with the probable expenditure in the current year.

REVISED, 1915-16.

[Lakhs of Rupees.]

Provinces.	Grants to		Outlay in the Public Works Department on			Other items.	Total.

BUDGET, 1916-17.

[Lakhs of Rupees.]

PROVINCES.	GRANTS TO		OUTLAY IN THE PUBLIC WORKS DEPARTMENT ON			Other items.	TOTAL
	Local Boards and Municipalities.	Other local bodies.	Original Works.	Repairs.	Establishment charges.		
1. Madras	17·43	·01	39·05	9·57	15·29	1·34	82·69
2. Bombay	8·26	...	27·70	23·30	16·00	2·28	77·54
3. Bengal	9·45	1·55	15·10	24·00	13·00	·90	64·00
4. United Provinces	4·18	...	20·57	25·12	10·99	1·94	62·80
5. Punjab	11·94	...	12·31	18·20	9·01	2·39	53·85
6. Burma	10·50	...	27·03	29·00	19·52	6·21	92·26
7. Bihar and Orissa	6·73	1·00	40·62	8·50	9·00	4·74	70·59
8. Central Provinces	3·99	...	21·66	20·44	11·00	·91	58·00
9. Assam	2·81	...	6·65	16·36	7·06	1·07	33·95
TOTAL	75·29	2·56	210·69	174·49	110·87	21·78	595·68

194. The Budget estimate for 1916-17 is less than the Revised for the current year by ₹91·16 lakhs. The large decrease reflects the policy of severe retrenchment which has become necessary owing to the protracted duration of the war and the consequent financial dislocation. Allotments aggregating ₹9 lakhs only have been made for outlay on Civil Works from the special Imperial assignments made in recent years, against a corresponding outlay of ₹26½ lakhs included in the Revised estimate of the current year

195. The total provision for original works in 1916-17 has been taken at about ₹77 lakhs less than the probable expenditure in the current year and ₹2,19 lakhs less than the expenditure in 1914-15. The grants have been restricted in all the provinces to pressing requirements. Provision has been made in Bihar and Orissa for the progress of work in connection with the Bankipore buildings.

196. It is not possible to make similarly large reductions in any of the other items of expenditure shown in the table in paragraph 193. The total provision for grants to local boards and municipalities in 1916-17 is, however, taken at about ₹5 lakhs less than the similar expenditure in 1915-16, in spite of the fact that the Budget provides for a fresh item of ₹4·50 lakhs for contributions to district funds in Burma for the maintenance of provincial roads made over to them; and a reduction in the allotment for non-recurring contributions to local boards and municipalities for roads, bridges and other public works has been made in almost every province. Of the provision under "Grants to other local bodies", ₹1·50 lakhs represent the grant from Imperial revenues to the Calcutta Improvement Trust.

197. The Budget grants for Repairs and for Establishment charges are generally based on normal requirements and sanctioned scales.

REVENUE.

(a) *Imperial.*

Revised, 1915-16. 198. The total Revised estimate for 1915-16 exceeds the Budget by ₹1 lakh, mainly in consequence of higher receipts in Delhi from the rent of buildings occupied by Government officials and the supply of electric energy. The *Budget, 1916-17.* total Budget estimate for 1916-17 practically repeats the Revised for the current year.

(b) *Provincial.*

Revised, 1915-16. 199. The Revised estimate for 1915-16 shows a rise of ₹3·87 lakhs over the Budget estimate. Increased receipts are expected in almost all the pro- *Budget, 1916-17.* vinces from the sale of old materials, rent of Government buildings and other sources. The Budget estimate for 1916-17 provides generally for normal receipts.

XXXII and 46.—ARMY.

Revised, 1915-16, compared with Budget, 1915-16. Expenditure—India.

200. The Army expenditure in India during the current year will, it is anticipated, exceed the Budget estimate of R23,75·05 lakhs (£15,833,600) by R1,68·16 lakhs (£1,121,100). Foremost amongst the causes contributing to this large increase may be mentioned an enhanced outlay of R89·91 lakhs (£599,400) on account of various special services, *e.g.*, port defences, operations on the North-West Frontier, etc. The decision that India should bear the normal cost of the regular British and Indian garrison involves an additional charge of R88 lakhs (£586,700), including extra food charges. The formation of mechanical transport companies and units of the Royal Flying Corps accounts for an additional expenditure of R12·83 lakhs (£85,500). The Railway charges have risen by R6·28 lakhs (£41,900); the increase is chiefly due to the fact that all internal movements of stores and animals in consequence of the war have been borne by Indian revenues. The discharge of a large number of reservists who were found unfit for active service has necessitated an increased payment of R3·75 lakhs (£25,000) on account of gratuities, while a change in the system of paying Indian pensioners in the United Provinces has contributed to an extra outlay this year of R1·25 lakhs (£8,300). On the other hand, the non-effective payments in India arising out of the war, which are recoverable from the Imperial Government, are now anticipated to amount to only R12 lakhs (£80,000), or R33 lakhs (£220,000) below the budget figure. This decrease is, however, merely nominal since in the adjustment with the War Office for such payments a correspondingly higher payment will have to be made at Home. The foregoing causes account for a net increase of R1,69·02 lakhs (£1,126,800).

Among the variations of minor importance may be mentioned the following:—Decrease of Rs. 3·95 lakhs (£26,300) on dairy farm operations and a lapse of R1·65 lakhs (£11,000) in connection with the scheme for the establishment of a grass farm at Risalpur, which has been held in abeyance. The training grant has not been fully spent, and a saving of R2 lakhs (£13,300) has thus accrued. Credit has been afforded to the Imperial Government for the value of stores brought back by certain units from Hong Kong; outlay at home on stores for ordnance factories in India is being passed out to India for adjustment; increased prices have been paid for Australian remounts; and more horses have been purchased in order to supply chargers on hire to Indian Army Reserve officers. These four causes account for an increase of R8·15 lakhs (£54,300).

Home.

201. The expenditure at Home is also largely in excess of the Budget provision and is expected to amount to £4,895,500, or £755,400 over the Budget. The decision that the Imperial Government should be credited with the savings on the Indian Troop Service which accrued owing to the stoppage of ordinary reliefs entails an excess charge of £542,000, including arrears for the year 1914-15. The payments to the War Office on account of non-effective charges of British forces for service in India have been raised by £214,400, a figure which takes into account the smaller recovery from the War Office for non-effective war charges in India referred to in the preceding paragraph. Apart from aviation stores on which an outlay of £60,000 has been incurred, the store demands from India are lower than the Budget provision by £38,000, and the retired pay charges of officers of the Indian service fall below the Budget by £55,000, while the miscellaneous pension payments have risen by £29,000 in consequence of the war.

Receipts—India and Home.

202. The receipts during 1915-16 are expected to be R29·89 lakhs (£199,300) lower than the Budget in India and £17,600 better at Home. The worseness in India is mainly due to the fall in receipts, owing to the absence of troops from India, being greater than was anticipated; the decrease mainly occurs in sales of clothing stores, unserviceable and obsolete ordnance stores, and dairy produce.

Net Expenditure.

203. The net Army expenditure during the current year—Home and India—is thus expected to exceed the Budget provision of £18,898,600 by £2,058,200.

Special Expenditure.

204. The Special or Schedule provision was strictly limited, and a total sum of R17·53 lakhs (£116,900) only was allotted for expenditure falling to the Army head. The probable expenditure is now estimated at £97,500. Certain lapses have occurred and, on the other hand, fresh expenditure of an

absolutely urgent nature has been incurred. The supply to a small extent of certain equipment from Home has been postponed to a future year.

205. The allotment to meet Army expenditure in India in the ensuing year amounts to R26,84·47 lakhs (£17,896,500), which exceeds the Revised estimate of the current year by R1,41·26 lakhs (£941,800). It has been considered advisable to provide a reserve to meet unforeseen expenditure; but for this factor, the excess would have been only R62·81 lakhs (£418,800). Provision for ordnance factory stores from Home has been made in the Indian estimates instead of in the Home estimates, to the extent of R31·37 lakhs (£209,100), against R3·50 lakhs (£23,300) in the Revised for 1915-16, and the Secretary of State will pass the charges out for adjustment in this country. For mechanical transport companies the number of which is being increased in the ensuing year, additional funds to the extent of Rs 23·74 lakhs (£158,300) have been allotted; and Rs. 4·53 lakhs (£30,200) more have been provided for the Royal Flying Corps. A sum of Rs. 9·5 lakhs (£63,300) has been included for an ambulance convoy and Rs. 6 lakhs (£40,000) for an acetone factory. A larger provision to the extent of R15 lakhs (£100,000) has been made for war non-effective payments in India to correspond with the amount taken into account in the Home estimates as recoverable from the Imperial Government. On the other hand, the provision for special services, *e.g.*, port defences, etc., is R22·94 lakhs (£153,000) less than the expenditure anticipated in 1915-16. The foregoing causes, apart from the reserve, account for a net increase of R63·70 lakhs (£424,600).

Budget, 1916-17, compared with Revised, 1915-16. Expenditure—India.

Some of the minor variations are as follows:—Railway charges and travelling allowances indicate an increase of R5·01 lakhs (£33,400); and provision has been made for the full annual training grant, of which R2 lakhs (£13,300) lapsed in the current year. Certain abnormal pensionary charges in 1915-16 result in the allotment for next year being R4·5 lakhs (£30,000) lower, and a special credit of R2 lakhs (£13,300) to the Imperial Government in 1915-16 for stores returned from Hong Kong accounts for a corresponding decrease in 1916-17. A smaller provision has been made for clothing supplies and for purchase of animals by the Remount Department, but these decreases are more or less counterbalanced by increases, *e.g.*, in connection with dairy farms, extra ammunition for machine gun section training and bayonet fighting equipment.

206. The Home estimates for 1916-17 amount to £4,182,600, or a decrease of £712,900 as compared with the anticipated expenditure in the current year. This decrease is largely due to the exceptional cause mentioned in the preceding paragraph, namely the inclusion in the Indian estimate of provision for ordnance factory stores from Home. The payments to the War Office on account of savings in sea transport charges will be £270,000 less than in 1915-16 in which year the arrears of 1914-15 were also paid. The recovery from the War Office of war pensionary payments in India is expected to be more next year by £100,000, and the payments to the War Office for non-effective charges of British forces will be reduced by a like sum. No provision has been made in 1916-17 for aviation stores, on which an outlay of £60,000 has been incurred in 1915-16. These four causes account for a decrease of £663,000. The balance of £49,900 is accounted for chiefly by absence of provision (*a*) for payments to the Admiralty in connection with the gun-running operations in the Persian Gulf and, (*b*) for Aden re-inforcements; and by lower provision for pensionary charges of officers of the Indian Service.

Home.

207. A sum of R1,35·50 lakhs (£903,400) has been estimated as the probable receipts in 1916-17—an increase of £10,000 over the current year. This figure is made up of an increase of £41,600 in India and a decrease of £31,600 at Home.

Receipts. India and Home.

208. The estimated net Army expenditure for 1916-17 thus amounts to £21,175,700, or £218,900 more than the Revised estimate of the current year. This is made up of an increase of £900,200 in India and of a decrease of £681,300 at Home.

Net Expenditure

209. The gross Army expenditure for the coming year, as compared with the Budget estimate for 1915-16, shows an increase in gross expenditure of R3,15·80 lakhs (£2,105,400). The receipts show a falling off of R25·76 lakhs (£171,700) and the net expenditure is thus expected to exceed by

Budget, 1916-17, compared with Budget, 1915-16. India and Home.

£2,277,100 the estimates of the current year as framed in March last. Apart from the reserve of £523,000 to meet unforeseen expenditure, extra provision to the extent of £446,400 has been made for various measures of internal defence necessitated by the war. The decision that Indian revenues should bear the normal cost of the regular garrison of India—British and Indian—accounts for an increase of £586,700, including extra food charges, while the further decision that the War Office should be credited with the savings in sea transport charges adds £272,000 to next year's estimates. A sum of R41·10 lakhs (£274,000) has been provided to meet outlay on mechanical transport companies and the Royal Flying Corps. The foregoing factors broadly account for the increase in expenditure next year; there are various other causes which largely counterbalance each other.

The worseness in receipts is attributable to war conditions and to the fact that the estimate for 1915-16 did not fully allow for the fall in receipts which resulted from the absence of troops from India.

ecial xpenditure.

210. Only urgent and absolutely necessary measures are being provided for in the Schedule for 1916-17. The total amount allotted for the Army head is R13·19 lakhs (£88,000), of which £13,600 is for expenditure in India and £74,400 at Home. The latter figure represents liabilities of previous years, to the extent of £73,500, carried forward by the Secretary of State. The Indian figure includes the usual provision of £6,700 as an addition to the ordinary grant for the training of troops, and £5,800 for the extension and improvement of dairy farms.

vised, 1915-16, pared with dget, 1915-16.

211. The total expenditure (India and Home) in 1915-16 falls short of the Budget by £131,300, and there is an increase in receipts to the extent of £125,500; the net expenditure is thus £256,800 less than the Budget.

penditure, ceipts and Net penditure. dia and Home.

212. The decrease in Indian expenditure is due chiefly to smaller purchases of coal on account of heavier issues from stock. Smaller outlay on Schedule measures, owing to delay in the construction of the new station ship for Rangoon, the dredger for the Bombay Dockyard and the despatch vessel required for duty in the Persian Gulf, partly counterbalanced by larger expenditure on miscellaneous stores demanded from India, accounts for the lower Home expenditure. The increase in receipts in India is mainly due to recoveries on account of dockyard services and supplies in connection with the fitting up of transports and on account of hire of Royal Indian Marine vessels, which were not taken into account in the Budget.

Revised, 1915-16, compared with Budget, 1915-16 India and Home. Ordinary Expenditure.

216. Under this head the Ordinary expenditure and the expenditure on Military Works Schedule (Special Demands) measures are separately compiled in the ordinary course of accounting. Under Ordinary expenditure, the Revised anticipates an excess of £22,400, which is mainly due to expenditure connected with aviation units on the North-West Frontier R1·00 lakh (£6,700), and the provision of accommodation for the reception of Indian sick and wounded returning from the Indian Expeditionary Forces R1·20 lakhs (£8,000); and to the transfer of funds from other heads R·50 lakh (£3,300).

Receipts.

217. The Military Works receipts represent the rents derived from military quarters and mess houses, recoveries for water supply and electrical power, the sale proceeds of stores, and the rental and repair recoveries from silladar cavalry units whose lines have been taken over by the Military Works Services. The increase is mainly due to additional recoveries, amounting to R1·10 lakhs (£7,300), realized by the sale of "The Terrace" at Murree, and compensation for the buildings, etc., comprising the Chilkulgudiam Indian infantry lines, which have been handed over to the Nizam's Government.

Special Demands, expenditure.

218. Under Special Demands an increase of R9·53 lakhs (£63,500) is expected over the budget allotment of R24·65 lakhs (£164,300). This is mainly due to additional expenditure sanctioned during the year on the improvement of frontier roads, R4·60 lakhs (£30,700); additional accommodation for Ordnance subordinates at Ishapore, R·84 lakh (£5,600); and the construction of a subsidiary reservoir and settling tanks for additional storage of water at the Cordite Factory, Aruvankadu, R1·41 lakhs (£9,400).

Net Expenditure. Total.

219. On Military Works expenditure as a whole, a net increase of £76,900 is expected.

Budget, 1916-17, compared with Budget, 1915-16. India and Home. Ordinary Expenditure.

220. The Ordinary Military Works grant for 1916-17 has been fixed at R92·00 lakhs (£613,300), as compared with R87·00 lakhs (£580,000) in the current year. The allotment for the latter year was restricted to a minimum but there are certain urgent works which cannot be longer postponed, and consequently the grant for 1916-17 has been raised by R5 lakhs to provide for such as have become obligatory. In addition, a sum of R6 lakhs has been included to meet the expenditure on works in connection with aviation units.

Receipts.

221. The increase of R·45 lakh (£3,000) in receipts anticipates an improvement in the rental recoveries with reference to past actuals.

Special Demands, expenditure.

222. The allotment made for Special Demands amounts to R30·74 lakhs (£204,900), or R6·09 lakhs (£40,600) more than the Budget figure for 1915-16. Existing conditions have again rendered it necessary to confine expenditure to urgent works in progress. The main allotments are R10 lakhs for works in the new cantonment at Delhi; R6·34 lakhs for the reconstruction of lines of Indian troops, R4 lakhs on improvement of frontier roads, and R1 lakh for volunteer armouries, etc.

Net Expenditure. Total.

223. The total net expenditure of R1,16·74 lakhs (£778,300) in 1916-17 is more than the Budget provision of 1915-16 by R16·64 lakhs (£111,000).

Total Receipts .	£	1,387,634	1,369,652	1,374,688	1,220,300	1,173,100	1,165,900
NET EXPENDITURE	£	19,565,466	19,896,113	20,434,714	20,169,200	22,042,700	22,500,000

226. The total net military expenditure in the current year is anticipated to exceed the estimates prepared last March by £1,873,500. Two decisions which were arrived at during the currency of the year, firstly, that India should pay to the War Office the savings in sea transport charges resulting from the cessation of ordinary reliefs and, secondly, that India should bear the normal cost of the ordinary garrison—British and Indian—account for an increase of £1,129,000. A sum of £614,000 is also expected to be spent, over and above the Budget provision of £357,000, for various measures arising from war conditions, *e.g.*, port defences, protection of the North-West Frontier, etc. It has also been necessary to embark on fresh expenditure to the extent of £152,000 in connection with the organisation of aviation units and mechanical transport companies.

227. The Budget estimate for the ensuing year has been fixed at £22½ millions net, on the assumption that war conditions will continue throughout that period. The strictest economy has been observed and, beyond the ordinary maintenance charges, only absolutely necessary measures have been provided for. In view, however, of the ever changing military situation and the possible demands which may be made upon the Army in India, a margin of about half a million sterling has been included for expenditure which cannot at present be accurately foreseen.

TRANSFERS BETWEEN IMPERIAL AND PROVINCIAL.

	Accounts, 1912-13.	Accounts, 1913-14.	Accounts, 1914-15.	1915-16. Budget.	1915-16. Revised.	Budget, 1916-17.
Transfers from Imperial to Provincial—						
1. (*a*) Recurring assignments under the terms of the Provincial Settlements, including permanent additions subsequently made to them, with the exception of special recurring grants for Education and Sanitation .	16,09,000	1,06,32,000	1,16,20,000	1,37,51,000	1,39,49,000	1,40,36,000
(*b*) Recurring assignments from Provincial to Imperial in connection with the new scheme of taxation	...	...	...	...	...	—63,25,000
2. Special recurring grants for—						
(*i*) Education	55,96,000	1,05,38,000	1,14,29,000	1,14,46,000	1,14,50,000	1,14,50,000
(*ii*) Sanitation	...	36,50,000	36,70,000	36,70,000	36,70,000	36,70,000
3. Assignments in connection with the scheme for the incidence of famine relief expenditure (*vide* paragraph 54 of Financial Statement for 1907-1908) . .	37,50,000	37,50,000	29,24,000	24,70,000	24,70,000	14,48,000
4. Non-recurring grants—						
(*i*) Under the terms of the Provincial settlements . .	4,90,000	15,33,000	4,36,000	...	6,85,000	3,32,000
(*ii*) For Education . . .	3,81,70,000	8,000	11,87,000	1,51,000	2,37,000	1,74,000
(*iii*) For Sanitation . . .	1,50,00,000	1,00,000	5,50,000	...	2,30,000	...
(*iv*) For medical relief, agriculture and allied objects . .	...	25,35,000	...	...	...	...
(*v*) For public works expenditure and discretionary outlay .	1,50,00,000	...	15,00,000	...	...	...
(*vi*) Other items . . .	14,44,000	53,00,000	39,09,000	27,89,000	32,97,000	23,09,000
Total Transfers .	8,10,59,000	3,80,46,000	3,72,25,000	3,42,77,000	3,59,78,000	2,70,87,000

(*a*) *Recurring assignments excluding special grants for Education and Sanitation.*

228. The increases of (*a*) ₹1·98 lakhs in the Revised estimate over the Budget of the current year and (*b*) ₹·87 lakh in the Budget for 1916-17 over the Revised for 1915-16 are made up as follows:—

	Lakhs of rupees. 1915-16.	1916-17.
(1) Increase in assignment to Bihar and Orissa in connection with the new High Court at Bankipur .	2·70	3·10
(2) Reduction in assignment to Bengal in consequence of saving in expenditure which will result from the establishment of a High Court at Bankipur . .	...	—2·00
(3) Minor adjustments of a recurring nature . .	—·72	—·23
	1·98	·87

The annual assignment payable to Bihar and Orissa in connection with the High Court at Bankipur is estimated at ₹5·80 lakhs.

(b) Recurring assignments from Provincial to Imperial in connection with the new scheme of taxation.

229. The reason for the recovery of contributions aggregating R63·25 lakhs from the several Provincial Governments in connection with the financial arrangements for 1916-17 is that the increased taxation credited to "divided" heads has to be wholly appropriated to Imperial revenues. The distribution of the total sum is given below :—

	Lakhs of R
Madras	6·43
Bombay	18·40
Bengal	20·90
United Provinces	4·30
Punjab	2·80
Burma	6·37
Bihar and Orissa	2·40
Central Provinces	1·15
Assam	50
Total	63·25

(c) Special recurring grants for Education.

230. The unimportant variation between the Budget and the Revised estimates for the current year is due to the allotment of a small sum for recurring outlay on specific items of Provincial expenditure, from the undistributed balance of the recurring appropriation of R124 lakhs made from Imperial revenues in recent years for the improvement of education (see paragraph 100).

(d) Assignments in connection with the scheme for the incidence of Famine Relief expenditure.

231. The variation in the amount of assignments for the famine insurance of Provincial Governments provided in the Revised estimate for 1915-16 and the Budget for 1916-17 arises from the circumstances mentioned below. Under the scheme for the incidence of famine relief expenditure introduced in 1907, the details of which were explained in paragraphs 48 to 57 of the Financial Statement for 1907-08, certain annual assignments are made to Provincial Governments, and the latter use the funds so placed at their disposal to build up a reserve of credit with the Imperial Government which can be utilised when necessary to meet famine relief expenditure. To avoid the possible accumulation of an unnecessarily high credit, it was decided (1) to fix a maximum limit to the reserve of each province, and (2) when that limit was reached in any province, to discontinue the annual assignment until the credit had been reduced by expenditure on famine relief. The limit for Bombay was fixed at R80 lakhs; and it is estimated that this figure will be reached in 1916-17 with an assignment of R3·48 lakhs, which is R10·22 lakhs less than the normal assignment for the province. The maximum limit has already been reached in the Central Provinces and no further assignment is now made to it in this connection.

(e) Non-recurring grants under the terms of the Provincial Settlements.

232. The non-recurring grants to be made in the two years under the terms of the settlements represent contributions to the Punjab to bring its net Irrigation revenue up to the amount guaranteed in its provincial settlement.

(*f*) *Non-recurring assignments for Education.*

233. The following contributions will be paid for Provincial expenditure from the undistributed balance of the recurring appropriation of R124 lakhs made from Imperial revenues in recent years for educational expenditure :—

	Lakhs of rupees. 1915-16.	1916-17.
(1) Additional grant to the Dacca University . .	1·00	1·00
(2) Contribution in aid of research work by Dr. J. C. Bose	·40	·32
(3) Grant to the Hindu University for acquisition of land	·50	...
(4) Grant to the Islamia College, Lahore, for the equipment and maintenance of science laboratories .	·30	·30
(5) Other petty items	·17	·12
Total .	2·37	1·74

(*g*) *Non-recurring grants for Sanitation.*

234. The following allotments have been sanctioned during the current year from the undistributed balance of the special recurring appropriation of R51 lakhs made from Imperial revenues in recent years for the improvement of sanitation :—

	Lakhs of rupees.
(1) To the United Provinces, for sani ry improvement of Lucknow	1·20
(2) To the United Provinces, for sanitary improvement of the pilgrim route to Badrinath and edarnath . . .	1·00
Total .	2·20

(*h*) *Miscellaneous non-recurring grants.*

235. The following are the details of the miscellaneous non-recurring grants which will be given in the two years :—

	Lakhs of rupees. 15-16.	1916-17.
(1) Contribution to meet provincial expenditure in Burma and Assam in connection with the North-East Frontier	18·49	24·14
(2) Assignment to Bihar and Orissa in respect of cost of High Court buildings at Bankipur . . .	15·00	...
(3) Grant to the United Provinces for tank restoration works, out of the special provision made in the Imperial Budget under Minor Irrigation Works for the improvement of irrigation . . .	1·15	...
(4) Yearly instalments of the contribution to the Calcutta Improvement Trust for a period of 60 years .	1·50	1·50
(5) Grant for five years to the Chittagong Port in aid of dredging and revetment operations . .	·75	·75
(6) Miscellaneous adjustments, representing mainly refund of expenditure undertaken on behalf of the Imperial Government or of Provincial revenue erroneously credited as Imperial . . .	—3·92	—3·37
Total .	32·97	23·02

CAPITAL EXPENDITURE ON RAILWAYS AND IRRIGATION AND OTHER WORKS NOT CHARGED TO REVENUE.

RAILWAY CONSTRUCTION.

236. In the Budget for 1915-16, a sum of ₹12 crores was allotted for expenditure on railway construction for which the Government of India undertake financial responsibility. During the course of the year the Secretary of State withdrew ₹35 lakhs which represented the provision for certain new lines, thus reducing the budget grant to ₹11,65 lakhs. The expenditure of the year is now estimated at ₹731·51 lakhs or ₹468·49 lakhs less than the original grant, the lapse being due partly to non-supply of English material owing to congestion in the workshops at home, and partly to restriction of all but necessary expenditure both at home and in India. For 1916-17 a grant of 450 lakhs has been provided, of which ₹151·96 lakhs is for rolling stock. *Revised, 1915-16.* *Budget, 1916-17.*

237. The distribution of the total expenditure on Railway Construction between State and Companies' agency in each of the three years from 1914-15 to 1916-17 is as follows:—

		1914-1915. Accounts.	1915-1916. Budget.	1915-1916. Revised.	1916-1917. Budget.
1. Outlay on State Lines:					
(*a*) India	₹	12,12,86,978	9,28,13,000	5,79,58,000	3,06,53,000
	£	8,085,799	6,187,500	3,863,800	2,043,500
(*b*) England	£	2,424,059	1,450,200	929,400	758,400
TOTAL	£	10,509,858	7,637,700	4,793,200	2,801,900
2. Outlay of Companies:					
(*a*) India	₹	—88,51,716	—1,27,22,000	—89,81,000	—31,82,000
	£	—590,114	—848,100	—598,700	—212,100
(*b*) England	£	1,513,292	1,210,400	682,200	410,200
TOTAL	£	923,178	362,300	83,500	198,100
Total of Programme	£	11,433,036	8,000,000	4,876,700	3,000,000

The following outlay in England on account of purchased lines worked by companies is included in the Indian figures under outlay on State lines:—

	4,567,398	3,031,300	2,097,500	1,252,600

238. The details of the Budget grant for 1916-17 are shown below :—

The bulk of the restricted programme grant for 1916-17 will be devoted to the improvement of open lines of railway.

239. The figures in the table in paragraph 237 do not include the expenditure on Protective Railways met from the Famine Insurance grant, nor that on Branch Line Companies. Including this outlay and also some small expenditure from Provincial revenues the total expected outlay on railway construction in the three years ending 1916-17 is as follows :—

	Accounts, 1914-15.	Revised Estimate, 1915-16.	Budget Estimate, 1916-17.
	R	R	R
Total as in table on page 109 . . .	17,14,95,532	7,31,51,000	4,50,00,000
Famine Protective lines	—19,669	—5,000	—10,000
Branch lines	62,86,131	1,18,09,000	1,12,96,000
Provincial State lines	6,887	22,000	26,000
Grand Total in Rupees .	17,77,68,881	8,49,77,000	5,63,12,000
Grand Total in sterling at R15 to the £ .	11,851,259	5,665,100	3,754,100

CONSTRUCTION OF PRODUCTIVE IRRIGATION WORKS.

240. The figures are—

	Accounts, 1914-15.	Budget, 1915-16.	Revised, 1915-16.	Budget, 1916-17.
Total in Rupees . . .	1,68,47,703	1,65,00,000	1,33,80,000	1,35,00,000
Equivalent in Sterling . .	1,123,180	1,100,000	892,000	900,000

vised, 1915-16.

241. The expenditure in 1915-16 is expected to fall short of the Budget grant by R31·20 lakhs. There will be a lapse of about R17 lakhs in the allotments for works in operation, mainly on canals in the Punjab and on the permanent head works of the Ganges Canal, owing to a curtailment of programme in consequence of the financial situation and other causes. There will also be a saving of about R4 lakhs in the grants for works under construction, due chiefly to a slower progress on the Toludur project in Madras and the non-utilisation of the allotment for the Seharwah project in Bombay which has not yet been sanctioned; and the whole of the reserve of R10·53 lakhs will lapse.

dget, 1916-17.

242. The Budget grant for 1916-17 has been fixed at R1,35 lakhs, *i.e.*, the amount of the probable expenditure in 1915-16, with reference to the financial situation and after due consideration of the requirements of the various canals under construction most of which are now nearing completion. The following statement shows the distribution of the expenditure in 1915-16 and the grant for 1916-17 :—

Name of Project.	Expenditure in 1915-16.	Expenditure in 1916-17.
Works in operation—	R	R
Godavari Delta System	1,35,000	1,42,000
Kistna „ „	79,000	13,000
Kurnool-Cuddapah Canal	86,000	79,000
Cauvery Delta System	73,000	45,000
Eastern Nara Works	1,05,000	2,22,000
Jamrao Canal	1,25,000	2,37,000
Ganges Canal, including Mat and Hathras branches and permanent headworks	7,33,000	8,79,000
Agra Canal	59,000	45,000
Upper Bari Doab „	2,76,000	1,50,000
Sirhind Canal	1,07,000	1,70,000
Lower Chenab Canal	1,04,000	2,00,000
Lower Jhelum „	50,000	3,00,000
Indus Inundation Canals	1,60,000	—5,000
Upper Chenab Canal	13,48,000	23,20,000
Lower Bari Doab Canal	10,38,000	7,80,000
Upper Swat River Canal	13,98,000	10,30,000
Mandalay Canal	73,000	6,000
Mon Canals	1,05,000	21,000
Asola Mendha Tank works	67,000	62,000
Other Projects	3,38,000	2,75,000
Works under construction—		
Toludur Project	2,85,000	7,52,000
Gorai Canal	2,74,000	3,16,000
Upper Jhelum Canal	21,80,000	10,29,000
Ye-u Canal	5,44,000	7,01,000
Twante Canal	7,84,000	8,93,000
Mahanadi „	18,63,000	13,01,000
Wainganga Canal	9,93,000	5,37,000
Reserve	...	10,00,000
TOTAL R	1,33,80,000	1,35,00,000
Equivalent in Sterling £	892,000	900,000

Of the total grant of R1,35 lakhs, about R55 lakhs will be allotted to canals under construction; about R70 lakhs will be devoted to the completion and development of canals in operation; and R10 lakhs will be held in reserve to meet unforeseen requirements.

243. The figures mentioned above do not include the expenditure on Protective Irrigation Works, whether financed from the Famine Insurance grant or from ordinary revenues outside that grant. Including this outlay, and also some small expenditure on works which were originally classed as productive but have since ceased to belong to that class, the total expected outlay on the construction of irrigation works in the three years ending 1916-17 is as follows.—

	Accounts, 1914-15.	Revised Estimate, 1915-16.	Budget Estimate, 1916-17.
	R	R	R
Outlay on Productive Irrigation Works . .	1,68,47,695	1,33,80,000	1,35,00,000
Outlay on Protective Irrigation Works met from Famine Insurance grant.	73,30,560	72,92,000	62,34,000
Outlay on Protective Irrigation Works outside the Famine Insurance grant.	8,97,948	3,25,000	...
Other outlay from ordinary revenues . .	1,40,035	2,26,000	52,000
Total R .	2,52,16,238	2,12,23,000	1,97,86,000
Equivalent in Sterling £	1,681,082	1,414,900	1,319,100

INITIAL OUTLAY ON THE NEW CAPITAL AT DELHI.

244. The figures are :—

	Accounts, 1914-15.	Budget, 1915-16.	Revised, 1915-16.	Budget, 1916-17.
Total in Rupees . . .	54,05,418	40,00,000	50,00,000	40,00,000
Equivalent in sterling . . £	360,361	266,700	333,300	266,700

Revised, 1915-16.

245. The expenditure in the current year will exceed the Budget grant owing largely to existing commitments, and it is now expected to amount to R50 lakhs made up as follows :—

[Lakhs of Rupees.]

(*i*) Works Expenditure	43·06
(*ii*) Acquisition of land	—·53
(*iii*) Establishment and miscellaneous charges . . .	7·47
TOTAL . . .	50·00

Of the works expenditure, about R10 lakhs are being spent on the preparation of sites, the laying out of service roads, the provision of a temporary supply of water and of electric power, and other preliminary work; R8 lakhs on the purchase of tools, and plant and other stores; and R23 lakhs on work on the Government House and the Secretariat, and the construction of certain residential buildings and roads.

Budget, 1916-17.

246. The provisional distribution of the Budget estimate of R40 lakhs is given below :—

[Lakhs of Rupees.]

(*i*) Works expenditure	31·12
(*ii*) Establishment charges and other miscellaneous expenditure .	8·88
	40 00

Of the grant of R31·12 lakhs for works outlay, about one-fourth will be required for the preparation of sites and other preliminary work and for the further purchase of tools, plant, and other stores. The balance will be applied mainly to the construction of roads and buildings, work on which has already been commenced.

WAYS AND MEANS.

HOME TREASURY.

247. The bulk of the payments made in England on account of the Government of India consist of expenditure chargeable to the Indian revenues; and if such payments represented the only transactions, the Ways and Means programme would be a simple arrangement, as the whole of the expenditure would ordinarily be met by remittance of funds from India. The capital outlay on the construction of railways and irrigation works, however, necessitates heavy borrowing; and when practicable, a large portion of the money required is raised in England, either direct or through the agency of Companies. A further complication is introduced by the practice under which all payments made in England to Railway Companies working purchased lines, for purchase of stores and other capital purposes, as well as all moneys raised by them and paid into the Home treasury, are brought to account under the appropriate heads in this country and are treated in the Home accounts and estimates as remittances to or from India, respectively. Operations connected with the Gold Standard Reserve, and with the replacement of one particular form or item of direct or indirect debt by another, also largely swell the receipts and charges of the Home Treasury without affecting ordinarily the general Ways and Means programme. *Introd*

248. The items mentioned in the preceding paragraph constitute the bulk of the transactions of the Home treasury in normal years. The conditions created by the war have led to certain abnormal transactions which have considerably affected the Ways and Means position in 1915-16 and will continue to affect it in 1916-17. Large sums are being received in England (1) from the Imperial Government and the Government of Australia in repayment of expenditure incurred on their behalf in India; and (2) by the sale of wheat purchased from Government funds in India. These indirect remittances from India have largely increased the resources of the Home treasury and reduced the need for direct remittances by Councils to finance its requirements.

249. The following are the details of the transactions appearing in the Budget and Revised estimates of the Home treasury for 1915-16 and in the Budget estimate of 1916-17.

	Budget, 1915-16.	Revised, 1915-16.	Budget, 1916-17.

* The heads marked with an asterisk appear on both the receipt and payment sides. As the receipt and disbursement under each of them are generally equal, they do not affect the Ways and Means of the year to any material extent.

† Outlay recoverable from War Office.

(a) Of these amounts £8,700 and £4,200 represent funds of the Gold Standard Reserve.
(b) " " £8,300 and £7,787,400 "
(c) " " £7,787,400 and £0,044,900 "

ood, 1915-16.

250. The table in paragraph 249 shows that there will be a net receipt of £2,501,300 in the Home treasury in 1915-16 and that its balances at the end of the year will amount to about £14½ millions. These figures do not, however, represent the true position in respect of the transactions and balance of the treasury proper. To meet possible demands for payments of Reverse Councils in England, £7,779,100 of the funds of the Gold Standard Reserve has been temporarily paid into the Home treasury and is being let out on short loans to banks instead of being invested in securities. Eliminating this special receipt, the transactions of the Home treasury in 1915-16 are expected to result in a net disbursement of £5,277,800 of which £4,061,000 will be financed from Council Bills drawn against treasury balances in India, and £1,216,800 will be met by a reduction of the cash balances of the Home treasury proper. Allowing for the fact that the net disbursement of £10,703,100 in the Budget estimate for 1915-16 included a small net payment of £4,000 to the Gold Standard Reserve, the Revised estimate shows an improvement of £5,421,300 over the Budget, apart from the transactions connected with the Gold Standard Reserve. This improvement is the net result of the following variations from Budget anticipations :—

	£
(1) Larger recoveries from the War Office in respect of expenditure incurred in India on its behalf . .	6,122,000
(2) Net receipts in England under the "Wheat Scheme" .	3,044,400
(3) Receipt of gold from India . . .	2,000,000
(4) Savings in total grants for capital expenditure on railways, irrigation works and Delhi (inclusive of the net outlay of the various companies) . . .	2,056,800
(5) Increase in net receipts in connection with miscellaneous deposit and remittance transactions . . .	1,056,700
Total increase in receipts or reduction in outgoings	14,279,900
(6) Payment from treasury balances of Reverse Councils .	4,668,000
(7) Decrease in net receipts of capital from railway companies	3,115,600
(8) Increase in net expenditure chargeable to revenue .	775,000
Total decrease in receipts or increase in outgoings .	8,858,600
NET IMPROVEMENT .	5,421,300

251. The principal items working up to the increase of £1,056,700 in the net receipts from miscellaneous deposit and remittance transactions, shown in the table in the preceding paragraph, are: (*i*) recoveries aggregating £1,250,000 from public departments in England other than the War Office on account of expenditure incurred on their behalf in India in connection with the war; (*ii*) receipts amounting to £392,200 in connection with the employment of enemy ships, inclusive of sums received in England on account of vessels under the control of authorities in India; (*iii*) a receipt of £100,000 from the Egyptian Government in repayment of funds supplied to it from India; and (*iv*) a higher payment of £531,700 on account of family allotments and remittances of troops on the Indian establishment including those serving with the Indian Expeditionary Forces, and of £92,100 on account of certain advances. There will also be a net rise of £74,700 in the recoveries from various public departments in England of miscellaneous payments made on their behalf in India; but this will be more than counterbalanced by an increase in the expenditure incurred in England on account of Provincial Governments, local bodies, etc., which is recovered from them in India.

252. The total drawings of Council bills on India in 1915-16 are expected to amount to £20,061,000. Of this sum, £4,061,000 will be utilised, as already stated, to meet the disbursements of the Home treasury; while £7,533,000 will be appropriated as a remittance of the Gold Standard Reserve, and £8,467,000 as a remittance of the Paper Currency Reserve. The drawings of Reverse Councils in India on London during the year amounted to £4,893,000. Of these, £225,000 was paid from the funds of the Gold Standard Reserve; and £4,668,000 was paid from the Home treasury, in view of the considerable improvement in its balances particularly with reference to the wheat transactions, and the need for strengthening the treasury balances in India.

The cash balance of the Home treasury at the end of 1915-16, exclusive of the sum held on account of the Gold Standard Reserve, is now estimated at about £6·7 million against a Budget forecast of £4 million.

253. The details of the transactions in respect of capital raised and deposited by Railway Companies are as follows:— *1915-16 Capital raised and deposited by Railway Companies.*

	Budget, 1915-16.	Revised, 1915-16.
RECEIPTS.	£	£
(a) *Subscribed Capital*—		
To discharge Debentures—		
Assam-Bengal Railway	650,000	...
Bengal-Nagpur Railway	1,239,600	...
Rohilkhund and Kumaon Railway	107,000	...
	1,996,600	...
(b) *Miscellaneous*—		
Transfer fees, etc.	2,400	9,500
TOTAL RECEIPTS	1,999,000	9,500
ISSUES.	£	£
For discharge of Debentures	1,996,600	375,200
For Capital outlay, *i.e.*, Stores, Establishment Charges, etc.	1,212,800	691,700
TOTAL	3,209,400	1,066,900

The Budget estimate provided for the renewal or replacement by fresh capital of £1,996,600 debentures of the Assam-Bengal, Bengal-Nagpur, and Rohilkhund and Kumaon Railway Companies. Debentures to the value of £1,621,400 only have been renewed; and the remaining £375,200 has been discharged from funds supplied by the Secretary of State.

254. The following are the details of the Railway remittance transactions. As already explained, they occur almost wholly in connection with the capital account of the purchased lines worked by companies:— *1915-16. Railway remittances.*

	Budget, 1915-16.	Revised, 1915-16.
RECEIPTS.	£	£
Debenture Capital—		
East Indian Railway	3,500,000	3,450,600
Great Indian Peninsula Railway	3,000,000	...
South Indian Railway	510,000	...
Miscellaneous—		
Transfer fees, etc.	6,500	28,300
TOTAL	7,016,500	3,487,900
ISSUES.		
Advances for purchase of stores—		
East Indian Railway	752,300	524,200
South Indian Railway	372,800	308,500
Bengal and North-Western Railway	47,700	14,700
Great Indian Peninsula Railway	1,415,300	958,100
Bombay, Baroda and Central India Railway (including Rajputana-Malwa Railway)	449,700	320,300
TOTAL	3,037,800	2,125,800
Discharge of Debentures—		
South Indian Railway	510,000	...
Miscellaneous payments—		
East Indian Railway: rental paid to South Behar Railway Company	30,000	30,000
Rohilkhund and Kumaon Railway: Interest on Debenture Stock allocated to State works	17,300	17,800
TOTAL ISSUES	3,595,100	2,173,600

255. The Budget estimate for 1915-16 provided for (1) the issue of new capital of £3·5 million by the East Indian Railway Company, and of £3 million by the Great Indian Peninsula Railway Company, and (2) the replacement by fresh capital of £510,000 debentures of the South Indian Railway Company which would mature during the year. New 4½ per cent. debenture stock of the face value of £3½ million has been issued by the East Indian Railway Company producing the amount shown above; and the debentures of the South Indian Railway Company have been renewed. The Great Indian Peninsula Railway Company was not asked to raise any fresh capital during the year.

Loans, 1915-16.

256. In accordance with the Budget programme, £500,000 India bonds and £407,500 Indian Midland Railway debentures have been discharged; and £7 million India bills which matured during the year have been replaced by fresh issues, *viz.*:—

(1) £3½ million in September with a currency of 12 months at an average rate of £94-17-0·44;

(2) £3½ million in November with a currency of 12 months at an average rate of £94-12-11·87.

1916-17. The Budget Estimate.

257. The Budget estimate provides for a net disbursement of £3,977,500. The deterioration of £6,478,800 as compared with the net receipt of £2,501,300 in the current year's Revised is the net result of the following variations:—

Worse.

	£
Temporary Debt renewed, *less*	1,500,000
Receipts on account of the Gold Standard Reserve (net), *less*	6,.21,600
Receipts in connection with purchase and sale of wheat (net), *less*	3,044,400
Net payments to Railway Companies, *more*	1,968,300
Gold received from India, *less*	2,00[illegible],000
Outlay on new Capital at Delhi, *more*	38,300

Better.

	£
Net expenditure on Revenue account, *less*	472,700
Permanent Debt discharged, *less*	407,500
Receipt from the War Office in respect of recoverable outlay incurred in India in connection with the war, *more*	2,464,000
Outlay on State Railways, *less*	171,000
Deposits, Advances and Miscellaneous Remittance transactions, *net*	392,700
Outlay on Irrigation Works, *less*	17,900
Reverse Bills, *less*	4,668,000

258. The details working up to the increase of £1,968,300 in the net payments to Railway Companies shown in the preceding paragraph are given below:—

	Revised, 1915-16.	Budget, 1916-17.
RECEIPTS—	£	£
Capital deposits by Railway Companies—		
For capital outlay	9,500	2,000
For discharge of debentures	...	2,930,400
Remittance account between England and India—		
Railway transactions	3,487,900	506,500
Total receipts	3,497,400	3,438,900
DISBURSEMENTS—		
Capital expenditure not charged to Revenue—		
Outlay of Railway Companies	691,700	412,200
Payments for discharge of debentures	375,200	2,930,400
Remittance account between England and India—		
Railway transactions	2,173,600	1,807,700
Total disbursements	3,240,500	5,150,300
NET DISBURSEMENTS	−256,900	1,711,400
Increase	1,968,300	

259. The reduction in the net receipts on account of the Gold Standard Reserve in 1916-17, as compared with 1915-16, arises from variations in the amount of funds of the Reserve held in the balances of the Home treasury at the beginning and at the end of each of the two years. The amount so held stood at £8,300 on the 1st April 1915, and is expected to stand at £7,787,400 at the end of the current year and at £9,044,900 at the end of 1916-17. Full details of the transactions of the Reserve in the two years are given in paragraph 263.

260 The improvement of £392,700 under Deposits, Advances and Miscellaneous Remittance transactions mentioned in paragraph 257 is the net result of the following principal causes of variation: (1) higher recoveries from public departments in England other than the War Office on account of expenditure incurred on their behalf in India in connection with the war (2) a decrease in the net receipts in connection with enemy vessels; and (3) smaller payments of family allotments of troops.

Loans, 1916-17.

261. Provision has been made in the Budget for the discharge of £500,000 India Bonds and of £1,500,000 India Bills which will mature during the year, and for the replacement of the remaining £5,500,000 India Bills.

262. Of the net disbursement of £3,977,500 in 1916-17, it is proposed to meet £3,885,000 by Council Bills, and £92,500 by drawing on the cash balances of the Home Treasury which are estimated to stand at the end of 1916-17 at £4,383,000 inclusive of £9,044,900 held on behalf of the Gold Standard Reserve.

1915-16 and 1916-17.

263. The following are the details of the transactions of the Gold Standard Reserve in England:—

Temporary Debt discharged .	7,000,000	7,000,000	7,000,000
Discharge of Railway Companies' Debentures (inclusive of Debentures of Companies working purchased lines) .	2,506,600	875,200	3,430,400

The programme herein announced of the probable drawings on India and of the transactions in connection with the Government Sterling Debt and the borrowings of Railway Companies, represents the present intentions of the Secretary of State. But in view of the varying conditions of Indian finance and of the London money market, no assurance can be given that this programme will be adhered to either in amount or in form. The Secretary of State reserves to himself the right to vary the programme to any extent that may be considered necessary during the course of the year. The estimate of Council drawings is for the amount necessary to provide for the Secretary of State's requirements, but additional Bills will as usual be sold if needed to meet the demands of trade.

INDIA.

266. The following is a summary of the Estimates of Ways and Means in India during 1915-16 and 1916-17 :—

	Budget Estimate, 1915-1916.		Revised Estimate, 1915-1916.		Budget Estimate, 1916-1917.	
	Rupee figures.	Equivalent in £ at R15=£1.	Rupee figures.	Equivalent in £ at R15=£1.	Rupee figures.	Equivalent in £ at R15=£1.

*Head (10) represents expenditure defrayed by reduction of Provincial balances.

†The figures shown under head (13) differ from those given in the Home Treasury Ways and Means statement, as Bills drawn by the Secretary of State towards the end of one year are paid in India in the next. The figures of the present statement represent payments in India.

1915-16. Main features of Budget estimates.

267. In the Budget estimate for 1915-16, the cash balance in the Indian Treasuries on the 1st April 1915 was taken at R20,78 lakhs. It was estimated that (1) the net Imperial revenue in India would amount to R23,71 lakhs, (2) a sum of R74 lakhs would be available from the Famine Insurance grant for the avoidance of debt, (3) the remittance and capital transactions of railway companies, etc., would result in a net credit of R4,77 lakhs, and (4) a net receipt of R39 lakhs would accrue in connection with Imperial and Provincial loans. On the other hand, provision was made for: (1) a net expenditure of R1,62 lakhs from Provincial balances, (2) a net payment of R33 lakhs on account of Unfunded Debt, (3) capital expenditure in India on railways (inclusive of outlay by companies) and canals to the extent of R9,60 lakhs, (4) an outlay of R27 lakhs on the construction of the new Capital at Delhi, (5) the discharge of R12 lakhs of the permanent debt, (6) a net payment of R55 lakhs on account of miscellaneous deposit and remittance transactions, (7) a recoverable outlay of R11,35 lakhs in connection with the war, (8) a net expenditure of R1,51 lakhs on the replacement of military stores and *materiel* supplied

from our stock to the Imperial Government and (9) the payment of Council Bills to the extent of ₹10,89 lakhs. The total payments mentioned above aggregate ₹36,24 lakhs, against a total receipt of ₹29,61 lakhs; and it was proposed to meet the net disbursement of ₹6,63 lakhs by raising a rupee loan of ₹4·5 crores and by drawing on the cash balances to the extent of ₹2,13 lakhs.

1915-16. Main features of Revised estimates.

268. The results, according to the Revised estimate, show considerable variations from this forecast. The year opened with a cash balance which was ₹1,39 lakhs more than the Budget forecast, the increase being due almost wholly to the improvement in the revenue account in 1914-15 over the Revised estimate (see paragraph 6). The full amount of the contemplated rupee loan of ₹4·5 crores was duly raised in August, and an additional ₹50 lakhs, supplementing the main issue, was raised through the Post Office. The unsatisfactory collections of revenue in the earlier months of the year and the heavy indirect remittances to the Home treasury, in the shape of outlay on the purchase of wheat and recoverable expenditure in connection with the war, however, led to a considerable reduction in the treasury balances in India; and to relieve the strain, the bulk of the receipts from Reverse Councils sold in India on London was credited to Treasury, the opposite payment in England being made from treasury balances (see paragraph 252). The recoverable war expenditure has continued to rise heavily in the later months of the year. But, on the other hand, there has been a satisfactory improvement in railway returns and in other revenue collections in recent months; while expenditure has been curtailed in all directions in pursuance of a policy of strict economy. It will accordingly be possible to make direct remittances in aid of the Home treasury, either by payment of councils or by actual shipment of gold, to the extent of about £6·6 million during the whole of the year, to repay £3 million of the temporary debt to the Gold Standard Reserve, and to close the year with a balance of ₹17·18 crores.

269. Taking the year as a whole, the net disbursements from treasuries in India in 1915-16, after allowing for the receipts from the new rupee loan will amount to ₹4,99 lakhs against a Budget estimate of ₹2,13 lakhs, the increase being due to the following variations:—

	Lakhs of ₹.
(1) Increase in expenditure incurred on behalf of the War Office	10,33
(2) Outlay in connection with the Wheat Scheme	4,31
(3) Repayment of a portion of temporary loan from Gold Standard Reserve	4,50
(4) Remittance of gold to London	3,00
(5) Reduction in net credits on account of remittance and capital transactions of railway companies, etc., owing mainly to a decrease in the capital expenditure which is incurred in England and is passed on to India for adjustment in the Indian accounts	1,39
(6) Increase in Delhi capital expenditure	21
(7) Increase in net issues in connection with miscellaneous deposit and remittance transactions	96
(8) Reduction in amount available from the Famine Insurance grant for the avoidance of debt	5
Total increase in outgoings or reduction in receipts	24,75
(9) Receipts on account of Reverse bills	7,00
(10) Reduction in payment of Council bills	4,03
(11) Lapse in the grant for capital expenditure on railways (inclusive of outlay by companies) and irrigation works	3,42
(12) Improvement in the combined revenue account of the Imperial and Provincial Governments	3,07
(13) Reduction in outlay on replacement of military stores and *materiel* supplied from stock to the Imperial Government	1,49
(14) Improvement under Unfunded Debt owing chiefly to smaller withdrawals from Post Office Savings Banks	1,61
(15) Increased receipts on account of the new rupee loan	50
(16) Increase in net recoveries on account of Imperial and Provincial loans	10
(17) Saving in provision for discharge of debt, mainly owing to the postponement of the repayment of the Gwalior loan of 1887 which fell due during the year	7
Total increase in receipts or reduction in outgoings	21,89
INCREASE IN NET DISBURSEMENTS	2,86

The increase of 96 lakhs in the net issues in connection with miscellaneous deposit and remittance transactions, shewn in the above analysis, results from a number of variations. Recoverable outlay amounting to ₹1,87 lakhs will be incurred in connection with the war on behalf of certain public departments in England other than the War Office. But on the other hand, special receipts amounting to ₹1,28 lakhs and ₹22 lakhs respectively will be obtained from the liquidation of hostile firms and the employment of captured enemy vessels, apart from the sums realised on the latter account in England and passed on to India for adjustment. There will also be material increases in other directions in the net issues under the deposit and remittance heads owing to (*i*) higher drafts on the banking accounts maintained with our treasuries by various local bodies, (*ii*) a reduction in the balance of uncashed railway cheques at the end of the year as compared with that at its beginning, (*iii*) larger advances for the payment of troops in the field, and various other causes; but these will be partly counterbalanced by an increase in the receipts on account of family allotments and remittances of troops and under certain other items.

1915-16. Rupee loan.

270. It was announced last year, subject to the usual reservations, that a rupee loan of ₹4½ crores would be raised in 1915-16. By a notification issued on the 28th July 1915, subscriptions were invited to a 4 per cent. short-term loan, to be issued at par, which would be redeemed after eight years in any case, while the Government reserved the right of redeeming it at any time after five years. Tenders for this loan were opened on the 17th August, the total sum tendered amounting to about ₹664 lakhs. Under the terms of the loan notification, ₹450 lakhs out of this sum were taken, all valid applications for ₹2,000 and under being accepted in full, while those in excess of that amount were allotted to the extent of 67·667 per cent. A commission of 1 per cent. on the amount of the loan was paid to the Presidency Banks in connection with its flotation. A supplementary section of the loan was issued for receiving subscriptions from small investors through the Post Office, and about ₹50 lakhs were received from this section which remained open till the end of October.

1916-17. Main features of Budget estimates.

271. In 1916-17 the net Imperial revenue in India is estimated at ₹29,84 lakhs; a sum of ₹78 lakhs will be available from the Famine Insurance grant for the avoidance of debt; the remittance and capital transactions of Railway Companies, etc., are likely to result in a net credit in India of ₹2,06 lakhs; and net receipts of ₹38 lakhs and ₹59 lakhs are anticipated respectively in connection with Unfunded Debt and Imperial and Provincial loans. On the other hand, provision has been made: (1) for an expenditure of ₹53 lakhs from Provincial balances; (2) for a payment of ₹2 lakhs in connection with the discharge of permanent debt; (3) for capital expenditure of ₹4,07 lakhs in India on railways and canals and of ₹32 lakhs on Imperial Delhi; (4) for a recoverable outlay of ₹25,27 lakhs to be incurred on behalf of the War Office; (5) for a net issue of ₹2,90 lakhs in connection with miscellaneous deposit and remittance transactions, of which ₹2,63 lakhs represent recoverable expenditure incurred in connection with the war on behalf of certain public departments in England other than the War Office; and (6) for the payment of Council Bills to the extent of ₹5,83 lakhs. The total amount of funds required by the Government of India next year therefore aggregates ₹38,94 lakhs, while the receipts at its disposal amount to only ₹33,65 lakhs.

New rupee loan.

272. It will not be possible to provide any portion of the net disbursement of ₹5,29 lakhs mentioned in the preceding paragraph from the cash balances which are expected to stand at the beginning of the year at ₹17,18 lakhs. It is accordingly proposed to budget for a new rupee loan of ₹6½ crores inclusive of the Post Office Section which is estimated to yield ₹50 lakhs. With a loan of this amount, it will be possible to close the year, according to the present estimate, with a balance of about ₹18,39 lakhs. It is also proposed to associate a scheme for the conversion of Government of India 3½ per cent. and 3 per cent. securities with the proposed loan, and to accept subscriptions in excess of the minimum of ₹6 crores for which the main loan will be issued up to a maximum limit of ₹12 crores in all, utilising any excess over the minimum in paying off the balance of the temporary debt to the Gold

Standard Reserve. The announcement now made regarding the rupee loan is in accordance with present intentions; but full liberty is reserved, as usual, to vary the programme now announced to any extent that may be considered desirable.

273. The following table gives details of the transactions of Savings Banks and Provident Funds during a series of years, and the estimated transactions for 1915-16 and 1916-17 :— *1915-16 and 1916-17.*

Year.	Net additions to deposits, cash.	Interest.	Total addition.
1905-06	31,49,000	46,80,000	78,29,000
1906-07	50,94,000	52,25,000	1,03,19,000
1907-08	14,86,000	53,50,000	68,36,000
1908-09	—26,22,000	54,63,000	28,41,000
1909-10	51,82,000	57,20,000	1,09,02,000
1910-11	1,05,06,000	60,82,000	1,65,88,000
1911-12	1,95,69,000	67,79,000	2,63,48,000
1912-13	1,68,26,000	73,79,000	2,42,05,000
1913-14	2,37,05,000	84,07,000	3,21,12,000
1914-15	—8,35,53,000	78,82,000	—7,56,71,000
1915-16 (Revised)	49,66,000	70,18,000	1,19,84,000
1916-17 (Budget)	—42,34,000	73,04,000	30,70,000

Post Office Sa Bank, etc.

274. The net withdrawals from Postal Savings Banks in the current year are now estimated at R5 lakhs. The Budget estimate for 1916-17 anticipates a further net withdrawal of R1,00 lakhs from these Banks, including withdrawals for the purpose of subscription to the Post Office Section of the new loan and a growth of R57½ lakhs in the deposits in the various Provident funds for Government servants.

J. B. BRUNYATE.

The 21st March 1916.

Appendix I.

PRO FORMÂ ACCOUNT OF EXPENDITURE ON DELHI AND THE DELHI PROVINCE.

Prefatory Note.

I.—Scope of pro formâ account.

The following *pro formâ* account, with its supporting statements, exhibits the expenditure, initial and annual, on Delhi and the Delhi Province and also any receipts and savings which form a direct set-off to that expenditure. The account has been prepared in consultation with the Comptroller General and carries his approval as regards both its form and its substantial completeness at the present date subject to the qualifications implied in the following prefatory remarks; it will be added to, or amplified later, if experience should show this to be necessary.

2. The main item of the account, as regards non-recurring expenditure, is the Delhi project proper, the figures for which appear against item 1 of Part I—*Initial Outlay*. The principal recurring charge is that representing the expenditure in the new province, which appears as item 1 of Part II.—*Annual Expenditure.*

3. The account necessarily exhibits any expenditure occurring under the named heads, without qualification on account of contributory causes. It must, therefore, be clearly understood that the increase of expenditure, including that in the Delhi Province, is not wholly due to the change of Capital. Thus, an increase of the garrison at Delhi on strategic grounds had been already independently and strongly recommended to the Government of India by the Chief of the General Staff and endorsed by His Excellency the Commander-in-Chief in July 1911, before the transfer of the Capital had been officially proposed, and the reconstruction of the accommodation of the troops already there had long been recognised as pressing. Similarly, the recent advance in the policy relating to education and sanitation, particularly the latter, would, under any circumstances, have involved increased expenditure in this city. For practical purposes, these considerations must be ignored in the figured statements, as well as various similar points of minor pecuniary significance. The same principle will be applied to the Railway expenditure, *i.e.*, the cost of any remodelling of the railway system which is connected with the constitution of the new Capital will be exhibited in full in the *pro formâ* account. A wholly independent railway requirement, such as the permanent marshalling yard which will eventually replace the temporary yard now in use, will not be shown.

II.—Relation between the pro formâ account and the regular accounts.

4. A brief explanation is added below connecting the various items in the *pro formâ* account with the entries in the published accounts and estimates. Some further explanations are also to be found in the account itself and in its supporting statements.

5 The capital expenditure directly incurred on the construction of the new Imperial Capital at Delhi is shown in the regular accounts under the special head "51—Initial Expenditure on the new Capital at Delhi." The only other item of expenditure which will be recorded in the capital section of the regular accounts is that arising from diversions or re-arrangements of the railway system, which will appear under the head "48—State Railways."

Item 1 of Part I of *pro formâ* account.

Item 3 (*b*), *ibid.*

6 The initial expenditure incurred during the years 1911-12 and 1912-13 in connection with the provision of temporary accommodation for the Government of India at Delhi, pending the construction of the new Capital, has been treated, on the advice of the Comptroller General, as a revenue charge, under a special minor head styled "Temporary Delhi" subordinate to the major head "45—Civil Works." Any non-recurring receipts which may eventually be obtained in connection with these temporary works, *e.g.*, from the sale of lands and buildings when no longer required by the Government of India, will be similarly credited under a special head subordinate to the major head "XXXI—Civil Works."

Item 2, *ibid.*

Item II, *ibid.*

7. The remaining expenditure is mainly brought to account in one of two ways: either, first, as expenditure of the new Province; or, secondly, as departmental expenditure chargeable to the Department in which it is incurred.

Items 1 and I of Part II of *pro formâ* account.

8. The expenditure and receipts appertaining to the *quasi*-provincial administration of the Imperial area are brought to account in the same way as in the case of other minor administrations, and are eventually published separately, like the figures for Coorg and Baluchistan, in an appendix to the Civil Estimates. But as the Civil Estimates are not published till late in the year, a special arrangement has been made by which the figures for the Delhi province under each major head are separately shewn in the various sections of the Financial Secretary's memorandum (*e.g.*, I and 3, Land Revenue, page 21). It will be noted that any grants which may specially be given from Imperial revenues in aid of the Delhi Municipality or other local funds will be brought into the regular accounts and, consequently, into the *pro formâ* account also, since they will appear as charges of the Delhi administration.

9. Expenditure which does not appertain to provincial administration is recorded, as in the case of other provinces, under its appropriate departmental head in the regular accounts. Thus expenditure on the land and buildings required for the new Cantonment, and any corresponding receipts, appear under the Army and Military Works heads, respectively, under both of which a special Delhi sub-head has been opened. Railway capital outlay has already been referred to. Railway revenue charges and receipts similarly come under the Railway account head. In these cases, the *pro formâ* account necessarily exhibits only initial expenditure and non-recurring receipts, as Military expenditure is not being permanently increased and the influence of the new Capital on the ordinary daily receipts and working expenses of the Railways cannot evidently be satisfactorily isolated. This latter consideration also applies to the case of Postal and Telegraph expenditure, which moreover represents ordinary administrative expenditure of the department, and is relatively insignificant in amount. For these reasons, in the case of this department, neither the initial outlay nor the recurring receipts and expenditure have been included.

Items 3 (*a*) and III of Part I of *pro formâ* account.

Items 4 to 7 and I and IV of Part I, and Items 2 and 3 and II to V of Part II of *pro formâ* account.

Item I of Part I.

10. There are also a few items of expenditure and of actual receipt or of definite saving which are not recorded in the accounts of the Delhi Province or in the departmental accounts, but which it is necessary to take into consideration in calculating the expenditure in Delhi and the Delhi Province. Most of these are self-explanatory, but attention may be called to the intended treatment of the sale-proceeds of vacated lands and buildings at Calcutta (if any) and elsewhere. These will be credited under the major heads "XXV—Miscellaneous" and "XXXI—Civil Works", and the *pro formâ* account will take credit only for actual Imperial receipts. No account will be taken, in the statements themselves, of book transactions, or of the considerable savings obtained from the vacation of rented accommodation, *i.e.*, of relief in respect of rental payments which the Local Government obtains by giving up private buildings previously leased for provincial establishments, and moving the latter into offices formerly occupied by the Government of India. Any reference made to such saving will, therefore, be found in an explanatory footnote. [See Part I, Note 5.]

11. Outlay on stores and all other expenditure incurred in England under a capital head or as a revenue charge, which can be distinguished as appertaining to the construction of Delhi or to the administration of the Delhi Province, have been included in the *pro formâ* account.

PART I.—INITIAL OUTLAY.

[Figures in thousands of Rupees.]

EXPENDITURE.	Actuals to end of 1914-15.	Revised Estimate, 1915-16.	Budget Estimate, 1916-17.
1. DELHI PROJECT: Capital outlay on permanent Delhi chargeable to Head "51" (for details see Statement I-A)	1,39,11	50,00	40,00
2. Temporary Delhi *	54,33	...	...
3. Initial expenditure of non-Civil Departments :—			
(a) Military services †	35,97	9,86	10,00
(b) Railways ‡	2,73	2,35	11
4. Non-recurring grant to the Punjab Government in compensation for expenditure incurred on new headquarters buildings for the Commissionership transferred from Delhi	1,26	...	...
5. Cost of withdrawal to Delhi of Imperial offices previously located at Calcutta or elsewhere	2,03	6	6
6. Special non-recurring monetary concessions to establishments of the Government of India and attached offices on the occasion of their first move to Delhi	88	37	37
7. Miscellaneous items §	2,03	50	49
TOTAL	2,38,34	63,14	51,03

RECEIPTS.	Actuals to end of 1914-15.	Revised Estimate, 1915-16.	Budget Estimate, 1916-17.
I.—Receipts which may be obtained on account of Imperial buildings vacated by the Government of India or attached offices in consequence of the move‖	...	...	...
II.—Non-recurring receipts on account of Temporary Works	...	...	...
III.—Recoveries on account of land or buildings vacated in the old Cantonment of Delhi ‖	...	...	...
IV.—Miscellaneous items	3	2	...
TOTAL	3	2	...

Total Expenditure to end of 1916-17	3,52,51	Total receipts to end of 1916-17	5
Net expenditure to end of 1916-17	3,52,46		

* NOTE 1.—The head "Temporary Delhi" has been closed from 1st April 1913, subsequent expenditure being treated as part of the expenditure of the Delhi Province—see Part II of Account.

† NOTE 2.—The expenditure included under item 3 (a) is that relating to the formation of the new Cantonment. Its details are as follows :—

	To end of 1914-15.	1915-16.	1916-17.
Acquisition of land	12,83	...	...
Cost of buildings	20,41	8,94	10,00
Establishment charges	1,53	82	
Tools and Plant	1,20	10	...
TOTAL	35,97	9,86	10,00

‡ NOTE 3.—The figures relate to charges for the acquisition of land and outlay on railway facilities at Nangal Raya.

§ NOTE 4.—The expenditure shown against item 7 represents mainly the proportionate cost of the Delhi Audit Office and the cost of temporary establishments employed in the Secretariats in connection with the change of Capital.

‖ NOTE 5.—These heads record only actual receipts obtained from the sale of the vacated buildings and land. As explained in paragraph 10 of the prefatory note, this procedure has the effect of excluding a substantial true saving in respect of rented accommodation. Thus in 1913-14 and 1914-15 the Government of Bengal, by moving its offices into the vacated Imperial buildings in Calcutta, saved Rl,36,000, partly by being enabled to dispense with private accommodation previously leased, and partly by being relieved from the necessity of renting further accommodation.

PRO FORMÁ ACCOUNT OF EXPENDITURE ON DELHI AND THE DELHI PROVINCE.

PART II.—ANNUAL EXPENDITURE.

[Figures in thousands of Rupees.

Expenditure.	Actuals, 1914-15.	Revised Estimate, 1915-16.	Budget Estimate, 1916-17.	Receipts.	Actuals, 1914-15.	Revised Estimate, 1915-16.	Budget Estimate, 1916-17.
1. Expenditure of Delhi Province* . .	40,65	34,07	29,46	I.—Revenues of Delhi Province*	16,38	16,12	16,2(
2. Compensatory assignment to Punjab Provincial revenues in respect of extra expenditure incurred in administering territories which have been transferred from the old Delhi district to the districts of Rohtak and Gurgaon . .	23	13	13	II.—Assignment from Punjab Provincial revenues to Imperial on account of the creation of the new Province of Delhi, with effect from the 1st October 1912† .	1,91	1,91	1,9
3. Miscellaneous items .	4	3	4	III.—Saving under Calcutta house allowances‡ .	41	41	(
				IV.—Saving under hill journey and travelling allowances and contingencies on account of shorter move of Secretariat and attached offices.§ . . .	2,50	2,50	2,(
Total expenditure .	40,92	34,23	29,63	V.—Miscellaneous items .	3	3	
Net expenditure .	19,69	13,23	8,53	Total receipts .	21,23	20,97	21

* NOTE 1.—The details of this item are given in Statement II-A.

† NOTE 2.—This assignment represents the amount by which the Provincial outlay on the Delhi area exceeded the vincial revenue obtained therefrom prior to the constitution of the Imperial enclave, *i.e.*, the net expenditure incurred on area of which the Local Government has now been relieved.

‡ NOTE 3.—The figures shown against item III will be subject to increase as additional offices are successively transf from Calcutta to Delhi.

§ NOTE 4.—The figure shown against item IV is a minimum figure calculated once for all on the assumption that all o or portions of offices which previously moved between Calcutta and Simla have subsequently moved regularly between Delhi Simla. The actual saving throughout has been larger owing to certain establishments which previously moved to Calcutta retained in Simla throughout the cold weather.

Printed and Published for the Govt. of India *by the* Superintendent Government Printing, India, *Delhi.*

REGISTERED No. C. 696

The Gazette of India.

PUBLISHED BY AUTHORITY.

CALCUTTA, SATURDAY, MARCH 25, 1916.

☞ Separate paging is given to this Part in order that it may be filed as a separate compilation.

PART II.

Notifications by High Court, Comptroller-General, etc.

GAZETTE OF INDIA.

NOTICE.

The 18th March 1916.

On and after 8th April and until further notice, Parts I, IV, V and VI of the *Gazette of India* and the Weather and Crop Report will be published in Simla. Parts II and III will continue to be published in Calcutta. All notifications and other matter intended for publication in those Parts should be addressed to the Publisher at Simla and Calcutta, respectively.

Attention is invited to the following Circular Memorandum of the Government of India, Home Department, of August 1901:—

"It has been brought to the notice of this Department that matter for the *Gazette of India* is sometimes sent to the Press late on Friday evenings for publication in the next day's *Gazette* and that this involves considerable inconvenience to the Press and expense to Government. In the Circular Memorandum of this Department, No. 777—79, dated 9th February 1870, the Government of India directed that all notifications or other matter intended for insertion in the *Gazette of India* should be delivered at the Press not later than 2 P.M. on Friday, and that any papers sent thereafter must be certified to be extremely urgent in order to ensure their appearance in the next day's *Gazette*. The undersigned is directed to request that these orders may be more strictly observed in future, and that Departments will refrain from sending to the Press as extremely urgent any papers which can without harm or inconvenience be held over for the next *Gazette*.

J. P. HEWETT,
Secretary to the Government of India."

CESSATION OF EXCLUSIVE PRIVILEGES.

The public are warned that entries under this heading must not be accepted as final, as under the provisions of Rules 9 and 11 of "The Indian Patents and Designs (Temporary) Rules, 1915," the Controller may extend the time prescribed by the Indian Patents and Designs Act, 1911, and by the Inventions and Designs Act, 1888, for paying the necessary renewal fees.

The Patent Office will supply on request definite information, so far as possible, as to the position of any particular Patent or Exclusive Privilege.

1909.

220. (Gaultier.) 284. (Shelley.)

1911.

184. (Watson.) 576. (King.) 605. (Gabbett-Fairfax.)

DESIGNS ENTERED ON THE REGISTER.

March 13th to 18th.

Class 13. Nos. 3961 to 3998. The Calico Printers' Association, Ld., St. James's Buildings, Oxford Street, Manchester, England. March 7.

NOTICES.

THE PATENT OFFICE, 1, COUNCIL HOUSE STREET, CALCUTTA.

Public room, open 11 a.m. to 4 p.m.; Saturdays, 11 a.m. to 1 p.m.

1. *All communications* relating to applications for patents and for registration of designs under the Indian Patents and Designs Act (II of 1911), or in continuation of applications under the Inventions and Designs Act (V of 1888) should be addressed to the Controller of Patents and Designs, 1, Council House Street, Calcutta. Documents sent by post should be carefully packed.

2. *Directions* for the guidance of inventors and others are given in the Patent Office Handbook (price one rupee) which contains the Indian Patents and Designs Act, 1911, the Indian Patents and Designs Rules, 1912, the Indian Patents and Designs (Temporary Rules) Act, 1915, the Indian Patents and Designs (Temporary) Rules, 1915, together with current regulations and instructions. These should be consulted before an application is made to the Controller.

3. *Advice.* The Patent Office cannot undertake (1) to give opinions on the interpretation of Patent Law, or on the advisability of protecting inventions and designs or on their infringement; (2) to make searches in respect of information available in the public room; (3) to recommend any particular agent; or (4) to assist in the disposal of inven-

tions. Applicants are warned that the Indian Patents and Designs Act, 1911, is in force in British India only, and patents granted under it do not extend to the United Kingdom or any of the British possessions. The International Convention for the Protection of Industrial Property does not include India. For information regarding patents in countries other than India applications should be made to the patent offices in the countries concerned.

4. *Fees* are payable in *cash* and must be received in the Patent Office within the time allowed by the Acts. When cheques are offered in payment of fees, it must be clearly understood that the office cannot hold itself responsible for any delay that may occur in the collection of cash on the cheques; any cheque not payable in Calcutta is subject to commission. In cases where it is not possible to have the fees handed in at the Patent Office, it is preferable to send them by money-order or postal order payable at Calcutta to the Controller of Patents and Designs, and to advise him that they have been so sent. Stamps will not be received in payment of fees.

5. *Trade and property marks and names* are not registered and *medicines* are not patented under the Indian Patents and Designs Act. There is no provision of Law in British India for their registration. Neither does this Act deal with *pictures, photographs*, etc., for which copyright is obtainable under the Indian Copyright Act, 1914.

6. *Printed Specifications* of applications, which have been accepted, are published within about three weeks after acceptance has been notified in the *Gazette of India*. These specifications can be purchased at the Patent Office at a uniform price of 8 annas per copy; and may be seen free of charge, together with other publications of the Patent Office, at the following places:—

Delhi, the 22nd March 1916.

No. 1901-*Education*.—The following bye-laws regulating the construction of buildings within the limits of the Notified Area, civil station, Delhi, made under the provisions of sections 189 and 190 of the Punjab Municipal Act III of 1911, have been approved by the Chief Commissioner, Delhi Province, and are hereby published for information.

The bye-laws will come into force six weeks from the date of publication.

DELHI CIVIL STATION NOTIFIED AREA COMMITTEE.

Bye-laws for the regulation of building within the Notified Area of Delhi, under sections 189 and 190 of Punjab Act III of 1911 (Municipal Act).

1. Any person who desires to erect, re-erect, within the meaning of section 3 (5) of Act III, 1911, Punjab, any building within the limits of the Notified Area, Delhi, shall submit to the Secretary, Notified Area Committee, an application giving notice of his intention in the following form :—

APPLICATION.

Under section 189 (3) (*a*), Act III, 1911, Punjab.

Delhi,_____ 191 .

To

The Secretary,

Notified Area Committee,

Delhi.

SIR,

I beg to give you notice that I intend to $\frac{\text{erect}}{\text{re-erect}}$, building in_____ Road and in accordance with the provisions of Section 189, Act III, 1911, I forward herewith plans of the site and building and complete elevations, sections and specifications of the work.

Signature of the owner }_____

Address_____

2. Except where the Notified Area Committee shall exempt any person from complying with the terms of these Bye-laws, the notice above prescribed shall be accompanied by the following, *viz*:—

(1) Site plan, fully dimensioned, of the land on which it is intended to erect or re-erect such building.

The site plan shall show all erections and proposed erections within the compound or proposed compound of the building to be erected or re-erected, and the distance of the building to be erected or re-erected from all adjacent houses, out-houses and offices

(2) A plan of the building proposed to be erected or re-erected, in which the rooms shall be named, drawn and dimensioned. The sections and elevations shall be drawn in sufficient detail to enable the stability of the structure and sufficiency of the ventilation to be determined.

(3) A specification of the building proposed which shall show—

(A) the arrangements proposed for carrying off storm water and sullage from the latrines, cook-houses, dhobi ghat and bath rooms;

(B) the materials and methods of construction proposed to be used for external and party walls, roofs, floors, fire-places and chimneys, drains and latrines.

(C) the height of the ground floor above ground level.

(D) the space to be left about the building.

NOTE.—The plan and specification will be retained in the office of the committee; and it is therefore desirable that the applicant should present all plans and specification in duplicate.

3. Except where the Notified Area Committee shall exempt any person from complying with the terms of these bye-laws the ventilation and space to be left about the main building of the compound or proposed compound shall be determined as follows:—

(1) The plinth area of all buildings in the compound or the proposed compound shall not exceed one eighth of the area of such compound.

(2) The main building shall not be less than 50 feet from the compound wall on at least three sides.

(3) The distance of servant's quarters or stables from the main building shall not be less than 75 feet. Notwithstanding this if one of the buildings be double storied its distance from the nearest adjoining building shall not be less than twice the height of the double storied building.

By order,

G. F. DEMONTMORENCY,

Personal Assistant to Chief Commissioner, Delhi.

ORDERS BY THE HON'BLE THE CHIEF COMMISSIONER, AJMER-MERWARA.

NOTIFICATION.

Mount Abu, the 1st March 1916.

No. 306—1093.—The following draft of a Notification which it is proposed to issue in exercise of the powers conferred by section 9 of the Indian Petroleum Act, 1899 (VIII of 1899), is published for the information of all persons likely to be affected thereby and notice is hereby given that the said draft will be taken into consideration by the Hon'ble the Chief Commissioner on or after the 25th March 1915.

2. Any objection or suggestion which may be received from any person with respect to the draft before the date aforesaid will be considered by the Hon'ble the Chief Commissioner.

Draft Notification.

In exercise of the powers conferred by section 9 of the Indian Petroleum Act, 1899 (VIII of 1899), and with the previous sanction of the Governor General in Council the Hon'ble the Chief Commissioner is pleased to make the following amendments in the Ajmer-Merwara Petroleum Rules issued in this office Notification No. 1530-1093, dated the 14th October 1909:—

(1) In rule 6, Chapter IV, Part II, of the said rules for the words "forty gallons" the words "sixty-five gallons" shall be substituted.

(2) In condition 3 of license form B, condition 1 of license form H, condition 1 (for dangerous petroleum in the case of the holder of a license in form H) of license form I, condition 1 of license form K and condition 1 of license form M, appended to the said rules—

(*a*) for the words "forty gallons" after the words "not more than" the words "sixty-five gallons" shall be substituted; and

(*b*) the following shall be added as sub-clause 7:—

"(7) When the capacity exceeds forty but does not exceed sixty-five gallons..... 10 B. W. G."

By order,

B. J. GLANCY,

First Assistant to the Agent to the Governor-General, Rajputana, and Chief Commissioner, Ajmer-Merwara.

TREASURE TROVE.

NOTIFICATION.

It is hereby notified under section 5 of the Indian Treasure Trove Act, VI of 1878, that, in the beginning of October 1915 an idol of Vigneswaraswami made partly of bronze and chiefly of copper valued at Rs. 70 was found buried underground in S. No. 335 of Mel Bhuvanagiri village in the Chidambaram taluk, South Arcot District, Madras Presidency, (held on patta by one Pushpavalli Thayaru) by one Ayyakannu Padayachi, son of Ponnappadayachi while digging up the roots of prickly pear.

2. All persons claiming the said treasure or any part thereof are hereby required to appear personally or by agent before the Collector of South Arcot at his office at Cuddalore on Monday, the 7th day of August 1916, in view to the matter being enquired into and determined according to law.

M. AZIZUDDIN,

Collector.

SULPHATE OF QUININE, SULPHATE OF CINCHONIDINE, CINCHONA FEBRIFUGE, RESIDUAL ALKALOID AND QUINOIDINE.

Manufactured at the Bengal Government Cinchona Plantation.

These articles are guaranteed to be free from wilful admixture with other Cinchona alkaloids. Quinine can be purchased by Government officers, District and Local Boards. It can also be purchased by Missionaries for *bonâ fide* public purposes. Otherwise it is not sold to private persons or firms. Cinchonidine is for sale to Government Officers and to dealers. Cinchona Febrifuge can be purchased both in powder and 3½ grain tablet forms by Government officers and the general public. It is also sold by the principal Druggists in Calcutta. Quinoidine or *Pure amorphous alkaloid* and Residual Alkaloid or *Amorphous cinchona alkaloid*, which contains about 40 per cent. of *pure amorphous Alkaloid*, are for sale to Missionaries and Government Institutions only. *These drugs are sold strictly cash and in advance, but private purchasers may use the V. P. Post system, and are obtainable from the Superintendent, Juvenile Jail, Alipore.*

The rates for these drugs from 1st April 1915, are as follows:—

SULPHATE OF QUININE.

	₹
For quantities of not less than 6 lbs. in one delivery . . .	14-8 per lb.
For any quantity less than 6 lbs. in one delivery	15-8 ,,

SULPHATE OF CINCHONIDINE.

	₹
For quantities of not less than 6 lbs. in one delivery	11 per lb.
For any quantity less than 6 lbs. in one delivery	12 ,,

CINCHONA FEBRIFUGE.

	₹
For quantities of not less than 6 lbs. in one delivery	5 per lb.
For any quantity less than 6 lbs. in one delivery	6 ,,

RESIDUAL ALKALOID OR *AMORPHOUS CINCHONA ALKALOID* AND QUINOIDINE OR *PURE AMORPHOUS ALKALOID* AND QUINOIDINE TABLETS.

	₹
For any quantity	4 per lb.

Quinine is available in 1-oz., ¼-lb., ½-lb., 1-lb. and 4-lb. tins.
Cinchonidine is available in ¼-lb., ½-lb. and 1-lb. tins.
Cinchona Febrifuge is available in ¼-lb., ½-lb. and 1-lb. tins.

NOTE.—These statistics are compiled from *fortnightly* returns furnished by Local Governments and Administrations. They r to the wholesale prices in the markets referred to above which prevailed on the last (or nearest mart) day of each night. The statistics for Karachi, Bombay and Calcutta are compiled from the Chambers of Commerce Ma Reports.

(a) Price for the fortnight ending the 31st July 1914 being taken as 100.

India per maund of 82⅔ lbs.

FOREIGN SEA-BORNE TRADE DURING FEBRUARY 1916.

REVIEW of the SEA-BORNE TRADE and NAVIGATION of BRITISH INDIA for the month of FEBRUARY 1916.

FOREIGN COMMERCE.

FOREIGN SEA-BORNE TRADE DURING FEBRUARY 1916.

The trade returns of British India for February 1916, as compared with those of its immediate predecessor, showed an increase in total exports and re-exports, but a decrease in total imports. The growth in exports is spread over all the principal groups. The total imports of merchandise were valued at R11½ crores, exports at nearly R21 crores (inclusive of R1,30,000 being the value of wheat exported on Government account), and re-exports at R71 lakhs. As compared with the preceding month (January 1916), the imports decreased by 2 per cent, while the exports increased by over 47 per cent and the re-exports by 90 per cent. As compared with February 1915, the imports showed an increase of about 30 per cent, exports of 41 per cent, and re-exports of 102 per cent.

The actual net excess of exports, including re-exports, over imports was R2,80 lakhs in January 1916 and R10,07 lakhs in February 1916. The statement below shows the figures of imports and exports, including re-exports, during January and February of the years 1913-14, 1914-15, and 1915-16, and the actual net excess of exports over imports during the same periods:—

	1913-14		1914-15		1915-16		Actual net excess of exports over imports		
	Imports	Exports, including re-exports	Imports	Exports, including re-exports	Imports	Exports, including re-exports	1913-14	1914-15	1915-16
	R(lakhs)	R(lakhs)	R(lakhs)	R(lakhs)	R(lakhs)	R(lakhs)	R(lakhs)	R(lakhs)	R(lakhs)
January . .	18,04	22,40	10,06	11,46	11,78	14,58*	4,36	1,40	2,80
February . .	13,47	25,22	8,91	15,12	11,53	21,60(a)	11,75	6,21	10,07

Comparisons with January 1916.—As compared with January 1916, the most noticeable changes were:—

Under imports: *increases* under motor cars and motor cycles (+R6⅓ lakhs), railway carriages (+R5⅔ lakhs), cotton grey piecegoods (+R25 lakhs), cotton white piecegoods (+R15½ lakhs), horses (+R10½ lakhs), but *decreases* under dates (—R6 lakhs), spices (—R10 lakhs), sugar 16 D. S. and above (—R21 lakhs), kerosene oil (—R20⅔ lakhs), iron or steel sheets and plates (—R10 lakhs), and tea chests (—R5 lakhs).

Under exports: *increases* under rice (+R94¾ lakhs), tea, black (+R8 lakhs), coffee (+R19⅓ lakhs), raw hides (+R26⅕ lakhs), lac (+R7½ lakhs), cotton seed (+R13 lakhs), linseed (+R25½ lakhs), sesamum (+R13 lakhs), raw cotton (+R1,83½ lakhs), raw jute (+R46 lakhs), raw wool (+R39 lakhs), jute, gunny bags (+R72 lakhs), jute, gunny cloth (+R68 lakhs), cotton manufactures (+R23 lakhs), and indigo (+R11⅓ lakhs), but *decreases* under barley (—R12½ lakhs), and tanned or dressed hides (—R10⅓ lakhs).

Comparisons with February 1915.—As compared with February 1915 the most noticeable changes were:—

Under imports: *increases* under sugar 16 D. S. and above (+R13 lakhs), salt (+R11 lakhs), hardware (+R7⅔ lakhs), cotton yarn (+R15 lakhs), cotton grey piecegoods (+R88 lakhs), cotton white piecegoods (+R43½ lakhs), cotton coloured goods (+R33½ lakhs), horses (+R8 lakhs), but *decreases* under betelnuts (—R6¼ lakhs), railway plant and rolling-stock (—R49 lakhs), and matches (—R5¾ lakhs) kerosene oil and raw silk (—R10 lakhs each).

* There were no exports of wheat on Government account in January 1916.
(a) Includes R1,30,000, being the value of wheat exported on Government account in February 1916.

Under exports: *increases* under rice (+₹30 lakhs), tea, black (+₹55 lakhs), raw hides (+₹38 lakhs), raw skins (+₹17 lakhs), castor seed and cotton seed (+₹14 lakhs each), groundnuts seed (+₹23 lakhs), linseed (+₹32 lakhs), raw cotton, (+₹1,77 lakhs), raw wool (+₹55 lakhs), indigo (+₹36 lakhs), jute gunny bags (+₹94 lakhs), and jute gunny cloth (+₹63 lakhs), but *decreases* under wheat (private and government) (—₹30 lakhs), raw jute (—₹28 lakhs), and hides, tanned or dressed (—₹20 lakhs).

VARIATIONS IN CLASSES.

The variations in February 1915 and 1916, as compared with January 1915 and 1916, respectively, according to the four main classes of merchandise, are as follows:—

	January 1915 ₹(lakhs)	February 1915 ₹(lakhs)	Increase(+) or decrease(—) ₹(lakhs)	January 1916 ₹(lakhs)	February 1916 ₹(lakhs)	Increase(+) or decrease(—) ₹(lakhs)
IMPORTS						
1. Food, drink, and tobacco	1,65	1,84	+19	2,40	1,99	—41
2. Raw materials and produce and articles mainly unmanufactured	96	78	—18	91	64	—27
3. Articles wholly or mainly manufactured	7,27	6,18	—1,09	8,19	8,61	+42
4. Miscellaneous and unclassified	18	11	—7	28	29	+1
Total	10,06	8,91	—1,15	11,78	11,53	—25
EXPORTS						
1. Food, drink, and tobacco	3,17	3,80	+63	3,25(*a*)	4,23(*b*)	+98
2. Raw materials and produce and articles mainly unmanufactured	4,57	6,28	+1,71	6,02	9,87	+3,85
3. Articles wholly or mainly manufactured	3,43	4,53	+1,10	4,77	6,49	+1,72
4. Miscellaneous and unclassified	11	16	+5	16	30	+14
Total	11,28	14,77	+3,49	14,20(*a*)	20,89(*b*)	+6,69

The imports in February 1915 were less than those in January 1915 by ₹1,15 lakhs, but the imports in February 1916 were less only by ₹25 lakhs as against those in January 1916. In February 1915, the imports of food, drink, and tobacco were more by ₹19 lakhs, but in February 1916, they were less by ₹41 lakhs as compared with the preceding month. The imports of raw materials in February 1915 were less by ₹18 lakhs, and of manufactured articles by ₹1,09 lakhs, and in February 1916, raw materials decreased by ₹27 lakhs but manufactured articles increased by ₹42 lakhs.

Under exports, the figures for February 1915 were more than those for January 1915 by ₹3,49 lakhs, while in February 1916, the figures are more by ₹6,69 lakhs as compared with January 1916. In February 1916, food, drink, and tobacco showed an increase of ₹98 lakhs as against ₹63 lakhs in February 1915, raw materials of ₹3,85 lakhs as against ₹1,71 lakhs and manufactured articles of ₹1,72 lakhs as against ₹1,10 lakhs, in the corresponding month of last year.

(*a*) There were no exports of wheat on Government account in January 1916.
(*b*) Includes ₹1,30,000, being the value of wheat exported on Government account.

COMPARISON WITH THE IMPORTS AND EXPORTS OF JANUARY 1916.*

I.—Imports.

A DECREASE IN THE IMPORTS OF FOOD STUFFS.

The imports of food, drink, and tobacco, in February 1916, as compared with the preceding month (January 1916), decreased by R41 lakhs, due mainly to the reduced imports of sugar. The imports of sugar 16 D. S. and above declined in February, 1916, to 34,242 tons, valued at R1,09½ lakhs, from 41,683 tons, valued at R1,30½ lakhs, in January 1916. Imports from Java decreased in February 1916, to 16,750 tons from 36,918 tons in the preceding month, while those from Mauritius increased to 13,712 tons from 1,233 tons. In the eleven months ended February 1916, the imports of sugar 16 D. S. and above rose to 471,230 tons, valued at R14½ crores, as against 398,215 tons, valued at nearly R9 crores, in the corresponding period of the previous year. Imports of spices, in February, 1916, declined to 8½ million lbs, valued at R8⅔ lakhs, as against 13½ million lbs, valued at nearly R19 lakhs, in the preceding month, due mainly to the reduced imports of betelnuts from the Straits Settlements and cloves from the East African Protectorate. Imports of dates decreased to 51,564 cwts from 138,934 cwts in the preceding month.

A DECREASE IN THE IMPORTS OF KEROSENE OIL AND RAW SILK.

The value of the imports of raw materials decreased by R27 lakhs, due mainly to smaller imports of kerosene oil. Imports of kerosene oil, in February 1916, amounted to nearly 5 million gallons, valued at over R25 lakhs, as against 10⅗ million gallons, valued at R45¾ lakhs, in the preceding month. Imports from the United States of America declined to 2 million gallons from 7 million gallons in the preceding month and those from Borneo to one million gallons from nearly 3 million gallons. Imports of raw silk decreased, in February 1916, to 47,794 lbs from 140,949 lbs in the preceding month, due to reduced imports from China.

AN INCREASE IN THE IMPORTS OF MANUFACTURED ARTICLES.

The value of the imports of manufactured articles increased by R42 lakhs. Imports of cotton piecegoods, including fents, increased in February 1916 to 203½ million yards, valued at R3,94 lakhs, from 181 million yards, valued at R3,52 lakhs, in the preceding month. The number of motor cars imported increased in February 1916 to 374, valued at R11 lakhs, from 225, valued at R7⅛ lakhs, in the preceding month. Imports of iron or steel, sheets and plates, declined to 7,280 tons from 11,414 tons in the preceding month. Tea-chests declined by R5⅕ lakhs.

II.—Exports.

AN INCREASE IN THE EXPORTS OF RICE, TEA, WHEAT AND COFFEE AND A DECREASE IN THE EXPORTS OF BARLEY.

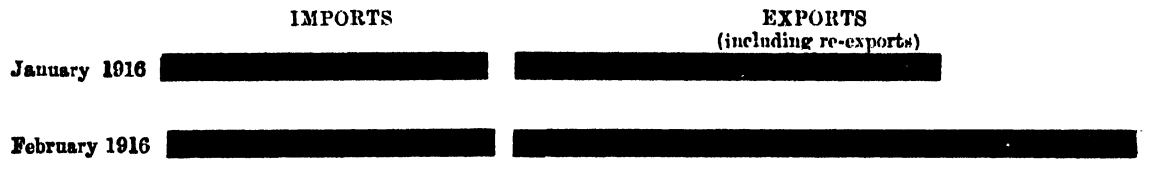
Exports of food, drink, and tobacco increased by R98 lakhs, mainly due to larger shipments of rice. Exports of rice not in the husk amounted in February 1916 to 190,188 tons, valued at R2,08¼ lakhs, as against 92,486 tons, valued at R1,14½ lakhs, in January 1916. There were no shipments to the continental countries in Europe, except 9,720 tons to Portugal. Exports to the United Kingdom increased to 47,115 tons in February 1916 from 12,705 tons in January; Ceylon took 42,323 tons in February as against 30,455 tons in the preceding month; the Straits Settlements 24,488 tons as against 23,072 tons; Java 36,155 tons as against 8,164 tons; and the West Indies 7,128 tons as against 859 tons. In the eleven months ended February 1916, the exports amounted to 1,090,276 tons, valued at R12,52 lakhs, as against 1,325,516 tons, valued at R15,01⅛ lakhs, in the corresponding period of the previous year. Shipments of wheat on private and government account in February 1916

* Comparison has been made with the previous month and not with the corresponding month of the previous year. The comparison of February 1916 with February 1915 is not important under present conditions.

amounted to 1,893 tons, valued at R2½ lakhs, as against 456 tons, valued at R58,500, in the preceding month. 1,000 tons of wheat, valued at R1,30,000, were exported in the month of report on Government account from Bombay to Italy. In the eleven months ended February 1916, the exports, both on private and Government account, amounted to 651,959 tons, valued at nearly R8,43 lakhs, as against 697,621 tons, valued at R8,18 lakhs, in the corresponding period of the previous year. Exports of tea rose in February 1916 to 25½ million lbs, valued at R1,44 lakhs, from 24 million lbs, valued at R1,36¼ lakhs, in the preceding month. The United Kingdom took 16½ million lbs as against 12¾ million lbs in the preceding month and Russia 4½ million lbs as against 6 million lbs. In the eleven months ended February 1916, the exports amounted to over 317 million lbs, valued at R18¾ crores, as against 291⅕ million lbs, valued at nearly R15 crores, in the corresponding period of the previous year. Exports of coffee in February 1916 increased to 36,783 cwts, valued at R22 lakhs, from 5,230 cwts, valued at R2¾ lakhs, in the preceding month, mainly due to larger shipments to the United Kingdom and Australia. Shipments of barley declined to 10,190 cwts, valued at R56,000, in February 1916 from 203,394 cwts, valued at R 13 lakhs, in the preceding month.

A HEAVY INCREASE IN THE EXPORTS OF RAW MATERIALS AND UNMANUFACTURED ARTICLES, SPECIALLY RAW COTTON.

The value of the exports of raw materials increased by nearly R4 crores. Shipments of raw cotton increased to 53,735 tons, valued at over R3,60¾ lakhs, in February 1916, from 26,828 tons, valued at R1,77¼ lakhs, in the preceding month. All the principal importing countries took larger quantities. The United Kingdom took 3,896 tons, as against 2,470 tons ; Italy 4,606 tons, as against 2,626 tons ; and Japan 40,171 tons, as against 19,333 tons. In the eleven months ended February 1916, the exports amounted to 403,053 tons, valued at nearly R22¼ crores, as against 464,070 tons, valued at over R31 crores, in the corresponding period of the previous year. Exports of raw jute increased in February 1916 to 54,135 tons, valued at R1,59¾ lakhs, from 41,410 tons, valued at R1,13¾ lakhs, in the preceding month. The United Kingdom took 24,825 tons, as against 24,116 tons, in January 1916 ; France 8,752 tons, as against 2,766 tons ; Spain 4,854 tons, as against 887 tons ; Italy 8,509 tons as against 2,077 tons ; and the United States of America 6,545 tons, as against 11,072 tons. In the eleven months ended February 1916, the exports amounted to 556,826 tons, valued at R14½ crores, as against 461,994 tons, valued at nearly R12 crores, in the corresponding period of the previous year. Exports of seeds increased to 109,304 tons, valued at R1,59½ lakhs, in February 1916 from 64,435 tons, valued at nearly R97 lakhs, in the preceding month, due mainly to the increased shipments of linseed, sesamum and cotton seed. Shipments of raw hides increased to 6,072 tons, valued at nearly R94 lakhs, in February 1916 from 4,157 tons, valued at R67⅔ lakhs, in the preceding month. The United Kingdom took 1,272 tons, as against 245 tons in the preceding month ; Italy 1,878 tons as against 1,562 tons; and the United States of America 2,540 tons, as against 2,291 tons. Exports of raw skins increased to 2,633 tons from 2,221 tons in January 1916. The United States of America took 2,482 tons, as against 2,107 tons in the preceding month. Exports of raw wool amounted, in February 1916, to over 11 million lbs, valued at nearly R68 lakhs, as against 5⅖ million lbs, valued at R 29 lakhs, in the preceding month. The increase was due to the heavy exports to the United Kingdom.



AN INCREASE IN THE EXPORTS OF JUTE GOODS, COTTON MANUFACTURES, AND INDIGO, AND A DECREASE IN THE EXPORTS OF DRESSED HIDES.

Exports of manufactured articles increased by R1,72 lakhs, due mainly to larger shipments of jute goods. Exports of gunny bags increased, in February 1916, to 83 millions in number, valued at R1,98 lakhs, from 60¾ millions, valued at R1,26⅛ lakhs, in the preceding month. The United Kingdom took 36¾ millions in February 1916, as against nearly 31 millions in the preceding month ; Russia 12¼ millions as against 4¼ millions ; France nearly 3½ millions as against 10 millions ; Java over 3 millions as against nearly 2

millions; the United States of America 4⅔ millions as against 1⅓ millions; and Chile nearly 7 millions as against *nil* in the preceding month. In the eleven months ended February 1916, the exports amounted to 721¾ millions, valued at over ₹18 crores, as against 356 millions, valued at ₹11½ crores, in the corresponding period of the previous year. Shipments of gunny cloth increased in February 1916 to 118 million yards, valued at nearly ₹1,96 lakhs, from 78½ million yards, valued at ₹1,27⅘ lakhs, in the preceding month. The United Kingdom took 27¾ million yards in February 1916 as against 19⅘ million yards in the preceding month; Canada nearly 8 million yards as against 7⅕ million yards; France over 9 million yards as against 430,500 yards; the United States of America 42½ million yards as against nearly 44 million yards; and the Argentine Republic 23 million yards as against *nil*. In the eleven months ended February 1916, the exports amounted to 1,082 million yards, valued at nearly ₹16 crores, as against 966 million yards, valued at over ₹12 crores, in the corresponding period of the previous year.

Exports of cotton manufactures including twist and yarn, amounted in February 1916 to ₹89 lakhs, as against ₹66 lakhs in the preceding month, due mainly to larger exports of cotton piecegoods to Asiatic Turkey and of cotton twist and yarn to China. Exports of tanned or dressed hides decreased in February 1916 to 756 tons from 1,192 tons in the preceding month, due mainly to the reduced shipments to the United Kingdom, which took 750 tons as against 1,185 tons in the preceding month. Exports of indigo increased to 9,608 cwts, valued at nearly ₹54 lakhs, in February 1916, from 8,410 cwts, valued at ₹42½ lakhs, in the preceding month.

The following diagrams illustrate the relative magnitude of the import and the export trade in merchandise in January and February 1916 :—

ELEVEN MONTHS ENDED FEBRUARY 1916.

The summary of the results for eleven months ended February 1916 is as follows :—

	1913-14.		1914-15.		1915-16.		ACTUAL NET EXCESS OF EXPORTS OVER IMPORTS.		
	Imports.	Exports, including re-exports.	Imports.	Exports, including re-exports.	Imports.	Exports, including re-exports.	1913-14.	1914-15.	1915-16.
	₹ (lakhs)	₹ (lakhs)	₹ (lakhs)	₹ (lakhs)	₹ (lakhs)	₹ (lakhs)	₹ (lakhs)	₹ (lakhs)	₹ (lakhs)
Merchandise . .	1,67,78	2,25,39	1,28,56	1,67,49	1,20,62	1,78,18(a)	57,61	38,93	57,56
Treasure . . .	32,53	6,61	19,89	3,24	11,34	7,35	—25,92	—16,65	—3,99

It will be seen that, during the eleven months ended February 1916, as compared with the eleven months ended February 1915, the imports of merchandise showed a fall of ₹7,94 lakhs or 6 per cent, while the exports, including re-exports, rose by ₹10,69 lakhs or over 6 per cent. The total value of merchandise increased by ₹2,75 lakhs or nearly 1 per cent to ₹2,98,80 lakhs.

(a) Includes ₹6,90 lakhs, being the value of wheat exported on Government account.

CHIEF INCREASES AND DECREASES.

Comparing the values of the imports during the eleven months, April 1915 to February 1916, with those in the corresponding period of 1914-15, the chief increases and decreases are as follows:—

Increases

		R (thousands)
Class I	Dates	20,79
	Sugar, 16 D. S. and above	5,61,48
	Salt	50,57
Class II	Precious stones and pearls, unset	25,75
Class III	Gold and silver thread	22,40
	Chemicals	40,42
	Silk piecegoods	67,79
	Matches	30,95
	Tea-chests	38,87
	Motor cars and motor cycles	23,65
	Drugs and medicines	19,35
	Pipes and fittings, cast (iron or steel)	17,90
	Paper	10,35

Decreases

		R (thousands)
Class II	Coal	52,27
	Oils, kerosene	34,68
Class III	Hardware	20,36
	Machinery, primemovers	28,40
	,, textile	30,82
	,, electrical	20,50
	Iron or steel—beams, pillars, etc.	28,93
	,, sheets and plates	1,31,05
	Copper, wrought	1,64,80
	Railway carriages	2,94,50
	Railway locomotive engines, etc.	81,29
	Materials for construction of railways	1,72,40
	Cotton, raw	19,43
	,, twist and yarn	17,36
	,, grey piecegoods	3,04,76
	,, white ,,	58,24
	,, coloured ,,	2,40,58
	,, hosiery	18,59
	Woollen piecegoods	71,15

Under exports the chief increases and decreases are as follows:—

Increases

		R (thousands)
Class I	Barley	1,47,54
	Gram	9,77
	Pulse	47,77
	Wheat (private and Government)	24,89
	Wheat flour	16,23
	Spices—pepper	13,51
	Tea	3,77,89
Class II	Coal	17,29
	Hides (raw)	1,47,78
	Skins (raw)	41,10
	Rubber (raw)	18,73
	Jute (raw)	2,52,29
Class II	Hemp (raw)	10,63
	Silk (raw)	11,03
	Wool (raw)	1,65,37
Class III	Indigo	89,24
	Myrobalans	16,47
	Saltpetre	22,71
	Hides, tanned, etc.	56,95
	Cotton, twist and yarn	85,02
	,, piecegoods	74,70
	Jute gunny bags	6,51,58
	,, ,, cloth	3,68,76
Class IV	Bran and pollards	9,31

Decreases

		R (thousands)
Class I	Coffee	56,78
	Jawar and bajra	62,59
	Rice	2,46,84
Class II	Cotton seed	90,80
	Groundnuts seed	10,99
Class II	Linseed	2,29,84
	Rapeseed	44,17
	Sesamum seed	80,43
	Cotton (raw)	8,87,32
	Wood teak	16,84
Class III	Opium	22,96

IMPORTS OF FOREIGN MERCHANDISE.

In the following table are shown the quantities and values of the principal articles of imports during the eleven months, ended February 1916, as compared with the figures for the corresponding period of 1914-15 :—

Principal Articles	Quantity		Value		Increase (+) or decrease (−) in the eleven months ended February 1916, as compared with the corresponding period of 1914-15	
	1914-15	1915-16	1914-15	1915-16	Quantity	Value
	(thousands)	(thousands)	₹ (thousands)	₹ (thousands)	(thousands)	₹ (thousands)
Apparel (excluding haberdashery, hosiery, and boots and shoes)	—	—	97,84	1,30,68	—	+32,84

(*a*) Exports of wheat on Government account are shown separately under Government stores from 1st April 1915

Trade by Provinces.

The total imports and exports, including re-exports, of private merchandise into and from the several maritime provinces during the month of February 1916, as compared with those of January 1916, are stated below :—

	Imports		Exports, including re-exports	
	January 1916	February 1916	January 1916	February 1916
	₹ (lakhs)	₹ (lakhs)	₹ (lakhs)	₹ (lakhs)
Bengal	4,99	4,06	6,99	9,08
Bihar and Orissa	...	...	...	...
Bombay	3,60	3,84	3,16	6,88
Sind	1,12	1,02	1,40	1,58
Madras	97	1,24	2,10	2,11
Burma	1,10	77	93	2,00
Total	11,78	11,53	14,58	21,60*

Under imports, Madras showed an increase of 28 per cent and Bombay of 7 per cent, while Burma showed a decrease of 30 per cent, Sind of 9 per cent, and Bengal of 7 per cent. Under exports, Bombay showed the largest increase of 116 per cent, Burma of 115 per cent, Bengal of 30 per cent, and Sind of 13 per cent. Madras showed no increase as compared with the preceding month.

Weekly Export Trade.

The course of the export trade of the chief ports during the last three months is shown below :—

		Calcutta†	Bombay‡	Karachi	Madras	Rangoon	Chittagong	Total
		₹ (lakhs)	₹ (lakhs)	₹ (lakhs)	₹ (lakhs)	₹ (lakhs)	₹ (lakhs)	₹(lakhs)
December	Week ending 4th	1,67	1,00	16	19	7	...	3,09
	„ 11th	1,86	1,43	14	19	15		3,77
	„ 18th	1,68	1,34	14	7	17		3,40
	„ 25th	1,21	1,38	22	3	6		2,90
	Total	6,42	5,15	66	48	45	...	13,16
January	Week ending 1st	1,28	81	65	...	16	15§	2,90
	„ 8th	2,20	1,53	39	8	20		4,40
	„ 15th	1,77	83	10	19	9		2,98
	„ 22nd	2,47	1,27	7	46	29		4,56
	„ 29th	2,95	1,24	43	11	24		4,97
	Total	10,67	5,68	1,64	84	98	15	19,96(a)
February	Week ending 5th	1,67	1,98	5	19	64	24§	4,53
	„ 12th	1,31	93	7	8	20		2,59
	„ 19th	2,90	1,48	2	20	45		5,05
	„ 26th	2,07	2,42	63	27	41		5,80
	Total	7,95	6,81	77	74	1,70	24	18,21(b)

In the week ending 26th February the trade was more brisk than in any other week of February. During the nineteen months of war, Calcutta has done over 50 per cent of the export trade, Bombay over 27 per cent, Karachi over 9 per cent, Rangoon nearly 7 per cent, and Madras 4 per cent.

Trade with the Allies and Neutral Countries.

The total trade with the allies and the more important neutral countries in the month of February 1916, as compared with January 1916, is noted below :—

	Imports			Exports			Total		
	January ₹ (lakhs)	February ₹ (lakhs)	+ or − ₹ (lakhs)	January ₹ (lakhs)	February ₹ (lakhs)	+ or − ₹ (lakhs)	January ₹(lakhs)	February ₹ (lakhs)	+ or − ₹ (lakhs)
United Kingdom	6,64	7,32	+68	4,70	6,89	+2,19	11,34	14,21	+2,87
Russia	4	...	−4	55	67	+12	59	67	+8
Belgium	3	2	−1	...	...	...	3	2	−1
France	15	19	+4	79	1,26	+47	94	1,45	+51
Italy	22	15	−7	54	1,01	+47	76	1,16	+40
Japan	81	69	−12	1,48	2,83	+1,35	2,29	3,52	+1,23
Sweden	9	9	...	...	...	...	9	9	...

United States of America	88	59	−29	2,13	2,26	+13	3,01	2,85	−16

* Includes ₹1,30,000, being the value of wheat exported on Government account from Bombay.
† Value of principal articles of Indian merchandise
‡ Represents value of articles entered for shipment and does not take into account short shipments
§ Weekly figures not available
(a) Inclusive of ₹15 lakhs, being the value of exports from Chittagong during the month of January
(b) „ ₹24 lakhs „ „ „ „ „ „ February

It will be observed that in February 1916, the total trade with the allies and the principal neutral countries, except the United States of America, increased. Imports from the United Kingdom increased by R68 lakhs, Spain by R10 lakhs, and France by R4 lakhs. Imports from the United States of America decreased by R29 lakhs, Japan by R12 lakhs, Italy by R7 lakhs, Norway by R2 lakhs, and Holland and Belgium by a lakh of rupees each. Under exports, the United Kingdom accounted for an increase of R2,19 lakhs, Japan of R1,35 lakhs, and France and Italy of R47 lakhs each. The United States of America showed an increase of R13 lakhs, Russia of R12 lakhs, and Spain of R14 lakhs. There were practically no exports to Belgium and Sweden, and no imports from Russia. These increases and decreases are with January 1916.

Balance of Trade.

India's Balance of Trade during February 1916, as compared with January 1916, is shown in the following table. The table takes into account the imports and exports of merchandise and treasure on private account only as well as the value of wheat exported on Government account. There were no exports of wheat on Government account during January 1916:—

	January 1916	February 1916
	R (lakhs)	R (lakhs)
Exports of Merchandise, including Re-exports*	14,58	21,60(c)
Imports „ *	11,78	11,53
Excess of Exports over Imports	2,80	10,07
Net Imports of Gold *	27	14
„ „ „ Silver*	61	44
Net imports of Treasure	88	58
Council bills and Telegraphic transfers paid in India	5,24	6,32·6
Sterling bills on London sold in India	...	...
Enfaced Rupee paper (net imports)	—2(a)	—12(a)
Interest on enfaced Rupee paper	1	2
	d.	d.
Rate of exchange	16·129	16.139(b)

The amount of Council Bills and Telegraphic Transfers paid in India in February 1916 was R6,32,67,000, of which R51,85,000 was paid through the Gold Standard Reserve, R3,77,09,000 through the Paper Currency Reserve and R2,03,73,000 through the Treasuries. In January 1916 the amount paid was R5,23,71,000, of which R3,50,48,000 was paid through the Paper Currency Reserve and R1,73,23,000 through the Treasuries. As regards enfaced rupee paper, R12,24,000 represented the amount of paper enfaced to London, and R10,500 the amount re-transferred from London in February 1916, while in January 1916, R3,31,900 represented the amount of paper enfaced to London and R1,28,400, the amount re-transferred from London.

Movements of Gold and Silver (Private and Government).

In the month of February 1916, the imports of gold were valued at R15 lakhs, and the exports at R1⅓ lakhs, as against R40 lakhs and R13 lakhs, respectively, in January 1916. Of the imports, gold bullion was valued at R12⅔ lakhs, as against R29½ lakhs in the preceding month, imported chiefly from the United Kingdom and Australia. Bullion worth R5¼ lakhs was imported from the United Kingdom, and over R6⅓ lakhs from Australia, as against R15⅓ lakhs and R11 lakhs, respectively, in January 1916. Sovereigns and other British gold coin were valued at about R2 lakhs, as against R7 lakhs in the preceding month. As regards exports, gold bullion worth R63,000 and sovereigns worth R69,000 were exported in the month of report, as against R1 lakh and R12 lakhs, respectively, in January 1916.

* Exclusive of Government transactions.

(a) Net exports.

(b) Up to 17th February 1916, figures for later weeks not being available.

(c) Includes R1,30,000 being the value of wheat exportd on Government account.

Imports of silver were valued at R53¼ lakhs, of which over R1½ lakhs were on account of Government, as against R69 lakhs on private and Government account in January 1916. Bullion worth R47 lakhs was imported, as against R66½ lakhs in January 1916. Exports of silver were valued at R14¼ lakhs, of which nearly R6¼ lakhs were on account of Government, as against R15½ lakhs, both on private and Government account, in the preceding month.

In the eleven months ended February 1916, the exports of gold were valued at R6,35 lakhs as against R3,04 lakhs in the corresponding period of 1914-15, and the exports of silver at R1,70 lakhs as against R1,84 lakhs last year.

Declared value per unit of selected Articles.

The declared values per unit of certain selected articles imported and exported during February 1915 and 1916 are noted below :—

		February.								February.					
		1915.			1916.					1915.			1916.		
Imports		R	A.	P.	R	A.	P.	*Exports*—contd.		R	A.	P.	R	A.	P.
Coal	ton	19	7	3	14	4	6	Indigo	cwt	566	6	3	560	11	6
Sugar, 16 D. S. and above	cwt	14	12	5	15	15	8	Rice not in the husk	,,	5	7	4	5	7	7
Cotton, twist and yarn	lb	0	12	6	1	2	5	Wheat	,,	7	8	1	6	9	9
,, grey piecegoods	yard	0	2	6	0	2	10	Manganese ore	ton	21	2	5	17	0	8
,, white ,,	,,	0	3	0	0	3	0	Tea	lb	0	8	5	0	9	0
,, coloured ,,	,,	0	3	5	0	4	0	Cotton, raw	cwt	21	13	4	33	9	1
Exports								Jute, raw	bale	40	5	2	52	11	0
Coal	ton	9	3	1	9	0	8	,, gunny bags	no.	0	4	3	0	3	9
Coffee	cwt	55	8	1	60	4	4	,, gunny cloth	yard	0	1	9	0	2	8

Under imports, the declared unit value of sugar, 16 D. S. and above, rose by 8 per cent, of cotton twist and yarn by 47 per cent, and of piecegoods, grey and coloured, by 13 per cent and 17 per cent, respectively. Coal fell by 27 per cent. The declared unit value of cotton white piecegoods was on the level of last year. Under exports, raw cotton showed an increase of 54 per cent, raw jute of 31 per cent, gunny cloth of 52 per cent, tea of 7 per cent, and coffee of 9 per cent. While manganese ore showed a decrease of 19 per cent, and wheat of 12 per cent, coal and indigo indicated a slight decrease in the declared value per unit, and rice, not in the husk showed a slight increase. These comparisons are with the corresponding month of the previous year.

Customs Revenue.

The following table shows the gross Indian sea customs revenue (excluding salt revenue) collected on principal and other articles in February 1916, as compared with January 1916, February 1915, and February 1914 :—

	February 1914	February 1915	January 1916	February 1916	Increase (+) or decrease (−) in February 1916, as compared with		
					January 1916	February 1915	February 1914
Import duty.	R (thousands)	R (thousands)	R (thousands)	R (thousands)	R (thousands)	R (thousands)	R (thousands)
Special duties—							
Liquors	12,35	12,83	11,91	12,55	+64	−28	+20
Petroleum	4,35	11,20	8,69	5,01	−3,68	−6,19	+66
Silver, bullion and coin	10,07	15,83	9,43	7,19	−2,24	−8,64	−2,88
Tobacco	2,14	3,09	2,95	3,33	+38	+24	+1,19
General duties—							
Sugar	5,13	3,62	5,44	5,67	+23	+2,05	+54
Cotton goods	14,49	7,83	12,74	13,80	+1,06	+5,97	−69
Metals excluding silver, but including hardware, etc.	6,37	2,44	2,76	2,81	+5	+37	−3,56
Other articles	16,37	12,58	16,43	16,52	+9	+3,94	+15
Total import duty	71,27	69,42	70,35	66,88	−3,47	−2,54	−4,39
Export duty on rice	19,34	9,06	6,34	11,32	+4,98	+2,26	−8,02

The customs duty figures are an index to the volume of the import trade only, as under exports rice alone was subject to duty in the month of report. In the eleven months, April to February, the import duties declined from R7,50 lakhs in 1914-15 to R6,64 lakhs in 1915-16, and the export

duty on rice from nearly R68½ lakhs to R60 lakhs. The total customs revenue, excluding salt, but including excise duty on cotton goods and land customs, in the first eleven months of 1915-16, amounted to about R7,74½ lakhs, as against R8,71¾ lakhs for the corresponding period of last year.

SHIPPING.

The following table shows the number and tonnage of vessels, which entered and cleared with cargoes at ports in British India during February 1916, as compared with January 1916, February 1915, and February 1914:—

Entered with cargoes.

	STEAMERS.		SAILING VESSELS.		TOTAL.	
	No.	Tons.	No.	Tons.	No.	Tons.
February 1916	161	335,803	78	5,751	239	341,554
January 1916	170	365,302	72	5,732	242	371,034
February 1915	151	303,084	65	5,006	216	308,090
February 1914	189	518,406	43	3,505	232	521,911
Cleared with cargoes.						
February 1916	244	487,403	174	14,262	418	501,665
January 1916	218	425,123	160	15,056	378	440,179
February 1915	204	441,899	128	10,966	332	452,865
February 1914	250	669,936	137	12,508	387	682,444

In the month of February, there were 239 arrivals* and 418 sailings† in and from India. For the last three months, there were 701 arrivals and 1,141 sailings, as against 710 arrivals and 993 sailings in the corresponding period of last year.

The great scarcity of freight at the present time is reflected in these tonnage figures. If a comparison be made with the corresponding month of 1914, before the war broke out, it will be seen that there is a decrease in tonnage of vessels cleared of 180,779 tons or 26 per cent. The clearances from Bengal showed an increase of 23 per cent; while those from Bombay a decrease of 40 per cent; Sind 62 per cent; Madras 37 per cent; and Burma 15 per cent. The decrease in entries amounted to 180,357 tons or 35 per cent.

The shipping clearances with cargoes in foreign trade from the ports of British India in the eleven months, April to February 1915-16 as compared with the corresponding period of 1913-14 before the war broke out, show the present position of the freight market:—

	TONNAGE CLEARANCES IN THE ELEVEN MONTHS, APRIL TO FEBRUARY	
	1913-14 Peace conditions.	1915-16 War conditions.
British ships	3,861,952	3,402,565
Foreign ships	3,530,473	1,900,649
TOTAL	7,392,425	5,303,214

Under war conditions, the total tonnage clearances have declined 28 per cent. Under peace conditions, the British tonnage was 52 per cent. and foreign tonnage 48 per cent, while under war conditions, the British tonnage is 64 per cent and foreign tonnage 36 per cent.

RAILWAY STATISTICS.

Railway statistics, like the import and export statistics above, are a valuable indication of the general movement of trade throughout the country, and show that the earnings from 1st April 1915 to 4th March 1916 were R58,36 lakhs as against R54,98 lakhs in the corresponding period of 1914-15 or an increase of R3,38 lakhs.

* The details were as follows:—Bengal 21, Bombay 66, Sind 32, Madras 95, and Burma 25.
† The details were as follows:—Bengal 53, Bombay 67, Sind 61, Madras 174, and Burma 68.

DEPARTMENT OF STATISTICS, INDIA } G. FINDLAY SHIRRAS,

IMPORTS INTO CHIEF PORTS DURING JANUARY 1916

RETURN SHOWING the QUANTITIES of the PRINCIPAL STAPLES of AGRICULTURAL PRODUCE IMPORTED into CALCUTTA, BOMBAY, KARACHI and MADRAS PORTS BY RAIL, RIVER and SEA during JANUARY 1916

DEPARTMENT OF STATISTICS, INDIA
March 24th, 1916

G. FINDLAY SHIRRAS,
Director of Statistics

Published by order of the Governor-General in Council

DEPARTMENT OF STATISTICS, INDIA.

TRADE FLUCTUATIONS IN SELECTED ARTICLES IN JANUARY 1916.

The object of the tables below is to show the quantities of the principal staples of agricultural produce imported from the various provinces, etc., and from foreign countries into the ports of Calcutta, Bombay, Karachi, and the Madras ports during the month of January 1916, and for the ten months April 1915 to January 1916, as compared with the corresponding periods of 1915. The statistics include foreign sea-borne and coasting trade as well as inland (rail and river-borne) trade. They have been furnished by Collectors of Customs, Steamer Companies, Railway Audit Officers, the Commissioners for the Port of Calcutta, etc.

TRADE FLUCTUATIONS IN JANUARY 1915 AND 1916.

It will be seen from Table I, that the imports by rail, river and sea in January 1916, as against the corresponding month of 1915 show (in round numbers) an increase of—

172 per cent in linseed.
(10,900 tons as against 4,000 tons last year.)

55 per cent in tea.
(22,923,100 lbs. as against 14,794,200 lbs. last year.)

53 per cent in raw cotton.
(604,700 bales as against 395,800 bales last year.)

12 per cent in gram and pulse.
(28,200 tons as against 25,200 tons last year.)

3 per cent in wheat (excluding wheat flour.)
(31,100 tons as against 30,200 tons last year.)

The imports of Jute by rail, river and sea into Calcutta show a fall of 52 per cent (376,100 bales as against 779,300 bales last year) due mainly to smaller exports from Bengal. The decrease of 5 per cent (8,000 tons as against 8,400 tons last year) in the imports of rape and mustard seed into ports is accounted for by smaller exports mainly from the Punjab. The fall of 4 per cent (124,200 tons as against 129,800 tons last year) in the imports of rice is mainly due to smaller exports from Burma.

NOTE.—400 lbs. are equivalent to 1 bale of cotton or jute.
82⅔ lbs are equivalent to 1 maund.
1 maund of paddy is taken as equivalent to 25 seers of rice.

It will be seen from Table IV (wheat, excluding wheat flour) that the principal sources of the imports in January 1915 were the Punjab, and the United Provinces. Table XI shows the *exports* out of India of wheat (including wheat flour) month by month during the last four years.

TRADE FLUCTUATIONS IN TEN MONTHS ENDING JANUARY 1915 AND 1916.

The ten months' figures in table I show (in round numbers) an increase of—

33 per cent in jute.
(4,983,900 bales as against 3,747,800 bales last year.)

30 per cent in raw cotton.
(3,163,900 bales as against 2,426,900 bales last year.)

21 per cent in gram and pulse.
(357,900 tons as against 295,100 tons last year.)

12 per cent in tea.
(267,795,700 lbs. as against 239,616,300 lbs. last year.)

8 per cent in rice.
(1,148,400 tons as against 1,062,100 tons last year.)

Imports of linseed into ports show a decrease, of 26 per cent (191,400 tons as against 258,700 tons last year) mainly on account of smaller exports from Bihar and Orissa and Bengal. The fall of 1 per cent (993,500 tons as against 1,006,500 tons last year) in the imports of wheat (excluding wheat flour) is due principally to smaller exports from the Punjab to Karachi.

TRADE FLUCTUATIONS IN JANUARY 1916 AS COMPARED WITH THE PREVIOUS MONTH.

As compared with December 1915, the imports in January 1916 into the ports referred to above show (in round numbers) an increase of—

83 per cent in rice.
(124,200 tons as against 67,700 tons previous month.)

30 per cent in raw cotton.
(604,700 bales as against 465,700 bales previous month.)

6 per cent in wheat (excluding wheat-flour).
(31,100 tons as against 29,500 tons previous month.)

and a decrease of—

24 per cent in rape and mustard seed.
(8,000 tons as against 10,400 tons previous month.)

23 per cent in linseed.
(10,900 tons as against 14,200 tons previous month.)

21 per cent in tea.
(22,923,100 lbs as against 29,093,500 lbs previous month.)

17 per cent in jute.
(376,100 bales as against 455,500 bales previous month.)

The Statistics for January 1915 and 1916, as also for the ten months ending 31st January 1915 and 1916, together with those for December 1915 and January 1916 are summarised below :—

SUMMARY TABLE I.

(1) Articles	(2) Imports, January 1915	(3) Imports, January 1916	(4) Imports, April 1914 to January 1915	(5) Imports, April 1915 to January 1916	(6) Increase (+) or decrease (—) of imports in January 1916 as compared with January 1915	(7) Increase (+) or decrease (—) of imports in ten months, April 1915 to January 1916 as compared with ten months, April 1914 to January 1915

TABLE XI.

The following statements show the exports of (1) wheat, (2) wheat flour and (3) Total (wheat and wheat flour) from British India by sea to foreign countries during each month of the four official years 1911-12, 1912-13, 1913-14 and 1914-15. The figures are in thousands of tons :—

1.—Wheat.

Months.	1911-12 000's of tons.	1912-13 000's of tons.	1913-14 000's of tons.	1914-15 000's of tons.	1915-16 000's of tons.
April	68	69	27	9	11
May	136	107	166	24	105 (a)
June	189	244	260	169	292 (a)
July	266	328	318	169	187 (a)
August	125	153	135	43	48 (a)
September	66	232	135	56	6 (a)
October	66	148	53	88	...
November	74	114	47	55	...
December	97	80	22	37	... (b)
January	102	99	20	25	...
February	75	51	10	22	...
March	97	35	9	9	
TOTAL	1,361	1,660	1,202	706	
	1910-11	1911-12	1912-13	1913-14	1914-15
Production (in thousands of tons)	10,061	9,924	9,853	8,358	10,269

NOTE.—In this statement the figures of production for one year have been placed below those of exports of the next year because the production of one year is usually exported in the next year.

(a) Include exports on Government account 91,357 tons in May, 249,952 tons in June, 150,295 tons in July 36,483 tons in August and 2,375 tons in September 1915.

(b) Exports were below 1,000 tons in these months.

2.—Wheat flour.

Months.	1911-12 000's of tons.	1912-13 000's of tons.	1913-14 000's of tons.	1914-15 000's of tons.	1915-16 000's of tons.
April	4	4	6	6	4
May	4	4	9	3	2
June	4	6	10	5	4
July	5	5	8	8	6
August	6	6	4	6	4
September	6	5	7	4	6
October	4	9	9	4	4
November	3	5	6	4	7
December	4	6	4	3	3
January	5	7	6	5	9
February	4	5	4	4	4
March	3	6	6	2	
TOTAL	52	68	79	54	

3.—Total (wheat including wheat flour converted into wheat).†

Government of India Notifications, Appointments, Promotions, etc.

MILITARY SECRETARY'S OFFICE.

NOTIFICATIONS.

Delhi, the 18th March 1916.

No. 1248-M.—His Excellency the Viceroy and Governor General will leave Delhi at 6-15 P.M. on Friday, the 31st March 1916. His Excellency's departure will be public.

His Excellency the Commander-in-Chief in India and Staff, the Members of the Governor General's Executive Council and all the principal Civil and Military Officers in Delhi will be in attendance at Viceregal Lodge by 5-15 P.M. Ladies and gentlemen on the Government House list desirous of attending are also invited to be present at the same hour.

Guards of Honour of British and Indian Infantry will be drawn up at Viceregal Lodge.

His Excellency will be escorted to the Station by a Battery of Royal Horse Artillery, a Territorial Battery, His Excellency the Governor General's Body Guard and a Regiment of Indian Cavalry. The route will be *vid* the Flagstaff Tower, Flagstaff Road, Alipore Road, Kashmir Gate, Lothian Road and Queen's Road and will be lined by troops from the main gate of Viceregal Lodge to the Flagstaff Tower under the orders of the General Officer Commanding at Delhi.

The Chief Commissioner, Delhi Province, the General Officer Commanding at Delhi and Staff, the Deputy Commissioner, Delhi, and the Senior Superintendent of Police, Delhi, will be in attendance at the Delhi Main Station.

A Guard of Honour of Volunteers will be drawn up on the platform.

A Royal salute will be fired as the Special train moves out of the Station.

Levee dress (cloth) will be worn by Civil and Review Order (Summer clothing) by Military officers. Gentlemen not entitled to wear uniform will appear in Morning Dress.

The Viceroy will arrive at Bombay on the morning of the 2nd April, His Excellency's arrival being private.

The party accompanying His Excellency will be :—

The Hon'ble Diamond Hardinge
Sir James DuBoulay, K.C.I.E., I.C.S., Private Secretary.
Lt.-Colonel F. A. Maxwell, V.C., C.S.I., D.S.O., Military Secretary.
Captain W. A. Brown, A.-D.-C.
Captain the Hon'ble A. Hardinge, A.-D.-C.

All communications intended to reach His Excellency the Viceroy and party should be addressed to "Viceroy's Camp" without the addition of any post town; all others to the headquarters of the several departments at Delhi.

No. 1249-M.—His Excellency the Viceroy and Governor General will arrive at Delhi at 7-30 A.M. on Thursday, the 6th April 1916. His Excellency's arrival will be public.

A Royal salute will be fired as the Special train arrives at the Station.

The Chief Commissioner, Delhi Province, the General Officer Commanding at Delhi and Staff, the Deputy Commissioner, Delhi, and the Senior Superintendent of Police, Delhi, will receive His Excellency at the Delhi Main Station.

A Guard of Honour of Volunteers will be drawn up on the platform.

His Excellency will be escorted to Viceregal Lodge by a Battery of Royal Horse Artillery, a Territorial Battery, the Governor General's Body Guard and a Regiment of Indian Cavalry. The route will be *vid* Queen's Road, Lothian Road, Kashmir Gate, Alipore Road, Flagstaff Road and the Flagstaff Tower and will be lined by troops from the Flagstaff Tower to the main gate of Viceregal Lodge under the orders of the General Officer Commanding at Delhi.

His Excellency is due to arrive at Viceregal Lodge at about 8 A.M., and will be received there by His Excellency the Commander-in-Chief in India and Staff, the Members of the Governor General's Executive Council and all the principal Civil and Military officers in Delhi. Ladies and gentlemen on the Government House list desirous of attending are also invited to be present at Viceregal Lodge by 7-45 A.M.

Guards of Honour of British and Indian Infantry will be drawn up at Viceregal Lodge.

Levee dress (cloth) will be worn by Civil and Review Order (Summer clothing) by Military officers. Gentlemen not entitled to wear uniform will appear in Morning Dress.

By Command,
F. A. MAXWELL, *Lieut.-Colonel,*
Military Secretary to the Viceroy.

LEGISLATIVE DEPARTMENT.

NOTIFICATION.

Delhi, the 20th March, 1916.

No. 18.—Whereas by Regulation passed by the Secretary of State for India in Council on the fifth day of October, 1871, the provisions of section 1 of the Government of India Act, 1870 (33 and 34 Vict., c. 3), were declared applicable to the Hill District of Arakan.

And whereas the Lieutenant-Governor of Burma has proposed to the Governor General in Council a draft of the following Regulation, together with the reasons for proposing the same;

And whereas the Governor General in Council has taken the draft and reasons into consideration, and has approved of the draft and the same has received the assent of the Governor General on the 16th day of March, 1916.

In pursuance of the direction contained in section 71 (2) of the Government of India Act, 1915, the said Regulation is now published in the Gazette of India and will be published in the Burma Gazette.

REGULATION No. I OF 1916.

A Regulation to declare and amend the Law applicable in the Hill District of Arakan.

WHEREAS it is expedient to declare and amend the law applicable in the Hill District of Arakan; It is hereby enacted as follows:—

Short title and extent.

1. (*1*) This Regulation may be called the Arakan Hill District Laws Regulation, 1916; and

(*2*) It extends to the Hill District of Arakan.

Acts and Regulations in Force.

Laws in force in the Hill District of Arakan.

2. (*1*) So much of each of the enactments specified in Schedule I as is in force in the territories to which the enactment generally applies, shall be deemed to be in force in the Hill District of Arakan subject to the restrictions and modifications, if any, therein stated, and to any amendments to which the enactments are for the time being subject in the territories to which they generally apply:

Provided that, notwithstanding anything in the Indian Arms Act, 1878, or in any rule under that Act, no license to manufacture or deal in arms or ammunition shall be granted without the express sanction of the Local Government. 878.

(*2*) An enactment not comprised in Schedule I shall not be deemed to be or to have been in force in the Hill District of Arakan or in any part thereof, unless it is expressed by special mention to extend thereto or, after the commencement of this Regulation, is extended thereto under the powers conferred by sub-section (*3*).

(*3*) The Local Government, subject to the control of the Governor General in Council, may, by notification in the Burma Gazette, extend, with such restrictions and modifications as it thinks fit, to the Hill District of Arakan or any part thereof, any enactment which is in force in any part of Lower Burma at the date of the extension.

(*4*) The Local Government, subject to the control of the Governor General in Council, may, by notification in the Burma Gazette, declare that any enactment, which is comprised in Schedule I or which may, after the commencement of this Regulation, be extended to the Hill District of Arakan, shall no longer be in force in the Hill District of Arakan or any part thereof specified in the notification.

(*5*) The Local Government, subject to the control of the Governor General in Council, may, by notification in the Burma Gazette, declare what area constitutes the Hill District of Arakan for the purpose of this Regulation.

Construction of enactments.

3. For the purposes of facilitating the application of any enactment for the time being in force in the Hill District of Arakan, a Court may construe the enactment with such alterations not affecting the substance as may be necessary or proper to adapt it to the matter before the Court.

Functions of High Court to be discharged by Commissioner.

4. The functions of the High Court in all civil and miscellaneous matters shall be discharged by the Commissioner of the Arakan Division.

Assessment and Collection of Thathameda-tax.

Thathameda-tax.

5. Subject to the provisions of this Regulation, thathameda-tax shall be leviable at such average rate per household or family as the Local Government may, by notification in the Burma Gazette, direct.

Power to vary.

6. The average rate at which thathameda-tax is to be levied may vary from place to place or by races or classes of the community as the Local Government, having regard to local circumstances, may deem expedient.

Liability to pay.

7. The residents of any town or village, or, if the Commissioner so directs, the residents of any part of a town or village, or the persons belonging to any race or class in a town or village, shall be jointly and severally liable for the whole of the thathameda-tax leviable upon such residents or members of such community, respectively.

To be deemed Land-revenue.

8. For the purpose of the Revenue Recovery Act, 1890, thathameda-tax shall be deemed Land-revenue.

Exemption.

9. The Local Government may, by notification in the Burma Gazette, exempt any household or family, or any class of households or families or the residents of any particular locality, from the payment of thathameda-tax.

Power to make rules.

10. (*1*) The Local Government may make rules—

(*i*) for the assessment, demand and collection of thathameda-tax;

(*ii*) for the recovery of arrears of thathameda-tax;

(*iii*) for the recovery within the Hill District of Arakan of arrears of land-revenue or of any sum recoverable as such whether the same falls due within or without the district; and

(*iv*) generally, for carrying into effect the purposes of sections 5, 6 and 7.

(*2*) All such rules shall be published in the Burma Gazette, and shall thereupon have the same effect as if enacted by this Regulation.

Exemption of certain villages and tribes from taxation.

11. Nothing contained in section 5 shall authorise the imposition of thathameda-tax in any village or upon the members of any tribe which has hitherto been treated as exempt from all taxation.

Miscellaneous.

Boatmen to declare contents of boats.

12. Boatmen proceeding up the river Kuladan shall declare the contents of their boats at Kuladan to such official there as the Deputy Commissioner may, from time to time, by a written order affixed to the jetty and on the walls of the Court-house at that station, appoint in this behalf.

Power to search and seize spirits, etc., unprotected by pass.

13. (*1*) The official thus appointed may search any boat proceeding up the said river whenever he sees reasonable grounds for doing so, and may seize all spirit manufactured out of the district, opium, ganja, ammunition and arms not protected by a pass from the Deputy Commissioner, which he may find therein.

(*2*) Any articles so seized may be confiscated by order of the Deputy Commissioner, or of an Assistant or Extra Assistant Commissioner.

(3) The order passed in every such case, and the grounds thereof, shall be recorded by the officer passing it.

14. The head boatman of every boat in which any of the articles mentioned in the last preceding section is carried without a pass, shall be liable to a fine not exceeding one hundred rupees, or, in default of payment, to fifteen days' simple imprisonment.

Penalty for carrying prohibited articles.

15. The enactments mentioned in Schedule II are repealed to the extent mentioned in the fourth column thereof.

Repeal of enactments.

J. B. WOOD,
Secretary to the Government of India.

Simla, the 22nd March 1916.

No. 472-Est. B.—The following revised rules for the examination of officers serving in Baluchistan, in the Pushtu and Baluchi languages, which have received the sanction of His Majesty's Secretary of State for India, are hereby published for general information. These revised rules will take effect from the date of this notification in supersession of all existing rules.

Rules for the examination of officers serving in Baluchistan in the Pushtu and Baluchi languages.

1. The following officers will be required to pass an examination according to the standard prescribed in Appendix A or C to these rules in Pushtu or Baluchi :—

(*a*) Officers of the Political Department of the Government of India serving in Baluchistan, whose substantive pay does not amount to Rs. 1,500 a month.

(*b*) European and Eurasian Extra Assistant Commissioners.

(*c*) Superintendents of Police and European and Eurasian Assistant and Deputy Superintendents of Police.

(*d*) Executive and Assistant Engineers and temporary Engineers of the Canal Department.

(*e*) Military Officers serving with the Frontier Militia or Levy Corps

(*f*) Officers of the Indian Medical Service holding the appointments of whole-time Civil Surgeons.

2. The prevailing vernacular of the various districts shall, for the purpose of these rules, be considered to be as shown below :—

Quetta-Pishin Zhob Loralai	Pushtu.
Sibi Kalat (including Mekran and Kharan) Chagai	Baluchi.

3. (*a*) The Officers mentioned in rule 1 (*a*) will ordinarily be required to pass, in the first instance, in the vernacular of the district to which they are first posted, within two years from the date of being posted to that district.

(*b*) An officer transferred within two years to a district the vernacular of which is not the same, may pass in either language, whichever he may elect, provided he shall pass one or the other within two years.

(*c*) The Agent to the Governor-General and Chief Commissioner may, for special reasons to be recorded, exempt an officer who has passed in one compulsory language from passing in the other on transfer to another district.

4. The officers mentioned in rule 1 (*a*) who fail to pass an examination as prescribed in rule 3 will be liable to be passed over for promotion until they do pass the examination.

5. The officers mentioned in rule 1 who have passed the examination prescribed in rule 3 will be entitled to receive the following allowances while serving in Baluchistan.

(*a*) The officers mentioned in rule 1 (*a*), (*b*), (*d*), (*e*) and (*f*), an allowance of Rs. 100 a month so long as their substantive pay does not amount to Rs. 1,500 a month.

(*b*) Superintendents or Officiating Superintendents of Police, an allowance of Rs. 100 a month; permanent or officiating European and Eurasian Assistant and Deputy Superintendents of Police Rs. 50 a month.

6. Officers mentioned in rule 1 who have passed in one of the two languages will, on passing the second language, be entitled, in addition to the prescribed monthly allowance already earned, to a reward of Rs. 1,000 in case the second language is Pusthu or to a reward of Rs. 500 in the case of Baluchi.

7. The following officers serving in Baluchistan may, with the previous permission of the Agent to the Governor-General and Chief Commissioner, present themselves for examination in either or both the languages :—

(*a*) Officers of the Political Department of the Government of India whose substantive pay amounts to Rs. 1,500 a month or more.

(*b*) The Superintendent, Civil Veterinary Department, Sind, Baluchistan and Rajputana; the Residency Surgeon and Chief Medical Officer in Baluchistan, and the Secretary to the Agent to the Governor-General and Chief Commissioner in the Public Works Department in Baluchistan.

(*c*) Cantonment Magistrates and Assistant Cantonment Magistrate, Quetta.

(*d*) All executive officers of the Military Works Services whether engaged on Military or Civil Works.

(*e*) Chaplains.

8. On passing the examinations, the officers mentioned in rule 7 (*a*), (*b*) and (*c*) will be entitled to a reward of Rs. 1,000 in the case of Pushtu, and to a reward of Rs. 500 in the case of Baluchi. Both rewards admissible under this rule, *i.e.*, the reward of Rs. 1,000 for Pushtu, and the reward of Rs. 500 for Baluchi, may be earned by the same officer. The officers mentioned in rule 7 (*d* will be entitled to the following:—

(1) For passing in Pushtu, an allowance of Rs. 100 per month, while serving in Baluchistan (provided their substantive pay does not amount to Rs. 1,500 per month) or the reward of Rs. 800 admissible under paragraph 376, A. R., I., Vol. I, but not to both.

(2) For passing in Baluchi the reward of Rs. 500 admissible under paragraph 376, A. R., I., Vol. I, only.

8(*a*). Chaplains, on passing the examination prescribed by rules, will be entitled to a reward of Rs. 800 for Pushtu or Rs. 500 for Baluchi, and not to the monthly allowance.

9. Permanent or officiating (1) Native Extra Assistant Commissioners, (2) Native Assistants, (3) Superintendent of the office of the Agent to the Governor-General and Chief Commissioner in Baluchistan, (4) Superintendent and Registrar of the office of the Revenue and Judicial Commissioner in Baluchistan, (5) Native Deputy Superintendents of Police, (6) Munsifs, (7) Tahsildars and (8) Naib Tahsildars, and permanent (*a*) Assistant Surgeons and Sub-Assistant Surgeons in civil employ, (*b*) Inspectors and Sub-Inspectors of Police, (*c*) Subordinates of the Public Works Department and Military Works Services of the rank of Sub-Overseer and upwards, and (*d*) Veterinary Inspectors or Graduates, serving in Baluchistan and not being by birth, domicile or education natives of districts in which the language is commonly spoken will be permitted to present themselves for examination in Pushtu or in Baluchi according to Appendix B or D to these rules.

Officers of the classes mentioned above who have passed in one language may, with the previous sanction of the Head of their office or Department, present themselves for examination in the other language.

Note.—The words "Extra Assistant Commissioners, Tahsildars, Naib Tahsildars and officiating Tahsildars and Naib Tahsildars" include officers serving in the Settlement Department, the Revenue Assistant to the Revenue Commissioner and the Personal Native Assistant to the Agent to the Governor-General and Chief Commissioner in Baluchistan as well as those in the regular line.

10. On passing the examination in Pushtu or Baluchi permanent or officiating (1) Native Extra Assistant Commissioners, (2) Native Assistants, (3) Superintendent of the office of the Agent to the Governor-General and Chief Commissioner in Baluchistan, (4) Superintendent and Registrar of the office of the Revenue and Judicial Commissioner in Baluchistan, (5) Native Deputy Superintendents of Police and (6) Canal Upper Subordinates in sub-divisional charge will be entitled to a reward of Rs. 500; and officers of the other classes enumerated in rule 9, except Sub-Assistant Surgeons in civil employ, to a reward of Rs. 200 provided that those who are only officiating in these appointments will not receive the reward till they are confirmed. Sub-Assistant Surgeons on passing the examination will be entitled to draw language allowance at the rate of Rs. 5 per mensem for so long as they remain stationed in Baluchistan. Those officers who have to leave their districts to attend the examinations will also receive travelling allowance, if they succeed in passing the examinations.

Both the rewards, or, in the case of Sub-Assistant Surgeons, allowances for Pushtu and Baluchi, may be earned by the same officer.

11. (*a*) Military Officers, other than those mentioned in rules 1 and 7, may appear at an examination according to Appendix A or C to these rules with the sanction of the authority to which they are subordinate, and will, on passing, receive the reward laid down in paragraph 376, A. R., I., Vol. I.

(*b*) Civil Officers serving in Provinces other than Baluchistan or Departments other than those mentioned in rules 1, 7 and 9, may appear at an examination according to Appendix A, B, C or D to these rules, as the case may be, with the sanction of the authority to which they are subordinate.

(*c*) Other persons with the special permission of, and subject to any conditions as to fees or other matters that may be laid down by the Agent to the Governor-General and Chief Commissioner, may also be admitted to an examination under these rules.

12. The following officers who have passed an examination according to Appendix A, B, C or D to these rules, as the case may be, or an equivalent examination, while serving in other provinces shall, on appointment to a locality where the allowance is admissible, be entitled to the following allowances and rewards:—

(*a*) The officers mentioned in rule 1 (*a*), (*b*), (*c*), (*d*), (*e*) and (*f*), to the allowances specified in rule 5 and to the reward mentioned in rule 6, provided they have not already received such reward.

(*b*) The officers mentioned in rule 7 (*a*), (*b*) and (*c*) and rule 9, to the rewards to which they would have been entitled under rule 8 or 10, as the case may be, had they passed the examination when serving in Baluchistan, provided that they have not already received such rewards.

(*c*) The officers mentioned in rule 7 (*d*), to the allowance to which they would have been entitled under rule 8 had they passed the examination while serving in Baluchistan or to the reward admissible under paragraph 376, A. R., I., Vol. I, provided that they have not already received such reward, but in the event of their having already received such reward outside Baluchistan or in Baluchistan previous to the date of this notification, they may be permitted to refund the reward and draw the allowance under rule 8. This refund being made by foregoing the monthly allowance for the requisite number of months.

APPENDIX A.

(PUSHTU—HIGHER STANDARD.)

I. The following are prescribed as text books for the examination :—

(1) Ganj-i-Pakhtu . . . . . } As given in the Kalid-i-Afghani.
(2) Tarikh-i-Mahmud-i-Ghaznavi . . . }

II. The following are the subjects of the examination and the marks allotted to each :—

First day.

Examination in the colloquial consisting of—

	Marks.
(*a*) Translation *viva voce* and with readiness a paper of conversational sentences	100
(*b*) Conversation with a native of the country with fluency and such correctness of grammar, idiom and pronunciation as to be at once intelligible	100

Second day.

(*c*) A written translation of a passage in narrative or historic style from English into Pushtu	100
(*d*) Reading and construing portions of the text books . .	100

Candidates who fail in either of the colloquial tests on the first day will be liable to be excluded from the examination on the second day.

III. No candidate will be held to have passed the examination who does not obtain half marks on the whole, at least 50 marks in the conversational sentences [subject (*a*)], and at least 50 marks in the conversation with a native [subject (*b*)]. No candidate will be held to have passed with credit who does not obtain at least 65 marks in each of the four subjects, and at least 300 in the total. The object of Government is to ensure a good colloquial knowledge of the language, and consequently no officer will be considered to have passed the examination, however thorough his grammatical knowledge may be, unless he is able to converse fluently with the people.

IV. Examinations will, unless otherwise ordered, be held at Quetta twice a year, on the first Monday in April and on the last Monday in October and the following days. In very special circumstances the Agent to the Governor-General and Chief Commissioner in Baluchistan may order special examination to be held on a date or at a place other than the dates or the place mentioned in this rule.

V. All officers in Civil and Military employ, who may wish to attend the Pushtu examination, must forward their applications, through their superior officers, to the Agent to the Governor-General and Chief Commissioner, Baluchistan, not less than a month before the time fixed for the examination.

VI. For the conduct of these half-yearly examinations the Agent to the Governor-General and Chief Commissioner in Baluchistan will appoint a Committee to assemble at Quetta, consisting of a President and not less than two members, one of whom shall be a native whose vernacular language is Pushtu.

VII. Officers who are in receipt of a monthly allowance for having passed this examination, or who are otherwise eligible for the allowance, but are debarred from drawing it because their substantive pay amounts to Rs. 1,500 a month or more, shall, when available, be employed as examiners for the conduct of this examination and of the examination according to Appendix B, and shall not be entitled to any remuneration in respect of such examinations. When such officers are not available, other duly qualified persons, whether officials or non-officials, may be employed and shall be entitled to rewards at the following rates :—

European Examiner.

A minimum honorarium of Rs.100, and, when the number of candidates for examination exceeds ten, an additional honorarium of Rs. 10 for each candidate in excess of that number.

Native Examiner.

A minimum honorarium of Rs 50, and, when the number of candidates for examination exceeds ten, an additional honorarium of Rs. 6 for each candidate in excess of that number.

VIII. The Committee shall set the papers and shall report the results of the examinations to the Agent to the Governor-General and Chief Commissioner in Baluchistan for publication in the *Gazette of India*.

APPENDIX B.

(PUSHTU—SPECIAL TEST.)

I. The examination will ordinarily be conducted at Quetta on or about the dates fixed for examinations in Pushtu by the Higher Standard, *viz.*, on the first Monday of April and the last Monday in October. The Committee shall consist of the Political Agent, or such other Civil officer as the Revenue Commissioner may appoint, as President, and two members, one of whom shall be a native whose vernacular language is Pushtu. The other may be a Gazetted Officer serving under the orders of the Local Administration.

II. Candidates desiring to attend the examination must forward their applications through their District Officers to the Revenue Commissioner not less than two months before the date fixed for the examination. Each application should be accompanied by a certificate from the District Officer under whom the applicant is serving certifying to the eligibility of the latter by birth, education and otherwise to the reward on passing the examination. The names of candidates will be communicated to the President of the Committee by the Revenue Commissioner.

III. In the event of it being found inconvenient to allow candidates from outlying districts to proceed to Quetta, the Revenue Commissioner will arrange for their examination at such place and on such date as may appear convenient to him. The Committee so appointed should, however, be composed as prescribed in rule 1.

IV. Candidates will only be examined in colloquial Pushtu, but the examination must be a searching one.

V. The following are the subjects of examination and the marks allotted to each :—

	Marks.
(*a*) Translating *viva voce* and with readiness a paper of conversational sentences read out by one of the examiners	100
(*b*) Conversation with a native of the country with fluency and such accuracy of grammar and pronunciation and idiom as to be at once intelligible .	100
Total .	200

In order to pass the examination, candidates must obtain half marks in each subject.

VI. At the close of the examination, the President of the Committee will report the results of the examination, with the marks obtained by the candidates, to the Revenue Commissioner, who will communicate the same to the Agent to the Governor-General and Chief Commissioner.

VII. Officers who are in receipt of a monthly allowance for having passed the examination according to Appendix A, or who are otherwise eligible for the allowance but are debarred from drawing it because their substantive pay amounts to Rs. 1,500 a month or more, shall, when available, be employed as examiners for the conduct of this examination and shall not be entitled to any remuneration in respect of such examination. When such officers are not available, other duly qualified persons, whether officials or non-officials, may be employed and shall be entitled to rewards at the following rates :—

European Examiner	Rs. 10 per candidate.
Native Examiner	Rs. 6 per candidate.

APPENDIX C.

(BALUCHI—HIGHER STANDARD.)

I. The following are prescribed as text books for the examination :—

(*a*) Dames' "Text Book of the Baluchi language."
(*b*) Hitlu Ram's "Baluchi Nama" as translated and transliterated by J. M. Dunia.

II. The following are the subjects of the examination and the marks allotted to each :—

First day.

	Marks.
(*a*) Translation *viva voce* and with readiness of a paper of conversational sentences read out by one of the examiners, English into Baluchi	200
(*b*) Conversation with Baluchis or the examiners with fluency and such correctness of grammar, idiom and pronunciation as to be at once intelligible	200

Second day.

(*c*) A written translations of a passage in narrative or historic style from English into Baluchi	100
(*d*) Reading and construing portions of the text books . .	100
Total .	600

Candidates who fail in either of the colloquial tests on the first day will be liable to be excluded from the examination on the second day.

III. No candidate will be held to have passed the examination who does not obtain half marks on the whole at least half marks in the conversational sentences [subject (*a*)] and half marks in the conversation [subject (*b*)]. No candidate will be held to have passed with credit who does not obtain at least three-fourths of the maximum marks. The object of Government is to ensure a good colloquial knowledge of the language, and consequently no officer will be considered to have passed the examination, however thorough his grammatical knowledge may be, unless he is able to converse fluently with the people.

IV. Examination will ordinarily be held at Quetta twice a year, on the last Monday in April and on the first Monday in November and the following days. In very special circumstances the Agent to the Governor-General and Chief Commissioner in Baluchistan may order a special examination to be held on a date or at a place other than the dates or the place mentioned in this rule.

V. All officers in Civil and Military employ, who may wish to attend the Baluchi examination, must forward their applications, through their superior officers, to the Agent to the Governor-General and Chief Commissioner, Baluchistan, not less than a month before the time fixed for the examination.

VI. For the conduct of the half-yearly examinations the Agent to the Governor-General and Chief Commissioner in Baluchistan will appoint a Committee to assemble at Quetta, consisting of a President and not less than two members, one of whom shall be a native whose vernacular language is Baluchi.

VII. Officers who are in receipt of a monthly allowance for having passed this examination, or who are otherwise eligible for the allowance, but are debarred from drawing it because their substantive pay amounts to Rs. 1,500 a month or more, shall, when available, be employed as examiners for the conduct of this examination and of the examination according to Appendix D, and shall not be entitled to any remuneration in respect of such examinations. When such officers are not available, other duly qualified persons, whether officials or non-officials, may be employed and shall be entitled to rewards at the following rates :—

European Examiner.

A minimum honorarium of Rs. 100, and, when the number of candidates for examination exceeds ten, an additional honorarium of Rs. 10 for each candidate in excess of that number.

Native Examiner.

A minimum honorarium of Rs. 50, and, when the number of candidates for examination exceeds ten, an additional honorarium of Rs. 6 for each candidate in excess of that number.

VIII. The Committee shall set the papers and shall report the results of the examinations to the Agent to the Governor-General and Chief Commissioner in Baluchistan, for publication in the *Gazette of India*.

APPENDIX D.

(BALUCHI—SPECIAL TEST.)

I. The examination will ordinarily be conducted at Quetta on or about the dates fixed for examinations in Baluchi by the Higher Standard, *viz.*, on the last Monday of April and the first Monday in November. The Committee shall consist of the Political Agent, or such other Civil officer as the Revenue Commissioner may appoint, as President, and two members, one of whom shall be a native whose vernacular language is Baluchi. The other may be a Gazetted Officer serving under the orders of the Local Administration.

II. Candidates desiring to attend the examination must forward their applications, through their District Officers, to the Revenue Commissioner not less than two months before the date fixed for the examination. Each application should be accompanied by a certificate from the District Officer under whom the applicant is serving certifying to the eligibility of the latter by birth, education and otherwise to the reward on passing the examination. The names of candidates will be communicated to the President of the Committee by the Revenue Commissioner.

III. In the event of it being found inconvenient to allow candidates from outlying districts to proceed to Quetta, the Revenue Commissioner will arrange for their examination at such place and on such date as may appear convenient to him. The Committee so appointed should, however, be composed as prescribed in rule I.

IV. Candidates will only be examined in colloquial Baluchi, but the examination must be a searching one.

V. The following are the subjects of examination and the marks allotted to each :—

	Marks.
(*a*) Reading and construing portions of Hittu Ram's "Baluchi Nama" . . .	100
(*b*) Translating *viva voce* and with readiness a paper of conversational sentences read out by one of the examiners	100
(*c*) Conversation with a native of the country with fluency and such accuracy of grammar and pronunciation and idiom as to be at once intelligible . .	100
Total .	300

In order to pass the examination, candidates must obtain half marks in each subject.

VI. At the close of the examination, the President of the Committee will report the results of the examination, with the marks obtained by the candidates, to the Revenue Commissioner, who will communicate the same to the Agent to the Governor-General and Chief Commissioner.

VII. Officers who are in receipt of a monthly allowance for having passed the examination according to Appendix C, or who are otherwise eligible for the allowance but are debarred from drawing it because their substantive pay amounts to Rs. 1,500 a month or more, shall, when available, be employed as examiners for the conduct of this examination and shall not be entitled to any remuneration in respect of such examination. When such officers are not available, other duly qualified persons, whether officials or non-officials, may be employed and shall be entitled to rewards at the following rates :—

European Examiner	Rs. 10 per candidate.
Native Examiner	Rs. 6 „ „

J. B. BRUNYATE,
Secretary to the Government of India.

DEPARTMENT OF COMMERCE AND INDUSTRY.

NOTIFICATIONS.

CUSTOMS.

Delhi, the 25th March 1916.

No. 2343-W.—The following Order in Council is published for general information :—

AT THE COUNCIL CHAMBER, WHITEHALL,

The 23rd day of February 1916.

BY THE LORDS OF HIS MAJESTY'S MOST HONOURABLE PRIVY COUNCIL.

WHEREAS it is provided by Section 2 of the Customs (Exportation Prohibition) Act, 1914, that any Proclamation or Order in Council made under Section 8 of the Customs and Inland Revenue Act, 1879, as amended by the Act now in recital, may, whilst a state of war exists, be varied or added to by an Order made by the Lords of the Council on the recommendation of the Board of Trade :

And whereas it is provided by Section 2 of the Customs (Exportation Restriction) Act, 1914, that any Proclamation made under Section 1 of the Exportation of Arms Act, 1900, may, whether the Proclamation was made before or after the passing of the Act now in recital, be varied or added to, whilst a state war exists, by an Order made by the Lords of the Council on the recommendation of the Board of Trade :

And whereas by a Proclamation, dated the 28th day of July 1915, and made under Section 8 of the Customs and Inland Revenue Act, 1879, and Section 1 of the Exportation of Arms Act, 1900, and Section 1 of the Customs (Exportation Prohibition) Act, 1914, the exportation from the United Kingdom of certain articles to certain or all destinations was prohibited :

And whereas by subsequent Orders of Council the said Proclamation was amended and added to in certain particulars :

And whereas there was this day read at the Board a recommendation from the Board of Trade to the following effect :—

That the Proclamation, dated the 28th day of July, 1915, as amended and added to by subsequent Orders of Council, should be further amended by making the following amendments in and additions to the same :—

(1) That the heading "Haematite pig iron" in the list of goods the exportation of which is prohibited to all destinations should be deleted, and there be substituted therefor the heading :—

Pig iron of the following descriptions :—

(*a*) Pig iron containing less than 0·1 per cent. of phosphorus, including haematite pig iron;

(*b*) All other pig iron containing more than 0·1 per cent. of phosphorus, but less than 1·5 per cent. of silicon together with less than 0·09 per cent. of sulphur.

(2) That the exportation of the following goods should be prohibited to all destinations :—

Cerium, oxide and salts of;
Cerium, and its alloys (except ferro-cerium);
Sugar, refined and candy;
Sugar, unrefined.

(3) That the heading "Draw plates, jewelled, for drawing steel wire, and diamonds prepared for use therein," in the list of goods the exportation of which is prohibited to all destinations abroad other than British Possessions and Protectorates should be deleted, and there be substituted therefor the heading "Draw plates, jewelled, for drawing wire, and diamonds prepared for use therein."

(4) That the exportation of the following goods should be prohibited to all destinations abroad other than British Possessions and Protectorates :—

Ferro-cerium.

(5) That the exportation of the following goods should be prohibited to all foreign countries in Europe and on the Mediterranean and Black Seas, other than France, Russia (except through Baltic ports), Italy, Spain and Portugal :—

Bleaching powder;

Fruit, fresh, dried, or preserved in any way, and nuts used as fruit;

Oleaginous kernels, nuts, and seeds, such as are not already prohibited to be exported to any destination.

NOW, THEREFORE, Their Lordships, having taken the said recommendation into consideration, are pleased to order, and it is hereby ordered, that the same be approved.

Whereof the Commissioners of His Majesty's Customs and Excise, the Director of the War Trade Department, and all other persons whom it may concern, are to take notice and govern themselves accordingly.

ALMERIC FITZROY.

No. 2345.—In exercise of the power conferred by section 19 of the Sea Customs Act, 1878 (Act VIII of 1878), as amended by Act XII of 1914, the Governor General in Council is pleased to prohibit the bringing by sea or land into British India of any copy of an article in English by William Jennings Bryan entitled "British Rule in India" or of any part of it, or of any translation thereof in part or in full in any of the Indian languages.

FACTORIES.

The 18th March 1916.

No. 2183-C.—In pursuance of section 2 of the Defence of India (Criminal Law Amendment) Act, 1915, as subsequently amended, the Governor General in Council is pleased to direct that the following amendment shall be made in Rule 11 A of the Defence of India (Consolidation) Rules, 1915, namely :—

After sub-rule (3) the following sub-rule shall be added, namely :—

"(4) wherever in this rule the expression "Governor General in Council" is used it shall be read as if it was followed in every case by the words "or the Local Government" and shall be construed accordingly."

POST AND TELEGRAPH ESTABLISHMENTS.

The 25th March 1916.

No. 2329-57.—Mr. I. C. Thomas, M.V.O., Chief Engineer, Telegraphs, Indian Telegraph Department, is permitted to retire from the service of Government with effect from the afternoon of the 3rd April 1916.

The following postings are sanctioned with effect from the 4th April 1916, consequent on the retirement of Mr. Thomas :—

Mr. H. S. Styan will relieve Mr. Thomas as Chief Engineer, Telegraphs.

Mr. R. Meredith, C.I.E., will relieve Mr. Styan as Deputy Director General, Telegraph Traffic.

PART IV.

Acts of the Indian Legislative Council assented to by the Governor General.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Indian Legislative Council received the assent of the Governor General on the 20th March, 1916, and is hereby promulgated for general information :—

ACT No. VIII OF 1916.

An Act further to amend the Presidency Banks Act, 1876.

WHEREAS it is expedient to amend the Presidency Banks Act, 1876; It is hereby enacted as follows :—

1. This Act may be called the Presidency Banks (Amendment) Act, 1916.

Short title.

2. In the Presidency Banks Act, 1876 (hereinafter called the said Act), the following amendments shall be made, namely :—

Amendment of sections 36 & 45, Act XI of 1876.

(*i*) After clause (2) of paragraph (*a*) of section 36, the following clause shall be inserted, namely :—

"(2A) India three-and-a-half per cent stock, India three per cent stock, India two-and-a-half per cent stock, or any other capital stock which may, at any time hereafter, be issued by the Secretary of State for India in Council under the authority of an Act of Parliament and charged on the revenues of India."

(*ii*) In paragraph (*d*) of section 36 and in section 45, for the words and figures "clauses (1), (2), (3) and (4)," the words and figures "clauses (1), (2), (2A), (3) and (4)" shall be substituted.

3. Any reference in the said Act to section 36, paragraph (*a*), Nos. (1) to (5) inclusive, shall be deemed to include a reference to section 36, paragraph (*a*), clause (2A).

Construction of references to certain clauses of section 36, Act XI of 1876.

4. Any business carried on or transacted, or investment made prior to the commencement of this Act which, if this Act had been in force, could have been validly carried on, transacted or made, is hereby validated.

Validation of past transactions.

STATEMENT OF OBJECTS AND REASONS.

THIS Bill proposes to amend the Presidency Banks Act, 1876 (XI of 1876), so as to include India Sterling Stock among the securities in respect of which, or on the security of which, the Presidency Banks are authorised to transact business. The Presidency Banks have, in the past, been under the impression that clauses (1) and (2) of paragraph (*a*) of section 36 of the existing Act already confer the power to transact business in this class of stock, and India Sterling stock purchased in this belief is already held. The fact that the existing law does not specifically confer the power in question came to their notice incidentally in connection with the recent amendment of the Indian Trusts Act, 1882 (II of 1882).

2. It is considered desirable to make the amendment proposed not only in order to validate past transactions of the Presidency Banks, but also because India Sterling Stock, no less than securities of the United Kingdom which are already recognised, clearly belongs to the class of securities in which the Presidency Banks should be authorised to transact business. The present Bill provides for the necessary amendment of section 36 of the Act, and also for certain consequential amendments in the Act which are self-explanatory.

W. S. MEYER.

DELHI;
The 7th March, 1916.

A. P. MUDDIMAN,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

The following Act of the Indian Legislative Council received the assent of the Governor General on the 21st March, 1916, and is hereby promulgated for general information :—

ACT NO. IX OF 1916.

An Act further to amend temporarily the Indian Paper Currency Act, 1910.

WHEREAS it is expedient further to amend, temporarily, the Indian Paper Currency Act, 1910 ; It is hereby enacted as follows :—

Short title and extent.

1. (*1*) This Act may be called the Indian Paper Currency (Temporary Amendment) Act, 1916.

(*2*) It shall be in force during the continuance of the present war and for a period of six months thereafter.

Amendment of section 22 of the Indian Paper Currency Act, 1910.

2. Section 22 of the Indian Paper Currency Act, 1910 (hereinafter called the said Act), shall be construed as if for the words " forty millions " in the proviso to that section, the words " one hundred millions " were substituted.

Special power to issue currency notes against British Treasury Bills.

3. Notwithstanding anything in sections 19 and 22 of the said Act, the Governor General in Council may direct that currency notes shall be issued for an additional amount, not exceeding at any time sixty millions of rupees, against Treasury Bills, as defined in the Treasury Bills Act, 1877, equivalent in value thereto and held by the Secretary of State for India in Council as a reserve to secure the payment of such notes or of other currency notes of like amount. 40 Vic

Power to include securities created by Government of India in reserve provided for by the said Act.

4. Notwithstanding anything to the contrary in the said Act, any securities created by the Government of India and issued to the Head Commissioner of Paper Currency shall, for the purposes of the said Act, be deemed to be securities purchased by the Governor General in Council and the market-price, on the day such securities are issued to the Head Commissioner of Paper Currency, of similar securities shall be deemed to be the price at which the securities so created were purchased ; and all references to securities so purchased, wherever occurring in the said Act, shall be deemed also to refer to securities so created, and all references to sums expended in such purchases or to prices paid therefor shall be deemed, in the case of securities so created, to refer to such market-price, and the said Act shall be construed accordingly.

5. The Indian Paper Currency (Amendment) Ordinance, 1916, is hereby repealed. I of 1916.

STATEMENT OF OBJECTS AND REASONS.

The Indian Paper Currency (Amendment) Ordinance, 1916 (I of 1916), enabled the power of increasing the Paper Currency investment which was conferred by the Indian Paper Currency (Temporary Amendment) Act, 1915 (V of 1915), to be exercised, when desired, by means of (*a*) an increase in the sterling investment of the reserve, or (*b*) the creation of rupee debt *ad hoc*, thus facilitating transactions connected with the sale of the Secretary of State's bills, and also enabling full effect to be given to the original purposes for which Act V of 1915, already mentioned, was passed.

2. As the latter Act continues in operation during the war and for six months thereafter, and the duration of the recent Ordinance will expire six months after its promulgation, it is proposed in this Bill to re-enact the Ordinance in the form of a temporary Act having the same currency as Act V of 1915.

3. While thus confirming the powers previously taken, which relate primarily to investment in the ordinary sense, the proposed Bill confers on the Government of India the new power, independent of the investment limits already laid down, of issuing currency notes up to a maximum limit of £4 million against British Treasury Bills held by the Secretary of State. British Treasury Bills are designated for this purpose because, by the Statute under which they are issued, their currency is limited to a maximum period of twelve months, and their consequent steadiness of value and the readiness with which they can be realised render them specially suitable as a temporary substitute for gold. The new provision now proposed thus differs from the ordinary provisions relating to investment, which contemplate a more or less permanent locking up of the funds invested.

PART VI.

Proceedings of the Indian Legislative Council.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

PROCEEDINGS OF THE INDIAN LEGISLATIVE COUNCIL ASSEMBLED UNDER THE PROVISIONS OF THE GOVERNMENT OF INDIA ACT, 1915 (5 & 6 Geo. V, Ch. 61).

The Council met at the Council Chamber, Imperial Secretariat, Delhi, on Wednesday, the 15th March, 1916.

PRESENT:

The Hon'ble Sir WILLIAM CLARK, K.C.S.I., C.M.G., *Vice*-President, *presiding*, and 52 Members, of whom 16 were Additional Members.

QUESTIONS AND ANSWERS.

The Hon'ble Mr. Surendra Nath Banerjee asked:—

1. "(*a*) Will the Government be pleased to lay on the table reports for the last five years showing the population and the death-rate from malaria, plague and cholera, province by province, in India for each year? Death-rate from malaria, plague and cholera.

(*b*) Do the Government propose to direct that such reports should be published, in future, year by year?"

The Hon'ble Sir C. Sankaran Nair replied:—

"(*a*) A statement * giving the required information has been compiled from the annual reports of Provincial Sanitary Commissioners and is placed on the table. No separate figures are available for malaria, which is included under the head 'fevers.'.

(*b*) The information is already published annually in the reports of Provincial Sanitary Commissioners."

* *Vide* Appendix A.

[*Mr. Surendra Nath Banerjee; Sir C. Sankaran Nair; Mr. Rama Rayaningar; Sir Reginald Craddock.*] [15TH MARCH, 1916.]

The Hon'ble Mr. Surendra Nath Banerjee :—"Will the Hon'ble Member be good enough to issue instructions to show the mortality figures from malaria under a separate and distinct head. This is most important for our purposes?"

The Hon'ble Sir C. Sankaran Nair :—"I shall consider the matter."

The Hon'ble Mr. Surendra Nath Banerjee asked:—

Resolutions and Despatches on the subject of Local Self-Government.

2. "(1) Have any Resolutions and Despatches on the subject of Local Self-Government been issued by the Secretary of State for India since the Report of the Decentralisation Commission?

(2) If so, will the Government be pleased to lay on the table all such Resolutions and Despatches?"

The Hon'ble Sir C. Sankaran Nair replied:—

"(1) No Resolution has been issued by the Secretary of State, but two Despatches have been received from him on the general proposals of the Government of India on Rural Boards and Municipalities (Chapters XIX and XX of the Decentralisation Commission's report).

(2) A copy of these despatches * is laid on the table."

The Hon'ble Mr. Surendra Nath Banerjee :—"Have all the Despatches received from the Secretary of State with reference to this matter been made public?"

The Hon'ble Sir C. Sankaran Nair :—"Only two have been brought to my notice, and they have been laid on the table."

The Hon'ble Mr. Rama Rayaningar asked:—

Transfer of certain districts from Madras Presidency to Bihar and Orissa.

3. "(*a*) Has it been brought to the notice of the Government of India that there is a strong and widespread desire among the Uriya-speaking people of the Ganjam District and the Agency Tracts of the Madras Presidency for the partition of these areas into two Districts—one Uriya and the other Telugu—and for the transfer of the Uriya District so formed to Orissa?

(*b*) If so, do Government propose to consider the desirability of taking early steps for the partition and transfer referred to?"

The Hon'ble Sir Reginald Craddock replied:—

"(*a*) In 1912, memorials were received from certain inhabitants of the Ganjam District and the Vizagapatam Agency Tracts requesting the transfer of the Uriya-speaking portions of the Madras Presidency to the Province of Bihar and Orissa.

(*b*) The Government of India then intimated that they did not regard the change, to which the Madras Government was opposed, as either desirable or necessary, and they now see no reason to depart from that decision."

The Hon'ble Mr. Rama Rayaningar :—"Anent the answer given to question 3 (*b*), may I ask as a supplementary question whether Government will be pleased to consider the desirability of forming the Uriya-speaking portions of Ganjam and the Agency Tracts into a separate district?"

The Hon'ble Sir Reginald Craddock :—"The matter of creating a new Uriya District in Madras is one which it is primarily for the Government of Madras to consider and move."

Vide Appendix B.

[15TH MARCH, 1916.] [*Mr. Rama Rayaningar; Sir Reginald Craddock; Khan Bahadur Mir Asad Ali Khan; Sir R. W. Gillan.*]

The Hon'ble Mr. Rama Rayaningar asked :—

4. '(*a*) Will Government be pleased to state the number of applications for gun and revolver licenses under the Indian Arms Act, the number of such applications allowed and the number rejected during each of the past twelve years ? License granted under the Arms A

(*b*) Do Government propose to consider the advisability of modifying the Indian Arms Act to suit local conditions, and of providing for the freer issue of such licenses, and the exemption from the operation of the Act of members of Municipalities, District and Taluq Boards, and of other persons of recognized position under proper safeguards ? "

The Hon'ble Sir Reginald Craddock replied :—

" (*a*) Licenses under the Arms Act are granted by numerous authorities, and to collect the information desired would necessitate detailed inquiries which are considered disproportionate to any advantage which might be gained by the compilation of the statistics.

(*b*) Licenses under the Act can already be freely granted at the discretion of the licensing authorities, should the circumstances render this desirable, while the list of exempted persons is already so detailed that, unless on very strong grounds, Government are averse from adding to its complications. Incidentally it may be mentioned that members of Municipal Boards or Committees, to whom among others the Hon'ble Member refers, are already to be found in item 15 of Schedule I."

The Hon'ble Khan Bahadur Mir Asad Ali Khan asked :—

5. " (*a*) Has it been brought to the notice of Government that third-class passengers on the South Indian and Madras and Southern Mahratta Railways really undergo hardships which are chiefly due to overcrowding in trains ? Inquiry regarding the hardships felt by third class passengers.

(*b*) If so, do Government propose to cause an inquiry to be made regarding such hardships ?

(*c*) Have any steps been taken to prevent overcrowding in trains, especially in mail trains, on those Railways ? "

The Hon'ble Sir R. W. Gillan replied :—

' (*a*) The Railway Board have, from time to time, noticed complaints on this subject in the public press.

(*b* and *c*) They accordingly instituted inquiries as to the extent and cause of the alleged hardships and the best means of remedying them. They find that the Railway Administrations concerned are fully alive to the desirability of removing all causes of reasonable complaint, and that special orders have been issued with a view to prevent overcrowding. These orders are mainly directed towards providing suitable and convenient train services, limiting the amount of booking to the capacity of trains, providing additional trains when required, and making special arrangements for festivals. The result of the inquiries so far is to show that, while overcrowding has occurred at times on particular sections, it is by no means general, but the matter continues to receive the special attention of the Railway Board, and they have instructed all Senior Government Inspectors of Railways to report upon cases of overcrowding that come to their notice."

The Hon'ble Khan Bahadur Mir Asad Ali Khan asked :—

6. " Will Government be pleased to state whether service pensioners (including Military pensioners) are liable to pay a profession tax in any of the Indian Municipalities, and, if so, to state the names of such Municipalities as well as the number of persons so taxed, together with the amount of taxation ?" Pensioners and Profession tax.

[*Sir C. Sankaran Nair; Khan Bahadur Mir Asad Ali Khan; Major-General Holloway; Rai Ghanasyam Barua Bahadur.*] [15TH MARCH, 1916.]

The Hon'ble Sir C. Sankaran Nair replied :—

"Under the Madras District Municipalities Act, 1884 (IV of 1884), a person in receipt of a pension paid from any source is liable under sections 47 (1) and 53 (including the Explanation) to pay the tax on arts, professions, trades and callings and on offices or appointments.

No similar specific provision exists in any other Municipal Act in India.

The number of Municipalities in the Madras Presidency in which the profession tax was levied in 1914-15 is 63. Their names are given in statement II appended to the report for 1914-15 on the administration of District Municipalities in the Presidency. The Government of India have no information regarding the number of pensioners paying the tax nor the amount of such taxation, and the information could not be given without detailed examination of municipal registers."

The Hon'ble Khan Bahadur Mir Asad Ali Khan asked :—

Enlistment of Mahomedans in the Indian Volunteer Force.

7. "Will Government be pleased to state whether they propose to strengthen the Indian Volunteer Force by enlisting in it a fair proportion of Mahomedans ?"

The Hon'ble Major-General Holloway replied :—

"Under existing orders no separate companies or corps of Volunteers in which Indians only are enlisted are authorised. Individual Indians—irrespective of class—may be admitted into Volunteer Corps at the discretion of the Commanding Officer. No question of the proportion of Mahomedans in Volunteer Corps therefore arises in existing conditions."

The Hon'ble Rai Ghanasyam Barua Bahadur asked :—

Disadvantages which the cattle owners of Delhi labour under.

8. "(*a*) Is it a fact that cattle owners of Delhi are frequently subjected both to payment of pound fees and fines and to criminal prosecution for cattle straying into open fields in the notified area ? If so, is it a fact that the effects of these measures operate harshly on the people concerned ?

(*b*) Do Government propose to consider the advisability of the issue of grazing permits at fixed rates ?"

The Hon'ble Sir C. Sankaran Nair replied :—

"(*a*) The area vested in the Committee of the Delhi Notified area, other than lands enclosed as playing grounds or gardens or as reserved forest, is very small, and the Committee have decided on sanitary and other grounds to allow no grazing therein. Cattle found grazing therein are impounded, and in some cases where the owners are believed to have intentionally grazed their cattle on such lands, prosecutions have been instituted. The Government are informed that the area affected being small, it is not likely that such measures can have operated harshly on cattle owners generally.

(*b*) It is not their intention to open it to grazing on fixed permits or otherwise, as a very considerable area of grazing ground has been provided on the other side of the river Jumna."

The Hon'ble Rai Ghanasyam Barua Bahadur asked :—

Matriculation age-limit in the Calcutta University.

9. "(*a*) With reference to the answer given by the Hon'ble Mr. Sharp on 17th March, 1915, to the Hon'ble Mr. Ghuznavi's question regarding the Matriculation age-limit in the Calcutta University, will Government be pleased to state whether any recommendation of the Senate for altering the wording of section 8, Chapter 30, of the University Regulations has since come officially before the Government ?

(*b*) If the answer is in the affirmative, will Government state what action they propose to take ?"

[15TH MARCH, 1916.] [*Sir C. Sankaran Nair; Sir Gangadhar Chitnavis; Sir R. W. Gillan; Mr. Dadabhoy; Sir William Meyer.*]

The Hon'ble Sir C. Sankaran Nair replied:—

"(*a*) The reply is in the affirmative.

(*b*) The Government have postponed for the present consideration of the recommendation in question."

The Hon'ble Sir Gangadhar Chitnavis asked:—

System for serial entry and loading of goods on Railways.

10. "(*a*) Has the attention of Government been drawn to any serious complaints by merchants that they find it very difficult to have their goods booked and carried by railway without delay, and that the delay, causes them great loss?

(*b*) With reference to the reply given in the Council on the 5th March 1913, to my question on the subject—

(*i*) has the new system for serial entry and loading of goods had a fair trial on the Great Indian Peninsula Railway? and

(*ii*) has a conference of trade and railway representatives been held to consider whether the system has proved a sound one, and, if so, have any modifications in any specific direction been found desirable in the system?

(*c*) Is it proposed to adopt the system for general use on all Railways?"

The Hon'ble Sir R. W. Gillan replied:—

"(*a*) Owing to the diversion to rail routes of large quantities of coal and other traffic there has recently been great difficulty in handling the volume of traffic offering on certain routes. Complaints as to delay in despatch and transit have consequently been received.

(*b*) (*i*) The new system for the serial entry and loading of goods adopted by the Great Indian Peninsula Railway in 1912 has now had a fair trial, and has proved so well suited to the circumstances of that line that no reason has been found to modify it.

(*ii*) In these circumstances no conference of the trade and Railway representatives has been held to consider it.

(*c*) The question of adopting this system on all Railways was considered in February 1914. It was held that the methods employed on different railways for securing the serial loading of goods were probably best suited to the trade conditions in the part of the country in which each railway operates. As no complaints had been received from traders regarding the system adopted on any railway other than the Great Indian Peninsula Railway, it was decided not to move further in the direction of adopting the new method on all railways. This decision was communicated to the Secretary of the Indian Merchants' Chamber and Bureau, Bombay, who had made an inquiry on the subject."

The Hon'ble Mr. Dadabhoy asked:—

Anticipated expenditure in connection with the military operations of His Majesty's Government.

11. "With reference to the Hon'ble Finance Member's statement on the 1st March 'that the termination of the war, when it comes, will leave us with heavy financial demands upon us,' will Government be pleased to say whether the statement referred to anticipated heavy expenditure connected with the internal administration of the country, or with the military operations of His Majesty's Government? If it referred to expenditure connected with the military operations of His Majesty's Government, will Government be pleased to indicate the nature of the liabilities?"

The Hon'ble Sir William Meyer replied:—

"The heavy financial demands to which I referred are those which I proceeded to describe in the remainder of the passage from which the Hon'ble

Mr. Dadabhoy has quoted, *i.e.*, paragraph 32 of my speech introducing the Financial Statement."

The Hon'ble Mr. Dadabhoy asked:—

Budget provision of the year 1916-17 for the discharge of short-term sterling India Bills.

12. "With reference to the provision in the Budget of the coming year of one-half million pounds sterling for discharge of some of our short-term sterling India Bills with a view to help 'the Home Government in maintaining a grip over the London money-market,' will Government be pleased to state if the decision to make such provision has been come to in consultation with the Secretary of State for India, and, if so, to lay on the table the correspondence on the subject, between the Government of India and the Secretary of State for India in Council?"

The Hon'ble Sir William Meyer replied:—

"If the Hon'ble Member will reperuse paragraphs 70 and 71 of my speech introducing the Financial Statement, he will see that the sum of half a million pounds which he has mentioned related to the discharge of a compulsory obligation, *i.e.*, bonds issued in connection with the purchase of the Indian Midland Railway which fall due in the current year The transaction in regard to which I said that we ought to give some little help to the Home Government in maintaining a grip over the London money-market, and incidentally relieve ourselves of some interest charges, related to the repayment of £1½ million out of the short-term sterling India Bills, aggregating £7 million, which the Secretary of State raised in 1914-15. This matter was of course settled in consultation with the Secretary of State, whose approval is always taken to all our important Budget proposals. There are no special papers which could be laid on the table."

The Hon'ble Mr. Dadabhoy asked.—

Military expenditure.

13. "With reference to the excess military expenditure of £940,000 over the Budget anticipation of the current year alluded to in clauses (1) and (2) of paragraph 14 of the Hon'ble Finance Member's speech of 1st March, will Government be pleased to lay on the table the correspondence on the subject between this Government and the Secretary of State for India in Council?"

The Hon'ble Sir William Meyer replied:—

"I do not think that any useful purpose would be served by laying these papers on the table. I am glad, however, to have this opportunity of explaining the position more fully, as perhaps it is not always understood. The extent to which India is permitted to meet charges which would otherwise fall upon the Home Government is defined and peremptorily limited, by the Resolutions on the subject in the two Houses of Parliament, which lay down broadly (the principle) that India is to meet the normal cost of the troops despatched from her shores. An admitted corollary to this principle is that India should make no saving out of the fact that some of her troops are not at present serving in this country, and that the normal sea-transport service has been temporarily suspended.

The detailed application of the general principle in question to the manifold classes and details of expenditure involved has been a matter of great complexity. There is no question of any controversy as between the Home Government and the Government of India. But since India's authority to incur this expenditure at all is limited, the legitimacy of any proposed charge must, as it were, be strictly audited against the Parliamentary sanction above referred to, and there have thus been many points of friendly discussion. Our own attitude has been throughout that in this matter we wish to throw upon the Home Government only those charges which, in the view of our Auditor General, we are not competent to bear under the terms of the Parliamentary Resolutions."

[15TH MARCH, 1916.] [*Mr. C. E Low.*]

THE INDIAN PORTS (AMENDMENT) BILL.

The Hon'ble Mr. C. E. Low:—"Sir, I beg to move that the Report of the Select Committee on the Bill further to amend the Indian Ports Act, 1908, be taken into consideration. The Bill, as introduced, received very slight alteration in Select Committee.

"In regard to the additional rule-making power conferred by clause 4, sub-clause (*2*), the Select Committee have amended the Bill so as to limit the vessels whose hire may be controlled by rule to passenger vessels, seeing that the hire of vessels carrying goods is a matter that may well be left to be regulated by the ordinary laws of supply and demand.

"The Select Committee also inserted a provision in clause 7 requiring the Port authority to be consulted before the Local Government can exempt any vessel or class of vessels entering port from payment of port dues, and in clause 11, rendering Government liable for any damage to vessels taken up for examination practice in peace time.

"With regard to the last named clause, I shall ask your leave to propose an amendment giving power to Government to make requisitions for vessels on Port authorities in times of emergency.

"I beg to move that the Report be taken into consideration."

The motion was put and agreed to.

The Hon'ble Mr. C. E. Low:—"Sir, I beg to propose the following amendment—that in clause 11 of the Bill after the new section 68 (A), the following be inserted, namely:—

'68 (B). Whenever the Governor General in Council is of opinion that an emergency has arisen which renders it necessary that the duties imposed, for the purposes specified in section 68(A) on the authorities therein mentioned or other duties of a like nature should be imposed on such authorities continuously during the existence of the emergency, he may by general or special order authorise any officer to require the said authorities to perform such duties until the Governor General in Council is of opinion that the emergency has passed, and the said authority shall comply accordingly, and the provisions of the said section shall apply subject to the following modification, namely:—

Duties of the said authorities in an emergency.

'The Government of India shall pay any authority on whom a requisition has been made such compensation for any loss or damage attributable to such requisition and for any services rendered or expenditure incurrred in complying therewith as, in default of agreement, shall be decided to be just and reasonable, having regard to the circumstances of the case, by the arbitration of a person to be nominated in this behalf by the Governor General in Council, and the decision of such person shall be final.'

"I may explain that clause 11 of the Bill is designed to make it compulsory on the Port authorities to provide vessels and personnel for the practice of the examination service of ships entering the port which is periodically carried out by the Military authorities in times of peace. The purpose of the actual examination in times of war is of course to ensure that no vessel is permitted to enter the harbour until the examining officers have assured themselves as to her nature. These periodical practices in times of peace, from the point of view of the Port authorities, are a comparatively small affair, and the Port authorities, with scarcely an exception, have willingly agreed to place the necessary crafts and personnel at the disposal of the Military authorities, receiving as compensation only what the Bill terms 'running expenses' which, however, will not include charges for the hire of the vessels and the wages of the officers and crew. In time of war, however, vessels have to be taken up for the examination services for long periods, a demand which is naturally a much more serious matter from the point of view of the Port authorities owing to the loss of the services of their vessels and probably extra expenses in respect of replacement. Government are far from desirous of relieving themselves of the proper responsibility for due compensation in such cases; in fact, during the present war, Government have been treating the

vessels taken up in the same way as vessels taken by them for other services, such as transports and store ships, and paying for them accordingly. We propose therefore to insert an additional clause providing that, in times of emergency, the Port authorities shall be required to comply with the provisions laid down in clause 11 as it stands, *i.e.*, the provisions laid down for times of peace until the emergency has passed, with the further modification that Government shall pay such compensation for any loss or damage attributable to the requisitioning of the vessels and for any services rendered or expenditure incurred in complying with the requisition as may be agreed upon, or in default of agreement, as shall be decided to be reasonable by an arbitrator nominated by Government. I may add that the additional clause has been referred for opinion to all the principal Port authorities in India, and has been unanimously accepted."

"I beg to move the amendment."

The motion was put and agreed to.

The Hon'ble Mr. C. E. Low:—"Sir, I beg to move that the Bill, as amended, be passed."

The motion was put and agreed to.

THE INDIAN MEDICAL (BOGUS DEGREES) BILL.

The Hon'ble Sir Pardey Lukis:—"It is not necessary that I should address the Council at any length. It will be observed that there is practically only one note of dissent to the Report of the Select Committee, who have amended and modified the Bill in such a way as to go far towards meeting the criticisms that have been directed at it. We have removed the word 'Bogus' from the short title; we have reduced the amount of the fines for first offences and for members of an association controverting clause 4; we have inserted an important proviso in clause 6, excepting from its operation the use by people of titles which were in use by them at the commencement of the Act; and we have added two new clauses which provide against hasty or ill-judged prosecutions. I am also authorised to announce that, in the interests of the students of unrecognised institutions, the Government of India, by exercising the powers conferred in the latter portion of clause 3, will permit, during the next two years, the grant, by such institutions, of certificates of efficiency to those students who are registered as having completed their second year's tuition at the time of the passing of the Act. I trust that, with these modifications and amendments, the Council will be able to give their unanimous assent to the Bill. I now move, Sir, that the Report of the Select Committee on the Bill to regulate the grant of titles implying qualifications in western medical science and the assumption and use by unqualified persons of such titles be taken into consideration".

The Hon'ble Dr. M. N. Banerjee:—"Sir, it is evident from the papers before us that many people have no clear idea as to the scope and provisions of this Bill. We find Dr. Menon (L. R. C. P. and S., Edin.) of Bombay suggesting that—

'If, as a result of the Bill, persons trained in properly organised private institutions are to to be prevented from practising, it is only proper and highly necessary that unqualified men and quacks should also be prevented from practising.'

and then the Hon'ble Mr. Watson of the United Provinces thinking—

'That the Bill might more fully serve its object if it included a provision making it compulsory for all medical practitioners to register their degrees or qualifications at some central registration office which would grant certificates without which no persons should be permitted to practise in India.'

[15TH MARCH, 1916.] [*Dr. M. N. Banerjee.*]

If a medical man with European qualifications sees provisions in the Bill against practising, and if an Hon'ble Member does not see that his proposal is not only outside the scope of the Bill, but is impracticable as even in England the law does not prevent anybody from practising, we need not wonder at the confusion of ideas and the conflicting opinions which prevail in the matter.

"I think it should be clearly understood that this Bill does not interfere with the liberty of anyone to practise, but intends only to protect the diplomas. The diplomas (by this word I mean all that goes with it in the Bill) are to be given only by authorised bodies, and not by any body or any association as at present. Any unauthorised body or association granting a diploma will be penalised.

"Representing as I do the unofficial medical profession and the private medical schools, I will state my views as to how the interests I represent will be affected by this Bill.

"I do not think any medical man can take exception to the principle of the Bill. The diplomas used by the passed students of the private medical institutions are so similar to those given by authorised bodies mentioned in the Schedule, that it is often difficult for medical men, not to speak of laymen, to ascertain which is which. But with the protection given by this Bill, the diplomas will have an enhanced face-value, which will elevate the members of the profession holding them in the estimation of the public. And nothing can be more desirable in the interests both of the public and of the profession. Besides, it seems to me to be wrong in principle and fraught with danger in practice to allow any private individual or association to grant diplomas. For there are no safeguards against any sinister influences prevailing with irresponsible persons.

"To understand the effect of the Bill on the private medical schools, it is necessary to know their previous history. The Hon'ble Sir Pardey Lukis has informed us that there are only four private medical institutions in all India, and that they are in Calcutta. The oldest of them, the Belgatchia institution, was started about a quarter of a century ago, and the others within the last 15 years. They came into existence to supply a demand for more medical education and more medical men in the country, and also to furnish a field for practical work for the unofficial medical men. During the last 20 years they have passed out no less than 4,000 trained men who have been useful as country practitioners and as medical assistants in the various services. Most of these passed students are of the school standard, some being of the college standard also. All the institutions depended, for their maintenance, mainly on the fees collected from their students, the contributions from the public being neither reliable nor considerable. If it were not for the fact that all the Physicians and Surgeons and most of the lecturers render their services without remuneration, it would have been impossible to maintain them. I have often wondered that the Government never thought seriously of utilising the services of these self-sacrificing men.

"That the institutions have so far served the purposes for which they were started, and that they have done their work to the best of their resources and ability, cannot be disputed. But circumstances have changed. Since the passing of the local Medical Registration Acts a new state of affairs came into existence. Those institutions which had done good work so long with the tacit consent of the Government, and with open encouragement from high officials, were now declared as unrecognised institutions, and their passed students were disqualified from signing certificates, giving medical evidence in law courts and holding public appointments and also appointments in private industries, such as jute, tea, shipping and mining, etc. The schools did not know where they were, nor were the students anxious to enter them, mindful of the fate that overtook their predecessors.

"I cannot help thinking that if half the energy that has been spent against this necessary and inoffensive Bill had been directed against the Medical Registration Act, the sad end of two of the four medical schools in Calcutta might have been averted, and the families of disqualified men suddenly

thrown out of employment would have been saved from the troubles and tribulations which overwhelmed them. However, facts must be taken as they are. One of the private schools has already ceased to exist, and another is, I understand, going to wind up in April next. Of the two remai ing, one, I mean Belgatchia, had the good fortune to secure Government help, and has just been affiliated to the University. The other one, I understand, will also be helped to affiliate itself to the State Medical Faculty.

"What then is the effect of this Bill on the private medical schools? The answer must be *nil*. For the two schools which might have been affected have ceased to exist, not for this Bill but through the operations of the Medical Registration Act passed in the local Council. So it seems to me that those who are fighting against this Bill woke up to their senses when the thief had left and are now fighting a shadow.

"The graduates of the private medical colleges in Calcutta have sent a representation for the consideration of this Council, but the proviso added to clause 6 by the Select Committee will satisfy them. And as for the students that are already in the schools, a provision has also been made by which they will pass out with certificates of efficiency during the next two years. One of the schools requires and asks for this concession for three years. If the Government can see their way to grant this, all parties will be satisfied.

"Much of the opposition to this Bill has been raised on the ground of insufficient supply of medical men in the country. From conversations which I have had with some leading men, I have come to know that the opposition was largely based upon a misconception of facts. When I asked a gentleman, who presided at one of the biggest Calcutta meetings, how he thought two private medical schools in Calcutta which could pass out only 100 students a year could supply the medical needs of all India, he was surprised and confessed that things were differently represented to him. Many have an idea that there are many private institutions all over India, and they are able to supply a number of medical men. Now, with the facts that have already been stated and taking also into consideration the difficulty of maintaining large hospitals in this country, the only way to supply a sufficient number of trained medical men is what I put forward in my Resolution at the last meeting of the Council, and which I am happy to say has been accepted by Government. When that scheme is carried into effect, I expect numbers of Government and private vernacular medical schools will spring up in every province in India, and supply to a very large extent the medical needs of the country."

The Hon'ble Sir Gangadhar Chitnavis:—"Sir, the Bill as it has emerged from the Select Committee stands shorn of many of its objectionable features. I am glad the clause purporting to give retrospective effect to the proposed law has been eliminated, and other changes have been made with a view to avoid causing hardship to the present body of the students of the unauthorised institutions. We must be thankful to the Hon'ble Sir Pardey Lukis and the Hon'ble the Home Member for the concessions. It is a good thing that this legislation has been undertaken before the retirement from the service of an officer of the large local knowledge and sympathies of Sir Pardey Lukis. We cannot fail to recognise his benevolent intentions, and to realise that his sympathy for the medical graduates lies at the root of this legislation. Opinion may be divided about its effects, but the acceptance by Government of the Hon'ble Dr. M. N. Banerjee's Resolution recommending the adoption of measures for the diffusion of sound medical knowledge through the vernaculars for the relief of the rural population, if followed by practical results, will induce the people to accept the law without hesitation or objection. I am glad that the Hon'ble Dr. M. N. Banerjee has told us that the Bill will not prejudicially affect a large number of existing institutions. I, however, hope that, as a further supplementary and precautionary measure, adequate financial aid will be given by Government to the private medical institutions, if any, that may be threatened with extinction, and that they will in due course be affiliated to the Universities, and will serve

[15TH MARCH, 1916.] [*Mr. Dadabhoy; The Vice-President; Rai Ghanasyam Barua Bahadur.*]

as useful centres for the impartation of medical instruction in the interests of the public.

"In view of these facts, I beg to support the motion."

The Hon'ble Mr. Dadabhoy :—"Sir, I am quite in agreement with what has fallen from my Hon'ble friend Sir Gangadhar Chitnavis, and I rise to congratulate the Hon'ble Surgeon-General Sir Pardey Lukis on the amendments which have been incorporated in this Bill. There is no man who is more considerate and more sympathetic in the Indian Medical Services than Sir Pardey Lukis. I was also quite confident that he would respect public opinion, and make such modifications in the Bill as would lead to its popular reception. The Bill has emerged from the Select Committee very much improved, and great credit is due for this to Government, as well as to Sir Pardey Lukis. It would have been somewhat difficult to support the Bill as it stood, but, as my friend the Hon'ble Sir Gangadhar Chitnavis has remarked, most, if not all, objectionable features have now been removed from it. I am glad that important provisions have also been made in the Bill so as to bring it into line with Indian medical opinion. The amount of fine originally intended to impose was very severe, but the rigour of that has been removed by putting it on the same basis as in the English Act. The provision as regards the trial of cases before a first-class magistrate, and the provision that 'no Court shall take cognizance of an offence punishable under this Act, except upon complaint made by order of the Local Government, or upon complaint made with the previous sanction of the Local Government,' introduce very useful and desirable changes into the Bill. As the Bill now stands, I have no doubt it will disarm popular objection. When properly understood, no serious objections will be taken to its provisions.

"Before I sit down I appeal to the Hon'ble Surgeon-General Sir Pardey Lukis, and trust he will be good enough to accept the second amendment which the Hon'ble Mr. Banerji is going to propose. Just now, in announcing his scheme, he expressed his practical agreement with the amendment which will be presently proposed by the Hon'ble Mr. Banerji. I understood him to say— ".

The Hon'ble the Vice-President :—"Order, order. The Hon'ble Member cannot speak on an amendment till it has been moved."

The Hon'ble Mr. Dadabhoy :—"With these words at present, I shall support the Bill."

The Hon'ble Rai Ghanasyam Barua Bahadur:—"Sir, I am glad to find that the Bill, as amended by the Select Committee, has met with almost unaninous approval, and I hope that the whole country will now receive it with a free heart. I feel sure that, when its principle is understood better, it will be found by all concerned that the misapprehensions about it to the effect that it was meant to strike a blow at the private medical institutions were thoroughly unfounded. The object of the Bill really is to bring all private institutions up to a proper standard of efficiency and some common standard. While passed graduates and certificate holders of these institutions have been sufficiently protected by the amendments and additions made by the Select Committee, suitable provisions have also been made to guard against improper prosecutions and the trial of offences by inexperienced magistrates, the objections against the amounts of fine have also been given due consideration. The interests of the students now undergoing their courses in these institutions have also not been lost sight of. In fact, the amendments and additions made by the Select Committee have met all the objections that were put forward, save and except that against the principle of the Bill. The principle of the Bill seems to me to be very sound, and when it is properly understood by my countrymen outside this Chamber, I hope they will see their way to accept the Bill without any misgivings.

[*Rai Ghanasyam Barua Bahadur; Mr. Abbott; Pandit Madan Mohan Malaviya; The Vice-President.*] [15TH MARCH, 1916.]

"From what has fallen from the Hon'ble Dr. Banerji, I understand that one of the institutions seems to feel aggrieved at not getting one year's more extension of time, and in the case of that institution they desire another year's extension for such of their students as have completed their first year's course now and gone to the second year class, so that they may have an opportunity of trying their chance of getting their final certificates. When Government have made all the other concessions that the people wanted, I hope this concession will not be too much for them to grant also. It will not in any way prejudice the principle of the Bill, and will only add to the concessions which have already been made in deference to public opinion or private interests. I hope the Government will be pleased to give their best consideration to this appeal.

"I also beg to submit that, since the Medical Registration Bills of the Provincial Governments have at present excluded from recognition practitioners with qualifications from private institutions, in view of the amendment that has been added to clause 6, I think Government should be pleased to consider the advisability of asking Local Governments to allow the same recognition to those practitioners as this Government has been pleased to do.

"With these remarks, I beg to support the motion."

The Hon'ble Mr. Abbott:—"Sir, I beg to give this Bill my whole-hearted support."

The Hon'ble Pandit Madan Mohan Malaviya:—"I ask, Sir, for a ruling in the first instance on a point of order as to whether I or any other member of this Council who feels it his duty to speak on the motion before the Council is entitled to deal with the Bill merely as it has emerged from Select Committee, or whether in doing so, in offering support to the principle of the Bill or to the Bill as it has emerged from the Select Committee, he can also, in anticipation, refer to the amendments which may be before the Council. I hope you will kindly hear me before you give your ruling."

The Hon'ble the Vice P esident:—"Certainly."

The Hon'ble Pandit Madan Mohan Malaviya:—"I submit, Sir, that it is impossible to give one's support to a measure like this without qualifications. On certain occasions a member feels that though he cannot give his unqualified support he can, while reserving his right to speak to the amendment when it comes on but yet referring to the amendment and referring also to the apprehensions that are entertained, support the Bill. I ask for a ruling on the point whether I or any other member will be entitled, in view of what I have submitted to you to speak of possible amendments to the Bill in speaking on this motion."

The Hon'ble the Vice-President:—"The Hon'ble Member, in speaking at this stage, is fully entitled to refer in general terms to such qualifications in his support to the Bill as emerge from the consideration of the Select Committee's Report. What he is not entitled to do, is to argue in detail on amendments which either he or any other member is going to move later."

The Hon'ble Pandit Madan Mohan Malaviya:—"Thank you, Sir. The Bill before the Council is a measure of some importance, and there are two opinions which have been expressed as to the necessity for the Bill. In the speech of the Hon'ble Surgeon-General we have heard that it is in the interests and convenience of the public that it has been thought necessary to introduce this Bill. That undoubtedly is the object of the Government, and it is from that point of view that the Bill ought to be judged.

[15TH MARCH, 1916.] [*Pandit Madan Mohan Malaviya.*]

Now it seems to me that the situation in this country, so far as the facilities for medical relief are concerned, is not a satisfactory one. We are all aware—the Government more fully aware than any of us—that the number of qualified medical men who are available to the people is very small, smaller than the needs of the people require. The institutions which turn out qualified men to practise the profession of medicine are also very limited for a country like India, with a population of 315 millions. There are only five Universities at present which grant medical degrees, and it has again and again been brought to the notice of Government that the needs of the public are not satisfied by the number of graduates who are turned out from these institutions. Nothing more eloquent could be adduced in proof of this than the fact that the few institutions started in Calcutta attract such a large number of pupils from the Punjab, from Bombay and other provinces. The need, therefore, exists, and it has to be satisfied. If there is not a sufficient number of qualified men available, there must be some less qualified medical men, whose aid people will resort to. It is therefore that these institutions have grown up.

"Now, in these circumstances, there are two ways in which the Government can deal with the situation. I submit that the preferable, the sounder, way was to create more medical colleges in order to afford greater facilities to students requiring medical training. That has unfortunately not been done. The course that has been followed is to prevent certain private institutions from conferring degrees, diplomas or titles upon students after putting them through a certain amount of training. With regard to the question whether men who are not competent should be allowed to practise, there can be no two opinions. But the Government have not thought fit, and I understand that even in England they have not thought fit, to prevent practice by men unless they have a certain standard of education. At any rate, so far as this country is concerned, we find that the Government does not propose to prevent anybody from practising the profession of medicine even though he may not have the smallest qualification. The course that has been followed is to afford protection to certain degrees so that people, who have not been through the prescribed institutions, should not be able to use those degrees after their names. Now, Sir, if it was proved that the use of these degrees really did make for the injury of the people, then there would be a good deal to support the Bill before us. But I desire to say that I am not satisfied yet that it has been proved that the evil, if it exists (I have no doubt it does exist when my Hon'ble friend says it does), has reached the stage when a Bill like this should be necessary. If, therefore, the Government is going to pass this Bill—and I am sure it is going to—all that I wish to say here is, that in two directions caution is necessary. In the first place, in dealing with these institutions which already exist, Government ought to come forward to co-operate with the people in multiplying the number of private institutions. More than one speaker has said that private institutions will suffer. My Hon'ble friend on my right—the Doctor—says that two schools have ceased to exist and there are two others. One of them, I understand, has received Government aid and the other is going to.

"But what are the possibilities of private individuals coming forward to endow medical institutions? Is the tendency likely to be stimulated by the action which has been taken, or is it likely to be checked? I fear that, in future, the tendency to make endowments or to promote work for creating private institutions will be greatly checked by the action that has been taken. Well, in that view it becomes all the more necessary that the Government should come forward not only to add to the number of State institutions where medical education is given, but also to publish a scheme for affording State assistance to persons who are willing to start medical colleges and institutions to increase the number of qualified medical men who should be available to the country.

"I hope, Sir, that this aspect of the case will be fully considered by the Government. My object is not to support the creation and circulation of bogus degrees. I do not wish that men who are not qualified should injure

our fellow-men; but I do wish that there should be a larger number of men qualified who can serve our fellow-men, and I fear that that aspect of the case is less present to the mind of the Government, if I may say so, than the aspect of preventing the creation and circulation of false degrees. My main object in making these remarks is, that the other aspect may be more fully considered in its relation to the needs of the people."

The motion was put and agreed to.

The Hon'ble Mr. C. Vijiaraghavachariar:—"Sir, I beg to move that in clause 3 of the Bill, as amended by the Select Committee, the words 'certificates or other documents' be omitted; and in case it is carried, that the word 'or' be inserted between the words 'diplomas' and 'licenses.'

"The object of this amendment, Sir, is to confine the scope of this Bill to medical degrees, titles, diplomas and licenses, without prohibiting the issue of certificates or other documents implying or stating that the holders of them can practise western methods of medical science. I do not think I need detain the Council very long. I have already stated my views with reference to the principles and provisions of the Bill, and I do not think it necessary for me to go over the same ground again, except to traverse some statements made by one or two Hon'ble Members who have spoken before me.

"The Hon'ble Sir Pardey Lukis alluded to the fact that I am the only one who has recorded a dissenting minute. Then there is the Hon'ble Dr. Banerjee who stated that he represents non-official medical opinion—"

The Hon'ble the Vice-President:—"Order, order—I am very sorry to interrupt the Hon'ble Member, but he is moving an amendment and he can only speak on that. He must not refer to the general principles of the Bill. He ought to have spoken at the previous stage on the general question."

The Hon'ble Mr. C. Vijiaraghavachariar:—"I will only allude to this fact in so far as it is necessary for the amendment I am moving. All that I say is, that the fact that I am the only one differing from the Members of the Select Committee should not be used as an argument against me; and to that extent, and to that extent alone, I shall allude to this statement. Because, although of course it was only spoken upon the original motion, it is just likely that Hon'ble Members of this Council, who, after all, are human beings, it is just likely that the statement that I am the only one in recording a dissenting minute in Select Committee, might, very unconsciously no doubt, prejudice them against me as regards this amendment. Alluding to the support rendered to the Bill itself, I find that, if at all it is properly examined, there is a volume of opinion outside the Council in support of the view which I have put forward. At present I only ask for a qualification of this Bill. It is true I am not now opposing the motion itself. I believe I shall be in order if I allude to the statement of the Hon'ble Dr. Banerjee that he represents non-official medical opinion. It is a mournful satisfaction to me that the arithmetical value of his representation is exactly on a par with the arithmetical value of my dissenting minute as regards the Select Committee's Report. He stands in the glorious minority of one, as I do as regards the dissenting minute. The immediate object of my amendment is, that, I believe, needless hardship to private schools and even medical men will be caused by retaining the words in question. Whether we regard the Statement of Objects and Reasons or the speeches made by the Hon'ble Sir Pardey Lukis, the question of 'certificates or other documents' cannot at all properly come within the scope of the Act. The title of the Act is merely ..... 'the grant of titles implying qualifications,' etc., the preamble says 'Whereas it is expedient to regulate the grant of titles implying qualifications,' etc., and the name of the Act itself is 'The Indian Medical Degrees

[15TH MARCH, 1916.] [*Mr. C. Vijiaraghavachariar; Mr. Rama Rayaningar; Dr. M. N. Banerjee; Pandit Madan Mohan Malaviya.*]

Act.' In all these three places the question of 'certificate or other document' finds no place. But somehow these words have found their way into the provisions of sections 3 and 4 and one other section. Now, taking this provision on its own merits, I cannot understand the value of it. The object of the Bill is to prohibit certain degrees being conferred by unauthorised authorities, and to prevent persons from using them and posing as men of certain qualifications which they do not possess. It is to prevent people from practising under false pretences, and to prevent the public from being treated by men of inferior qualifications who pose as men of superior qualifications. But I cannot understand why this provision should be extended to 'certificates or other documents'. For example, a teacher who gives lessons to a boy writes a letter to a friend of his saying that he is a very clever boy. That letter would come within the definition of 'other document', and the professor is liable to be prosecuted for writing that letter. We are all allowed to issue certificates to our domestic servants, to our chauffeurs and our grooms. But a medical pupil is prevented from getting a certificate from his professor, and his professor is prevented from giving a certificate to his pupil. Again, if a professor writes, this woman is a good midwife and she was taught by me, he will be prosecuted under this Act. He can say it, but he cannot write it. The offence is in the writing. What is the principle involved in this, may I know? Why should a man be allowed to say what he cannot put down in writing? Is the Act intended to save pen and ink and paper? I am unable to see what the principle involved in this provision is On the other hand, it is a perfect hardship. It is a trespass upon the private liberty of a man to say that he cannot say what he likes to say, in paper, while he can do so orally. For these reasons, Sir, I respectfully submit the words 'certificate or other document' ought not to be in this law and ought to be deleted."

The Hon'ble Mr. Rama Rayaningar:—"Sir, I support the amendment for the reasons which my Hon'ble friend Mr. Vijiaraghavachariar has given."

The Hon'ble Dr. M. N. Banerjee:—"Sir, Mr. Achariar has referred to me as representing the non-official profession, saying that I was a single man representing the whole of the non-official medical profession. With regard to that I should like to say that I have been authorised by the Bengal Medical Association, which is the representative association of the non-official medical men in Bengal, by telegram, to represent to this Council that, after the modification that has been made by the Select Committee, they have no objection to the Bill. So that I can at least say on behalf of the Bengal Medical Association what they think, although I am not representing non-official medical men in other parts of India."

The Hon'ble Pandit Madan Mohan Malaviya:—"I wish, Sir, the Hon'ble Mover of the Bill and the Government to consider whether this amendment of Mr. Achariar's cannot be accepted. The main object put before the Council was that certain degrees which were being used by persons who had not obtained these degrees from Universities should not be used by them. But, if I remember aright, there are English Universities where, when a degree is not granted, certificates are given after a smaller period of training in certain cases. Now, here if a man has received five years' or three years' training in one of these medical colleges, and if afterwards he is not able to take a degree, why should not the men who teach him be in a position to write a certificate that the student has attended for five or three years, as the case may be, and has passed certain tests which those who teach him impose upon him? So that they can tell the public that though he is not a Licentiate or Bachelor of Medicine, yet he has gone through a course of training, and that he could be trusted to perform certain duties as a medical man. Will it really

conflict with the main object of the Bill, and will it not help to increase the number of qualified medical men if the amendment were accepted?"

The Hon'ble Rai Sita Nath Ray Bahadur:—"Sir, while expressing my sympathy with the Bill in question, I must say that the amendment proposed is a very reasonable one. The principal aim of the Bill is to prevent private medical institutions from giving degrees or titles on the imitation of those given by the Government medical colleges and schools. Instead of quacks being allowed to practise with impunity the allopathic system of medicine, what the mover of the amendment asks for, is that the existing private institutions should be allowed to give certificates to their pupils indicating that they have received proper instructions in certain branches of medicine. The direct effect of the rejection of this amendment would be to reduce the number of qualified medical men. Sir, I may tell you that the requirements of the country for medicine and qualified medical men are very large indeed. There are thousands and hundred thousands of men in the interior of Eastern Bengal and especially in the Char lands which are so numerous in the large rivers there, who have never once in their life come across a medical man, nor tasted a drop of medicine, and the result is that when epidemic diseases break out, most of these people die, without taking any medicine whatsoever. Sir, I will give you a concrete case of the usefulness of the passed students of these private medical institutions. Last December, when cholera broke out in a virulent form simultaneously in several parts of Vikrampore, in the Munshigange sub-division of the Dacca district, we thought it proper to send a number of allopathic doctors to the affected areas for giving medical relief to the cholera-stricken people, but not being able to find out immediately sufficient number of qualified medical men of the type of sub-assistant surgeons, we thought it would be as well to send a few qualified doctors who passed out of the Belgatchia medical school, and the result was indeed eminently satisfactory, for they were able to cure a large number of patients who would have otherwise died without tasting any medicine, and now, Sir, what would have been the result if we had only to depend on men who passed out of Calcutta or Dacca medical schools? For all these reasons, I cannot help giving my humble support to the amendment."

The Hon'ble Mr. Madhu Sudan Das:—"Sir, as I read the Bill and as far as I can understand its scope and objects, and as far as these can be found in the terms of the Bill, I do not think that it is necessary to have this amendment. If a person sits at the feet of a professor and studies a certain science, say chemistry, and is very proficient in that science, why should a professor be prevented from granting him a certificate saying that he has attained a certain degree of proficiency? There is nothing in the Bill which can prevent or which is meant to prevent a professor from giving such a certificate. Supposing, for instance, a certain person recommends a certain medicine to me, it may be a grandmother's prescription, I use the medicine, I get cured of the ailment at the time, and I put down in a certificate that this man gave me a prescription that has done me an immense amount of good, in fact removed the ailment; there is nothing in the Bill, as I understand it, that prevents me from doing that. The Bill says:—

'No person.....shall confer, grant, or issue.....any certificate or other document *stating or implying that the holder*, grantee or recipient *is qualified to practise western medical science.*'

That is very different from acquiring proficiency in one or two branches of the science that constitutes medical science. I do not think that anybody ever intended that the object of the Bill was to prevent persons from giving certificates of that nature. Now, for instance, there are patent medicines sold, and these patent medicines are advertized; the advertizers enclose a number of certificates; it is certainly not the intention of this Act that the givers of these certificates or the purchasers of

[15TH MARCH, 1916.] [*Mr. Madhu Sudan Das; Mr. Lowndes; Pandit Madan Mohan Malaviya; The Vice-President.*]

the patent medicines should come within the purview of the Act and be prosecuted; it only limits the number of persons or the associations that should be authorised to state in a certain manner, whether the manner be a license, a degree or a certificate which implies or states that the man is not only qualified to treat a certain disease, but that he is qualified to practise western medical science. Consequently, by moving this amendment my Hon'ble Friend Mr. Achariar has shown himself a little too chary, which was not necessary, for the Bill does not prevent any person from giving a certificate unless the certificate says in so many terms that the person is authorised to practise western medical science. That is a very different thing from having proficiency in a particular branch of one of the sciences that constitute medical science. There is danger apprehended where there is none and I submit therefore, Sir, that the amendment is unnecessary."

The Hon'ble Mr. G. R. Lowndes :—"Sir, in view of the discussion that has taken place on the amendment, I think it is possibly desirable that I should say a word on the legal interpretation of this clause. I would suggest that the interpretation of the Hon'ble Mr. Das is clearly a better interpretation than that which the Hon'ble Mr. Achariar puts on it. Mr. Achariar in his breezy way said that if a letter referred to any one as 'a very clever boy'—I believe I have taken his words correctly—that would be a breach of the terms of the clause. I also understood the Hon'ble Mr. Malaviya to suggest that no certificate of any sort or kind could be given. Now, having regard to the provisions of this clause, I should have thought that the plain meaning of the section is to prohibit only a certificate which states or implies that the holder is qualified to practise western medical science. It seems to me childish to suggest that to certify that a particular person was a clever boy or had attended chemistry classes for five years implies that he is qualified to practise western medical science."

The Hon'ble Pandit Madan Mohan Malaviya :—"May I ask the Hon'ble Member to explain the matter a little further? Supposing there is a student—"

The Hon'ble the Vice-President :—"The Hon'ble Member is not entitled to make another speech; he may ask a question."

The Hon'ble Pandit Madan Mohan Malaviya :—"Sir, I do not propose to make a speech; I am explaining my meaning and I will do so in a few words. I will give an illustration—a man has studied for five years in a college, he has been plucked, he has not obtained a degree; then the professor or professors in each subject which he has studied give him a certificate to the effect that he was very good in his subjects and that he had studied for five years in that institution, and that he was plucked; would such certificates in themselves mean practising his profession as a medical man or would he be liable to prosecution? Clause 3 of the Bill says :—

'the right of conferring, granting or issuing in British India degrees, diplomas, licenses, certificates or other documents stating or implying that the holder, grantee or recipient thereof is qualified to practise western medical science.'"

The Hon'ble Mr. G. R. Lowndes :—"The language used would have to be construed under the Act. My learned friend is as qualified as I am to say whether a particular certificate implies a particular fact or not. I only intervened to suggest what would be the plain legal meaning of the words in the clause. They clearly do not cover such an interpretation as the Hon'ble Mr. Achariar jokingly put upon them."

[*Mr. C. Vijiaraghavachariar; The Vice-President; Sir Pardey Lukis.*] [15TH MARCH, 1916.]

The Hon'ble Mr. C. Vijiaraghavachariar:—"When I referred to a clever boy I meant clever in one of these three subjects. The Law Member says that the interpretation—."

The Hon'ble the Vice-President:—"Order, Order. The Hon'ble Member is entirely out of order; he has given his explanation and is not entitled to go further."

The Hon'ble Sir Pardey Lukis:—"Sir, I regret that I am unable to accept my Hon'ble Friend's amendment. I agree with Sir Harcourt Butler that, if these institutions be permitted to grant certificates of qualification to practise western medical science, it is highly probable that such certificates will be utilised to support bogus claims to practise, especially if they resemble the document now displayed. This is the diploma issued by one of the self-constituted colleges, and Hon'ble Members can see that, if the last line be erased, it ceases to be a diploma and becomes a certificate, and would doubtless be used as such, but I think it extremely likely that very few laymen would be able to distinguish between it and a proper diploma.

"For these reasons, Sir, I deprecate any weakening of the provisions of the Bill as now amended. This might tend to frustrate the object of the Bill, which is to raise the standard of efficiency of these self-constituted medical colleges and to prevent ill-equipped and under-staffed so-called colleges, founded by irresponsible persons, from conducting the examination of their own students without any outside inspection or control.

"I would point out here that there is no justification for the arrogation to themselves, by the managers of these institutions, of the right to issue at their pleasure certificates of this nature. It is, moreover, contrary to our general medical policy, as it affects Government medical schools. In this connection I may mention that the certificated class for medical women has now been done away with; that from next year, pupils of the military assistant surgeon class will be required to possess the same certificates and preliminary education and to pass the same examinations as civil assistant surgeons; and that in Bengal, Bombay and Madras definite examining bodies are now being constituted for the examination of sub-assistant surgeons. For instance, in Madras, the Board of Examiners has now been enlarged and conducts all medical examinations other than those of the University. In Bengal, the students of the Sealdah and of the Dacca Medical Schools take the License of the State Medical Faculty and the question of other Government schools is now under consideration. Similar arrangements exist in Bombay in connection with the License of the College of Physicians and Surgeons. I can see no reason, therefore, for recommending to the Council the acceptance of this amendment.

"The self-constituted medical schools of Calcutta are to be given two years' grace in the matter of the grant of such certificates. During this period it rests with their management to see that the house is set in order, and it is as well that they should realise definitely that they are now at the parting of the ways, and that it is obligatory on them to improve themselves to a degree sufficient to merit Government recognition.

"I do not think that my Hon'ble Friend can have been quite serious in what he advanced as regards the penalties incurred for granting certificates. In his note of dissent he remarked that if he were to attend lectures in First Aid delivered by a private professor, and obtain from him a certificate of competency, they would both be liable to criminal prosecution and conviction. In that connection, I should like to say, in the first place, that it is hardly likely that I, as the Chairman of the Executive Committee of the Indian Council of the St. John Ambulance Association, would bring in an Act which would render every member of my Association liable to prosecution. I should also like to point out, as has been done by the Hon'ble Mr. Das and the Hon'ble Mr. Lowndes, that this Bill deals only with certificates and other documents implying that the holder is qualified to practise western

medical science. It is not intended to penalise the holder of a certificate which merely states that he (or she) is qualified to render First Aid to the injured, pending the arrival of the doctor."

The Hon'ble Mr. C. Vijiaraghavachariar:—"Sir, I plead guilty somewhat to the charge of want of seriousness, but the Hon'ble Sir Pardey Lukis will acquit me of that charge when I say I am very serious now. I am considerably embarrassed by two circumstances. The Hon'ble and the distinguished Law Member must know that Courts, in construing an Act, decline to go into the proceedings of Council. They absolutely decline to interpret the Acts by what has been said in Council, no matter by whom. Having that in view, my next consideration is—and I am somewhat suspicious about this—if my amendment is unnecessary, why is it opposed? If it is redundant, if it is unnecessary, may I know why it is opposed? The Hon'ble Mr. Das seems to think that such a certificate can be granted if it does not traverse qualification in all the three subjects, *i.e.*, Allopathy, Obstetrics and Surgery, and the Hon'ble and distinguished Law Member seems to endorse that opinion."

The Hon'ble Mr. G. R. Lowndes:—"I can assure my learned friend that I did not do so."

The Hon'ble Mr. C. Vijiaraghavachariar:—"Very well, Sir, I did not then understand him, that is all, I would say. Somehow or other it is said that my amendment is redundant: then I cannot quite follow the chain of reasoning employed by the Hon'ble Mr. Das and by the Hon'ble Mr. Lowndes. I understood Mr. Das to mean that if the certificate related to a single subject, such as Surgery or Obstetrics, or Allopathy, it is safe. If so, I am glad to accept that interpretation. All that a clever professor has to do then is to give three certificates instead of one, that this particular person is good in Allopathy, No. 1, that he is good in Obstetrics, No. 2, and that he is good in Surgery, No. 3. If he gives three separate certificates he is safe, because the word used in this clause of the Bill is 'and' and not 'or'. Western medical science is described as Allopathic medicine, Obstetrics *and* Surgery and they have to be taken in a cumulative sense and not disjunctively! That is what I understood Mr. Das to say. However, I am unable exactly to understand this, Sir. In traversing my arguments, Sir Pardey Lukis asked us to behold a very neatly drawn document. I saw the document, but not what was written in it from this place. I take it, it is a diploma. He said if you remove something at the bottom it becomes a certificate. Will that be a ground for converting an act which would be innocent if performed orally into an offence when it is reduced to writing? I particularly called the attention of Sir Pardey Lukis to this point, and I have the mournful satisfaction to see that no Hon'ble Member traversed that position.

"He has said that the retention is intended to produce greater efficiency. May I say as against this argument, that it does not prevent any man from practising as he likes. This proposed law does not in the least interfere with the liberty of any person in India from practising in western medicine. All that it says is, he shall not assume bogus titles, and in addition to that he cannot hold written certificates. That is all. How far this will tend to the development of greater efficiency and to the diminution of false pretences to which the public are likely to be subjected in the absence of this law is an open question. Upon that question opinions must vary, but in the meanwhile I think that absolutely no ground has been made out for including written declarations and making them penal while permitting oral declarations. To this incongruous aspect I have drawn the Hon'ble Member's attention and it has not been traversed. I therefore press my amendment upon the attention of the Council.

"Sir, I should like a division on this matter."

The amendment was put and the Council divided as follows :—

AYES—9.	NOES—41.
The Hon'ble Raja of Mahmudabad.	The Hon'ble Sir William Clark.
„ Pandit Madan Mohan Malaviya.	„ Sir Reginald Craddock.
„ Mr. C. Vijiaraghavachariar.	„ Sir William Meyer.
„ Mr. Rama Rayaningar.	„ Mr. C. H. A. Hill.
„ Khan Bahadur Mir Asad Ali Khan.	„ Sir Sankran Nair.
„ Babu Surendra Nath Banerjee.	„ Mr. G. R. Lowndes.
„ Mr. Qumrul Huda.	„ Mr. W. M. Hailey.
„ Rai Sita Nath Ray Bahadur.	„ Sir R. W. Gillan.
„ Lieut.-Col. Raja Jai Chand.	„ Mr. F. H. Stewart.
	„ Raja Abu Jafar.
	„ Dr. M. N. Banerjee.
	„ Mr. W. H. Cobb.
	„ Mr. J. B. Wood.
	„ Mr. H. Sharp.
	„ Sir Edward Maclagan.
	„ Mr. R. A. Mant.
	„ Mr. J. B. Brunyate.
	„ Mr. H. Wheeler.
	„ Brigadier-General Holloway.
	„ Mr. G. B. H. Fell.
	„ Surgeon-General Sir C. P. Lukis.
	„ Mr. R. P. Russell.
	„ Mr. C. H. Harrison
	„ Mr. A. H. Grant.
	„ Mr. C. H. Kesteven.
	„ Mr. A. P. Muddiman.
	„ Mr. Davidson.
	„ Mr. J. G. Cumming.
	„ Mr. Oldham.
	„ Mr. M. S. Das.
	„ Mr. C. W. M. Hudson.
	„ Lt.-Col. D. B. Blakeway.
	„ Mr. C. H. Atkins.
	„ Mr. J. Walker.
	„ Mr. M. B. Dadabhoy.
	„ Sir G. M. Chitnavis.
	„ Lieut.-Col. P. R. T. Gurdon.
	„ Rai Ghanasyam Barua Bahadur.
	„ Mr. R. E. V. Arbuthnot.
	„ Maung Bah Too.
	„ Mr. J. H. Abbott.

The amendment was accordingly negatived.

The Hon'ble Mr. C. Vijiaraghavachariar :—"Sir, my next amendment is for the same purpose, and I may say is almost consequential upon the last, namely, that in clause 4, the words 'certificate or other document' be omitted, and the word 'or' be inserted after the word 'diploma'.

"I do not think therefore that there is any need for me to detain the Council by moving it, and I beg to withdraw it."

The amendment was, by permission, withdrawn.

[15TH MARCH, 1916.] [*Mr. C. Vijiaraghavachariar; Mr. Surendra Nath Banerjee*]

The Hon'ble Mr. C. Vijiaraghavachariar:—"So is the next one which I also beg leave to withdraw, namely, 'that in clause 6 and in the proviso to that clause, the words 'or certificate' be omitted, and the word 'or' be inserted after the word 'diploma'."

The amendment was, by permission, withdrawn.

The Hon'ble Mr. Surendra Nath Banerjee:—"Sir, I have the honour to move the following amendment which stands against my name, namely, that the following proviso be added to clause 3 of the Bill:—

'Provided that until Local Governments open or recognise lower standard vernacular schools, nothing in this section shall be deemed to preclude existing private medical institutions from granting certificates to their passed students.'

"Sir, section 3 of the Bill restricts the power of granting certificates of qualification in western medicine to specified institutions mentioned in the Schedule and to such other bodies as the Governor General in Council may, from time to time, authorise in that behalf. The object of my amendment is to suspend the operation of this section, so far as the granting of certificates is concerned, in the case of existing medical institutions so long as the lower standard vernacular schools have not been opened by the Government, or having been opened by private effort have not been recognised by the Government. The effect of my amendment would be to allow the existing medical institutions to continue to grant certificates so long as these lower standard schools have not come into existence. The Council will remember that they accepted the other day—and the Government also accepted—the Resolution that was moved by the Hon'ble Dr. Banerji for the establishment of lower standard schools for the benefit of the rural population That Resolution when given effect to will, I am sure, go to a very large extent to meet the medical needs of the community. But, Sir, what is to be the situation in the meantime? We in Bengal—my knowledge of these things is confined to my Province—have a population in round numbers of 50 millions. On the register of qualified medical practitioners we have 2,500 men. In other words, we have one qualified medical man to 20,000 people. Any man in his senses will see that this is hopelessly inadequate. And so long as this state of things remains, the reign of the quacks will continue supreme. Under the circumstances, it is most desirable that the existing private medical institutions should continue to teach and to grant certificates to their passed students, for, Sir, it need hardly be said that some sort of medical qualification is better than no qualification at all, and that partially-equipped medical practitioners are more desirable than thorough-going quacks I claim for my amendment that it is a necessary corollary to the Resolution moved by the Hon'ble Dr. Banerji. Sir, when that Resolution was accepted, I placed myself in communication with the leaders of medical opinion in Bengal, with the President of the Medical Association to whom reference has already been made by my friend the Hon'ble Dr. Banerji. I asked them if, having regard to the acceptance of Dr. Banerji's Resolution by the Government, they had any further objections to offer to the Bill. This was the reply that I received from Dr. Suresh Prasad Sarbadhikari, the President of the Bengal Medical Association. With your permission, Sir, I will read this telegram:—

'Bengal Medical Association gladly accept amended Bill read with Dr. Banerji's Resolution and tender grateful thanks for concessions. Association strongly prays (this is the operative part of the telegram) that existing schools be permitted to confer diplomas (probably they mean certificates) till rural practitioners are being created in pursuance of Dr. Banerji's Resolution, when all legitimate objections from peoples' and practitioners' point of view will disappear.'

"Sir, this telegram embodies the deliberate judgment of the most representative, the most influential medical association in Bengal; consisting of men of the highest eminence and who are entitled to speak on behalf of themselves and of the community. Let me refer to one particular fact in this connection. It will be remembered, Sir, that when I had the honour and also the duty of

opposing this Bill in February last, I quoted largely from the representation of this body. It will be seen that Dr. Banerji's Resolution has had the effect of disarming their opposition and reconciling them to the Bill, subject to the one important condition, and that is, the operative part of their telegram, *viz.*, that these private institutions will be permitted to grant certificates to their passed students so long as Dr. Banerji's Resolution has not been carried into practical effect.

"Sir, my amendment is based upon this telegram which embodies the expression of opinion in Bengal. That opinion was decidedly opposed to this Bill at one stage. Public meetings were held, there were demonstrations, protests in the press, telegrams were sent to the Government. All that has disappeared in consequence of the hope that has been created in the public mind by Dr. Banerji's Resolution, and it seems to me that it would be an act of conciliatory statesmanship if my Hon'ble friend the Member in charge could see his way to accept my amendment. It would secure for this Bill the firm support of Bengal public opinion, and in these days the support of public opinion is a valuable asset which, I venture to think, is highly useful even for the purposes of practical administration. I hope and trust that, under these circumstances, my amendment will be accepted by the Government. There is not the smallest desire to shelve the Bill, but there is at the back of our minds the idea that, if this amendment is accepted, the Government will hurry on with these institutions which Dr. Banerji's Resolution refers to. The Government will be anxious to see that this Bill is given effect to, and as there would be that natural solicitude, the Government would have the strongest motive to establish those institutions which would go far to supply the medical needs of my Province.

"I hope and trust that my Hon'ble friend will see his way to accept this amendment, which embodies the deliberate judgment of the Province which is most affected by the Bill, for, as a matter of fact, it is only in Bengal that there are two medical schools which come under this Bill, and therefore Bengal opinion ought to count for something in a matter of this kind."

The Hon'ble Mr. Dadabhoy:—"Sir, I rise to support this amendment. My friend has very clearly and lucidly explained the scope and aim of his amendment. The amendment seems to me to be feasible and very modest. The concession which the Hon'ble Member asks for, is one which, I feel sure, Government will not refuse to grant. My Hon'ble friend has explained very clearly that, if the Government wish to give full and proper effect to the Resolution which was proposed the other day by the Hon'ble Dr. Banerji, it will be necessary to accept this amendment.

"I do not find much difference between the amendment proposed and the course which the Hon'ble Surgeon-General Lukis has decided to adopt. Under clause 3 of the Bill, Government wishes to reserve power to itself to grant certificates under certain conditions, and the Hon'ble Member wants that an express provision should be inserted in the Bill, so that, in future, there may be no doubt about the matter, and that the matter may not be left to individual discretion. The concession should be secured by statutory provision. Under these circumstances, I think his request is very reasonable, and I support it."

The Hon'ble Sir Pardey Lukis:—"I am afraid that I cannot accept my Hon'ble friend's amendment, which practically amounts to a proposal that the Act should be indefinitely held in abeyance pending the settlement of the question of vernacular medical education. This question was informally discussed in Select Committee, and it was then admitted to be entirely outside the purview of the present Bill, the object of which is to raise the standard of medical education in English-teaching institutions. It is on this understanding, and on this understanding only, that the Government of India decided

[15TH MARCH, 1916.] [*Sir Pardey Lukis; Rai Ghanasyam Barua Bahadur; Mr. Surendra Nath Banerjee.*]

to accept the Hon'ble Dr. M. N. Banerji's Resolution, and I cannot agree to the acceptance of that Resolution being used now as a reason for the indefinite prolongation of the right to grant certificates, the objection to which I have already pointed out in my answer to the Hon'ble Mr. Vijiaraghavachariar."

The Hon'ble Rai Ghanasyam Barua Bahadar:— "Sir, while I greatly sympathise with the object my Hon'ble friend, Mr. Banerjee, has in view, I see one more difficulty if his amendment is accepted. It will imply that, as long as the Government do not start their own schools of the lower grade, private institutions will be at liberty to continue to grant diplomas and certificates as they are doing now. So that private institutions which are not up to the mark in the standard they now assume for themselves will not feel induced to reduce it or to take steps to convert themselves into lower grade schools, unless and until the start is made by Government. Now it needs no saying that Government measures in matters like these take some time to mature themselves, and in this season of war and want of funds the delay may even be greater than usual. In such a case the result will be that the reform and improvement aimed at, as also the creation of private vernacular medical schools, may be indefinitely postponed, a thing which I do not consider desirable. If, however, the standard and curriculum of the proposed vernacular schools are definitely laid down at the earliest possible time, private enterprise may usher them into existence even before Government start their own schools of the kind. So I think the proper thing to ask Government to do, would be not to ask for a concession like this, but to prescribe the text-books and appoint examining bodies for the lower grade schools without delay, so that private institutions willing to come under that category may have the chance of doing so as soon as they want, whether the Government have started their own schools or not. I do not think it would be safe to allow all private institutions to grant certificates as they do now; at the same time, it will be unfair to disable them or other private bodies from taking action on right lines until the Government themselves can come up with their own institutions of the lower grade. I think that it would be enough if the Government fixed the standard and appointed an examining body for the contemplated lower grade of schools as early as possible, so that private enterprise in that direction may not be unnecessarily delayed. Indefinitely to postpone the operation of the Bill would be to frustrate its very object. I am unable to support the amendment as it stands."

The Hon'ble Mr. Surendra Nath Banerjee:—"Sir, I cannot quite follow the Hon'ble Sir Pardey Lukis in the objections that he has raised to my amendment. He seems to think that, if my amendment were accepted, it would result in the indefinite postponement of the operation of this Bill. I do not think that is so at all. Whether the Bill is to come into operation at once or not will depend largely upon the action of Government. If these institutions are forthcoming, say, in six months' time or even earlier, the Bill will be operative at once, and my contention is, that the acceptance of this amendment would be a strong incentive to the Government to hurry on these institutions.

"I may just mention one fact which, I think, the Hon'ble Sir Pardey Lukis is acquainted with. The Hon'ble the Inspector-General of Civil Hospitals in Bengal has taken a very deep interest in the matter, and, I believe, he is prepared to place the Sambhunath Pundit Hospital at the disposal of the authorities for starting an experiment of this kind. If the Hon'ble the Surgeon-General earnestly takes up the question of establishing these lower standard vernacular schools, my impression is that, in the course of the next six months at least, one institution of the kind might be started in Bengal; and then, such an institution having been started, the Bill would come in to operation at once.

"I confess I was not able to follow the arguments of my Hon'ble friend who spoke last. He spoke of raising the standard of private medical institutios.

I think that is what he said. As a matter of fact, there are no private medical institutions in Bengal, except two: the School at Belgatchia and Dr. Mullick's School. The School at Belgatchia has been affiliated to the University, and the other will soon, I hope, be affiliated to the State Faculty with the aid of the Hon'ble the Surgeon-General. Therefore my Hon'ble friend was fighting a shadow. He was building upon assumptions which do not exist—upon materials which are not to be found in any part of India.

"As the Hon'ble the Surgeon-General has taken up a decided attitude in regard to this matter, I will not press my amendment, but will beg to withdraw it."

The amendment was, by permission, withdrawn.

The Hon'ble Mr. Surendra Nath Banerjee:—"Sir, I beg to move the next amendment which stands against my name, which is that the following proviso be added to clause 3 of the Bill, namely:—

'Provided that nothing in this section shall be deemed to preclude existing private medical institutions from granting certificates to their passed students for a period of four years from the commencement of this Act.'

"Sir, the object of this amendment, and I am sure the Hon'ble Surgeon-General will be in sympathy with it, is to protect and safeguard the interests of students now attending the existing private medical institutions. They joined these institutions before the Bill was introduced, and surely they should not suffer by reason of the introduction of the Bill. The Hon'ble Surgeon-General has—very properly as I think—done away with those retrospective provisions of the Bill which were objected to, and I venture to think that my amendment only accentuates a principle which has already been accepted by him. Sir, I rely upon the Report of the Select Committee in support of the amendment which I have moved. The Select Committee, in paragraph 2 of their Report, say:

'Although no change of substance has been made in clauses 3 and 4, we think we ought to place on record the fact that, in connection with these clauses, we discussed the question of the position of the students of the third and fourth year in existing institutions. It was pointed out that it would be open to Government, by exercising the powers conferred by the latter portion of clause 3, to authorise such institutions to grant certificates to such persons, and the Hon'ble Member in charge of the Bill having expressed his intention of indicating, when dealing with the Bill in Council, that Government would adopt this policy, we decided that no amendment in the Bill was necessary in this respect.'

"The Select Committee, therefore, have agreed that the powers reserved under the latter portion of section 3 should be employed for the benefit of students in the third and fourth year classes. I ask why not for the students of the first and second year classes? And I venture further to submit that a matter of this importance should be dealt with by legislation: it should not be made the subject-matter of an executive order.

"Sir, since I gave notice of this amendment, I have had the opportunity of discussing the question with experts, and with the approval of my Hon'ble friend the Member in charge of the Bill, I propose to reduce the number of years from four to three. I find that the fourth year class will be dismissed in April next. There will, therefore, be three classes remaining, the first year which will become the second year of the new session, the second year which will become the third year of the new session, and the third year which will become the fourth year of the new session. Those who join these institutions after the Bill has become law are not entitled to exceptional treatment; they become students with their eyes open. The second, third, and fourth year students deserve consideration and, therefore, if my Hon'ble friend will agree to it, I propose to reduce the term from four to three years. I hope in that revised form the amendment will recommend itself to the acceptance of my Hon'ble friend."

[15TH MARCH, 1916.] [*The Vice-President; Mr. Dadabhoy; Rai Sita Nath Ray Bahadur; Sir Gangadhar Chitnavis; Maharaja Ranajit Sinha of Nashipur; Mr. Madhu Sudan Dass.*]

The Hon'ble the Vice-President :—"The amendment now stands for a period of 'three' years instead of 'four.'"

The Hon'ble Mr. Dadabhoy :—"Sir, I support the amendment. I have already placed my views on this Bill before the Council. I hope Sir Pardey Lukis will see the reasonableness of this amendment, particularly as the Bill has now been altered."

The Hon'ble Rai Sitanath Ray Bahadur :—"Sir, I also beg to support the amendment in its present form."

The Hon'ble Sir Gangadhar Chitnavis :—"Sir, I support the amendment. I hope the Hon'ble Sir Pardey Lukis will see that this further concession is made. The students of the first year class of these private institutions have spent some time and money in studying for the profession and in many cases, it will not be possible to continue their studies, without loss of time and money, even in private institutions that may secure affiliation. For these reasons, I beg to support the amendment."

The Hon'ble Maharaja Ranajit Sinha of Nashipur :—"Sir, I beg to support the amendment just moved by my friend on the right (Hon'ble Mr. S. N. Banerjee), and I am sure that the Hon'ble Sir Pardey Lukis will see his way to grant this concession also, as he has done in many other respects."

The Hon'ble Mr. Madhu Sudan Das :—"Sir, I beg to support the amendment of Mr. Banerjee, and my grounds are these. Both the public and the Government feel the need of having more doctors than the country now has. It is also agreed that the country is in need of a certain class of medical advisers who have acquired a qualification, which will make them or rather place them within the reach of the poorer classes of people; and, secondly, the qualification of these men would be of a lower standard than the qualification of men who are turned out in medical colleges. So far both the public and the Government agree that there is a necessity for more doctors in the country. When this was the state of things, certain persons undertook to open colleges or schools where they trained up certain doctors, and these men have been doing their work. Then it was found that they were not the right type of men whom the country required, and consequently by accepting the Resolution of the Hon'ble Dr. Banerjee, Government actually said in so many terms that the country is in need of doctors, but not of that type which these institutions produce. There is only the difference between the public and the Government opinion as regards the qualifications of these doctors. Government does not maintain, nor can they maintain, that these doctors who were turned out from these colleges were doing positive injury to society, or that they were a nuisance. That that cannot be the position of Government is clear from the fact that it is provided at the end of clause 6 that these men, who have existed to this day, will continue to exercise their functions as medical officers to the public after this Act comes into force. So the position of Government is this, that Government does not say that these are men who are obnoxious members of society, or who have done any positive injury to society. Then the question resolves itself into this :—'Are these people who have hitherto been necessary for medical help in this country, who are allowed after the Act to continue to render medical help to the country, do they become really a positive source of injury to the country that they should be at once stopped? What is the result of this stopping at once? The result will be that we will not have the number of doctors which the country needs. The Hon'ble Mr. Banerjee said that the acceptance of his amendment will have the support of Bengal, but I say what is more, it has the support of reason, it has the support of equity. But

then there is one thing. The proviso to clause No. 6 of the Bill says 'Provided that nothing in this section shall apply to the use by any person of any title, description or addition which, prior to the commencement of this Act, he used in virtue of any degree, diploma, license or certificate conferred upon, or granted or issued to him.' Now by this proviso those men who were holders of certificates before the passing of the Act will have the privilege of practising medicine. The Hon'ble Mr. Banerjee says—'Extend the period.' Now, suppose the period is extended; it will require consequential amendment; because what will be the result of accepting the amendment? Without a consequential amendment, the result will be that these men who, after the passing of the Act, receive certificates will not be authorised to practise medicine, because the proviso to that clause says that only those persons who hold a certificate of a date prior to the passing of the Act will enjoy the privilege of practising medicine, whereas to those men who would receive certificates under the extended period covered by the amendment of the Hon'ble Mr. Banerjee, that proviso will not apply. So the result will be that, even if we accept the amendment, without having a consequential amendment, the result will be that certificates will be not worth as much as the pieces of paper on which they are written. While I certainly support the Hon'ble Mr. Banerjee in his amendment, I say that the matter has not been considered sufficiently. Is Government prepared to allow these men turned out by these institutions to continue as practitioners after this Act is passed? Considering that it is only justice that those who are actually students at the present day, and considering that the need of the country is that we require more medical men, I hope the Hon'ble Sir Pardey Lukis, on behalf of Government, will see his way to accept the amendment with the consequential amendment. As regards the time, two or three years, I am not in a position to say which will suit the condition of the country. That can be decided best by Sir Pardey Lukis."

The Hon'ble Sir Pardey Lukis:—"I regret extremely that I must once again oppose the amendment proposed by my Hon'ble friend Mr. Surendra Nath Banerjee. In order to explain my reasons for so doing, I must go a little more fully into detail as regards the genesis of the self-constituted medical colleges of Calcutta than I did when introducing this Bill into Council last September.

"The parent institution was the College of Physicians and Surgeons of Bengal, which was originally started in 1884 under the name of the Calcutta Medical School. All went well until 1904-05, when the late Dr. Fernandez, who was at that time the Secretary owing to a difference of opinion with the other members of the Committee, decided to start another school in Wellesley Street, which he named the College of Physicians and Surgeons of Calcutta. The following year Major Sinha, I.M.S. (Retired) and about half the staff of the new school, finding themselves at variance with Dr Fernandez, seceded from that institution and started the College of Physicians and Surgeons of India in Motts Lane. After the departure of Major Sinha for England, the management devolved upon Major Basu, I.M.S. (Retired) and Dr. S. K. Mullick, but these two gentlemen found themselves in disagreement. Accordingly, in 1907, Dr. Mullick severed his connection with the College of Physicians and Surgeons of India, and started 'the National Medical College of India', in Bow Bazar, so that, in the result, three new schools sprang into existence between the years 1905 and 1907, all running in competition with the parent institution of which they were off-shoots. It was the sudden appearance of these institutions which induced the Government of Bengal in 1908, when submitting their proposals for the introduction of the Medical Registration Act, to suggest the inclusion of penal clauses somewhat similar to those of the present Bill. Whilst the Bengal proposals were under consideration by the Government of India, an application was made to the Local Government by one of these newly started medical colleges asking for a certain grant-in-aid. Two experienced medical officers were then deputed to inspect the institution, in

[15TH MARCH, 1916.] [*Sir Pardey Lukis.*]

communication with it authorities,and to report as to its suitability for recognition by Government to the extent proposed. The opinion of the Inspector-General of Civil Hospitals of Bengal was also asked for. That officer, in forwarding the report of the inspectors, stated that the so-called college had scarcely any equipment or other facilities for imparting proper medical education to its pupils, and he expressed strongly his opinion to the effect that this inspection brought out clearly what had for a long time been obvious, namely, the need for bringing the operations of the self-constituted medical schools under control in order to prevent the European system of medicine from falling into undeserved disrepute. He concluded by saying, however, that he was far from wishing that anything should be done to cripple the legitimate expansion of Indian institutions, and he gave it as his opinion that, if all the existing so-called medical schools were to amalgamate into one really good non-official college, and if their wealthy patrons were to subscribe the necessary funds to provide the requisite buildings, a scheme might be evolved worthy of the recognition of Government, but that, as things then were, he could not recommend that Government should in any way recognise the existing conditions, or accede to the request of the authorities of the self-constituted medical school in question. The next step was in August, 1910, when the Government of India addressed the Government of Bengal, stating that it was undesirable that legislation should be undertaken against these self-constituted medical colleges until an effort had been made to induce all or some of them to unite in forming one really good teaching institution. The Government of Bengal then addressed the Inspector-General of Civil Hospitals in December, 1910, directing him to convene a Conference in Calcutta, in which the heads of the various self-constituted medical schools might meet himself and various official and non-official representatives, in order to discuss the point raised by the Government of India. In compliance with these instructions, two meetings were held in Writers' Buildings on the 23rd and 27th of March, 1911, but no definite conclusions were arrived at, chiefly as a result of the clashing interests of the various institutions concerned and the opposition of their representatives. Here, apparently, the matter was allowed to drop, and nothing more was heard on the subject. After two years had elapsed without any progress being made, the Government of India decided to render financial assistance to the parent institution—the College of Physicians and Surgeons of Bengal—with a view to its ultimate affiliation to the University of Calcutta—a result now happily attained. Having thus provided for the future of the Belgatchia school, the Government of India next addressed all Local Governments in May, 1913, asking for their views as to the desirability of the introduction of the present Bill, and on the receipt of their replies, which were practically unanimous in favour of this proposal, a reference was made to the Secretary of State in December, 1914. His permission to introduce the Bill was received in February, 1915; the decision was immediately communicated to the Press, and the Bill was introduced into Council the following September. It is obvious, therefore, that the proprietors of these institutions have had ample warning of the intentions of Government, and they have only themselves to blame if, failing to recognise that these intentions were serious, they continued to admit large numbers of pupils as though nothing were likely to happen. There is absolutely no justification for the allegation made in a certain memorandum that has been widely circulated amongst members of this Council, to the effect that nobody could foresee that this Bill would fall upon the students as a bolt from the blue. For these, reasons I am unable to recommend that the two years' grace already granted as regards the issue of certificates should be extended to four years. The Government of India have been very patient and long suffering in this matter, but there is a limit even to their patience. Nor can I see any necessity for such extension. The memorandum above quoted states that there are 'hundreds' of students in the 1st and 2nd year in the private institutions except Belgatchia. In view of the fact that the so-called College of Physicians and Surgeons of India is now extinct, and that Drs. Monier and Manuk (the successors of the late Dr. Fernandez) have announced their intention of closing the College of Physicians and Surgeons of Calcutta at the end of this month, it is obvious that these 'hundreds' of

1st and 2nd year students must all be in the National Medical College of Dr. S. K. Mullick, and I can only say, if this supposition is correct, that, in view of the actual size of his institution, I find it difficult to understand where he accommodates these young men; how he arranges for their instruction; and what explanation he has to offer for having admitted such large numbers at the present juncture.

"I would point out, moreover, that the case of the 3rd and 4th year students, in which are included all those who have completed two years of professional study, is on a different footing to that of students of the 1st and 2nd year: the former would have to go back to the very beginning and repass all their earlier examinations, thereby suffering great loss of time and money. This does not apply to students who are merely commencing their 2nd year's course, and who, in consequence, cannot have passed their examinations in Anatomy and Physiology.

"For these reasons, Sir, I am unable to accept the amendment."

The Hon'ble Mr. Surendra Nath Banerjee:—Sir, the Hon'ble Surgeon-General has given us a history of the circumstances which have led up to the present legislation. It is a most interesting history and it certainly discloses the solicitude of the Government in the cause of private medical education. But apparently the object of stating these facts in this Council was to point to the conclusion that there was really no grievance, and that the proprietors—I think I am quoting the Surgeon-General's own words—had ample notice of what was coming on, and that they should have been prepared for this legislation. Perfectly true, so far as the proprietors are concerned, but what about the students? I am not concerned with the proprietors in the slightest degree. The proprietors may be hanged, drawn and quartered for the matter of that. My interest is in the students. Does the Surgeon-General really mean to say that the students, as a class, knew what was transpiring in the Secretariats, what was taking place in the Conferences and in the correspondence that was passing between the Provincial Governments and the Imperial Government? I know something of those students; far too absorbed are they in their own work, and sometimes, in their play. They would not concern themselves with these things. These are matters which would not be known to them; they would not be cognisant of them, and I think it is only right and proper that a sympathetic and a merciful consideration should be extended to them, apart from whatever treatment may be dealt out to the proprietors. With the proprietors, who betray their trust, who try to make money out of the students, who do not perform their duties, I have no concern, but for the students who are their meek and humble victims, I feel the deepest sympathy, and I appeal to the Government to extend to them that sympathy which every right-minded man must feel in connection with them. The Hon'ble Member says that the students have crowded into Dr. S. K. Mullick's school because they have been dismissed from the other schools. I do not know, I think that is mere assumption. I think that with this Bill hanging before them, the students would seek to discover other walks of life. I should think that, while Dr. Mullick's institution was suspended in the air, between heaven and earth, its fate unknown and its future enveloped in mystery, the students would not be so foolish as to enter that institution, at least in their hundreds. Therefore, there may be a few more students in Dr. Mullick's school than perhaps there were before. I appeal on behalf of the students, and I venture to submit that this concession should be made. The Hon'ble Surgeon-General has endeavoured to adapt himself, so far as practicable, to the demands of public opinion, and the Bill, as it has emerged from the Select Committee, is proof positive of his solicitude in that direction. Sir Pardey Lukis must have noticed that there was, on this side of the Council at least, a strong feeling that my amendment should be accepted, and in view of the fact that he is legislating for us, for our students, for those in whom we are interested, whom we know most, I think it is only right and proper that he should, in this

[15TH MARCH, 1916.] [*Mr. Surendra Nath Banerjee; Sir Pardey Lukis.*]

matter, defer to our opinion. Sir, I cannot withdraw this amendment. I must press it to a division, if necessary."

The amendment was put and the Council divided as follows:—

AYES—15.		NOES—35.	
The Hon'ble	Raja Abu Jafar.	The Hon'ble	Sir William Clark.
"	Raja of Mahmudabad.	"	Sir Reginald Craddock.
"	Dr. M. N. Banerji.	"	Sir William Meyer.
"	Pandit Madan Mohan Malaviya.	"	Mr. C. H. A. Hill.
"	Mr. Vijiaraghavachariar.	"	Sir C. Sankaran Nair.
"	Mr. Rama Rayaningar.	"	Mr. G. R. Lowndes.
"	Khan Bahadur Mir Asad Ali Khan.	"	Mr. W. M. Hailey.
"	Mr. Surendra Nath Banerjee.	"	Sir R. W. Gillan.
"	Maharaja Ranajit Sinha of Nashipur.	"	Mr. F. H. Stewart.
"	Mr. M. S. Das.	"	Mr. W. H. Cobb.
"	Mr. Qumrul Huda.	"	Mr. J. B. Wood.
"	Rai Sita Nath Ray Bahadur.	"	Mr. H. Sharp.
"	Lt.-Col. Raja Jai Chand.	"	Sir Edward Maclagan.
"	Mr. M. B. Dadabhoy.	"	Mr. R. A. Mant.
"	Sir G. M. Chitnavis.	"	Mr. J. B. Brunyate.
		"	Mr. H. Wheeler.
		"	Mr. C. E. Low.
		"	Major-General B. Holloway.
		"	Mr. G. B. H. Fell.
		"	Sir Pardey Lukis.
		"	Mr. R. P. Russell.
		"	Mr. C. H. Harrison.
		"	Mr. A. H. Grant.
		"	Mr. C. H. Kesteven.
		"	Mr. L. Davidson.
		"	Mr. J. G. Cumming.
		"	Mr. C. E. A. W. Oldham.
		"	Mr. C. W. M. Hudson.
		"	Lt.-Col. D. B. Blakeway.
		"	Mr. C. H. Atkins.
		"	Mr. J. Walker.
		"	Lt.-Col. P. R. T. Gurdon.
		"	Mr. R. E. V. Arbuthnot.
		"	Maung Bah Too.
		"	Mr. J. H. Abbott.

The amendment was accordingly negatived.

The Hon'ble Sir Pardey Lukis:—"Sir, I beg to move that the Bill, as amended, be passed.

The motion was put and agreed to.

The Council here adjourned for Lunch.

[15TH MARCH, 1916.] [*Mr. J. H. Abbott.*]

RESOLUTION *RE* CONSTITUTION OF A COMMITTEE TO INQUIRE INTO DIETARY ARRANGEMENTS, ETC., OF CHILDREN IN EUROPEAN BOARDING SCHOOLS.

The Hon'ble Mr. J. H. Abbott:—"Sir, I beg to move the Resolution which stands against my name :—

'That this Council recommends to the Governor General in Council that wherever there are European Boarding Schools, committees consisting of officials and non-officials be constituted by the Local Governments for the purpose of inquiring into the physical condition of, and the dietary arrangements for, the children therein and reporting thereon to the Director of Public Instruction.'

"In moving this Resolution I consider it peculiarly suitable to the present needs of the moment, the time when the problems of education and sanitation are so much before the public, and are receiving the earnest consideration of this Council.

"Perhaps there is no more supreme duty devolving upon the Government of a State than the careful care and upbringing of the child; for the boy or girl of to-day will be the citizen of to-morrow—soldier, doctor, lawyer, administrator, may be on the one hand, or on the other hand, the mother. The healthy development of the child, carefully moulding him year by year for the battle of life, depends wholly upon education of mind and body surroundings and nourishment. 'A sound mind in a sound body' is a very old saying, but nevertheless as true to-day as of yore; no mind can be developed, if the body, the temple of the soul, is ill-nourished, ill-cared for, and ill-clothed. These truisms have long been translated into Statutes in most European countries. The recognition of the appalling effects of under-feeding in schools has led in our Mother Country to the passing of the Education (Provision of Meals) Act of 1906, and the Education (Administrative Provisions) Act, 1907. In furtherance of the same objects, the London County Council, and other local bodies throughout Great Britain have appointed Children's Care Committees, whose primary duties are to visit the Public Elementary Schools, seek out ill-nourished and sickly children, and see that proper care and nourishment is afforded them. And even if the parents cannot afford the required food, the State steps in and makes it their business to see that the growing child has a fair chance; that he obtains that bodily and mental nourishment so essential to mould him into a good and loyal citizen of the nation.

"Sir, I do not ask that the State should go quite so far in the case of European schools in India. All that I ask is, that some measure of protection may be afforded to the children attending such schools. Such schools are, and have always been, almost entirely under private management. The only European schools wholly State-managed are a few special secondary institutions of a particular character directly under Local Governments; these include the Lawrence Military Asylums of Ootacamund, Sanawar and Murree. It is a well known fact that the management and administration of many of our privately managed and administered schools in India are not what should be desired, and are more or less in financial difficulties; and what is the consequence? Economy must be practised. And in many cases it is unfortunate to relate, economy lies in the direction of the curtailment and cheap supply of food. Sir, what is the result? Under these circumstances, such a condition of affairs must lead to the starvation of the bodies or minds of the pupils. It cannot be otherwise.

[15TH MARCH, 1916.] [*Mr. J. H. Abbott.*]

"It has been forcibly brought to my attention, although I have not sought for the information, that children in a robust state of health, are sent to such schools by parents, but when they return home for periodical vacations, they present a more or less washed-out anæmic appearance. These conditions cannot be attributed to any other causes than that of want of sufficient nourishment, insanitary environments, and perhaps, too, at times, aggravated by harsh or even cruel punishment.

"Sir, incredible as it may sound, the prisoners in His Majesty's jails in India are better protected by law regarding dietary and sanitary arrangements than are the pupils of our Schools. Take, for example, the fact that the inmates of a jail are periodically weighed, that a minimum scale of food allowance is fixed, which guarantees that each prisoner must receive the quantity of food allowed him by the regulations governing such institutions; that should harsh punishment be unjustly inflicted on one of them, the mode, the method, and the punishment can be investigated, criticised and reported to the authorities superior to those who are in charge. Should any one individual be found to lose weight, appear ill-nourished, or to suffer in any way for want of care and attention, the fact has to be reported to the Inspector-General of Prisons. Such, Sir, is the attention bestowed on criminals—where any abuses which may exist in jails are discovered, investigated, and the necessary action promptly taken. Such a systematised state of affairs does not exist in any of our privately-managed Boarding Schools; and I plead, on behalf of our children, with all the eloquence at my command, that such be introduced, that a food-scale definitely defining the minimum allowance for children be framed, and be binding on School Authorities; that each child at regular stated intervals be weighed and measured by school authorities in the presence of their Medical Officer, and the weight and measurement be notified to the parents concerned in the monthly report of the child. Surely the off-spring of those men, so large a proportion of whom give their best service to the State, are entitled to the same privileges criminals enjoy?

"Sir I do not propose, with the limited time at my disposal to describe fully the duties of Committees, which I ask in my Resolution to be appointed, but, with your permission, I shall endeavour to briefly outline their duties It is most essential that the Committees once constituted should comprise only entirely independent persons fully representative, and thoroughly capable; and should in all cases be nominated by the Collector or Deputy Commissioner of the district. The members, individually or collectively, should pay strictly surprise visits to the schools under their care, paying particular attention to the food—the quantity and quality supplied They should also pay attention and check the weights and measurements of the children. Should any child be found to be losing weight, or to show signs of emaciation, or to bear marks of severe punishment, the Medical Officer should furnish his report forthwith, together with that of the Visitor or Visitors, as the case may be, to the Director of Public Instruction of the Province concerned. They should immediately determine if the cause of emaciation is due to insufficient nourishment, to ill-treatment, or to any other fault of the school; or whether the cause is due to some organic disease; and if the latter, prompt action should be taken to arrest the disease; and the parents should, as in all case of sickness, be immediately informed of the condition of the child. In all cases the suggested visitation of such Committees, systematically, regularly and conscientiously made, would act as a great safeguard over the children to whom the country owes a solemn duty.

"Sir, I must now conclude. I have tried to portray the feelings which have actuated me to bring forward this Resolution, and I leave the matter to the Council, with the assurance that they will give the subject the attention it deserves."

[*Sir C. Sankaran Nair; Mr. Surendra Nath Banerjee; The Vice-President.*] [15TH MARCH, 1916.]

The Hon'ble Sir C. Sankaran Nair:—"Sir, the Government of India realise that the children attending schools must be in such a physical condition that they may be able to take advantage of the education therein imparted. Otherwise the curricula ought to be modified or steps taken to improve the physical condition of the children. Inquiries are already being made by Local Governments, by means of individual inspections of school children by medical officers, to collect information to enable the Government or school authorities to take remedial and precautionary measures. With the experience already gained, the Government of India have no doubt that such inquiries will be more vigorously prosecuted. My Hon'ble friend will, therefore, understand that the Government of India are in full sympathy with the object that he has in view. Nevertheless, I regret that the Government cannot accept his Resolution. It is not necessary now to refer either to the facts which he has stated or to the reasons that he has advanced. I am free to accept many of the statements he has made. Some of the arguments do not appeal to me, but it is not necessary to refer to them all. If Hon'ble Members will refer to the Resolution itself, they will see that the Government are thereby requested to constitute a Committee, consisting of officials and non-officials. Many of these schools are under the supervision of governing bodies, and it is their duty to make the inquiries that are referred to in the speech of my Hon'ble friend. There is no reason to supersede them, unless it appears that the Committees that might be appointed would perform the duties much better. Again, leaving aside medical officers for the present, it is very doubtful whether officials who have the leisure to attend to these duties can be found in all these places. And my Hon'ble friend wants independent persons—entirely independent persons, fully representative and capable. Such men are not easily found. To lay, therefore, an obligation on the Local Governments to appoint Committees consisting of such officials, it may not be possible to find them; or consisting of such representative persons—it may not be possible to find them either; is out of the question. But if my Hon'ble friend wishes it, the Government are prepared to go far to meet his views. There is no reason why the Local Governments should not appoint such Committees where the conditions are favourable and where the Government can get officials and non-officials of the character referred to by my Hon'ble friend. We are prepared, therefore, to forward a copy of my Hon'ble friend's Resolution, with his speech and the Proceedings of this day, to the Local Governments for them to take action where the local conditions justify it. Further than that we are not now prepared to go.

"Though the Resolution is confined to the constitution of Committees to make inquiries, in his speech my Hon'ble friend has gone very much further. He asked that a food scale definitely specifying the allowance for children should be framed by the school authorities. That goes very much further than what he indicated in the Resolution itself, and therefore I do not refer to that part of the Hon'ble Mover's speech.

"For the reasons I have given, Sir, we are unable to accept the Resolution."

The Hon'ble Mr. Surendra Nath Banerjee:—"Sir, I have just one word to say in connection with the Resolution and the speech of my Hon'ble Friend. The Resolution confines itself to European boarding schools. There are Indian boarding schools quite as important and far more numerous than the European boarding schools. Is the attention of the Government to be drawn solely and exclusively to European boarding schools in preference to Indian boarding schools?"

The Hon'ble the Vice-President:—"Order, order. The Resolution we are discussing is one relating to European boarding schools. As the Hon'ble Member knows, we are not discussing Indian boarding schools."

[15TH MARCH, 1916.] [*Mr. Surendra Nath Banerjee; Mr. J. H. Abbott; Khan Bahadur Mir Asad Ali Khan.*]

The Hon'ble Mr. Surendra Nath Banerjee:—"I just wanted to suggest that, as the Government is going to make an inquiry, they might include the case of the Indian boarding schools also. That is all I have to say, and I hope that my Hon'ble friend, the Education Member, will consider the matter favourably."

The Hon'ble Mr. Abbott:—"I must thank the Hon'ble the Education Member for the sympathetic way in which he has dealt with my Resolution, and I feel sure that something will come of it. I do not think I need refer to what the Hon'ble Mr. Banerjee said just now. I did not know how far any interference in this matter was possible or desirable in Hindu and Muhammadan schools. I therefore did not include them in my Resolution.

"With these remarks I withdraw my Resolution."

The Resolution was, by permission, withdrawn.

RESOLUTION *RE* PLACING THE ANCIENT AND INDIGENOUS SYSTEMS OF MEDICINE ON A SCIENTIFIC BASIS.

The Hon'ble Khan Bahadur Mir Asad Ali Khan:—"I beg to move the following Resolution:—

"That this Council recommends to the Governor General in Council that the Government of India, in consultation with Local Governments, should investigate the possibility of placing the ancient and indigenous systems of medicine on a scientific basis and increasing their usefulness."

"In doing so, I desire to draw the attention of the Council to the state of public feeling in the matter. The passing of the Medical Registration Act in different provinces, the hasty and ill-advised action of the Madras and Bombay Medical Councils against certain leading Indian practitioners for their interest in, and association with, Ayurvedic institutions, a matter favourably disposed of subsequently, and the generally unsympathetic and sometimes prejudicial attitude—with notable exceptions indeed—of the Indian Medical Service towards the indigenous systems of medicine, have really brought to the forefront the Ayurvedic as well as the Unani system. While the allopathic system has received more than full recognition at the hands of the Government, the other systems, especially the two indigenous systems, have been left uncared for. While continued efforts have been made through legislation and by other means to safeguard and promote the interests of the modern system, nothing so far has been done to revive the ancient systems, and encourage their practice. That there has been within recent years a considerable intellectual awakening among the peoples of India cannot be denied. Both Hindus and Mussulmans are endeavouring, in the words of our gracious King-Emperor, 'to conserve the ancient learning of India,' and wherever possible, reconstruct the old edifice on modern lines. Hence people are asking whether it is not one of the functions of the State to give as much medical relief as possible to suffering humanity, and whether the Ayurvedic and Unani systems which, though shorn of their ancient glory through neglect of ages, are still largely practised throughout the country, cannot be so improved as to minister to many millions of patients whom the allopathic system cannot possibly reach.

Public interest and sympathy are being roused by the publication of literature on the indigenous systems and the holding annually of All-India Ayurvedic and Unani Conferences in the principal cities of India. The founding of Ayurvedic and Unani colleges and dispensaries at important centres, and the growing interest in the study of these systems, are indeed unmistakable indications of a bright future for the Eastern systems. While I myself am not a believer in so-called 'systems,' I venture to think that the modern medical science has certainly made a notable advance. Even 'systems' are liable to change in the light of fresh facts gathered, new experience gained, and more light thrown on the subject.

"The Resolution, Sir, makes but a simple recommendation, at once modest and reasonable, and asks the Government to investigate the possibility of placing the indigenous systems of medicine on a scientific basi and increasing their usefulness. What the indigenous systems are, what is meant by a scientific basis, and what their usefulness is, will be presently explained, before the grounds for such investigation are put forward. The two widely prevalent indigenous systems are the Ayurvedic and Unani systems. It is perhaps too late in the day to question the antiquity of these systems, particularly the more ancient Ayurvedic system, which is said to be as old as the Vedas. These systems flourished during the Middle Ages, and reached a state of perfection Even to-day the advance made in therapeutics seems to go ahead of modern therapeutics. Both the Ayurvedic and Unani systems lay claim to great antiquity, much intrinsic value and high efficiency. While Ayurveda traces its source to the Vedas, Unani owes its origin to the Greek culture, and traces its development to the Egyptian culture and Arabic sources. Professor J. F. Royle of the King's College, London, in his essay on the Antiquity of Hindu Medicine, said:—'The antiquity and independent origin of their medicine display, I conceive, considerable merit not only as showing that they had at an early period paid attention to what now constitute the several branches of medicine, but also they had discovered various kinds of remedies as well as modes of applying them. That many of these are of a valuable nature we may readily be assured by looking at their Materia Medica, and our own obligations to it, as well as by remembering how recently some among them of old date have been introduced into European practice, as the smoking of *datura* leaves in asthma, the prescribing of Nux Vomica in Paralysis and Dyspepsia.' But he rightly added, 'From the mixture, however, of much ignorance and absurdity with what is valuable, many will be apt to despise altogether the medicine of the East.' The Right Hon'ble Mount Stuart Elphinstone bore testimony to the value of the system, when he remarked—'We are not surprised with their knowledge of simples in which they gave early lessons to Europe, and more recently taught us the benefit of smoking *datura* in Asthma, and the use of cow-itch against worms. Their chemical skill is a fact more striking and more unexpected.' Dr. George H. Clark spoke of the system thus: 'If the physicians of the present day would drop from the Pharmacopœia all the modern drugs and chemicals, and treat their patients according to the method of *Charaka*, there would be less work for the undertakers and fewer chronic invalids in the world.' Dr. A. F. Rudolf Hoernle of Oxford said: 'There is much that is valuable in the old Ayurvedic system of medicine; but there is much more that modern Hindu practitioners may, with profit to themselves and to their patients, learn from the great advances made by modern medical science.' The same remark may equally apply to Mussalman practitioners. Last, but not least, the Hon'ble Surgeon-General Sir Pardey Lukis, than whom there is no warmer friend of the indigenous systems of medicine, in his recent utterance at Indore referred in glowing terms to 'dechlorination,' and added, 'Any *Vaid* or *Hakim* could have told us, long before Widal and Javal made their experiments, that salt is contra-indicated in all dropsical affections.' So much for the greatness of the system One chief difference, however, between the Ayurvedic and Unani systems lies in the fact that the Hindu physicians use minerals too in their preparations, while the *Hakims* use chiefly herbs and drugs. To

[15TH MARCH, 1916.] [*Khan Bahadur Mir Asad Ali Khan.*]

either system modern surgery is practically unknown. Hence the desirability of improving these systems.

"By a scientific basis is meant that the ancient systems which through long neglect and consequent deterioration became rusty, should be so improved as to possess the advantages of the modern system, and brought up to date in the light of recent scientific researches. It must not, however, be understood that the ancient systems are unscientific. But it will be more correct to say they are, perhaps, less scientific. As for their usefulness, it need hardly be said that millions of patients, especially in rural areas, have to avail themselves of the indigenous methods of treatment. Many of those who practise the indigenous systems may be quacks. But the object of my Resolution is to reduce considerably the number of quacks, and have in their place a good number of duly qualified and trained *Vaidyas* and *Hakims*. Even as the present day physicians are, they are not such bad specimens as they are often portrayed to be, and the indigenous systems themselves have been useful and serve the purpose wherever no access can be had to modern methods of treatment. It must, however, be admitted that the indigenous systems are capable of improvement. They rely too much upon authority. If ever these systems should progress, they should be taught to base their theories and conclusions upon experiment and observation, the foundation stone of any rational system.

"There are good reasons why an investigation of the indigenous systems should be made. In the first place, the existing medical institutions, as well as medical practitioners, are quite inadequate to meet the growing requirements of the country. According to the latest figures available, there were, in 1913, 2,820 Civil Hospitals and Dispensaries treating a little over 515,000 in-patients and over 30 millions of out-patients; 851 State Special and Railway Hospitals treating a little over 98,000 in-patients and 2,331,000 out-patients; and 697 private non-aided institutions treating over 57,000 in-patients, and 4,828,000 out-patients. In other words, there are about 4,400 Hospitals and Dispensaries all over British India treating about 38 million patients, for a vast population of 240 millions. That is, there is one hospital for every 5,500 of the population. They are certainly inadequate. For an equally large, if not larger, number of patients who do not come within the reach of these medical institutions are, I believe, being treated generally by local *Vaidyas* or *Hakims*. If, however, the quality of these physicians is improved, be it ever so little, better results will surely follow, and mortality would gradually go down. Again, there are but five medical colleges with about 1,700 students and 28 medical schools with about 4,200 pupils for all India. Of these, the number of qualified students is very small. These numbers, too, are quite inadequate for the vast Indian population.

"The rate of mortality is very high when compared with that of the United Kingdom. In the United Kingdom, the death-rate was 14·2 per 1,000 of the population in 1913, against 17·1 in 1901, whereas, in India, it was 28·72 in 1913, against 29·45 in 1901. In England and Wales, it was 13·7 in 1913, against 1 ·9 in 1901; in Scotland, it was 15·5 against 17·9; and in Ireland, it was 17·1 against 17·8. In India, therefore, the death-rate is practically double of what it is in the United Kingdom In the urban area there is a higher death-rate than in the rural area. Among the provinces, Delhi showed in 1913 the highest death-rate of about 40 per 1,000 of the population, while Madras showed 21·40, the United Provinces, Coorg, the Punjab, Central Provinces, Bengal and Bombay recording 34·84, 33·48, 30·19, 30·28, 29·35, and 26·63, respectively. Thanks, however, to the recent sanitary measures of a benevolent Government, the rate of mortality, since 1911, has been showing a steady decline From 32·01 in 1911, it came down to 28·72 in 1913. But the rate of infant mortality is much higher. Fevers, cholera and plague have claimed millions of victims. Fevers alone have been claiming a death-roll of about four millions per annum for the last few years. Much of the sickness and mortality, as the moral and material progress and condition of India for 1913-14 says, is due to deficient

powers of resistance and to insanitary habits and surroundings. The sanitary laws of old which are embodied in the indigenous systems of medicine, if they are brought to light again and carefully adhered to, will surely tend to lower the death-rate and conduce to the better maintenance of the public health, as also a trained body of Ayurvedic and Unani practitioners, in addition to the Indian practitioners of the western system.

"Secondly, the indigenous systems should be improved in the interests of rural economy. The poor peasantry will find the indigenous treatment far less expensive than the allopathic treatment. While medicinal herbs, drugs and plants can easily be obtained in villages at little cost, modern medicine, whether imported or manufactured locally, would cost more. Moreover, villagers have far deeper faith in the indigenous methods of treatment, and family custom, orthodoxy and superstition will invariably favour the indigenous systems. To the poor villager, therefore, a cheap physician, good enough for all practical purposes, is a desideratum.

"Thirdly, the indigenous systems themselves, notwithstanding their defects, can still boast of a rich store of valuable medicine, as efficacious as western medicine. Rich in their Materia Medica, the Ayurvedic or Unani medicine can hold its own against modern medicine. The purity and excellence of certain Ayurvedic as well as Unani medicines have been appreciated by some of the best European physicians. If, therefore, investigation is conducted with zeal in this particular direction, the result will have justified the trouble taken. What is really wanted, is a little practical sympathy and freedom from bias on either side in order that the proposed investigation may yield fruitful results

"For these reasons, Sir, I would request the Government to investigate the possibility of placing these systems on a scientific basis. I may also be permitted to suggest that, in this task of investigation, the Supreme Government, as well as Local Governments will do well to invite the co-operation of renowned *Vaidyas* and *Hakims* and others interested in the study and practice of the indigenous systems. Bengal is rich in its *Kavirajes*. In other centres too, such as Kashmir, Benares, Lahore, Delhi, Calcutta, Allahabad, Bombay and Madras, there are competent authorities whose mature opinion will be of great use to the Government. As a preliminary step towards a complete investigation of the Ayurvedic and Unani systems of medicines, I should like to suggest the desirability of publishing in the original and in English translations of the most renowned and authoritative Treatises of medicine in these systems. Such investigation as the Resolution proposes, when undertaken with full responsibility and vigorously pursued, will not only help to resuscitate the ancient medical systems, but encourage and aid the existing Ayurvedic and Unani Institutions, and eventually lead to the formation of learned bodies or associations for the purposes of bringing into brotherly contact eminent practitioners of the Western and Eastern systems, of investigating indigenous drugs and methods of treatment, and of awarding titles, diplomas, and other marks of public recognition to those who distinguish themselves as students or practitioners of the indigenous systems at examinations instituted for the purpose.

"I hope and trust that this Resolution will meet with the unanimous acceptance of the Council."

The Hon'ble Mr. Rama Rayaningar:—"Sir, the Resolution, as it stands, reads as though the Hon'ble Mover wants us to understand that the Ayurvedic and Unani systems of medicine are not scientific, but that he does not really do so, is amply evident from his interesting speech. The Ayurvedic and Unani systems are not mere empiricisms; they are undoubtedly scientific. It is true that some of the theories that these systems postulate do not find favour with Allopaths; it is also true that, while the Allopathic system is progressing, the Ayurvedic and Unani systems remain stationary. They are as

they had been centuries before. This, however, does not mean that these systems are unscientific. That these systems are scientific has been admitted by great many eminent men. Lord Ampthill, one of our late Governors, said:—'Colonel King assures me that the ancient Hindus used animal vaccination secured by transmission of the small-pox virus through the cow; he bases the interesting theory on a quotation from Dhanvantari' and continuing His Lordship said—'I cannot refrain from mentioning yet another of Colonel King's interesting discoveries which is, that the modern plague policy of evacuation and disinfection is not a whit different from that enjoined in ancient Hindu Shastras.' Sir William Hunter has the following on the scope of Indian medicine—'Indian medicine dealt with the whole area of the science. It described the structure of the body, its organs, ligaments, muscles, vessels and tissues. The Materia Medica of the Hindus embraces a vast collection of drugs belonging to the mineral, vegetable and animal kingdoms, many of which have now been adopted by European physicians. Their pharmacy contained ingenious processes of preparation with elaborate directions for the administration and classification of medicines. Much attention was devoted to hygiene, regimen of the body and diet.' Speaking of the Ayurvedic medicine, Dr. Ray observed—'It is absolutely free from any trace of quackery or charlatanism.' As the Hon'ble Mover has already referred our much esteemed colleague, the Hon'ble Surgeon-General, more than once expressed his high appreciation of these great systems of medicine. What an irony of fate, though these systems are greatly appreciated by eminent men, they are by some condemned as worthless quackery. Whether professional jealousy or ignorance or something better, that is at the bottom of this condemnation it is not for me to say. Whatever that might be, there is no denying the fact that these systems are giving substantial medical relief to millions of Indians. People have great faith in these systems, indeed, in some cases, the cures effected by *Vayadas* and *Hakims* are really marvellous. After all as the learned Charaka says: 'Tadēva yuktam bhaishajyam yadarogyaya kalpaté Sachaiva bhishajam srēstho rogēbhyo yah pramochayēth'—that is the proper medicine which cures disease and he is the best physician who relieves from ailments.' Besides, indigenous medicines are comparatively very much less costly, and are within the reach of all people; the bulk of Indians are poor and have limited means. They cannot afford to pay for the costly allopathic treatment. Even if they can afford to pay, there are not sufficient number of allopathic medical practitioners to treat all the people. In these circumstances, I think it is the duty of Government to encourage the indigenous systems of medicine. Government can encourage Ayurvedic and Unani systems of medicine in various ways. They can have schools and colleges to teach these systems. They can publish authenticated texts on Ayurvedic and Unani medicines. They can offer research scholarships. It is, however, gratifying to note that Government have begun to take interest in the matter. Recently, when I interpellated Government on this subject, the Hon'ble Home Member gave a sympathetic reply. He said that the Government was considering the matter. It is time something substantial should be done. With these observations, Sir, I support the Resolution."

The Hon'ble Raja Saiyid Abu Jafar of Pirpur:— "Sir, the Hon'ble Mover has done a great service to the Indian public by moving this Resolution. For the Western medical system is undoubtedly a complete, and comparatively speaking, perfected whole comprising all the wonderful advances made by modern surgery, anatomy and therapeutical chemistry, based as it is, on unceasing and elaborate researches in the domain of disease and infection. But the Ayurvedic and Unani systems of treatment, which also had their days of glory and prosperity, still retains a considerable hold over the masses of this country. By a section of the people who profess great faith in these two systems, they are regarded as a very useful means of treatment, especially in some chronic cases. It is most desirable that these systems of

medicine should be revived and encouraged, which will be undoubtedly productive of enormous benefit to the people. It is regrettable that these indigenous systems of medicine have been dwindling away, neglected and uncared for, owing to the lack of a sufficient number of competent training institutions imparting instruction, and through a want of efficient qualified teachers. The greatest advantage in the Ayurvedic and Unani systems is that almost all the remedies of their pharmacopœias are indigenous, locally and more easily available, and cheaper than the imported drugs of foreign countries. Moreover, the proper spread of these systems of medicine and a multiplication of their practitioners will serve to supplement the number of doctors practising the westerm system of medicine which is already inadequate for the needs of the country.

"With these remarks, I accord my support to the Resolution."

The Hon'ble Maharaja Ranajit Sinha of Nashipur:—"Sir, I beg to support the Resolution. It is a fact that the indigenous systems of medicine, both *Kabiraji* and *Hakimi* are prevalent in this country. There are still several people who are prejudiced against western methods of medicine, especially Hindu widows, who generally resort to the *Kabiraji* and *Hakimi* systems of medicine; and now-a-days, owing to want of State encouragement, these systems are dwindling down. There are very few *Kabirajes* and *Hakims* who can be trusted with important and difficult cases, and so quacks are rampant in many parts of our country. Being a layman, I am unable to compare the indigenous system of treatment with that of the western method; but it is a fact that in most chronic cases the ancient systems prove efficacious, especially in cases of dysentery, etc., and I have known many instances of Europeans even resorting to the Ayurvedic treatment in preference to the Allopathic treatment. In fact, Government also encourages *Kabirajes* and *Hakims*, because I find from the Civil List that the Government have created the two titles of Vaidaratna and Shifa-ul-Mulk for the *Kabirajes* and *Hakims*, so, in a manner, Government also encourages the best *Kabirajes* and *Hakims*, and so, I think, it is time that the State should encourage this sort of treatment, especially because, as my Hon'ble friend has remarked, the poorer classes cannot afford to pay for Allopathic treatment as the charges of doctors are high and also the prices of medicines. In the case of indigenous medicines, the prices are very low and the *Kabirajes* do not charge heavy fees except, of course, in big towns and cities. My friend does not ask now for any State encouragement; he only asks that the matter might be investigated, that this system be put on a scientific basis. As many people depend on this system, I think it is desirable that it should be on a scientific basis, and that the lives of the people should not be left in the hands of quacks who do not understand either the Ayurvedic or Unani systems."

The Hon'ble Mr. Surendra Nath Banerjee:—"Sir, I desire to associate myself with the support that has been accorded to this Resolution by my Hon'ble friends. The question is one of great practical importance; it is not a theoretical matter in any sense, a question of mere research leading to no practical benefit; for, as the situation stands to-day, there are large sections of the community which avail themselves of the indigenous systems of medicine. Go to a village in Bengal, or to any other part of India, and you will find that the *Kabirajes* are in evidence; you will find that the *Hakims* are also conspicuously in evidence. Therefore, it is a fact which cannot be disputed that a very considerable section of our people, notwithstanding the prevalence of the western system of medicine, avail themselves of indigenous methods. There must be something in these methods to encourage them to have recourse to them; they must be benefited by these methods, otherwise they would reject them. That being so, I think it is the duty of Government to place these systems upon a satisfactory footing for the benefit of the vast masses of the

population who avail themselves of it. I think, Sir, that that is a clear conclusion to which the existing state of things points.

"Then, Sir, the Resolution is exceedingly moderate. I think my Hon'ble friend asks for no more than this, that the Government should investigate the possibility of placing the ancient and indigenous systems of medicine on a scientific basis Is it possible to do this? Whether it is possible or not, is to be the subject of inquiry. My friend does not say that it is. It is possible that, after examination, the attempt may have to be given up; but at the same time there is this fact, that these two systems of medicine are in vogue amongst our people, amongst the masses of our people. Who is to make the investigation? No public body has the means, no private individual has the inclination or the means. The Government wields the resources of the State, the Government alone commands the organisation and the means for carrying on the investigation. Therefore, it seems to me, having regard to the present situation, the basis upon which my friend places his proposition is exceedingly sound, exceedingly logical. Here is the Government, cognisant of the fact that there are large numbers of our people who avail themselves of these systems of medicine. These systems of medicine do need improvement, the Government alone can improve them, the Government alone can investigate the question as to the possibility of placing them upon a scientific basis, and that is what the Mover wants Government to do. I am sure my Hon'ble friend who will reply to this Resolution will see his way to accept it. It is an exceedingly moderate Resolution; it is necessary in the interests of the country, and what is more, it will satisfy a vast body of public feeling. For, say what you like about western systems of medicine, about the vast progress that they have made, about the immense and the unspeakable benefits that they have conferred upon our people, I think we cannot shut our eyes to the glories of the past. In the morning of the world, the Ayurvedic system was the only system in vogue. The Greeks borrowed their system from the ancient Hindus, the Arabs borrowed theirs from the Greeks. Therefore, if you go back to the misty past, you will find the Ayurvedic system prevailing. That system has outlived the vicissitudes of time and fortune, and is still an accepted system amongst the population of India. There must be something in it to account for this wonderful vitality, and therefore that fact points to the necessity of an investigation, of an investigation taken up by the great Government that presides over the destinies of this country, a Government which is the custodian of the ancient lore of India. And, therefore, it is with great confidence that I submit that this Resolution should be accepted by the Government."

The Hon'ble Rai Sita Nath Ray Bahadur:—"Sir, I beg to give my hearty support to the Resolution. Repeated attempts had been made in Bengal by *Kaviraj* Bijoya Ratna Sen to induce the Government of Bengal to give assistance to the indigenous systems of medicine by starting a central institution for promoting the study of the Ayurvedic system of medicine, and to put them on a sound and sure footing. But nothing came of his efforts, for the indigenous systems had never been looked upon with indulgence or sympathy. Who have not heard of the great *Kavirajes* Ganga Prasad Sen of Calcutta and Ganga Dhar of Murshidabad, and the very wonderful cures they used to effect in various hard cases, and especially in chronic cases. These indigenous systems are particularly most efficacious in chronic cases. Even now, the great masses of the people who live in the interior, and even the higher classes, always take advantage of the *Kaviraji* system to get themselves treated by *kavirajes* from whom they always get timely and effective remedy and relief. There is no doubt, as stated before, that the indigenous systems are most effective in chronic cases, and Government would do well to encourage the old systems, and to take steps to promote the study of those systems of medicine. I am glad that the passing of the present Bogus Degrees Bill will give a greater impetus to the study of the indigenous systems of medicine."

[*Sir Gangadhar Chitnavis; Mr. Madhu Sudan Dass; Mr. Surendra Nath Banerjee.*] [15TH MARCH, 1916.]

The Hon'ble Sir Gangadhar Chitnavis:—"Sir, as a representative of the Province where these systems of indigenous medicines are in practice to a certain extent, I also beg to support the Resolution, although I do not admit that the indigenous systems of treatment lack a scientific basis. I am glad the Hon'ble Mover also does not lay stress upon this point. If they were empirical, they would not have lasted for centuries, and would not have been popular to-day in spite of the competition of the western systems of Allopathy and Homœopathy. There is still a large class of people who believe in them, and the general experience is, that they are very good and helpful in the treatment of certain diseases. But it would be wrong to claim for them perfection The investigation recommended in the Resolution might be productive of good, and suggestions might be forthcoming which would increase the usefulness of the systems. Examination is the first condition of progress, and as these medicines are still used by a large class of people, any such improvement in the system is sure to benefit humanity. I accordingly support the Resolution."

The Hon'ble Mr. Madhu Sudan Dass:—"Sir, during the discussion that has followed the Resolution and also when the Hon'ble Mover was putting his Resolution before this Council, I frequently heard the use of the expressions 'Western' and 'Eastern' systems of medicine, and it was also said that they differed. There can be no two systems of medicine; medicine must have one scientific basis and one object in view. The object in view must be the cure of human diseases, and different systems followed in different countries may differ as regards the medicines they use, the drugs they use, or the instruments they use—such instruments differing in one country from those in another according to the advancement in other sciences made in each country. What must have been the origin of all medical science? If we go back to the primitive state of man, he must have gone about in a state of barbarism; disease must have overtaken him; he must have picked out some drug, used it and got cured. That was the first step of medical science, and then, as society advanced, the information collected by a number of individuals was tabulated. It was all in its origin empirical in character. Afterwards, the information has been classified, and has assumed now the dignified name of science. It is but natural that in the East—in India—man must have resorted to the drugs which are naturally produced in India, and it is equally natural that in the West man must have used drugs obtainable in the West. The West advanced and with the aid of chemistry they prepared different tinctures, and, whereas the *kabiraj* now prescribes a heap of weeds, Burroughs and Wellcome have made compressed tabloids of these weeds. It is a question of mere dimensions. All that this Resolution asks, is whether there is not sufficient material in India to form the basis of an investigation, and is it not likely that such investigation would bring to light the accumulated result of the experience of thousands of years? Science, Sir, is nothing but the classification of the result of human experience. What is science after all? Science is nothing but a survey of nature. Man looks round him and sees different objects, studies the nature of these objects, the virtues of the plants, and then he deduces his conclusions, and these conclusions form the basis of science, the result of scientific research. The Hon'ble Mr. Banerjee said 'if it is possible to build a science on it.' I do not understand why he should have gone so far as to doubt the possibility of it."

The Hon'ble Mr. Surendra Nath Banerjee:—"I rise to a point of correction. I did not doubt the possibility at all. I simply quoted the words of the Resolution. I said whether it was possible, and, if possible, Government was the only body to do it."

The Hon'ble Mr. Madhu Sudan Das:—"I submit that here we have the accumulated result of the experience of ages, and that result has not died away. The very fact that, since the incoming of the British here

the Western system of treatment has prevailed to a large extent and has received much patronage from the rich and the influential, but, notwithstanding all these disadvantages against it, the fact that the indigenous system has survived, shows that it has a vitality of its own, and that vitality it draws from the very nature of the soil and the environments of the country. Consequently, it is not at all desirable that such a treasure, a treasure which in fact is the accumulated result of such long experience, should be allowed to die out. In my own time I have seen, Sir, there was a time about 45 years or half a century ago, when the European doctor condemned *dahi* (sour milk). Now, I suppose, that *dahi* is prescribed by every doctor. Men who are lovers of science pick up anything that really contributes to the health of mankind; it does not matter whether it is from the East or West. Disease is the same whether it is in the Eastern body or Western body. A healthy Western body is just the same as a healthy Eastern body. Consequently, Sir, I think that this is a thing which should not die, while we are spending lakhs and lakhs to preserve a monument like the Taj Mahal, or anything of that kind which was meant to commemorate the life of one person. We should not be justified in allowing to die a system which has preserved in the past the lives of millions and millions, and is now doing the same work on the same scale. Should we be justified in allowing this to die? And to die of what? Financial starvation—to die from lack of sympathy from Government.

"With these remarks, I heartily support the Resolution."

The Hon'ble Mr. Qumrul Huda:—"Sir, we have all heard with interest the history of the Ayurvedic and the Unani systems of treatment just given by the Hon'ble Mover of the Resolution. Ayurvedic science flourished in India during the period of its highest civilization, and when the greater part of the world was very little acquainted with science. Unani, or generally called *Hikmat*, held its sway in Spain for about 800 years. In Egypt, it alone relieved suffering humanity and saved the lives of many till a comparatively recent date. The Hon'ble Mover in his lucid speech has sufficiently proved the fact that these ancient sciences—antiquated though they may look to a bigoted mind—are not such as to be left neglected and permitted to be buried in oblivion. I have heard remarks to the effect that *Hakims* and *Kavirajes* are quacks, but that is not the fault of the science these men profess to know, but the ignorance of the science on the part of the man who passes such remark. It may be admitted that these ancient sciences have not kept pace with the progressing European world. With the changes and the circumstances brought about by time, many so-called *Hakims* and *Kavirajes* have cropped up who cannot have the least pretensions to the science to which they falsely profess to belong. They are rather a slur on the profession. In these days the example of so-called *Hakims* or *Baids* will not be found wanting, who never learned or studied the science, but pretend to be *Hakims* because their grandfathers or great grandfathers in their time were renowned *Hakims* and had left some well-tried prescriptions. Admittedly such pretenders are a scourge and danger to the lives of Indian people. But why have such miserable and dangerous degradations crept into these noble sciences? The reason is not far to seek. The old institutions for imparting knowledge in this science were swept away by the change of kingdom, and no suitable institutions were found to take their places. When there was no criterion or standard left to judge the merits of those who claimed the knowledge of the science, it was a good day for the imposters to call themselves *Hakims* or *Kavirajes* as it suited their sweet will. Fearing a similar degradation of the European system of medicine, the Government was justified in introducing in this Council the Indian Medical (Bogus Degrees) Bill, though the cause of apprehended danger was not the same nor very similar.

"It is well known to the Government that there are still people in the land who have a preference for the Unani or Ayurvedic systems of treatment.

The Resolution we are discussing seeks, in a manner, for the sympathy of the Government towards these ancient sciences. Any action taken by the Government to teach these sciences on a scientific basis will shut the doors against pretenders and imposters. Naturally, it will improve the present condition of *Hakims* and *Kavirajes*. Thus, it will save the lives of many Indians who die for want of proper treatment. There are a few Madrasas for *Tib* and some colleges for Ayurvedic science in India. Let these be taken under the supervision of the Government, and I am sure in not very long time they will be turned into model *Tib* Madrasas and Ayurvedic colleges.

"With these few words, I support the Resolution."

The Hon'ble Sir Pardey Lukis :—"Sir, although I cannot agree with the remarks in regard to the alleged unsympathetic attitude of the Indian Medical Service towards the indigenous systems of medicine, it gives me very great pleasure to be able, on this occasion, to associate myself with the Hon'ble Mr. Surendra Nath Banerjee in supporting the motion of my Hon'ble friend Khan Bahadur Mir Asad Ali Khan, a motion which deals with practically the same subject as the Resolution recently proposed by the Hon'ble Dr. M. N. Banerji, *viz.*, the provision of competent medical aid for people in rural areas. The motion now before us deals with a subject to which I have devoted considerable thought during the 36 years of my residence in the East, and as I said the other day at Indore, the longer I remain in India and the more I see of the country and its people, the more convinced I am that many of the empirical methods of treatment adopted by the *Vaids* and *Hakims* are of the greatest value.

"I may say also that I do not recognise any fixed line of demarcation between the Eastern and the Western systems of medicine. The main difference between the two is, that whereas one has advanced the other has remained stationary, and that is why I am an advocate for the placing of the ancient and indigenous systems of medicine upon a scientific basis, thus increasing their usefulness. Modern medicine, as we know it to-day, is very different from the rough methods of treatment of the 'barber surgeons,' and we are ourselves only just emerging from the slough of empiricism. I well remember that in the early seventies, at which time disease-causing bacteria were unknown, I was almost howled down when I tried to deliver an address on the germ theory of disease before a Students' Debating Society. Hon'ble Members will recollect also that, until a few years ago, we believed malaria to be due to foul air, as its name implies.

"Why then should the Allopath arrogate to himself the right to appropriate for his individual benefit all new discoveries, denying these privileges to the practitioners of other systems of medicine? This appears to be especially unfair when it is borne in mind that 90 per cent of the Indian population live in rural areas where the *Vaids* and *Hakims* are—and will be for many years to come—the chief attendants of those dumb millions alluded to in recent speeches in this Council. It was in view of this, and in the hope that something might be done to raise the status and improve the education of *Vaids* and *Hakims*, that I insisted on a definite standard of education for the new type of vernacularly trained village practitioners which it is proposed to create, for I am strongly of opinion that, in the interests of the masses, the improvement of the education of those who profess the indigenous systems of medicine is quite as important as the invention of a lower grade of Allopathic practitioner. Personally if I were ill, I say frankly that I would prefer to be treated by a good *Vaid* or *Hakim* rather than by a bad doctor. I resent strongly that spirit of medical trades-unionism which leads many modern doctors to stigmatise all *Vaids* and *Hakims* as quacks and charlatans, and I shall always be proud of the fact that I was privileged to have the friendship of two such learned men as the late Nawab Shafa-ud-dowlah of Fyzabad and Kaviraj Bijay Ratan Sen of Calcutta. I will not trouble a lay audience with all the evidence that exists to show that many of

[15TH MARCH, 1916.] [*Sir Pardey Lukis; Mr. Vijiaraghavachariar.*]

the so-called discoveries of recent years are merely 're-discoveries' of facts known centuries ago to the ancients. I will merely remark that I am not alone in my opinion as regards the value of the ancient systems of medicine. If I err, I do so in good company, amongst whom I may mention my friend and former colleague, Sir Havelock Charles, Colonel King, of Madras, to whom India owes the magnificent Research Institute at Guindy, and that distinguished Sanitarian, Dr. Turner, the Health Officer of Bombay. For these reasons, Sir, it gives me great pleasure to be able to announce that I am authorised to accept this Resolution on behalf of the Government of India."

The Hon'ble Mr. C. Vijiaraghavachariar :—" I wish to say a few words, Sir. In associating myself with this Resolution, I thank the Hon'ble Surgeon-General Sir Pardey Lukis for the cordial sympathy he has extended to it. It does seem to me that there is some considerable difference of view between the Hon'ble Mover of the Resolution and the Hon'ble Sir Pardey Lukis, who has been somewhat misled, I think, by the speeches made in support of the Resolution. I am against treating the Ayurvedic and Unani systems of medicine as ancient monuments. I protest against it. I am also against providing the rural population with inferior practitioners, whether you call them Ayurvedic or Unani practitioners, or by whatever name you call them. If the Ayurvedic system and the Unani system are worth investigation they are worth investigation in the name of mankind, and not in the name of the rural poor. I come from the rural poor and I protest against the rural poor being treated as an inferior set of human beings to urban and suburban poor. What we want is, that the science—whether it is a perfect science or an imperfect science—should be investigated for its own sake apart from the uses to which it could be put in India. I also protest against having two sets of medical students and medical facilities in India, one for the poor and one for the rich. What we want is, that the medical future of India should be that, wherever people cannot afford to pay for such medicine and such medical aid, they must have it gratis or at half rates. Whether rich or poor, from Prince down to peasant, we must have the highest benefit which scientific skill can afford to us. The idea of two sets of institutions according as the people they will serve are rural or urban, rich or poor, is most vicious in principle and calculated to produce needless distinctions.

" I also protest against the statement that the ancient medical systems of India are entirely empirical. They had a scientific basis; they reached a certain degree of perfection, as most things in India did. There was progress, political progress, economic progress and progress in everything else; but for reasons we need not investigate now they came to a standstill, and medical science shared the fate of every other science. Then, the Hon'ble Sir Pardey Lukis made a claim for western medical science that it was advancing. I admit it is advancing; but I believe it is advancing mostly and only in one direction, namely, surgery. It is true surgery has decayed in India. If you look into any of the ancient books on surgery, you will find innumerable instruments that we cannot identify: they are named. Bones are also named. I believe something like 600 bones are named in Sanskrit literature, and over 140 or 150 surgical instruments. We don't know how to make those instruments now. But that decay began—it was not merely stationary but decayed—may be granted; while surgery has advanced in Europe to an extraordinary degree. But not Allopathy or anything else along with it. And one can understand why Europe has become the most military nation in the world, and it has summoned to its aid the science of inflicting the most deadly wounds. Those who know how to inflict the most deadly wounds must perforce also know how to cure them; for the two sciences, the science of inflicting the most cruel wounds on little or no provocation on women and children, and the science of surgery, are very intimately connected. I will not deny you this advantage. I freely and frankly admit that Europe

has made marvellous advance in the matter of surgery. But I deny that they are superior even now in the matter of treating diseases to the Ayurvedic and Unani systems of medicine. I am entirely serious when I say this. What is the practice in Southern India? My friend, the Hon'ble Mr. Surendranath Banerjee always speaks for Bengal. Let me for once speak for Southern India, although we, members of this Council, ought to speak for the whole of India and the whole of Burma. In Southern India this is the practice. In all matters of acute diseases, people — even the best educated people—have recourse to English medicine; but in all matters of chronic diseases, diseases which require long and patient treatment, they abandon western treatment, and take Unani and Ayurvedic medicines. I am not talking of the poor; I am not talking of those who cannot afford it; I am talking of all the people, both rich and poor. They all believe that European doctors are the best for providing prompt provisional remedies in acute cases and arresting their course, where that has to be done; but somehow they have got the belief that European medical science has not got good medicines to get rid of the disease altogether, and they therefore have recourse to the celebrated *hakims* and *kavirajes*.

"I can also quote the case of Japan, though I forget the exact authority. How has it been there? Japan, as we all know, learnt everything that the world could teach her, and it learnt the science of medicine, like every other science, from the West. She put the two together, her own science and western science, blending them into one and thus evolved a new system. With what result? In the Russo-Japanese War, she was able to cure 75 per cent of her wounded soldiers, while Russia was unable to cure 25 per cent. What we want is, a thorough investigation of Indian medical science, whether you call it Ayurvedic or Unani is immaterial; overhaul the whole of it and the medical future of India should be a State system in which, as in the Japanese State system, without any name the whole of medical science should be a blended mixture of the Ayurvedic, Unani and Western systems. No matter where the institutions are located, no matter who are the patients rich or poor, that will be the system used. If the Government is going to give us anything less than that; if you reduce your cordial support to the liberal support that you gave to the poor Resolution of the Hon'ble Dr. Banerjee the other day, I am very sorry for the motion, and I am very sorry for the support given by the Government of India. What I want is, that there should be an instalment of the future attitude of the Government, a formulation of that attitude now. We should thoroughly investigate these ancient systems of medicine, introducing Chairs into Medical Colleges for Oriental medicine and Chairs for all that is good in Oriental medicine. If that is not done, do what you like, the Oriental systems are bound to perish."

The Hon'ble Pandit Madan Mohan Malaviya:—"I feel thankful, Sir, for the discussion which has taken place on this Resolution. I also feel thankful to the Hon'ble the Surgeon-General for the sympathetic support he has given both on his own behalf and on behalf of the Government on the subject. The duty of the Government in this matter is very clear. The Government finds that the systems in vogue in this country are the Unani and the Ayurvedic, and that millions of people resort for medical help to those who practise these two systems. It is, I submit, clearly the duty of the Government—a humane call on the Government—to see that those who practise these systems receive the best education that can be given to them, so that they may be able to render the utmost aid, and also to minimise the chances of their doing any disservice to the people they serve. In that view I agree with my friend, the Hon'ble Mr. Vijiaraghavachariar, that the object should not be to confine the system of education in the Ayurvedic and Unani systems to those who are to be educated in the proposed vernacular schools, but that there should be a proper recognition of the worth and utility of these systems. In order that it should be so, there are only a few facts which

[15TH MARCH, 1916.] [*Pandit Madan Mohan Malaviya; Khan Bahadur Mir Asad Ali Khan; Mr. Dadabhoy.*]

have to be recognised. I think that the Resolution is somewhat unhappily worded in that respect, because it speaks of an investigation to find out whether the ancient and indigenous systems of medicine can be placed upon a scientific basis. I submit, Sir, that the true view would be that neither the Western nor the Eastern system of medicine rests very much on a scientific basis; or rather to put it in a different way, that the ancient and indigenous systems of India are not more scientific nor less scientific than the western system of medicine. But the fact is that the triumphs and discoveries which science has made have gone very much to serve and improve the western system of medicine. This is an undoubted and indisputable fact, and to that fact we ought all to be grateful Surgery has made undoubtedly great strides. In that respect the ancient systems lagged; as my friend has pointed out, we have to bring up the knowledge of surgery in the ancient systems of medicine up to date by incorporating a knowledge of western science in that direction; but in the matter of Materia Medica, in the matter of diagnosis and treatment of disease, the ancient systems of medicine have a great deal yet which will compare favourably with any other system. I am not concerned here, nor am I qualified, to institute a comparison between the two systems of medicine. My object is to point out that, as the Government finds that in this vast country a very vast number of His Majesty's subjects do place faith in the ancient systems of medicine, do resort to it in ill-health and times of trouble, it is the duty of Government to see that those who practise these systems of medicine receive the best possible education which can be given to qualify them for their profession. In that view, I hope that the Resolution will be taken up by the Government, not from the point of view of placing the indigenous systems of medicine on a scientific basis, but by promoting a systematic study of those systems alongside of the study of western medical science. It is a matter for sadness that for a long time, one hundred years and more, this duty has not been pressed upon the attention of Government. It is a pity, but it is never too late to begin a new reform, and in this matter I am very thankful that Government have shown an attitude of sympathy and willingness to institute an inquiry into the subject. I only hope that that inquiry will not be in the futile direction of placing one or the other system of medicine on a scientific basis, but on enriching the indigenous systems, by incorporating all that is best in the modern system and all that is lacking in the ancient system, of blending them together in such a way, that it will serve mankind in the best possible manner to the benefit of the people and to the immense credit of Government. I strongly support the Resolution."

The Hon'ble Khan Bahadur Mir Asad Ali Khan:—" Sir, I do not think it is necessary for me to make any speech at this stage. I must thank Sir Pardey Lukis and the Government of India that they have been pleased to accept my Resolution. I must also thank all my non-official colleagues for their suport of my Resolution."

The Resolution was put and accepted.

RESOLUTION *RE* EXHIBITION OF WAR FILMS IN SCHOOLS.

The Hon'ble Mr. Dadabhoy:—I beg to move the following Resolution:—

'That this Council recommends to the Governor General in Council that steps be taken by Government for the exhibition in all schools and colleges under Government control of the official war films, and for the introduction in them generally of the cinematograph for the impartation of instruction in hygiene, sanitation and agriculture.'

[*Mr. M. B. Dadabhoy.*] [15TH MARCH, 1916.]

"I need hardly commend this Resolution to Hon'ble Members with any lengthy remarks. The utility of the cinematograph as an instrument of instruction is obvious. As Professor Gregory of Glasgow pointed out, it 'is the most complete and the most vivid method of illustration.' It is very useful in the teaching of geography and natural history. Besides, in the words of Professor Gregory—

'In technical education the kinematograph promises to afford incalculable help. It will give medical students in all parts of the world the opportunity to observe special surgical operations, and to see them even better than they could do if present at the operation itself. It will, moreover, display costly industrial processes to students who have no chance of seeing them in actual practice.'

"In America, France, Germany and Japan the cinematograph has been introduced in schools. The Americans disseminate useful knowledge about phthisis and other diseases, and the fly and mosquitoes through the cinematograph, and in Pennsylvania it is used to great advantage in agricultural and horticultural education. In England, doubtless, Government has not done much in the line, but political, charitable and municipal organisations requisition the services of the cinematograph for their special purposes The Women's Imperial Health Association communicates valuable information through the celluloid film. Its employment in schools for instruction is likely to be appreciated most in India, and the short experience we have had of it justifies the conclusion that it has already gained a firm hold upon the popular mind. It fits in well with the ancient traditions. The Sanskrit lore, the richest perhaps in the world, for centuries was transmitted from generation to generation by word of mouth, and representation either on the stage or in the village fair by means of shows has always formed one of the most effective agencies in the education of the masses. It is true according to the Western test of literacy as applied at present, the bulk of the people are submerged in ignorance, but so far as the high caste Hindu population is concerned, thanks to the efforts of the peripatetic expounders of the *shastras* and the great epics, and of the organisers of the village shows, there is a considerable amount of ethical and spiritual knowledge even among the common people which helps to imbue them with sober ideas and a lively sense of their duty towards their King and country and towards themselves, and gives them a general refinement. And this knowledge has survived through centuries of chaos, misrule, war, rapine and successive foreign aggressions. The Mahomedans also have similar agencies for popular education. They have their *mullahs* and their fairs from time immemorial. And not only that: They have been influenced to some extent by the Hindu institutions. It may be broadly stated that, barring the aboriginal tribes inhabiting the hills and the jungles, the people have depended more upon shows than anything else both for the education and the delectation of the masses. 'Nature study' similarly, about the necessity of which we hear so much nowadays, has been one of the principal courses of education in orthodox India. The *asrams* formed the schools of Hindu India, and situated as they were far away from the hubbub of the towns amidst hills or beautiful forests or on the banks of the mighty rivers, hill streams and rapids, the scene afforded the amplest opportunity to the Indian pupil to imbibe all that a rich and bountiful Nature has to impart to the earnest inquirer. Life in the *asrams* was in itself a course of study of inestimable value. But the order has changed; new factors have come into play, and the conditions of life and study of the present day have destroyed the corrective and ennobling influence of the indigenous system of education. And informed opinion is that this has not been all to the good. We have lost much that was valuable in the previous system. But the die has been cast; a reversion to the old methods is not to be seriously thought of. Sound progress will lie in the judicious use in the schools and the colleges of the great scientific inventions of the world, alongside of the conventional instruction through secular books, with additional instruction in religion wherever practicable.

"Now, Sir, the European War that is going on, the greatest in the history of the world, should not be lost upon the youthful section of the people of the

country. The youths are the hope of the future; they will be our future citizens. Any effort to strike their imagination with the might of the great Empire of which India, through the wise Dispensation of Providence, forms an integral part, to instil in their minds a due sense of proportion, and to give them a proper idea of the responsibilities of the coveted Imperial citizenship, can never fail to have upon the country as a whole the most beneficial and abiding influence. Years ago, after the Chitral Expedition, a Military Tournament was arranged in Calcutta by Colonel Chatterton, and it was an effective demonstration of the military strength of this Indian Empire which appealed powerfully to the Bengal public. Even now as we discuss this resolution a Military Tournament is held in Calcutta for the War Fund. But the necessity of holding such Tournaments is no longer present after the introduction of the cinematograph. Every manœuvre, every little detail of the movements of colossal armies, the exploits of the invincible Royal Navy, which is the bulwark of the political independence and the commerce of the British Empire, the conveyance of war materials and provisions, the transport of troops and of volunteers going to the Front from India and His Majesty's Overseas Dominions under an impelling sense of duty,—in short, the numerous details of the huge machinery employed against the mighty forces of unscrupulous militarism, can be exhibited before the Indian public through the cinematograph at a minimum of cost and the maximum of profit. And it is of the first importance that the impressionable oriental youth should have laid before him the unique object lesson of this great War. It is desirable in the interest of law and order, it is necessary in his own interest that he should have an ocular demonstration of the military resources of the British Empire, and should have a correct idea of his insignificance against forces so highly organised and so large, as also of his important and dignified position as an Imperial citizen. Even the casualties will have their lessons. The war films are incalculably more valuable as instructors than the wounded soldier of the poet who could 'shoulder his crutch and show how battles are lost and won.' But we must necessarily have the official and authorised films. And Government can only reasonably be asked to exhibit these in the schools and the colleges under their control.

"Sir, the Resolution also recommends the introduction in them generally of the cinematograph with a view to impart instruction to the pupils in hygiene, sanitation and agriculture. Such instruction is admittedly absolutely necessary. Demonstration lectures on hygiene at least with the help of the magic lantern are familiar to us, and, as shown above, the cinematograph can be made to serve our purposes better than the magic lantern. Through it a continuous whole can be shown instead of individual parts by means of slides. And films can surely be made without much difficulty to demonstrate clearly and effectively sanitary methods and improved agricultural methods. The principles will be more readily grasped and much longer remembered by even the most careless student who feels bored and puzzled by dull and difficult text-books. The cinematograph so employed will increase the attractions of the public institutions, and will help to excite in the student a real interest in the subjects which cannot but be productive of the best of results. Dr. Bumpus of the Wisconsin University attaches great value to the cinematograph as an instrument of popular education.

"I should notice here two objections that are often raised to its employment in schools. It is said the exhibition is too trying to the eye and has a deadening effect upon the intellect by exposing too much. The first of these contentions is of dubious soundness and the second appears illogical. Experience does not lend support to the theory that the eyesight becomes damaged by following cinema shows. The other argument is, however, far more serious, but lacks substance. If demonstrations, pictures, maps and lantern lectures do not militate against the sound principle of education that the pupil should be encouraged to exercise his thought and imagination, it is difficult to see how visualisation by means of the cinematograph does. The principle is the same. On the contrary, these realistic shows, to my mind, dispel wrong notions.

"The cost of the experiment, I believe, will not be prohibitive, and in view of the solid gain anticipated, is well worth incurring. Moreover, the whole thing can be managed economically if, instead of attempting to provide each school and college with an apparatus, important places are selected as centres, and exhibitions in all institutions within each centre are placed in the hands of peripatetic operators who will tour throughout their charge at regular intervals. It is likewise easy to recoup the maintenance charges as also the initial outlay by charging the pupils a small fee which nobody will grudge to pay.

"Sir, in consideration of all these facts I ask Hon'ble Members to adopt this Resolution. I am confident the suggested departure will be welcome to the people. It has already been mooted in the Press and by enthusiasts, and I ought to mention that, except as regards the suggestion of the employment of the cinematograph for instruction in agriculture, the Resolution follows the lines of the inspiring leaderette on the s ubject in a recent number of the *Times of India*."

The Hon'ble Mr. Mant:—"I am sure that this Resolution will command general sympathy. Probably every Member of this Council who looks back on his school days will be able to recall some dull moments when he would have welcomed an order to put aside his lesson books and go to an exhibition of moving pictures. Whether this diversion would have been good for his education is another matter.

"The attitude of the Government of India towards the Resolution as a whole will, I understand, be explained by my friend Mr. Sharp. I propose to deal only with a small part of it, *viz.*, the idea of imparting instruction in *agriculture* by means of the cinematograph. The scope for activity in this direction is at present extremely limited. Agriculture is not taught at all in the ordinary schools, and, as the Hon'ble Mr. Hill explained to the Council last week, the Conference on agricultural education recently held at Pusa came to the conclusion that all attempts to teach it as a subject in primary schools should be definitely abandoned. The accepted policy is to teach agriculture only at special schools and colleges, which are as yet very few and far between, though it may be hoped that one result of the Conference will be to increase the number of these schools.

"In one province, *viz.*, Bombay, a very promising start has been made with vernacular agricultural schools; but the success achieved has been chiefly due to the fact that the instruction is imparted on strictly practical lines. The boys actually cultivate the land themselves, and are shown how to do this to the best advantage. It is very doubtful whether the cinematograph would be a useful supplement to education of this kind. I understand that some films have been manufactured which will show a bud suddenly burst into flower. This is no doubt very wonderful, and it is possible that the advanced student may learn something from films illustrating the growth of plants. But to the ordinary school-boy such a picture would be of doubtful value. It is just as likely to bewilder as to instruct. By compressing one of nature's slow processes into a few moments of time, it distorts the facts of nature, just as a concave mirror distorts the faces that it reflects. This sort of picture seems to me to be very similar to the performance of the conjurer who translates a mango seed into a tree. If it conveyed anything to the mind of the school-boy, it would probably give him the impression that flowers grow faster in Europe than they do in India. For the purpose of exhibiting pictures of plants, the magic lantern is, in many respects, superior to the cinematograph, as it does not misrepresent the facts, and the image can be kept on the screen while the teacher is explaining it. It is, moreover, cheaper, more portable, and much easier to work. The Agricultural Research Institute at Pusa is already doing a good deal in the way of producing lantern slides, especially those illustrating the life histories of Indian insects. The Institute has distributed over 500 of these slides to agricultural colleges, and has sent another 400 to Directors of Agriculture and to Agricultural Associations. On the outbreak of an insect-

[15TH MARCH, 1916.] [*Mr. Mant; Mr. H. Sharp.*]

pest among crops, it has been found very useful to take a magic lantern to the locality and show the villagers slides of the insects concerned. We have some specimens of these slides in the Secretariat and I shall be very glad to show them to the Hon'ble Mover or any other Hon'ble Member who may care to see them.

"There are of course many agricultural operations which the cinema does not distort, and which it would be very useful to exhibit in India. If suitable films could be obtained, which is by no means an easy matter, the cinematograph would be an admirable medium for illustrating the working of agricultural machinery and numerous processes of manufacture subsidiary to agriculture; but exhibitions of this kind are, I think, more suited to a general audience and especially to the adult agriculturist than to boys at school. It is to be hoped that more films of this nature will gradually become available, as they would be of great value in giving the Indian cultivator a vision of the wide field of improvement that lies open to him. When one sees the rubbish that is ordinarily exhibited on the cinema, one cannot but feel that the public taste is bound to rebel against it, and to demand the presentation of more serious and useful subjects.

"I am so far, Sir, in sympathy with the objects of the Mover of this Resolution, but as I have already explained, I am doubtful of the advantage of introducing the cinema as a part of the curriculum in our agricultural schools and colleges. There is also a serious objection, which, it seemed to me, was somewhat lightly dismissed by the Hon'ble Mr. Dadabhoy, *viz.*, that the cinema constitutes a grave danger to the eye-sight of the rising generation. My friend, Mr. Sharp, will be able to give the Council more precise information on this point, and he may perhaps be able to devise an amended form of Resolution which would be acceptable to the Government. As the Resolution at present stands, I am afraid that, from the point of view of the Department of Agriculture, I cannot support it."

The Hon'ble Mr. H. Sharp:—"I understand that the general intention of this Resolution is the encouragement of visual instruction. Any such movement is to be welcomed, and is indeed fully in accord with the policy of the Government of India as declared in their Resolution of 1913. I should like to take this opportunity of recounting very briefly some of the steps which have been taken to this end.

I think I may say that all provinces are now fairly supplied with wall pictures for schools and with magic lanterns. I can certify from experience that some provinces have long been supplied with these things, and that inspecting officers carry lanterns about with them and exhibit them even in the village schools. I can best give an idea of what is being done by referring Hon'ble Members to a press note issued by the Government of Bombay on the 4th August, 1914. It shows the following facts—

"In 1910, the Director in Bombay urged that the lantern should be used as an aid to the study of history, geography and science, and further, in conjunction with touring officers of the Agricultural and Sanitary Departments, for the display of agricultural and sanitary facts and principles. Every Government high school and training college was accordingly provided with a good lantern, and a collection of slides was accumulated. Next, Deputy Inspectors of schools and some of their assistants were provided with lanterns and slides for the promotion of general and sanitary knowledge in primary schools in rural areas. A sum of Rs. 20,000 was sanctioned for this purpose, and an officer was placed on special duty to instruct the teaching and inspecting staff. But, since lantern displays cannot be of frequent occurrence in village schools, it was decided to supplement them with sets of stereoscopic pictures, and to provide for every three Local Board schools a set of two stereoscopes and a number of stereoscopic pictures. Two sets, each of 250 pictures, have been prepared—one for primary schools to illustrate the readers, the other for secondary schools. Each Board school possesses 36 pictures out of a set interchangeable with other parts of the set. Each secondary school has a full set

"I am not aware whether other provinces have thus specialised in stereoscopes. But this description from the Bombay Presidency gives a good idea of what is being done by Departments of Public Instruction in regard to lanterns.

"Again, with reference to hygiene and sanitation, which are specially mentioned in the Hon'ble Mr. Dadabhoy's Resolution, the Hon'ble Sir Pardey Lukis and the Sanitary Commissioner have kindly supplied me with a good deal of information regarding what is being done. Thus Major Glen Liston says that, at the Bombay Bacteriological laboratory, he has a collection of ten cinematograph films illustrating medical subjects. He is anxious to prepare his own films, and the Government of Bombay have sanctioned money for a camera. There is also an ample stock of slides at Parel, and illustrated lectures have been prepared on various subjects—plague, dracontiasis and tuberculosis. A set of about 165 slides on hygiene has been collected in Simla. Sets of slides dealing with sanitation are now for sale with private firms, and this fact has been brought to notice. Further, the Sanitary Commissioner has provided me with a description of what is being done in Bengal. Three Assistant Surgeons are attached to the Education Department, and provided with a lantern and a set of slides dealing largely with malaria and its prevention. The Sanitary Department also has two lanterns and three or four complete sets of slides on malaria for loan. These lanterns are also used for giving lectures at agricultural fairs. Now all this shows that a good deal is being done. But this Resolution would go further than lanterns and stereoscopes, and raises the question of the cinematograph and education. Quite a lot has been written on this subject. I propose briefly to state how the question stands at present.

"The cinematograph appears to have a certain vogue in schools of some countries, especially in the United States; and some American writers consider it an admirable adjunct to education. On the other hand, many opinions have been expressed unfavourable to the use of the cinematograph in schools. There is, in fact, considerable divergence of opinion on the subject. I need not multiply instances. But a report made by the Chairman and Director of Education to the Lancashire Elementary Sub-Committee states that, with very few exceptions, all the teachers interrogated on the subject agree that the shows are detrimental to children. An investigation made at a normal training school in the state of Ohio resulted in nearly all the pupils declaring that they were the worse for these displays, and were afflicted with head-aches and eye-strain. A Conference considered the matter in 1913. It was found that the experts were divided as to the educational value of the cinematograph. The London County Council decided not to proceed with its experiments at the Polytechnics. I should add that I have gathered these facts not from official sources, but from educational periodicals from time to time.

"Why should there be these misgivings about the cinematograph? At first sight, its advantages would appear to be obvious. It interests children, who naturally love movement and colour. It can make a dull lesson pleasing. It is an advanced form of visual instruction, and it is useful for demonstration in some higher forms of professional training. Moreover, in what has been written on the subject, there is a good deal which shows that it is recognised that the cinematograph has come to stay, and is taking an ever increasingly important part in town life, and that therefore it is better to organise displays for children on suitable lines rather than allow them to seek recreation in cinematograph halls where the displays are not arranged with reference to the requirements of children. This last is of course a negative argument, and is not necessarily flattering to the cinematograph. But, on the other hand, it is urged that there are positive dangers about the cinematograph in schools. The displays tend to bring children together in crowded and perhaps ill-ventilated rooms. *Pace* my Hon'ble friend, evidence shows that attendance at the cinematograph has a detrimental effect on the eyes and even the nerves of children. Only the other day, I observed in a leading article in one of the best known papers in India, a statement that the eye-strain resulting from the cinematograph is demanding

[15TH MARCH, 1916.] [*Mr. H. Sharp.*]

the close and critical attention of all physicians who have a care for the rising generation. I understand that efforts are being made to overcome these physical disadvantages. But there is also doubt about the mental effect. The cinematograph is exciting. It stimulates, but does not arrest, attention. The realistic nature of the films leaves too little to the work of the imagination, and I hold that the imagination is one of the most potent faculties in the young, and a faculty for the development of which complete representation is an actual error. Again, the Sanitary Commissioner tells me, as the result of experience, that, in matters of sanitation, for rural tracts, the simpler and cruder the picture the better is the result obtained. There are also difficulties of other kinds. The production of suitable films is not easy. It is not a paying proposition compared to that of popular films. The subjects require very special treatment. In order to illustrate this difficulty, I had intended to read a passage from one of the reports of the Commissioner of Education at Washington, the writer of which is an enthusiast on the educational use of the cinematograph. But it is late and the passage is long, and I must content myself with saying that it shows that it is difficult to procure films which give a faithful representation of facts (a point made in Mr. Mant's speech also); indeed, that children sometimes ask the teachers which they are to believe—the text-book or the cinematograph; and that the supply of films is inadequate, the distributing agents being interested in the popular side of the business, which is more lucrative. Indeed, it seems that at that time no manufacturer in America turned out educational films in sufficient quantities, though films were procurable from England, France and other European countries.

"Again, there are other things. The cinematograph is not so easy to work or to lecture to as are the commoner forms of visual instruction. The cost of a good film may run into hundreds of pounds, and of its loan into thousands of rupees, and I may add that films do not last for ever and in fact are rather destructible. Some idea of the cost involved may be gathered when I state that the comparatively simple devices which I have described as in use in the Bombay Presidency for visual instruction have already cost considerable sums. In that Presidency, Rs. 36,000 has been spent in purchasing lanterns, and I find that a lakh of rupees was sanctioned for the supply of stereoscopes and stereoscopic pictures to schools. How much more expensive would be the supply of the cinematograph? And, I may add, only a few can participate in the cinematograph displays, whereas lanterns and stereoscopes can be freely distributed over the country, since these smaller forms of instruction can be easily carried about even in remote places.

"These are the main reasons why there is still doubt as to the educational use of the cinematograph. I am assured that it is not of special value as regards sanitation and hygiene, though it is of value in medical instruction as the Hon'ble Mr. Dadabhoy has rightly pointed out. For sanitation and hygiene, the lantern is probably a more effective instrument. As regards agriculture, Mr. Mant has already spoken about it. Those who favour the cinematograph for educational purposes seem to think it is best applied in teaching geography, history, and natural history

"The other part of my Hon'ble friend's Resolution, which deals with official war films, stands on a somewhat different footing. The existence of these films had already been brought to the notice of the Goverment of India, and the matter is under consideration. Intimation o their existence has already been given to at least one of the leading cinematograph firms in India, and Local Governments will probably be asked to lend official patronage to the displays. It is improbable that Government will take a direct hand in importing these films; nor is this necessary. For the cinematograph has attained a great popularity in India; the number of halls is rapidly spreading; and the firms engaged in these displays are in a strong position, and quite capable of purchasing even expensive films. No detailed arrangements have yet been decided upon. The displays will presumably be confined to the public cinematograph halls, and I myself hope that facilities will be given for students to see these displays under favourable conditions.

[*Mr. H. Sharp; Pandit Madan Mohan Malaviya; The Vice President; Mr. Dadabhoy.*] [15TH MARCH, 1916.]

"The general position regarding the cinematograph in schools is this. The Government of India are not convinced that this method is the best for instruction, or is even free from harm. Much has already been done in the way of lantern slides and other forms of visual instruction. The suitability of these methods is unquestioned. The still picture arrests attention, and is easier to lecture about. The lantern and the slide are comparatively easy to work. The cost of the cinematograph for general purposes is prohibitive. The cost of a valuable film would probably build a dozen excellent primary schools. But even if there were not these objections, it is held by some authorities that the effects of the cinematograph on children are physically and mentally deletrious. Anyway, the still picture offers a more effective method for teaching the subjects which are specially mentioned in this Resolution, and the production of suitable educational films presents difficulties. At the same time, there is no harm in permitting experiments to be made. The Government of India have put a private agency, whose object is the display of educational films for pupils, into touch with Local Governments, and though I have no official information, I understand that some of the Local Governments are rendering assistance to this firm. I noticed a passage which appeared only the other day in the *Madras Mail*, which states that the Burma Educational Syndicate have said they are not in favour of the Education Department taking any action for the introduction of the cinematograph as a means of education, but considered that Managers of schools should be approached and arrangements made with them

"In so far then as the Hon'ble Mr. Dadabhoy's Resolution represents a plea for visual instruction, it is to be welcomed as springing from the most wholesome and refreshing motives. But the Government of India would prefer to await the results of the experiment I have just mentioned, further information as to the progress of the educational cinematograph in other countries and success in the production of educational films, before accepting a Resolution which would commit them at this stage to the use of the cinematograph in schools. I am authorised to say that the Government of India are, therefore, unable to accept the Resolution in its present form. But if my Hon'ble friend will withdraw his Resolution, and will put it forward in a slightly modified form, it can then be accepted. The form suggested is as follows:—

'This Council recommends to the Governor General in Council that steps be taken by Government for the exhibition of the official war films, and that special facilities be given to pupils of Government institutions to attend these exhibitions, and that encouragement be given to the development of visual instruction [illegible] schools and colleges under Government control.'"

The Hon'ble Pandit Madan Mohan Malaviya:—"Sir, I should like my friend the Hon'ble Mr. Dadabhoy to say whether he is going to accept the amendment so that others who wish to speak may do so before him."

The Hon'ble the Vice-President:—"The first point to settle is, what the form of the Resolution is to be. I will ask the Hon'ble Mr. Dadabhoy to say whether he wishes to press his original Resolution or to withdraw it, and to move this fresh one."

The Hon'ble Mr. Dadabhoy:—"I shall accept the amended Resolution."

The Resolution was, by permission, withdrawn.

The Hon'ble the Vice-President:—"The motion now before the Council is—

'That this Council recommends to the Governor General in Council that steps be taken by Government for the exhibition of the official war films, and that special facilities be given to pupils of Government institutions to attend these exhibitions, and that encouragement be given to the development of visual instruction in schools and colleges under Government control.'

[15TH MARCH, 1916.] [*Pandit Madan Mohan Malaviya; Mr. Dadabhoy.*]

The Hon'ble Pandit Madan Mohan Malavia.—"I rise, Sir, to protest against the time that is being wasted by this Council in the consideration both of the Resolution as it stood originally and in the form in which it is now proposed. It will give an indication to the world that, in these days of war, we have nothing more serious to discuss than the question of the employment of cinematographs in schools, and that the Council has sat for an hour and a half listening to the discussion of a subject which could have been much more easily settled by correspondence.

"I only want to add this: I think the Resolution, in the form in which it has been altered now, is a very different Resolution from what the Hon'ble Mr Dadabhoy proposed. Holding that view, I object to a Resolution which has been materially altered being suddenly sprung upon the Council. The Hon'ble Mr. Sharp has given it as complete a change as could be given by putting in the words 'the encouragement of visual instruction' at the end of the Resolution. As explained in his speech, we understand what the encouragement of visual instruction means in that Resolution, but the Hon'ble Mr Dadabhoy made it very clear that he was referring to visual instruction of a definite kind. On that point, the Government have completely refused his Resolution, and I think, Sir, it is best, in these circumstances, that, as the Hon'ble Mr. Dadabhoy has withdrawn his first Resolution, he ought to have time to consider whether he will bring this Resolution in the form proposed by the Hon'ble Mr. Sharp for further consideration by this Council. At any rate, as a humble member of this Council, I request you, Sir, not to allow the Resolution in the altered form to be put before the Council, so that our time may not be taken up at this juncture with it any more."

The Hon'ble Mr. Dadabhoy:—"Sir, I have not been quite able to follow the line of argument of my friend the Hon'ble Pandit Malaviya. My Hon'ble friend protested against my having withdrawn the original Resolution and accepted the modification suggested by Government. I do not think that, by acquiescing in this arrangement, I have departed from the usual practice. In fact, my friend the Hon'ble Pandit Malaviya has oftener than myself accepted amended Resolutions before this.

"I shall now explain the circumstances under which I am constrained to accept this amended and modified Resolution. I was unwilling in the first instance to accept this modified Resolution; but if I had the alternative placed before me of either my Resolution in its original form being rejected, or some form of visual knowledge being imparted, I should certainly prefer the latter. Instead of having nothing, at least let us see that Government moves in this direction. And once the Government moves it will find hereafter the advantages of the scheme, and will perhaps be prepared to go further along the line we wish. I am therefore unable to follow either the line of argument adopted by my Hon'ble friend or his criticisms on the subject.

"Now, Sir, the Council has received some very interesting information both from the Hon'ble Mr. Mant and the Hon'ble Mr Sharp. The Hon'ble Mr. Mant has explained to us with a reference to the Hon'ble Mr. Hill's speech the other day introducing certain heads of the Financial Statement, that special schools are few and far between, and that the Government is not in a position to introduce this method of instruction in the Department of Agriculture. I am sorry that the Government of India is not convinced of the desirability of this form of instruction. However, it is the same old story. The Government of India is slow; it prefers to adhere to its own antiquated methods; it is not like other Governments which move more quickly in these matters. We have got the example of America; we have got the example of Japan; and we find that in those places this form of instruction has been introduced with great success. I am sure if a similar experiment had been tried in this country, the Government would have found it to be equally successful. However, as I said, it is a matter of difference of opinion.

[*Mr. Dadabhoy; Pandit Madan Mohan Malaviya; The Vice-President.*] [15TH MARCH, 1916.]

"From the interesting speech delivered by my friend, the Hon'ble Mr. Sharp, it appears that he is a lover of the magic lantern; he prefers the magic lantern to the cinematograph. Here, again, opinion is very much divided. However, from the latter portion of his speech it appears that the Government has already started inquiries regarding this matter and opinions are being collected. Reading between the lines of his speech, it clearly appears to me that, sooner or later, the Government will come to a final decision in the matter, and very probably a year or so after, they will decide to introduce the cinematograph in schools. However, so far as the wording of the Resolution which has been placed before me for my acceptance by the Hon'ble Mr. Sharp goes, I do not find anything objectionable in it. It certainly does not meet my case; it curtails the scope of my Resolution to a very material extent; but, as I have said, I feel convinced that if a small beginning is made by the Government in this matter now, later on, when some experience has been gained and after they have ascertained the cost that will be involved in the experiment, they will come round to my way of thinking.

"Under these circumstances, I think it advisable to accept the amended Resolution, though it very much curtails my original Resolution. In hopes of future, further and wider action I accept this modified Resolution, namely :—

'This Council recommends to the Governor General in Council that steps be taken by Government for the exhibition of the official war films, and that special facilities be given to pupils of Government institutions to attend these exhibitions, and that encouragement be given to the development of visual instruction in schools and colleges under Government control.'

"I only wish to add that I hope the suggested departure will mark the beginning of a new system of imparting instruction, and that later on, if it proves successful, Government, in its generosity, will also see the advisability of extending its scope and this boon to private institutions and schools."

The Hon'ble Pandit Madan Mohan Malaviya:—"I want to speak on the amended Resolution, Sir."

The Hon'ble the Vice-President:—"I do not think the Hon'ble Member will be in order in doing that. This is now the final stage."

The Hon'be Pandit Madan Mohan Malaviya:—"May I submit, Sir, that the Resolution as amended is a new Resolution, and that every one of us is entitled to give his opinion for and against it. I request that you will kindly rule on this point, *i.e.*, whether we are or are not entitled to speak. It is an entirely new Resolution that was put just now."

The Hon'ble the Vice-President:—"I admit the point. The Hon'ble Member can speak."

The Hon'ble Pandit Madan Mohan Malaviya:—"I only want to say a few words, and that is to add my strong protest against any money being spent even in the way suggested in the amended Resolution. We want every pie we can get for primary education. We are not in a state when any money can be spent on cinema shows; and when there is, as evidenced in the speech of the Hon'ble Mr. Sharp, strong objection to the cinematograph being displayed to young students, I submit that the Government will be pleased to consider the matter much more seriously than has been done, and not send out a recommendation to Local Governments which will encourage them in incurring any expenditure on cinematograph shows, or in encouraging young students being brought to face the glare which is certainly injurious to their eyes and which is not very helpful in other ways. That is all I have to say."

The Hon'ble Mr. Dadabhoy:—"Am I not entitled to speak on the Resolution in reply to the remarks just made by the Hon'ble Pandit Malaviya?"

[15TH MARCH, 1916.] [*The Vice-President; Mr. Dadabhoy; Pandit Madan Mohan Malaviya.*]

The Hon'ble the Vice-President:—"The Hon'ble Member is entitled to speak, but the subject is very nearly exhausted."

The Hon'ble Mr. Dadabhoy:—"I just want to say one word more about the question of expenditure. I am sorry that my Hon'ble friend, Pandit Malaviya, cannot see eye to eye with me. His ideas of all education is by books, conferences, societies and that sort of thing. He underestimates apparently the value of the instruction to be received by means of the cinematograph. This is one of the most important methods, and it has been recognised as such in every educated and advanced country. If my Hon'ble friend will study the educational history of such a country as Japan, he will find the progress that has been made there by the utilisation of the cinematograph. I say that is a complete justification of any reasonable expenditure which the Government may have to incur in this matter. It will pay Government tenfold by making citizens that are better informed, more loyal and having a knowledge of their responsibilities and duties."

The Resolution, as amended, was then put and accepted.

RESOLUTION *RE* THE PLACING ON THE TABLE OF THE CORRESPONDENCE RELATING TO THE RECOMMENDATIONS OF THE DECENTRALISATION COMMISSION.

The Hon'ble Pandit Madan Mohan Malaviya:—"Sir, I see that in answer to a question put this morning by my friend the Hon'ble Mr. Banerjee, important papers with which my Resolution is concerned, have already been laid on the table. In these circumstances, I beg leave to withdraw the Resolution, with liberty to bring it in another form if I feel so advised, namely.—

'That this Council recommends to the Governor General in Council that the correspondence between the Secretary of State and the Government of India, and also that between the Government of India and Local Governments relating to the recommendations of the Decentralisation Commission contained in Chapters 19 and 20 (Rural Boards and Municipalities) be placed on the table of this Council.'

The Resolution was, by permission, withdrawn.

The Council then adjourned to the next day, Thursday, the 16th March, 1916.

A. P. MUDDIMAN,
Secretary to the Government of India,
Legislative Department.

DELHI;
The 22nd March, 1916.

APPENDIX B.

(Referred to in Answer to Question 2.)

India Office, London,
11th July 1913.

Revenue,
No. 83.

To His Excellency the Right Honourable the Governor-General of India in Council.

MY LORD,

Recommendations of the Royal Commission on Decentralisation on the subject of Municipalities in India.

I have examined with interest the letter from Your Excellency's Government of the 6th March 1913, no. 4-Education, and its enclosures, in which you deal with the recommendations of the Royal Commission on Decentralisation on the subject of municipalities in India. You report that, as a result of a fresh examination of the whole question, you find evidence that there has been a steady advance in the efficiency of local bodies, and that future prospects are generally hopeful, and you forward a summary of the observations of local Governments on the specific recommendations of the Commission.

2. I see clearly the magnitude of the obstacles that have to be overcome before India can acquire in any great or general measure the public opinion on local affairs, and the will and ability to cope with municipal duties, that exist in Western countries, but it is also true that no progress can be expected if the question is approached in too cautious a spirit. You refer to the position of local Governments as immediately responsible for efficient administration, and propose in addressing them to indicate your assurance that it will be found possible in the more backward provinces to proceed steadily on the general lines of advance laid down by the Commission, and while maintaining all essential control to abstain from all unnecessary interference in matters of detail, and in particular to relieve officials of their municipal duties whenever possible. I agree that any attempt to exact uniformity in local administration, or to apply wholesale to existing conditions the general recommendations of the Commission, would be foredoomed to failure; and I fully concur in the view that local Governments must be left to decide how far the circumstances of their provinces admit of an advance towards the management by the people of their own local affairs. I also recognise that something has been done in recent years of plenty to give full effect to the policy of freeing municipal revenues from certain charges which more properly fall on Government, *e.g.*, for Police, and I am glad to observe that Your Excellency's Government are separately considering the possibility of giving further effect to the suggestions of the Commission in paragraph 833. The principle stated in paragraph 818 of the report, on which those suggestions are based, is in my opinion sound.

3. There are, however, certain large considerations that appear to me of importance in dealing with municipal administration, and I notice in the papers forwarded with your letter indications that these may not be fully appreciated at present by some authorities.

4. Your Excellency's Government has given many pledges of an anxiety to promote, in municipal as in other areas, the development of sanitation and education as matters of Imperial concern. But the success of these great movements depends, not merely on financial grants and the provision of expert officers, but on the extent to which the people can be brought to help in furthering them, not only individually but also collectively. The existence, therefore, throughout the country of moderately efficient municipal institutions is, as it appears to me, a necessary condition of permanency in the success of your efforts. Expert control is, as remarked in paragraph 4 of your letter, necessary

to efficiency in these matters, but it cannot take the place which should be occupied by interested and active municipal authorities. You refer to the fact that in the resolution of the 18th May 1882 the promotion of municipal and local self-Government was described as an instrument of political and popular education, and as being chiefly desirable from this point of view. It may also from one point of view be regarded as an extension of Lord Mayo's scheme of financial decentralisation and an endeavour to provide local agencies to take charge of local services of sanitation and elimentary education, and some support to the suggestions of the Commission in paragraph 837 may be found in such a line of argument. I think it desirable that the attention of local Governments should again be drawn to the consideration that any permanent success of your efforts in the direction of sanitary and educational progress depends largely on the extent to which it is found possible to foster the vitality of municipal authorities.

5. However that may be, it was recognised in 1882 that the movement was not directed primarily to immediate improvement in administration, but to the attainment of an efficiency based on intelligent co-operation of the people themselves in the sphere of public duty affecting their daily needs, and it was foreseen that failures would doubtless occur. Failures have occurred, and may still be expected; but there have also been encouraging successes, and the former should not be allowed to weigh too heavily against the need to enlist the co-operation of the people and their representatives in the improvement of sanitation and education. Such co-operation must rest on an interest in the work and a feeling of responsibility, and these in turn can only be secured by entrusting to municipalities an adequate sphere of work, adequate funds, and sufficient powers of decision in respect of both. In this connection I would suggest for your consideration, with reference to paragraphs 836 and 837 of the Commission's report, and to paragraph 7 of your letter, that it may be found that earmarked grants for sanitation and education are less fruitful in the long run in fostering the growth of responsibility than local self-Government grants as to which the local bodies have discretion. On the other hand, the risk attending unearmarked grants can hardly be regarded as a very serious one, since the sphere of municipal work as described by the Commission in paragraph 816, is such that their expenditure must directly or indirectly promote sanitation or education.

6. I request that you will give weight to these remarks in addressing the local Governments as to the opinions which form an enclosure to your letter under reply. I do not propose to discuss these opinions in detail, since I accept your view that the local Governments must decide, in consultation with you, how best to foster and adequately finance municipal self-government within their provinces.

7. I accept your proposals on the subject of the Presidency municipalities and Rangoon, and would only remark that in such cities, where there is a responsible public Press and representation in the Provincial Councils, the case for entrusting large powers and extended freedom to the municipal bodies appears to be specially strong.

I have the honour to be,

MY LORD,

Your Lordship's most obedient humble Servant,

(Signed) CREWE.

India Office, London,
25th December 1914.

Revenue,
No. 181.

To His Excellency the Right Honourable the Governor-General of India in Council.

MY LORD,

I have considered in Council Your Excellency's despatch in the Education Department, no. 15, dated the 1st October 1914, on the subject of the recommendations of the Royal Commission on Decentralisation in connection with Rural Boards in India.

Recommendations of the Decentralisation Commission as to Rural Boards.

2. The method which you propose to adopt in dealing with these recommendations follows the principle laid down by Your Government, and accepted by me, in dealing with the Commission's recommendations as to municipalities, *viz.*, that no attempt should be made to exact uniformity in local administration, but that local Governments should be left to decide how far the circumstances of their provinces admit of an advance. I note that the local Governments have expressed willingness to accept to a large extent the financial recommendations of the Commission, and I agree that the measure of progress accepted by the local Governments may be regarded as sufficient for present requirements. But while I would deprecate any attempt to bring pressure to bear on local Governments to induce them to adopt larger measures of advance than they have themselves decided upon, I regard it as important that the Central Government should exercise watchfulness in the matter, and should be ready to help and foster every genuine sign of growth from below. In particular, I desire to associate myself with the view expressed by your Government in paragraph 4 of your circular letter of the 23rd September 1914 that the present restrictions on the powers of Rural Boards with regard generally to budget expenditure and establishment should be gradually relaxed with due regard to local conditions and requirements.

3. I notice that in one respect your Government depart from the principle of not attempting to prescribe uniformity. In addressing the local Governments you have expressed the opinion that it is desirable for every District Board to have a competent engineering staff of its own, suggesting for consideration that in cases in which the finances of the Boards do not permit of the maintenance of a separate staff, a District Engineer corresponding more or less to an Executive Engineer might be placed in charge of two or more districts, and similarly that an officer corresponding more or less to a Superintending Engineer might be placed in charge of two or more divisions or other extended area. It appears to me that the necessities of the case are adequately met by the recommendation of the Commission, which was merely that in districts where there are sufficient works falling under Rural Boards to justify the special appointment of a trained Engineer, a District Board which desires to entertain such an officer, and can afford to pay him an adequate salary should be permitted to do so. The local Governments have, generally speaking, expressed unwillingness to make any material advance in this matter, and I see no good reason for urging them to do so, especially as the question is largely one of administrative economy, and the measure recommended by your Government may, in some instances, lead to uneconomical duplication of establishment.

I have the honour to be,

MY LORD,

Your Lordship's most obedient humble Servant,

(Signed) CREWE.

GOVERNMENT OF INDIA.

LEGISLATIVE DEPARTMENT.

PROCEEDINGS OF THE INDIAN LEGISLATIVE COUNCIL ASSEMBLED UNDER THE PROVISIONS OF THE GOVERNMENT OF INDIA ACT, 1915 (5 & 6 Geo. V, Ch. 61).

The Council met at the Council Chamber, Imperial Secretariat, Delhi, on Thursday, the 16th March, 1916.

PRESENT:

The Hon'ble SIR WILLIAM CLARK, K.C.S.I., C.M.G., *Vice*-President, *presiding*, and 47 Members, of whom 41 were Additional Members.

RESOLUTION *RE* AMELIORATION OF THE DEPRESSED CLASSES.

The Hon'ble Mr. Dadabhoy :—" Sir, I beg to move :—

'That this Council recommends to the Governor General in Council that measures be devised with the help, if necessary, of a small representative committee of officials and non-officials for an amelioration in the moral, material and educational condition of what are known as the Depressed Classes, and that, as a preliminary step, the Local Governments and Administrations be invited to formulate schemes with due regard to local conditions.'

" From the last census returns it is difficult to find out easily the classes, castes and tribes that would fall within the group of Depressed Classes, and *ergo* the number of men who belong to them. In the lowest strata of Indian society there are three classes of men who are as much depressed as any other class, but they are not usually known as the Depressed Classes. The aboriginals, the criminal and wandering tribes, and the Mahomedan *ajlaf* and *arzul* stand out of the group, and only the 'untouchables' among the Hindus have come to be identified with the Depressed Classes. Again, there are other numerous castes of Hindus with varying degrees of social disability,—the

inferior and the unclean sudras of the classification of 1901—who might well claim our care, attention and sympathy; but their case does not come within the scope of the present Resolution, and perhaps time and education are slowly, but steadily, solving the problem for them. The four classes noted above have a total strength of nearly 70,000,000 souls, or a little less than a quarter of the total population. In the classification according to religion the aboriginals would mostly come under the group of animists who number, according to the last census, over 10 millions, of whom 7,348,024 live in British India, and 2,947,144 in the Feudatory States. Some of them might come under the other head of 'beggars, vagrants, procurers, receivers of stolen goods and cattle prisoners'; but the wandering and criminal tribes are most of them within this group, and their number, notwithstanding the variation since 1901, is still large. In 1901, the *ajlaf* and the *arzal* together numbered 12,523,982, and the Hindu untouchables numbered over 50,670,000 If the classes increased during the subsequent decade at the same rate as the general population, the numbers must now be over 13 millions and 54 millions respectively. Of these latter 42¼ millions belong to British India, while the aboriginals within the same area are six millions in number. The reclamation and elevation of these various classes ought to be our chief concern. If India has to make a sound progress as a whole, the moral and material condition of the people in the lowest rungs cannot surely be neglected or even regarded with benevolent indifference. But somehow the problem has not so far been tackled with that earnestness of purpose and determination which a conviction of its gravity and its supreme importance to the welfare of the body politic could ensure. After long years the educated Indian is slowly waking up to the grim realities of the situation, but the amount of prejudice is still great. On the other hand, the policy of Government, if there has been any, has been one of drift; more accurately speaking, the whole administration in relation to these unfortunate classes is marked by the absence of a definite policy. The result is, there has been unequal development among the different groups. The time has surely come when the progress of the lower orders should engage the earnest attention of Government. It is a fact of great moment that any reasonable scheme of elevation will have the cordial support of the best minds of India. With the spread of high education, both Hindus and Mahomedans in advanced positions in life have come to realise that the amelioration in the general condition of the country cannot be properly effected without the elevation of the Depressed Classes of both the communities, and of the aboriginals and the wandering and the criminal tribes, who might also be included among the Depressed Classes. Even if considerations of national self-respect and of humanity did not operate, self-interest would secure, not only the support, but the co-operation, of the advanced sections in any promising scheme of improvement of these classes. Government might, therefore, be reasonably expected to take the matter seriously in hand.

"Sir, in the United States of America, there is a large population which occupies a degraded position. The Government there have a negro problem, or a problem of the elevation of the degraded classes, to which they have applied themselves with characteristic zeal and devotion. The solution is not far distant. To judge of the tremendous rate at which these negroes are progressing, it should be borne in mind that this question of their social, political and moral advancement has arisen only since the abolition of the Slave Trade. Roughly, the period is about half of that spent by India under British rule. And while we can hardly be said to have even undertaken the preliminary spadework for the elevation of our degraded classes, the negroes in the United States of America are advancing at rapid strides. There are large benefactions for the education of the coloured people. The Peabody Fund, the John F. Slater Fund, and the Daniel Hand Fund may be mentioned as instances. The State also fully recognises its responsibility in this matter, and 1,000,000 dollars are spent annually in the Northern States alone for education among the negroes. It appears from the Report of the Education Commissioner that in the Slave States 44·36 per cent. of boys of school-going

age were at school in 1907-08 against the general percentage of 69·32 for the whole of the United States, and 70·34 per cent. among the white population, and the ratio of attendance was 62·18 per cent against 66·13 per cent. among the white Americans. There are special normal and industrial schools, secondary schools, universities and colleges, schools of theology, schools of law and schools of medicine, dentistry and pharmacy. Hampton and Tuskegee have special industrial schools for training in handicrafts. In 1908-09, 23,160 pupils received industrial training in schools above the elementary grades. The white American has taken the negro by the hand and, notwithstanding race repulsion, gives him every encouragement, in the Northern States at least, to attain a dignified position in life. At Harvard once a coloured student was chosen 'class orator.' In some instances, white lawyers have backed up coloured barristers for appointment to important Federal offices. The Negro Trade Unions are admitted to the federation of the Knights of Labour.

"The brown Filipino has likewise made marvellous progress during the past few years of American rule. Schools have multiplied rapidly, but have failed to overtake the demand. There is now in the Philippines an insatiable desire for useful knowledge. And this has been excited among a population who, in the beginning, viewed American educational methods with suspicion, and opposed their introduction in supersession of the old Spanish organisation

"In Europe, a similar problem does not exist, but in most of the progressive countries special measures are adopted for the uplift of their degraded classes,—the vagrants and tramps and criminals. In England at Thrope Arch near Leeds, an industrial school is maintained for the children of criminals and delinquents. In Switzerland, the education colony at Witzwil, Berne, for vagabonds and tramps has, within the short space of twenty years, created a revolution, the effects of which are not confined to that State. It is a new gospel of reclamation and progress which now finds favour in distant lands also. France has profited by the Swiss example. It is the same story everywhere—enlightenment and advancement—with of course varying degrees of success. But the picture is changed when we come to India. Here the problem has not been tackled seriously, and no scheme even has been formulated for the elevation of the untouchables, the aboriginals, the wandering and criminal tribes, and the degraded Mahomedans. In the Punjab alone, through the *kot* system, an effort has been made for the reclamation of the wandering and criminal tribes, but that has not gone far. As regards education even, a regrettable indifference is noticeable among the authorities. It would be ungenerous to suggest that the Government are regardless of humanitarian principles; but they clearly fight shy at the magnitude of the problem, and rather than tackle the difficulties themselves with proper zeal and spirit, they have practically left the field to missionaries and philanthropic enthusiasts. Even the annual educational reports do not contain any information about the progress in the education of the special classes. Neither is there in them any reference to the subject. It is only in the last quinquennial Review of the Progress of Education in India, thanks to the efforts of the Hon'ble Mr. Sharp, that there is a summary of the position. And there we find that only 2·6 per cent. aboriginals are at school, while the figures for the Depressed Classes are not available. The percentages of literates among these two classes are 0·4 and 2·8! And this with all the progress made during the quinquennium! In Madras, where something like a serious effort is being made, the expenses of the education of the Depressed Classes rose from Rs. 2,63,072 to Rs 6,07,775, and the contribution from the public funds, including local board funds, accounted for less than half of this latter sum. There was a decline in the number of special secondary schools, and all the progress there was in elementary education was due to missionary effort. In Bombay, the same arrangements prevail for both aboriginals and untouchables, with hardly much progress. The Bombay Government admit that the *mahars* and the *dheds* who form the bulk of the Bombay untouchables value education, 'are possessed of admirable brains and well repay the labour of teaching them,' but have no special scheme

to suggest. In the ordinary schools the boys have to pick up crumbs of knowledge 'on the verandah away from the master's eye,' and special schools are few in number. The recent Press Note on the subject issued by the Bombay Government closes with a magnificent *non possumus* :—

'The position of these castes and tribes in the future depends partly on their own selves, and partly on those more favoured Indian communities, which by extending the hand of human comradeship or hardening their hearts and averting their faces, have it in their power to elevate or to degrade them.'

There ends the responsibility of the State, and indeed the shortest way to progress has been shown! People sunk in ignorance, despised, degraded and persecuted must look to themselves and to their persecutors for their elevation! Could there be a greater lack of imagination or appreciation of their duty in an enlightened Government? Sir A. Bourne has well pointed out in connection with the whole problem of the Depressed Classes that—

'Hindus in general take little interest in these people, and practically all that has been, or is being, done to elevate them is the work of missionary bodies.'

"In Bengal, only 'a slow increase (in special schools) is observable'; in the Punjab, 'the whole number (of special schools) seems to be very small'; in the Central Provinces, 'the number of low-caste children at school has risen from about 15,331 to 16,231', or about 6 per cent! The United Provinces Government have fallen into a similar error. In their Resolution No. 1611-XV of 25th August, 1914 on the Report of the Piggott Committee, they observe :—

'There have recently been gratifying signs of desire for education among castes who have hitherto been condemned to menial or even predatory habits, such as the Doms of Benares; and it is the clear duty of the Government and the Boards to support any such awakenings. His Honour trusts that the benevolent intentions of liberal Hindu thought will be translated more or more, as time goes on, into practical help and persuasion towards this object. Meanwhile he accepts the recommendation of a majority of the Committee that, in places where a particular section or group, *e.g.*, of the depressed classes, applies for a school, guarantees an attendance of an adequate number of boys and offers (if it can) to provide reasonable accommodation, even though it may be below the regular standard, the Board should start a special school under a suitable master. More than this, it seems impracticable to prescribe at present.'

Again, the same strain of helplessness.—the same attitude of *laissez faire* —the same inability to prove equal to the occasion! It seems, unless the stimulus comes from this Government, the Provincial Administrations will not undertake any proper scheme of reform.

"But, Sir, it is not all a question of education. The problem is not the same for all the four classes, each of them having a distinct problem of its own. In the case of the Mahomedan *ajlaf* and *arzul* it is one of education, general and industrial, while in that of the wandering and criminal tribes, the main question is one of settlement, education ranking next in importance. The common brotherhood of Islam may be depended upon to secure for the former elevation in the social scale once they become educationally advanced. But the vagrants and tramps must be gathered together in organised settlements before they can be weaned from their nomadic and thieving habits, and before education can be introduced among them. This education too must be mostly industrial in the initial stages. The aboriginals stand upon a slightly different level. They are already settled in villages, but the difficulty is they are scattered, generally in the hills far away from the centres of habitation. Education is undoubtedly the chief need, but to be effective and practicable as regards cost, it can only be imparted to them after they have been removed to, and settled in, farm colonies. The organisation of these colonies will do more for them than the mere establishment of elementary schools. But after all farm colonies may be difficult where the people are already settled in villages for which they have naturally a strong attachment. Some special scheme of education must accordingly be evolved for their children which would combine the advantages of cheapness, attractiveness and accessibility. The case of Hindu untouchables presents an entirely new set of difficulties. That any man made after the image of God, endowed with

[16TH MARCH, 1916.] [*Mr. Dadabhoy.*]

brains and a moral sense, should pollute his fellow being with his touch, is incredible. The very idea is revolting, and is enough to shock humanity. But despite of our vaunted civilisation, despite of our progress and enlightenment, large bodies, nay millions, of men have been relegated to that infamous position for centuries through Brahmanical persecution. The District Manual of Mangalore points out :—

'The *Ande Koragas* were considered so unclean that they were not permitted to spit on the public way, but had a pot suspended from the neck which they used as a spittoon.'

Good gracious! I hope this is a description of the past. Moreover, this may be an extreme case, but the exclusion of the Depressed Classes from even court-houses and other public places in certain parts of India is a notorious fact. The pariah, under the penalty of severe punishment, must call out from a long distance on the public way to warn high caste Hindus of his presence. The touch of the filthiest vermin does not offend so much as that of the 'untouchable' man. Could human perversity go further? Could hatred brutalise humanity more? And yet that is a true picture of even the present state of things. It is, Sir, a shame to Hindu society, it is a shame to Hindu culture, it is a shame to India. Government cannot really sit idle in the face of such enormities. But it may be argued the problem is more social than anything with which Government are directly concerned. Government must be powerless to remove the social ban. It is for the society itself to apply the corrective. At the same time, it has been pointed out by more than one earnest worker in the cause that, without the removal of the ban, no real improvement in the condition of the Depressed Classes is possible. Is there then no hope for these millions of inoffensive, law-abiding, industrious citizens? I, for my part, do not despair.

"Sir, putting aside for the moment this problem of social reform, I submit Government could do much to improve the lot of the Hindu untouchables by means of well-devised schemes of educational, industrial and political advancement. It has been remarked by one actute observer that their conversion to Christianity effaces all memories of their former degradation. Change of religion is, therefore, their only hope. This view, however, does not appeal to me. The change in treatment which follows the assumption by them of European dress is produced, not by the conversion preceding it, but by the material wealth and prosperity lying at the back of it. Poor Christians do not enjoy the same consideration. It is wealth which counts in these days more than anything else. The facts taking place before our very eyes confirm me in this belief. Some of the *mahars* in the Central Provinces are prosperous, and as they gain in wealth the social ban is relaxed. In other provinces also the acquisition of wealth by members of the Depressed Classes is followed by a perceptible improvement in their relations with the higher sections of the Hindu society. I am credibly informed in one of the provinces a *kalal* has been made a Raja by Government, and it came out in evidence sometime ago that a Brahmin, a Mukerji, had taken rice at his place. The fact thus stands out that wealth is a powerful leveller, and caste disabilities disappear under its influence. And in this we have a key to the solution of the problem.

"Sir, to my mind, our object should accordingly be to help the material prosperity of the Depresssd Classes, and to secure its official recognition by the appointment of the deserving members to the local bodies and other official committees, and, in exceptional cases, by the bestowal of honours. Some sort of education is the first necessity, but high literary culture is not a condition precedent. In my humble opinion, our first objective ought to be to secure the widest diffusion of elementary and secondary education among the classes concerned simultaneously with industrial education. Next in importance is the encouragement of industries among the men. By attacking this educational and industrial problem with vigour and determination, Government would help materially in the solution of the whole problem of the elevation of the Depressed Classes. The impetus of appointment to public offices will again encourage the dissemination of education

among them. Thus, the problem to which I claim the attention of the Council and Government is three-fold—educational, industrial and political. In some instances, the solution of this problem may have to be supplemented by colonisation and settlement; but those are questions of detail. I request Government to adopt a definite policy of reform, and to formulate a scheme in consultation with the Local Governments and official and non-official representatives.

"Sir, in this connection the question of cost claims our first consideration, as Government may not, in present circumstances, be disposed to view with favour any scheme involving large expenditure. But my own idea is, the magnitude of the task and the inevitable heavy cost need not paralyse us. The investigation I recommend in the Resolution can alone enable us to form a correct estimate of the amount of expenditure necessary. But I would not be wrong in assuming that it will be large. Even then I hold that the task of elevation of the Depressed Classes should be taken in hand without delay. And I hold further that this can be done without imposing an extra severe strain upon the Exchequer. The State will undoubtedly have to spend more and more of the educational grants on special institutions, but the major portion of the work can be done in other ways. Philanthropic bodies and Christian missionaries are already rendering splendid service in the cause. The success of the missionaries among the aboriginals is well known. The great Salvation Army has shown us a new way of humanising tramps and criminals. I do not think I can speak too highly of their reforming work. It is written large on the pages of the history of the Punjab, the United Provinces and Madras. The chief drawback in the case of all these missionaries is, that their object may be viewed with suspicion. The Arya Samaj may be expected to do a good deal in this line. It has special advantages and can do much. The various Depressed Classes Mission Societies, either organised or encouraged by devoted philanthropists like Sir Narayan Ganesh Chandavarkar and the Hon'ble Sir Sankaran Nair, are active and watchful. All this non-official agency can be utilised by the Government, with proper safeguards, where necessary, to accelerate the pace of advancement among the Depressed Classes, moral, material and educational. With a liberal system of grants-in-aid the object can be attained at a minimum of cost. Government can further reduce the State cost by attracting private benefactions for the behoof of the Depressed Classes. Private charity, experience shows, usually takes its direction from the lead of Government, and benefactions can be made to flow in this channel with a little official encouragement and a discriminating official recognition. This source has not been exploited so far. But more than all these, I would urge the adoption of the Swiss system of education colonies in which industrial education is imparted to the pupils along with general education, and the industries help the colonies to become self-supporting. Captain J. W. Petavel is now in India, popularising the method and organising experimental colonies. From what has been said of education colonies, they appear to have a great future, and they are calculated to prove especially valuable as an elevating agency in the cause I advocate before the Council. Much could thus be done by Government to remove from the fair name of India the stigma of the Depressed Classes without incurring enormous expenditure. But we must have a definite policy for a beginning, and a workable scheme of reform. And this plan of action I ask Hon'ble Members to recommend to Government by adopting this Resolution."

The Hon'ble Sir Gangadhar Chitnavis:—"Sir, I have listened with great interest to the Hon'ble Mover's comprehensive and very attractive speech, and though I do not wholly agree with the somewhat exaggerated picture he gives of the treatment of the Depressed Classes by the higher classes, I share his earnest desire that the elevation of the Depressed Classes should be systematised, and, wherever possible, pushed forward. The old condition of things has now everywhere changed. I also admit that in

parts of India, through the benevolent efforts of Government and the various missionary bodies, including the Depressed Classes Improvement Missions with many high class Hindus as members, the material condition of the depressed classes and the lower castes has everywhere, to some extent, improved along with that of the general population. The whole tendency of modern civilisation is to remove inequalities in social status based upon anything but sterling merit, and to produce complete toleration among the conflicting units. It is producing its natural results in India. With the principle 'of live and let live' at work, the weaker sections of the community have a chance, of which they are not slow to avail themselves. But I believe the pace of progress could be accelerated. In the Central Provinces, the *Mahars* and the *Mangs* are improving. They are freely receiving education in Government and missionary schools, and the social disabilities of the more thriving amongst them are gradually becoming less oppressive. Some of the *Mahars* have shown great aptitude in the various trades, and some of them have been admitted into Government service as patwaris and clerks. Acquisition of wealth is certainly a great factor in the solution of the problem. And so far as that is dependent upon general, industrial and technical education, it is a matter in which Government help is both desirable and necessary. The Government and the various missionary societies have done much in this direction; but before any comprehensive scheme of elevation can be prepared, a thorough investigation of the whole subject must be undertaken, and that is what my friend the Hon'ble Mr. Dadabhoy seeks in his motion. I have, therefore, great pleasure in supporting the Resolution."

The Hon'ble Mr. Rama Rayaningar:—"Sir, I am glad my friend, the Hon'ble Mr. Dadabhoy, has raised this question of the elevation of the Depressed Classes. I wanted to move a Resolution about it myself. In 1913, I invited Government attention to it by interpellation and also by general observations in the course of the debate on the Budget. But the Government reply was to a degree disappointing. They refused to show the members of the Depressed Classes any special consideration in the matter, even of appointment to the low paid public offices. If that attitude continues, there is little hope of progress, but I hope in the interest of the country better counsels now prevail.

"Sir, we have in Madras a large depressed class. Some of them are not allowed even to enter public places. Their movements on the public way are not free and unrestricted. Regrettable as it is, it is true that in some cases the social rigours are so great that, to escape from them, the depressed people are driven to embrace either Christianity or Islamism. Their only fault is their birth. Are we Hindus so dead even to our own interests, that we are not prepared to entertain kindlier feelings towards the depressed classes, and would much rather lose than keep them among us by humane treatment? Can it be believed that the elevation of the depressed classes is repugnant to the sublime principles of the Hindu religion, or that it was the intention of the ancient lawgivers that they should be permanently kept out of the common rights of humanity? The Hindu religious tenets and the intentions of the lawgivers are not in favour of such extravagant theory. The Avatar hero of Ramayana did not scruple to mix with Guha, a Nishada, a Panchama by caste. The sage Kanva, according to *Bhavishyottara purana*, admitted into the sacred fold of Hindu Dwijas a large number of Mlechyas. The *Skanda purana* relates how a whole tribe of Konkan fishermen were elevated into Brahmins. Sri Ramanuja Charya, the great teacher of the *Vistawita* philosophy, took the Panchamas by hand and promoted them in the social scale. But unfortunately through the moral degeneration of centuries Hindu Society has lost its former elasticity; the rules have become crystalized; the intentions of our lawgivers have become obscured in a mass of unmeaning and uncompromising practices. We must have a broader outlook and a more practical sense of our present needs and our social duties. We must revert to the old order of things when Hinduism was

progressive and the Hindus constantly got recruits from among non-Hindus and advanced to conquer the world. I hope there is a change coming in the country. Hindu thought is undergoing a slow evolution, and the day may not be distant when our leaders will themselves advance to receive in brotherly embrace the depressed of our society. The Brahmo Samaj, the Arya Samaj and the Theosophical Society perhaps give us the lead.

"Sir, this however is not the direction in which Government can be expected to help us. The change will come of itself. Under the influence of modern civilization we are progressing fast, and the reconstitution of our society on modern and liberal lines is a question of time. But it is not desirable to leave the solution of this sore problem of the depressed classes to the humanizing influence of time. The Hon'ble Mover has indicated the line in which Government can and ought to move to help in the solution. Government has certain obvious duties in this matter, and it is sincerely to be hoped it will not be slow to recognise and perform them. The situation requires tactful and sympathetic handling. We representatives of the people have the right to expect Government to organise special measures for the elevation of the depressed classes. Sir, it will not do to consider their claims to educational facilities and to public appointment along with those of the other sections of the community. Regard for the special needs of minorities is one of the accepted principles of this Government. The special treatment of the depressed classes will not therefore involve any serious violation of policy. I recommend to Government the adoption of a definite policy and the formulation of proper schemes with due regard to local conditions. Sir, the object of the Resolution has my whole-hearted support."

The Hon'ble Mr. Surendra Nath Banerjee:—"I think, Sir, every member of this Council, be he an official or a non-official, will sympathise with the object of this Resolution. Whatever differences of opinion there may exist with regard to the terms of the Resolution or the form of the recommendation that has been made, I think we all welcome the discussion that this Resolution has given rise to in this Council. We of the educated community cannot neglect this question; we cannot discard the depressed classes; they are Indians They are of us and we are of them, the bone of our bone and the flesh of our flesh, and we feel this, that in the onward march which has begun, in the onward national movement, we must take them with us, and if we do not do that, they will drag us down. The progress of a community does not mean the progress of this section or of that; it means the harmonious, the conjoint, the simultaneous advancement of the whole, and therefore in this onward movement the depressed classes must take their place and their share. Sir, this movement is universal throughout India. I regret very much that my Hon'ble friend the mover of this Resolution went somewhat out of his way to level (I do not think he did it intentionally) an attack against the Hindu community. He must bear in mind that we are the inheritors of past traditions, of a civilization as ancient as the world. That civilization undoubtedly had its defects, but that civilization in the morning of the world was the guarantee for law and order and social stability. In the past it afforded consolation to millions; in the future it is destined to afford consolation to millions. We are trying to evolve a national system in conformity to our present environments, but we cannot push aside all those things which have come down to us from the past. We reverence the venerable fabric which has been built up by our ancestors. We notice their defects, and we are anxious to get rid of them gradually and steadily, not by any revolutionary movement, but by the slow, steady process of evolution. My friend must have a little sympathy with us; he must extend to us the hand of generosity in our efforts to deal with these problems. My Hon'ble friend suggests that the Government should take measures—measures of an educational character, measures which will help forward the moral and material advancement of the depressed classes—and he recommends further that the Provincial Governments should frame

schemes, in consultation with officials and non-officials. Sir, we welcome the action of Government in a matter of this kind, but after all, if you analyse the situation, it is a social problem, and the British Government, very properly, as I think, in conformity with its ancient traditions, holds aloof from all interference with social questions.

"Government can do a great deal by way of education, a great deal by helping forward the industrial movement among the Depressed Classes. But the vital problem, the problem of problems, is one of social uplifting, and there the Government can only afford to be a benevolent spectator. It may sympathise with our efforts, but it cannot actively participate in them. I say the crux of the problem is social. I think, in regard to matters of administration, the best way is to look at a concrete case and try to solve its complexities by reference to actual facts. I am acquainted with this problem in my province. I may say that I have been taking an interest in the elevation of the Depressed Classes. We have a hundred thousand *Namasudras*, as they are called in Bengal in the Faridpur district, and we have a few thousand in the Mymensingh district. Now what is their grievance? It is this, that the upper classes will not partake of food or water which is touched by them; that the upper classes will not admit them into the rooms where they are dining; that the priests of the upper classes will not minister to their religious rites, and that in some cases the upper classes will not allow the wells where they draw water from to be touched by them. These are the grievances which practically weigh heavily upon the Depressed Classes, and we are doing our best by the education of public opinion to bring about a reasonable and amicable settlement of these points.

"The settlement cannot come in a day; public opinion must be educated, public feeling has to be transformed, a better understanding has to be established. It is the work of years, but the work has begun, and I am perfectly confident that, with the growing desire of the educated community to uplift these *Namasudras*, within a measurable distance of time, most of these grievances will have disappeared. My Hon'ble friend has made an attack upon the Hindus; my friend has said that we are doing nothing. I think he said that. Am I right in that interpretation?"

The Hon'ble Mr. Dadabhoy:—"No, my Hon'ble friend is wrong."

The Hon'ble Mr. Surendra Nath Banerjee:—"I am very pleased to hear that. I was under the impression that he had made that attack, and if he had, I should certainly have replied to it with considerable emphasis. We are doing our very best in the task of uplifting the Depressed Classes. As a matter of fact we have our organizations. There is the Brahmo-Samaj which has got a mission of its own; there is the Social Service League which has got a mission of its own; there is the Arya Samaj which is working in the same direction; there are leaders in the mofussil who are helping forward this movement. And in an educational way we are doing our best. A concrete fact will interest the Council. I am associated with the Ripon College which contains a very large number of students. We make it a point, when a poor member of the Depressed Classes applies for admission, either to admit him free or to charge him half fees, and I believe the same thing is being done by the authorities in the other colleges. There is the difficulty about our hostels that, while our students will perhaps live with them in the same hostel, they will not dine with them, and I find from the proceedings which have been published in to-day's papers that my Hon'ble friend Babu Radha Charan Pal moved a Resolution in the Bengal Legislative Council asking the Government for a small grant of Rs. 1,200 for a hostel for these classes. Therefore, the fact is that educated public opinion in Bengal and in India is most anxious that there should be a definite movement towards uplifting the Depressed Classes. Government can co-operate by establishing schools, by helping the organisations which are already at work by starting Co-operative

Credit Societies, and by affording facilities for the admission of members of the Depressed Classes into the public service. In this way the community will be educated; their self-consciousness and their self-respect will be strengthened. They will learn to assert their rights, and, Sir, when a community has learnt to assert itself its future is assured, for, sooner or later, it will get its rights. And the *Namasudras* have begun that process.

"I think, therefore, that the future of this question appears to me to be exceedingly hopeful. I hope and trust that the Resolution of my Hon'ble friend will be accepted—at least the principle of it: I think it can do nothing but good. The association of Government with private effort in this direction will stimulate private effort; and will bring about, within a measurable distance of time, a satisfactory solution of this great problem."

The Hon'ble Mr. Hill:—"Sir, the Hon'ble Mr. Dadabhoy, in moving this Resolution, has placed two sets of people in the dock, first of all the Hindus and secondly, the Local Governments. My Hon'ble friend Mr. Surendra Nath Banerjee has effectively defended that part of the attack which was levelled at the Hindus, and has pointed out that the fundamental difficulty in connection with this problem is, at the root, religious and social, and the two, in the case of Hinduism, are indissolubly connected That being so, it was, I cordially agree with my Hon'ble friend, somewhat ungenerous to make an attack upon the leaders of Hindu opinion for their failure to grapple with a problem of extraordinary difficulty. However, I am not concerned so much to defend the Hindus who, under the able leadership of the Hon'ble Mr. Banerjee, are quite able to take care of themselves. What I am anxious about is, to express the bewilderment with which I listened to the remarks of the Hon'ble Mover of this Resolution, which assumed throughout that Local Governments were sitting with folded hands and required the leadership of the Government of India. With all respect, Sir, I have come sufficiently recently from a province to state that that position is diametrically opposed to the facts. I can only speak with some authority in respect of one province, but in respect of that province, I desire to repudiate, with the greatest possible emphasis, the suggestion that the Local Governments are indifferent to this problem. Nothing could be further from the facts On another point, I should like also, in respect of this Resolution, to indicate that the suggestion that a Committee emanating from the Government of India should be appointed, coupled with non-officials, to go into this question and to formulate a sort of uniform policy for India, seems to be one open to serious objection. I have listened with considerable sympathy to the general object which the Hon'ble Mover has in view, and I do not wish for a moment to suggest that the objects aimed at by this Resolution may not be desirable in themselves; but the suggestion that there ought to be a uniform policy laid down for the whole of India strikes one coming from the Bombay Presidency, where conditions from one end to the other differ so materially, as likely to hamper rather than to further the object which we all have in view. Between the north in Gujerat, and the south in Bijapur, where Mr. Starte is making, as I believe my Hon'ble friend Sir Reginald Craddock will explain, most admirable arrangements for the reclamation of the criminal classes of the Southern Division, there is such a wide difference of conditions and circumstances, that the suggestion that a uniform policy could be applied to all these classes seems to me absolutely untenable. In addition to those bodies to which my Hon'ble friend Mr. Surendra Nath Banerjee referred who are doing useful work, gradual spade work, in the preparation of the ground for the elevation of the Depressed Classes, I should like to add the name of the Servants of India Society. That Society in Bombay—and it is for the purpose of mentioning this that I have ventured to intervene in this debate—that Society in Bombay city is working whole-heartedly, in conjunction with officials, who are helping, as far as possible, in the direction of improving the economic condition of the Depressed Classes of Bombay city.

So far they have limited themselves to that. No doubt they will extend their operations as time goes on; but what I wish to emphasize, Sir, is that the Servants of India Society is precisely the kind of organization which, if it enlists the assistance, as the Servants of India Society has done, of Government and Government officials so far as is legitimate, can effect much more within given limits than any official or semi-official committee appointed by Government. The members of the Servants of India Society know precisely the conditions in which they are working, and Government could not possibly have a better agency to advise and help them and to indicate to them the directions in which Government can most successfully intervene.

"For these reasons, Sir, while sympathising—as all the speakers have done—with the objective which the Hon'ble Mr. Dadabhoy had in moving this Resolution, I have ventured to suggest that the charges brought against Local Governments are void of foundation, and that the suggestion that a committee, composed of officials and non-officials, should be appointed in order to create a uniform policy to give effect to the objects of the Resolution, is one which cannot really commend itself to those who have the objects of the Resolution at heart."

The Hon'ble Pandit Madan Mohan Malaviya:—"Sir, it seems rather ungracious to say so, but a sense of the dignity of the proceedings of this Council compels me to utter a protest against the manner in which sometimes subjects are brought before it for consideration. I am certain that in private conversation, in private dealings between man and man, no member of the Council would be guilty of the discourtesy which some of us, in the course of our discussions, I am sorry to say, have at times shown towards whole communities.

"In moving the Resolution the object of which I may at once say, has my whole-hearted support, my friend, the Hon'ble Mr. Dadabhoy, went out of his way to make remarks against the Hindu community which, I think, he ought to have avoided. Now, Sir, I am not here to defend everything Hindu that exists. I am not here to apologise for the many prejudices or superstitions, which I am sadly conscious are to be found among one portion or another of our community. But it is not the Hindu community alone which finds it difficult to get rid of prejudices. You, Sir, know—every sensible educated man knows—that whatever the community may be, superstitions and prejudices die hard. Without meaning the smallest disrespect, I would instance the case of the marriage with a Deceased Wife's Sister Bill. I suppose everybody recognises that that was a measure of an absolutely harmless nature which should have been accepted long, long ago by English society. At any rate, that is the view of a lot of people. And yet we know very well how many years it took, and what an amount of effort it needed to persuade English people to accept such a simple measure. Well, I mention that only as an instance to show that prejudices die hard. We Hindus have got some much worse prejudices to fight against, I acknowledge, I own it. But I do not think it is within the province of a Member of this Council either to lecture to the Hindus present here or to those outside as to socio-religious disabilities among themselves which they might fight against and remove. I think the province of Members of this Council is limited to dealing with matters of legislation or other administrative matters which may properly be taken up by the Government. As has been already pointed out, the Government have, in pursuance of a wise and liberal policy, laid it down that they shall not interfere in matters of a religious or socio-religious character, and accusations of the character in question ought, therefore, to be avoided here. When they are indulged in, it places members other than those who bring such charges in a very awkward position. I do not wish to descend into a disputation as to the merits of the imputations or the justification for the general observations that have been made. If I do, I shall be guilty of what I protest against. And yet if I do not, I am left in the position that I have heard without protest remarks showing that the Hindu community from one end of the country to the other was guilty of all that my friend, the Hon'ble Mover of the Resolution, has suggested. He has not

paused to qualify his remarks; he has not paused to inquire whether the conditions he had heard of as obtaining say, in Madras, obtained at all in the United Provinces, or whether they were different; and whether the conditions which obtain in the Punjab are the same as those which obtain in Bengal and Bombay. It is one sweeping generalisation that he has made against a whole community. I am conscious that we Hindus have many prejudices to fight against and conquer; but I submit that this is not the place to tell us of them.

"Secondly, in dealing with the Resolution, my Hon'ble friend might well have done a little more justice to the Government. I have been a student of the reports on Public Instruction for many years. My Hon'ble friends, Sir Edward Maclagan and Mr. Sharp, will bear me out when I say that there are numerous reports on public instruction which show that the Government of India—and under the direction of the Government of India, the Local Governments—have for decades past been endeavouring to promote in a special degree the education of the backward classes. I find that, even in the report to which my Hon'ble friend referred, a list is given of the many ways in which the Government have been endeavouring to promote the education of the backward classes. Not only that; but we know that in many places men of the humblest classes have risen high, and have been greeted as any educated man would be greeted. I had the honour of having a friend at Allahabad who belonged to the *Chamar* class. He was an M.A. of the same University as I belonged to. I greeted him just as cordially as any other man; and I would in similar circumstances greet any *Chamar* or any *Chandal* as cordially. It is not that the old conditions are not changing. They are changing; they must change. But we have to recognise that social conditions are the legacy of a number of circumstances. They are not created to order. And education is the great solvent which removes all social differences and prejudices. Let there be more education. I join with my Hon'ble friend in asking that more efforts should be made in that direction. But let not the impression go forth, as the Hon'ble Mr. Hill has very well pointed out, that we are starting a new campaign, or that effort in a new direction is being suggested which has hitherto been absent from the mind of the Government—both the Government of India and the Local Governments. The history of education, as can be seen from the Quinquennial Reports previous to that of the Hon'ble Mr Sharp, shows that the Government has been very much alive to this aspect of the question.

"But, Sir, when I come to deal with the subject-matter of the Resolution, I find myself in complete agreement with my Hon'ble friend. I understand he desires two things. One is that the status of the members of these Depressed Classes should be elevated. So far as the elevation or depression of that status rests upon social or socio-religious causes, the Government would rightly abstain from making any attempt in that direction. But I submit that it depends largely, almost wholly—nay, I say it depends wholly—upon education. That is the one solvent which will solve this problem, and most certainly do I wish and pray that the Government will do as much more as it can towards the spread of education among these classes. There are, however, other facts to be recognised. In going to deal with the Depressed Classes, the Government cannot regard other—what I may call non—Depressed Classes as out of the field of its consideration. The British Government has been offering education to children of every class in India. If it has not been doing so, it should. But if certain classes will not come forward to avail themselves of it, that is due to causes for which the Government is not responsible. If there are certain classes who readily avail themselves of that education, that again is the result of causes which have worked for a long time. All that we can reasonably ask—and I do join my friend in asking for it—is that there should be absolutely no impediment placed in the way of the education of any boy belonging to any class of the community. Be he a *Chamar*, be he a *Chandal*, be he or she of whatever class or condition, if there is a child living and breathing in India, the schools of the Government and the schools of the community ought to be

open to that child as much as to any other child. And if there are any difficulties thrown in their way, if any difficulties are shown to exist anywhere in the case of these children of the Depressed Classes, the matter should certainly be brought to the notice of the Government for remedy at the earliest possible opportunity. I will go further. I will say let there be special facilities, special encouragement given, in order to induce them to come forward to avail themselves of education. For I wish that there should be provision for educating every child. I hope the time will soon come, distant though it may seem at present, when compulsory education will be provided for every child in India. In the meantime let us provide such facilities as are possible for every class of the community who will come forward to avail themselves of it. And when you have once given education, an amelioration of the other conditions that my friend speaks of in the Resolution will come in as a matter of course. I have known many instances which support my view, but I do not wish to take up the time of Council by narrating them. I have heard from the lips of so revered a man as Sir Gurudas Banerjee, a Brahmin of Brahmins, how he treats every educated man who goes to him, whatever his caste may be. I know of no friend who would not be ashamed of himself if he refused to treat an educated brother in the way in which he should, merely because he happened to be of a lower or Depressed Class. Therefore, I say let there be more and more of education; let the other social advantages which result from education spring up, and the complaint about the treatment given to the Depressed Classes will disappear.

"I have already said in the beginning that we all have got to contend against some difficulties, and I know that even with education there may be some small-minded people, some narrow-minded people, who may fail to act up to the standard that is the right standard for a man to adopt towards his brother-man. But such instances you will find even among communities other than Hindus. There is not a community in which there are not some people who would allow their treatment of their fellow-men to be affected by differences in social position. Even in societies where there is absolutely no caste, in the sense in which we Hindus have it, in European societies and even in Muhammadan societies differences in social position sometimes lead not merely to the refusal of the courtesies which may be due to a man, but sometimes even to his persecution. There will always be some such men perhaps in every community: let us not think too much of them. So far as the general bulk of the community is concerned in India as elsewhere, once you educate the humblest men, once they begin to lead a life of cleanliness, once they wean themselves effectively, extricate themselves from the bondage of the customs and habits and surroundings which have for a long time been associated, unfortunately associated, with their position, there will be absolutely no bar to their being admitted into society, no bar to their being treated as educated brethren, and it is in that view, Sir, that I support the prayer that has been made that the Government should do all that it can to promote education among these humble people. I may add, however, that I do not at all see the necessity for a committee such as has been proposed. I entirely agree with the Hon'ble Mr. Hill in the view that there is no need for such a committee. I think, Sir, that Government, both Imperial and Provincial, are alive to their duty in this direction, and I think all that is needed is the provision of more funds. As Lord Curzon said long ago, the question of education in India is a question of funds; if funds are forthcoming, if grants for education will be made in abundance, then I have no doubt that this question of the amelioration of the conditions of the Depressed Classes will by itself steadily move on towards solution. For that purpose and to that extent I support the prayer which is contained in the Resolution."

The Hon'ble Mr. Madhu Sudan Das:—"Sir, the turn which the discussion on this Resolution has taken reminds me of the beginning and the heat of a football match. When two teams about to be engaged in a football match meet one another, each wishes that the other should come out

successful; but when the kicking of the ball commences, in the heat of the sport, all that benevolence disappears, and the whole thing assumes an altogether different aspect. The object which moved the Hon'ble Mr. Dadabhoy to put forward his Resolution has the full sympathy and support of all the Hindu Members. But in his attempt to kick the ball of responsibility to the other side, he raised a heat in the sport which has brought out undesirable discussion. But the discussion and the remarks which have been made have prominently brought into view these facts, that the leaders of the Hindu community are as anxious as anybody else to advance the interests of these Depressed, I should rather say, Oppressed Classes. But then to quote the language of the Hon'ble speaker who preceded me (Mr. Malaviya), customs and traditions die hard. And the Hon'ble Mr. Banerjee in his speech pointed out that when it is a contest between a desire to improve and between old customs and traditions—customs based in most cases on religion—then we must look forward to the work of evolution; a revolution should be avoided. Now, then, what is the position of the Depressed Classes as we find at this moment of the discussion of this question in this Council? People are advancing to approach the Depressed Classes and give them the right hand of uplift. But that must be the work of evolution, and evolution is slow. It may be steady, but it is slow, very slow. Who can say how many millions of ages it took to evolve man out of his ancestor, the monkey, according to Darwin? Evolution is very slow, and traditions and customs die hard, but there stands the man of the Depressed Class. What is his position? He is away from Hindu society in the midst of a desert. Why is he there? Because at some time or other he was cast away as the sweepings of society; and he does not receive the same treatment which even sweepings in thriving cities do, because the sweepings are looked after so that they may not ferment and breed germs of disease. Here these people live on the outskirts of a village; they are deprived of every opportunity of seeing the example of a good moral healthy life; they are deprived of what is a very powerful deterrent in the human nature, and that is the approval of respectable society I believe, Sir, that the censure of society is a more powerful deterrent than the sentence of a judge.

"Sir, the man who confesses his guilt to the policeman of having committed theft will conceal it from his neighbour; the soldier who will walk into the mouth of the roaring cannon will shrink before the little finger of scorn of society. Society furnishes a very powerful motive for a man to be worthy of its approbation and to earn its good opinion. What is the position of the Depressed Classes? What wonder if they turn to be criminal? It is all very good, Sir, to speak of the Criminal Tribes, but I am afraid very few of us realise the meaning of these two little words. A few men in a village commit an offence to which perhaps they are driven by hunger, and the residents of the village are all put down as belonging to the tribe of criminals. Before a child is born with the impress of God's innocence on his face, while he is actually drawing his mother's blood in his mother's womb, the brand of the criminal is put upon him. That is the meaning as I understand of criminal tribes, and that is what we have at the present day under the British Government, though the brightest jewel on the Crown of England was earned by abolishing slavery in the world. It is not my duty here to say what the Government has done or what the Government should have done. The question is, if those responsible for the administration of the country feel that they have done all that they could do or should have done to stretch the right hand of help to uplift these men from their pit of degradation; if they are satisfied I have nothing to say. Reference has been made in the course of the speeches delivered to the missionaries' benevolent efforts in this direction. I may say that on account of the complexity of the Hindu social system the missionaries perhaps in some cases have added another Depressed Class. They acted from the best of motives, from the most benevolent of motives, in fact I should say from the highest of motives, but on account of their ignorance of the social conditions and their inability to understand the complex rules of society, they have added another Depressed Class, and I belong to the

[16TH MARCH, 1916.] [*Mr. Madhu Sudan Dass; The Vice-President; Mr. Hudson.*]

Depressed Class of the Indian Christian community. I was born a high caste Hindu, but owing to my conversion I belong to that additional Depressed Class. The doors of this Chamber are hermetically sealed against that Depressed Class. If any Resolution is sent to this Council on the subject it is considered controversial, perhaps the very existence of that class is considered problematic; and that in a country where the Government maintains an ecclesiastical establishment and where the King who rules over us proudly bears the title of the Defender of the Faith. But let us turn to the situation where the Government can be of some help; many of these Depressed Classes are to be found in the jails; a man goes to jail and is taught an industry, he learns an industry and we often find that on the very day he regains his freedom he commits an offence again. To my mind that suggests a most interesting psychological problem. Why does he do this? Outside the jail he has those whom he loves and who are near and dear to him. As I said, after leaving jail he loses no time in losing his freedom again; why is that? I think, Sir, because the rules under which he works do not present to his mind any reward; he does not associate labour with the reward of labour; he considers the grub he gets is due to his imprisoned conditions. Can Government do nothing to improve this state of things? Cannot the jail rules be relaxed in such a way that the man would associate his right to earn an honest livelihood with his labour, and thus have an inducement to engage in the industry which he has learned in the jail? I suggest this because these jail birds are the people who are entirely under the control of Government. I do not like to go further because I know Government rules are cast-iron, but it is certainly in the power of Government to recast them in order to suit the present circumstances. I think we are agreed that this class really deserves our earnest attention, and I hope the Government, as well as those outside the walls of this Chamber, men of position, men of influence, will all combine (instead of kicking the football of responsibility among ourselves), that they will— "

The Hon'ble the Vice-President :—"I must ask the Hon'ble Member to bring his remarks to a close; he has one more minute."

The Hon'ble Mr. Madhu Sudan Das :—"I will die before that minute expires! I hope all will join together and stretch forth their hands of sympathy and help with a sincere desire to uplift those classes in such a way that the class will feel that the hands are held out to uplift them and not to strike them."

The Hon'ble Mr. Hudson :—"Sir, I beg to be permitted to say a few words. The last district in the Bombay Presidency in which I served was the Panch Mahals. The Hon'ble Mr. Dadabhoy's definition of 'Depressed Classes' would include the *Bhils*. I don't think they would be pleased to hear that they were so described because the whole country contains *Bhils*; there are there not only more than enough schools for them but there is also a school for educating *Bhil* school-masters. There are no criminal tribes resident in the district, but there are, of course, lower classes, really Depressed Classes, *Dheds* and *Bhangis*. For the *Bhangis*, which are the lower class, there are some special schools, and the *Dheds* themselves get whatever attention they require either in separate schools or in verandahs, and all inspecting officers make a point of seeing that these boys, though they may be in the verandah, do get individual attention. So much for the Panch Mahals.

"The next district is the Dharwar district. There the same remarks apply to the *Mangs* and *Mahars*, the Depressed Classes. The criminal tribes have been taken in hand by Mr. Starte, to whose work the Hon'ble Mr. Hill has referred, and I am sure that all that can be done for this class is being done by Government. We cannot interfere with social and religious matters, and

that ties our hands very largely. In this district there is also a high caste Hindu Mission, a Depressed Classes Mission, working.

"With these few words, Sir, I bring my remarks to a close."

The Hon'ble Rai Sitanath Ray Bahadur:—"Sir, I should like to tell the Hon'ble Mover that there is no such rigid distinction—an insurmountable barrier—between the Depressed Classes and the higher classes of Hindus in Bengal as is supposed to exist in the Madras Presidency. The question is beset with religious and social difficulties, and as such, it is difficult to see how this distinction and this barrier, which are entirely due to religion can be removed by the appointment of a Committee. I think that the elevation of the Depressed Classes must be left to the ennobling influence of education, and education alone, and I must say that education has already done much to uplift the Depressed Classes in Bengal and to remove the marks of inequality which distinguish the depressed from the higher classes. Individual efforts are not wanting in Bengal, and I may say that some of the leaders of the educated community have been crying themselves hoarse for uplifting the Depressed Classes. But the society, I mean, the orthodox Hindu society, is not yet so advanced as to yield to the influence of the leaders of the educated community. As I said before, the distinction in Bengal is not so marked and not so rigid as in Southern India. I may state here that the Depressed Classes in Bengal, be they *Namasadras*, or *Chamars*, are freely admitted into our colleges and schools, and there is absolutely no barrier against their admission. I should further state that the Government has been doing much by providing liberal education to *Namasudras* in the Faridpur district, especially, in the sub-division of Gopalgunj, and the result is that several *Namasudras* have taken M.A. and B.A. degrees and Government has been very generous towards them by appointing some of them as Deputy and Sub-Deputy Magistrates, and Kanungoes, etc., and given them some other good appointments. I may add here that whenever an educated or degree-holder *Namasudra* appears before us we do not make the slightest distinction in our treatment between such a man and another educated Hindu belonging to a higher class. All these go to show that the uplifting and elevation of the Depressed Classes can only be achieved by education and education alone, and though I have every sympathy with the object of this Resolution, I can hardly believe that the formation of a Committee alone will do much to solve the difficulty."

The Hon'ble Mr. Davidson:—"Sir, this debate has already been long drawn out—though perhaps not quite 'in linked sweetness'—and I would not add to its length at all, were it not that I think I should be failing in my duty to my province if I did not set forth what has been done for the Depressed Classes by one of the 'criminals in the dock,' namely, the Government of Madras.

"I have had a subordinate connection with that Government for intermittent periods throughout the last 25 years; this began in 1891, when it was my task to compile the Presidency Administration Report. My point is that I have had some opportunity of gauging the policy of the Local Government, and with the knowledge so gathered I can confidently aver that nothing can be further from the truth than the statement that in regard to the treatment of Depressed Classes there has been a policy of drift. On the contrary, in three departments the matter has been constantly before the Government, in the Department of Education, in the Judicial Department, and more recently in the Forest Department. With regard to the Department of Education, I need say little. That has been adequately dealt with by the Hon'ble Pandit Madan Mohan Malaviya. It is the case, of course, notwithstanding what the Hon'ble Mover says, that successive Administration Reports of the Education Department have again and again devoted special attention to the question of the education of the Depressed Classes. I should like, however, before I leave the topic of education, to refer briefly to one or two statements of Mr. Dadabhoy's

in regard to which I do not think his information is quite up to date. He spoke of the outlay on Panchama education as amounting to 6·7 lakhs. I do not know where he took that figure from: the only reference I have to hand is the latest Presidency Administration Report. I find that under the heading 'Education of Panchamas'—a heading which has been included in our report for many years—it is stated that the total expenditure rose from 7·55 lakhs to 7·75 lakhs. Now I do not wish to draw any comparison between, say, 7½ lakhs and 6½ lakhs. My point is that even the larger figure is expenditure on schools which are reserved exclusively for the use of the Panchamas and in no sense represents the total outlay on the education of Panchamas; also it refers for the most part, if not entirely, to elementary education.

"Mr. Dadabhoy next referred to an alleged decline in the number of secondary schools. I suppose the number of schools is comparatively unimportant; what is of greater interest is the number of pupils. In the same Administration Report I find it stated that there was a 'notable increase' in the number of Panchamas in secondary schools.

"I will leave now education and pass on briefly to refer to the Judicial and Forest Departments. In the Judicial Department, that section which deals with the Agency Tracts in the Northern Sircars, has continuously paid special attention to the educational, moral and material improvement of the hillmen indigenous to those tracts who come within Mr. Dadabhoy's definition of Depressed Classes, though I fancy that, like the *Bhils* of Bombay, they would rather resent inclusion in that category. Apart from the Agency Tracts the Judicial Department has during the last few years initiated a new departure—the establishment of special settlements for criminal tribes. This movement which is particularly associated with the name of a former member of this Council, the Hon'ble Sir Harold Stuart, has been the subject of special attention during the past two or three years. Turning again to the only book of reference, which I have at hand, the last edition of the Madras Civil Budget Estimates, I find that the matter is of sufficient importance to take up three pages of the detailed estimates, and the details show that there were at least eleven such special settlements scattered over six different districts.

"It remains only to refer to the third and last department, Forests, and there all I need say is that it is the constant endeavour of the district officers of that Department to enlist the co-operation of the hill tribesmen, who are otherwise apt to be addicted to crime, but who, finding themselves provided with regular employment and looked after by intelligent officers, soon learn to do useful work. There have during the past two or three years, in particular, been special endeavours in that way to improve the status of the *Malayalis* in North Arcot and the *Chenzus* in the Kurnool district, and if I had a forest administration report by me I could easily add other instances from at least three or four more districts.

"That, Sir, is all that I have to say on behalf of the 'criminal' to whom I stand in the relation of next friend—and I venture in conclusion to urge that I have made out a clear case to show that my client—the Government of Madras—is entitled to acquittal on the charge of neglecting the interests of the Depressed Classes."

The Hon'ble Sir Reginald Craddock:—"Sir, I should like to preface my remarks by saying—and I do not think any one in this Council will contradict me—that the Government of India and every Local Government have always been ready to befriend the poor, oppressed, or depressed in this country, whatever their caste, race or status. The Hon'ble Member who moved this Resolution has brought within its purview classes of the community which are markedly distinct from one another, and present problems which differ totally from one another. He has accused the Government of apathy, and of merely following a negative policy of drift. Well, Sir, my task in

defending the Government from this charge has been considerably lightened. Not only have representatives of two Governments got up to protest against the accusation, but I find myself in the pleasant position of having two Hon'ble Members, with whom I often have to disagree, as the stauncheat supporters of Government of any who have risen to speak. I refer to the Hon'ble Mr. Surendra Nath Banerjee and the Hon'ble Pandit Malaviya. I welcome their support. As my Hon'ble Colleague Mr. Hill said, we can very well leave the Hindu community to make its own defence against the statements made regarding them by the Hon'ble Mover, and on behalf of Government, I can only say that, while we sympathize very greatly with the object which the Hon'ble Member has in view, yet we cannot approve, and in fact no member of this Council, either official or non-official, has expressed approval, of the particular methods which the Hon'ble Mover has advocated. I should like, however, to explain to the Council how widely different some of these problems are, and to indicate very generally how they have been met, drawing also on this occasion, as some other members have done, on my personal experience in this matter which extends now to over 30 years. And in my official career I have been brought in contact with these very problems from the date on which I joined the service, almost I may say, up to the present time. Mr. Dadabhoy includes tribes and castes which are hereditary criminals and regard a predatory life as their special occupation and means of livelihood. Regarding these the problem is one of winning them from their criminal habits, and finding them the means of making an honest livelihood. Various members have referred to the efforts made in this direction, the noble efforts of the Salvation Army, and in addition to these the efforts made directly by Government It has for many years now been recognised that when you are dealing with criminal tribes, it is not sufficient to hunt them down from here and from there, to catch them when you can and imprison them in jail, or to bind them down under the bad livelihood sections. You have to do these in the interests of the peaceful citizens among whom they rob, but you will never cure them by that means, and you will never turn them into honest citizens. The police in their case are bound always to watch those men, to follow them, to dog their footsteps and to track them down, and in that case, of course, no man has a chance of reforming himself and becoming an honest citizen. It is in recognition of this that the Government have passed measures which enable them to deal with criminal tribes; and it is in recognition of this that the Government have assisted and helped the Salvation Army in their efforts to meet and deal with this great evil. Reference has been made to the work done by Mr. Starte in the Bombay Presidency. His methods have been so successful that his special duty has, from time to time, been extended and he is turning castes which led a life of plundering their fellows and of vagrancy and crime of various descriptions—coining, cattle-lifting, miscellaneous pillage of all kinds—he is turning them into steady cultivators, and in some cases even he has found them employment in mills, and there is every chance that those men will before long be weaned entirely from their former methods. Well, Sir, it is quite true that we have not found in every Province officers of Government who are equally successful in dealing with these men, and that the Salvation Army's help has been requistioned from time to time. I do not care whether it is the Salvation Army or whether it is any other reforming body, but I do say that zeal, it may be religious zeal, is very often a necessary element in pursuing this difficult task among people of this kind and in winning them from evil ways. The fact that a man feels that he has a mission behind him encourages him to pursue his task, and enables him to inspire confidence among these men far more than can be secured by a mere paid official whom they recognise draws his salary and is merely doing the work for wages and not for any higher reward. Sir, I am sure the Council will agree that no more can be done than is being done in the direction of these criminal tribes. It is a slow process, and we are moving as steadily as we can. The Punjab Government have put forward a scheme which in these hard financial times we may not be able to start at once, but which, we hope, will be successful, and the Madras

[16TH MARCH, 1916.] [*Sir Reginald Craddock.*]

Government and the Government of Bombay have done their part, the United Provinces also, and some of the other Provinces where the problem is not quite so acute. But I have no doubt that, as time goes on, in every part of India the efforts to deal with this question will be more and more skilfully conducted and more and more successful.

"Now, Sir, I pass to another category of men to which the Hon'ble Mr. Dadabhoy has alluded. As far as I can make out from his remarks, he has included among these Depressed Classes people who might be described as submerged merely on the ground of poverty. The occupations which they follow may be of so menial or humble a character that few of their number can expect to earn more than a bare subsistence. The problem in the case of these men, Sir, is the whole problem of the distribution of wealth, the problem of the fight with poverty, and no Committee that could be got together, whether Official or Non-Official, could find us, for that purpose, any immediate solution. All the measures that we take to improve the education of the country, to improve agriculture and so on, will re-act beneficially on the poverty which must exist in all communities, and which must of course claim a number of victims in so large a country as this. We hope, and every one must hope, that as the development of the country proceeds, as irrigation is extended, as agriculture is improved, as industries develop, that, simultaneously with the improvement in all the better classes, must likewise come an improvement in the condition of those who may be described as 'hewers of wood and drawers of water'. But at all times, and in all places, the Government is always ready to help and assist those classes to the best of its powers.

"The third class to which the Hon'ble Mr. Dadabhoy refers is the aboriginal. As the Hon'ble Mr. Hudson has pointed out, it is quite incorrect to place the aboriginal among the Depressed Classes, that is to say, if you count the Depressed Classes as people who are in a condition of degradation. That is not the position of the aboriginal at all. They number among their ranks Feudatory Chiefs of small States, Zamindars of various degrees, cultivators and agricultural labourers, and, even if you come down the scale to the very bottom you will find even among the tribes which inhabit the forests and live by hunting,—if they cultivate at all, they cultivate by fire and the axe—, that they are proud of their traditions and of their ancestry, and they will trace their descent, it may be to the sun or moon, along with many of the higher castes of India. And among these men, Sir, will be found many virtues—virtues of patience, courage, simplicity and honesty. The wilder men are the true children of nature, and one of the chief difficulties that the Government has to contend with, is that, as you bring these men into contact with civilization, the first contact produces deterioration, and that is one of the problems we have to deal with in connection with aboriginal races. But it is quite untrue to suggest that Government has followed a policy of drift with regard to aboriginals. In their case, the history of legislation in India shows many enactments, especially land enactments, for the benefit of these classes. I have personally had great experience in dealing with aboriginals I know that, as regards many of the *Gonds* of Balaghat and Mandla, a great deal has been done to settle them on the land; their migratory habits are disappearing, their cultivation has improved, and they contribute to society many respectable members. In addition to that, the most noticeable feature in my time has been the tendency of these people, who were once wild and shy, to improve themselves and to ask for schools to be opened among them. That is one of the most gratifying signs of improvement which I have noticed in the course of my service, and the progress has been from year to year. Sir, these *Gonds* are by no means depressed. They show very high virtues. I recollect that, in the great famine of 1896-97, there was an Engineer who had won the confidence of these people. The work on which he was engaged was the building of a tank, and these men had promised him that they would work hard and finish the tank before the rains broke. Some time after, while the tank was yet unfinished, there was an epidemic of cholera and the *Gonds*, as is their wont when they are frightened by epidemics,

left in a body. Yet, within three days these men came back and said :—'Well, cholera or no cholera, we promised the Sahib that we would finish this tank, and here we are'; and they finished it. There was another movement of reform —a temperance reform—among the *Gonds* of Balaghat District with which my Hon'ble friend Mr. Low, who was Deputy Commissioner when I was Commissioner of the Division, and I were closely associated. It was a purely spontaneous movement which we did our best to help, and in order to do that, we caused large sums to be remitted from the excise farms of the *Kalars*, for the *Kalar* has ever been the worst enemy of the *Gonds*. That movement subsisted for a long time—it subsisted, I think, for two or three years—and then unfortunately, the reformers at the head of it were unable to keep it going, though a few of them remained total abstainers. To indicate the zeal shown by these reformers, I may mention that the head of this movement had prescribed penalties for any one who indulged in liquor. Unfortunately, one of his own wives went to a neighbouring bazaar, and bought three pice worth of liquor. This was a very awkward predicament for him, but he rose to the occasion. He cut off her hair, and tied it up on an arch at the entrance of the village as an example to all who offended against the rules that he had promulgated of total abstinence. As my friend the Hon'ble Mr. Low said, this was more creditable to his zeal than likely to conduce to his domestic felicity.

"The last class with which the Hon'ble Member dealt, is one with which the speeches to-day have been mostly concerned, and that is, the the class of people who are generally known as 'the untouchables,' whose disabilities are social and religious rather than economic. Among these, as has been indicated by various speakers, will be found persons of every varying grade of prosperity and poverty. Among the *Mahars* of Bombay, and of the Central Provinces and Berar, will be found individuals who own lands, take contracts, speculate in cotton, as well as cultivators, village-watchmen, and labourers of all degrees. With regard to them the difficulty is not that the Government does not recognise them, but that, until the habits and prejudices of centuries are removed, the hands of their neighbours must necessarily press upon them. My Hon'ble friends Pandit Madan Mohan Malaviya and Mr. Surendra Nath Banerji have both stated that the educated Hindu of to-day is prepared to receive his educated brother, whatever be his class or origin. I have no doubt whatever that that statement is correct, and that the educated community are prepared to do all that these Hon'ble Members claim for it. But you must remember that these people live mostly in villages and very often in the back lanes of towns, and that their nearer neighbours have not yet come under these broad and liberal-minded influences. Therefore, as many speakers have indicated, the problem in dealing with this question is more social and religious than purely administrative.

"I know myself of many difficulties in the matter of schools. There are many places where the *Mahar* boys will not be allowed into the school; they may be allowed in the verandah, and get only a small part of the master's attention there, or they may be entirely excluded. But it is only gradually that that difficulty can be met. I have constantly dealt with this very problem on the spot. I have reasoned with the people; I have said to them: 'These are taxpayers like yourselves, either let them come into the school, or, if you wish to indulge your own prejudices—they may be reasonable prejudices, as you consider them—but if you wish to indulge them, should you not contribute something in order that these boys may have a school of their own'? In that way some of the better people have come forward to help in the matter of wells, and schools for the low castes; they have assisted, and the difficulties have been got over. But of course it is a matter which must take time, and Government itself cannot use compulsion. They go rather near to it sometimes, for example, in travelling by railway, and when petitions are presented in Court. But they cannot ensure that these people shall always be well-treated in their offices. Very often, I think, some of these classes refrain from seeking service they might otherwise wish to secure, because their neighbours are not likely to treat them warmly. Although the Hon'ble Mover described the

statement made by the Government of Bombay as 'a magnificent *non-possumus*,' I think that it very accurately describes what the real difficulties of the situation are. Even though Government is willing to help in every way these unfortunate people, yet it remains true that—

'the position of these castes and tribes in the future depends partly on their own selves, and partly those more favoured Indian communities, which by extending the hand of human comradeship or hardening their hearts and averting their faces, have it in their power to elevate or to degrade them.'

"That, Sir, I think represents very truly and accurately the position of affairs as regard these Depressed Classes. But within my own time I know that a better feeling has awakened and that prejudices are gradually becoming less and dying out; and I look to that as an augury of much brighter things in the future. I am encouraged in that hope by the statements made by non-official Members in the Council to-day.

"Sir, we sympathise with the objects of the Hon'ble Mr. Dadabhoy's Resolution. We are willing to go so far as to ask Local Governments to put on record what they have done, are doing, and what further they can do, to improve the condition of these people. But we can place no faith in special Committees Have I not indicated to the Council how wide are the problems, and how impossible it would be to deal with them by means of Committees? The problems extend over the whole range of Government from top to bottom. What I say is that, while extending our sympathy to the objects aimed at by the Hon'ble Mr. Dadabhoy, we can go no further than promise to refer the question to Local Governments, and ask them whether they can do more than they are doing. That is as far as we can go, and with that assurance, I will ask the Hon'ble Member to withdraw his Resolution."

The Hon'ble Mr. Dadabhoy :—"Sir, I find myself in a very peculiar and unfortunate position. There are two parties in this Council, and they are both on their defensive on this occasion. My justification for bringing in this Resolution, if any justification were needed, is to be found in the unenthusiastic and half-hearted support which I have received from my non-official colleagues. It was no pleasure, I assure you, Sir, to me to bring in this Resolution. If I could possibly have avoided it, I would have very cheerfully and very willingly done so. This is the sixth year of the life of this Reformed Council, as Hon'ble Members are aware, and the second term is now approaching expiration. During the major portion of that time—the five years that I have been on this Council—I anticipated that the champions of public liberty, public spirit and public enterprise and culture—men like my friends the Hon'ble Mr. Surendra Nath Banerjee or the Hon'ble Pandit Madan Mohan Malaviya—would take the trouble of moving a Resolution to this effect. I waited all this time to see if one of these enthusiastic members would bring in a Resolution for the amelioration of the Depressed Classes; but when I found that none of them had taken up the matter—though at times this matter is discussed even in the Congress Pandal in a certain manner; when I found that it was not taken up in this Council—I thought it my duty to do so ———."

The Hon'ble Mr. Surendra Nath Banerjee:—"I must make a correction. We have taken up the matter and we are doing our best in Bengal. It is therefore not a correct statement, so far as I am concerned, to say that we have not been doing anything in connection with the elevation of the Depressed Classes. I hope my Hon'ble friend will make that correction?"

The Hon'ble Mr. Dadabhoy:—"My Hon'ble friend has entirely misunderstood me. I said that he had failed to take any action in this Council. I expected him to take this action, and as he had failed to do so, I, as a Parsee, representing a Hindu constituency, thought it my duty to bring this matter for public discussion in this Council.

"I find myself, therefore, in a very unfortunate position; and yet I say that the justification for bringing up this matter is very clear. My friends, the Hon'ble Mr. Banerjee and the Hon'ble and learned Pandit, have said that I made certain statements in disparagement of the community to which they have the honour to belong. I entirely repudiate that. I have the greatest respect for the community to which my Hon'ble friends belong. In the course of my speech, I first pointed out the history of these Depressed Classes, and showed how Hindu society in the past had neglected its duty in this matter. It is only latterly that enthusiasm has, to a certain extent, been awakened and something done for these unfortunate classes.

"Sir, I think it was not right on the part both of Official and Non-official Members to say that I have not acknowledged the value of the work done by Government in this connection. I made it perfectly clear in the earlier part of my speech that it would be 'ungenerous'—as I mentioned—not to acknowledge the work that had been done by Government. All I wanted to point out was that no special remedial measures of any tangible or appreciable character had been adopted by Government in this connection. It could be gathered from my speech—and the Hon'ble Mr. Banerjee has referred to this also—that one of the chief obstacles to the raising of the Depressed Classes is the aversion of the higher classes to allow the boys of these degraded classes to enter the public schools. That feeling, thanks to the policy adopted by Government, has been gradually dying out; but I do say that in this connection the higher classes have not come up to the height of the occasion, and have not done all they might have been expected to do.

"Sir, as regards the statements made by some of the Official Members, first of all, the Hon'ble Mr Hill stated what has been done in Bombay. Very probably my Hon'ble friend did not like my reference to the Press Note issued by the Government of Bombay on the subject. What I pointed out in my opening speech in connection with this Press Note was that the Bombay Government, instead of taking up the Depressed Classes in their own hands and extending to them material help and assistance and special assistance by means of special schools for them, appointments in Government offices, and instead of making their life a little more bearable than it is, had by that Note left it to the Hindu community to ameliorate the conditions of these classes. And I protested that that was not the proper or the correct policy for a responsible Government to follow, that these degraded classes should not be left to their persecutors. Government should materially help and support them. Under no circumstances have I under-estimated what the Government of Bombay has done in this connection in the presidency from which my Hon'ble friend, Mr. Claude Hill, hails. Mr. Hudson has told us something about the existence of *Bhil* schools and about the inspection of those schools by Government officials, and he has also asked the Council to accept his statement that his individual attention has been paid to these schools. I do not at all doubt the correctness of his statement; but my friend, Mr. Hudson, would have done better if he had enlightened the Council with information about the proportion these schools bore to the numbers, the attendance there was in the schools, and the amount of money actually spent by the Bombay Government in aid of these schools. And in this connection, Sir, I pointed out in my first speech that the reports of the Directors of Public Instruction were entirely incomplete, and did not give any information on the subject. I also stated that in the last quinquennial report, compiled by the Hon'ble Mr. Sharp, the information on the subject was of a very scanty nature.

"I do not understand why my Hon'ble friend from Madras, Mr. Davidson, at all got up to speak on this occasion. In my opening speech I commended the work of the Madras Presidency, and I specially pointed out ——"

The Hon'ble Mr. Davidson:—"May I rise, Sir, on a point of order and say by way of explanation that I regarded the Hon'ble Member's reference to Madras as of the nature of that 'faint praise' which is generally held to 'damn' the recipient."

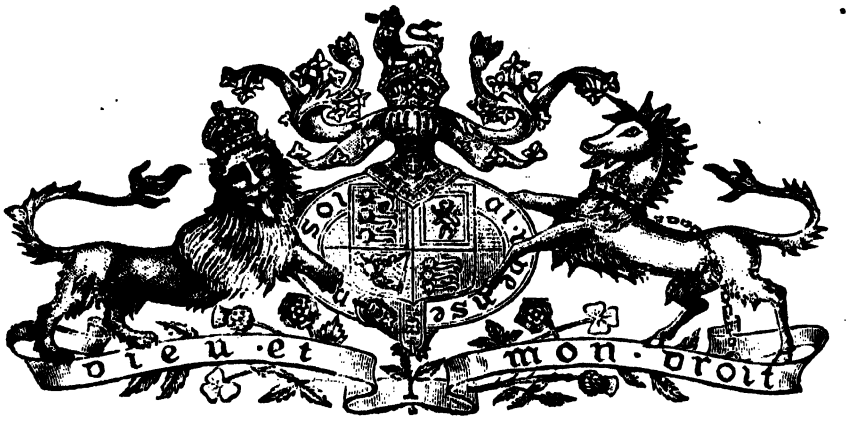
[16TH MARCH, 1916.] [*Mr. Dadabhoy.*]

The Hon'ble Mr. Dadabhoy:—"You are mistaken, seriously mistaken. I said Madras had done a great deal in that way, and I gave the figures of the school attendance. I also pointed out what had been done, and thanks to the valuable efforts of men like the Hon'ble Sir C. Sankaran Nair the Government of Madras had done some serious work. So I cannot possibly understand his criticisms on my speech. Sir, I have heard with great respect the remarks made by the Hon'ble the Home Member whose utterances in this Council are always characterised by great soundness. I am very pleased to know from him the efforts which the Government has been making in this connection; but I also say that, if the Hon'ble Member had enlightened the Council with greater details on the subject, it would have been better and more convincing. I still repeat what I stated in my opening address to this Council about the Government of India. I do not accuse them of dereliction of duty. What I said was that theirs was a policy of benevolent indifference in this matter, because they contended that this was a social question more or less. But in my opening speech I tried to separate the two; I pointed out how, so far as the social question was concerned, the Government was incapable and incompetent to act, and how so far as the educational, political and industrial advancement of the Depressed Classes was concerned, the Government was in a position to help these people. It is unfortunate this distinction was also lost sight of by my two Hon'ble Colleagues, Mr. Banerjee and Pandit Malaviya. Sir, I shall not detain the Council any further. My arguments have been already placed before the Council; and though the form of my Resolution has been disapproved, and certain statements of mine have been controverted and challenged, and some of my remarks have been disliked for obvious reasons, I am glad to find that there is a general sympathy with reference to this matter. And after the assurance which the Hon'ble the Home Member has given to me that he will advise all the Local Governments to report what they have done in the past, and what further action they can take in the future for the amelioration of the social, moral, educational and industrial progress of the various depressed communities of this country, I do not think it necessary to press my Resolution to a division. This Resolution will do one thing. This debate will stimulate our countrymen to further action; it will stimulate our friends, Messrs. Banerjee and Malaviya, to take up this cause with greater energy; it will stimulate Government to further beneficent action. I have no doubt that Government will take steps in the near future for giving special facilities for the advancement of these unhappy and wretched classes. With these words, Sir, I shall ask your permission to withdraw the Resolution."

The Resolution was, by permission, withdrawn.

The Council adjourned to Monday, the 20th March, 1916.

A. P. MUDDIMAN,



Secretary to the Government of India,

Legislative Department.

SUPPLEMENT TO

The Gazette of India.

No. 13.] DELHI, SATURDAY, MARCH 25. 1916.

OFFICIAL PAPERS.

A SUPPLEMENT to the GAZETTE OF INDIA will be published from time to time containing such official papers and information as the Government of India may deem to be of interest to the Public, and such as may usefully be made known. The Proceedings of the Indian Legislative Council will in future be published in PART VI of the GAZETTE.

Non-Subscribers to the GAZETTE may receive the SUPPLEMENT separately on a payment of five rupees per annum if delivered in Calcutta, or eight rupees if sent by post. The SUPPLEMENT and PART VI of the GAZETTE can also be subscribed for separately on a payment of rupees six per annum if delivered in Calcutta, or rupees nine if sent by post.

No Official Orders or Notifications, the publication of which in the GAZETTE OF INDIA is required by Law, or which it has been customary to publish in the CALCUTTA GAZETTE, will be included in the SUPPLEMENT. For such Orders and Notifications the body of the GAZETTE must be looked to.

GOVERNMENT OF INDIA.

FINANCE DEPARTMENT.

Speech of the Honourable Finance Member

INTRODUCING THE

BUDGET FOR 1916-17.

I rise to present the Budget of the Government of India for 1916-17. The preliminary estimates which I laid before the Council on the 1st March have been revised in the light of our latest information. The Financial Secretary's Explanatory Memorandum has also been checked and brought up to date.

2. The final figures of the Revised Estimate for 1915-16 and of the Budget Estimate for 1916-17 are given in the statements which I have to-day laid before the Council. The broad results of the revenue account are brought out in the table below, in which I have also shown, in brackets, for convenience of comparison, the figures now superseded, which were given in the corresponding table appearing in paragraph 61 of my speech introducing the Financial Statement.

[In millions of pounds]

	BUDGET, 1915-16.			REVISED, 1915-16.			BUDGET, 1916-17.		
	Imperial.	Provincial.	Total.	Imperial.	Provincial.	Total.	Imperial.	Provincial.	Total.
Revenue . .	46·650	30·750	80·400	52·594 (51·982)	30·732 (30·638)	83·326 (82·620)	55·925 (55·651)	30·603 (30·548)	86·528 (86·199)
Expenditure . .	52·607	31·828	84·435	54·388 (53·968)	31·297 (31·296)	85·685 (85·264)	55·099 (54·599)	30·956 (30·913)	86·055 (85·512)
Surplus (+) or deficit (—).	—2·957	—1·078	—4·035	—1·794 (—1·986)	—·565 (—·658)	—2·359 (—2·644)	+·826 (+1·052)	—·353 (—·365)	+·473 (+·687)

3. The effect of our corrections in the Revised Estimate for the current year is to reduce the Imperial deficit previously announced by £192,000 and the Provincial

deficit by £93,000. On the Imperial side, there are three alterations of some importance. The Railway revenue has shown a still further improvement in February, and we have raised our estimate of gross receipts by £400,000. On the other hand, we have had to allow for an increase of £175,000 in Opium expenditure, owing to the circumstance that our payments for the Malwa opium which we purchase in the spring are being effected for the most part just at the close of the financial year instead of at the opening of the following year. This is due to our beginning our purchases a little earlier than in previous years, and it seems likely that the same thing will happen next year, so that the advancement of payments on this occasion will not relieve us in respect of the corresponding expenditure in 1916-17. The third material increase is one of £200,000 under Military Services, which is due to the possibility of our having to raise our contribution adjustments in favour of the Home Government for reasons which I will explain presently. These larger corrections almost counterbalance one another: and the comparatively small net change in both the Imperial and Provincial deficits is attributable to minor improvements under Customs, Land Revenue and other heads.

4. As regards the Budget of next year, the effect of the changes made is to reduce the Imperial surplus by £226,000, and the Provincial deficit by £12,000. There is no important change on the Provincial side, and I need not refer to that further. On the Imperial side, we have allowed, as in the Revised Estimate, for an improvement of £400,000 on our previous estimate of gross Railway receipts, but in this instance we have to make a proportionate increase under working expenses also, so that the improvement in net receipts is £233,000 only. The only other important change occurs under the Military estimates, which have been raised by £500,000, this being due partly to provision for further urgent military requirements which have matured since the Financial Statement was presented; and partly to allowance being made for the possibility of a higher total contribution to the Home Government. The extra provision of £300,000 included on the former account will enable us to undertake a further development of the mechanical transport service, to increase the provision of motor ambulances, and to establish in India a factory for the manufacture of acetone—an industrial development of considerable interest and importance.

5. As regards the contribution, the additional provision proposed is £200,000 in the Revised and £200,000 in the Budget. As I pointed out in paragraph 27 of my speech introducing the Financial Statement, and further emphasised in replying to a recent question in Council, the adjustment of charges between the Home Government and ourselves in respect of the many units of our expeditionary forces is a very complicated matter, and the questions which arise are not yet completely settled. Since the Financial Statement was presented, the point has been prominently raised whether, in calculating the "normal cost" of a unit, allowance should be made for the fact that in ordinary peace-time conditions a certain number of British officers are absent on leave and draw furlough allowances instead of their full sanctioned pay and allowances; or whether India's contribution should not be based on the assumption that, in present circumstances, even if the units in question had remained here, prudence would have required the recall of officers from leave, as in the case of certain Civil services. As I explained in this Council the other day, all such questions must be finally settled with reference to the terms and spirit of the Resolutions of the Houses of Parliament. Meanwhile we have thought it prudent, without prejudice to the eventual decision, to include provision in our Budget and Revised Estimates, in case it should be decided that India should fairly pay the higher amount.

6. These very recent instances of additional requirements and of the points of difficulty which arise in calculating our share of the expenditure of the expeditionary forces, emphasise the necessity of maintaining a reserve for unforeseen Military expenditure. We have therefore retained the reserve at its original amount, namely, £½ million, while making specific provision for the requirements and contingencies mentioned. The gross Military budget for 1916-17 will thus stand at £23·7 million and the net budget at £22½ million, instead of £22 million provided in the Financial Statement.

7. Turning to Ways and Means, we now expect the total cash balance in England and India at the end of the current year, exclusive of the amount held in the Home Treasury on account of the Gold Standard Reserve, to be about £18·1 million or £460,000 higher than the figure taken in the Financial Statement. This is due to the reduction already mentioned in the Imperial and Provincial deficits, and to a further improvement in the position in regard to withdrawals of post office savings bank

deposits, which we are now able to take at £133,000 less than was previously estimated. There has also been a small further lapse under railway capital expenditure.

Next year however there is a worseness of £298,000, principally caused by the reduction of the Imperial surplus which I have already explained. On the whole, therefore, combining the corrections of both years, we expect the closing balance on the 31st March 1917, exclusive again of the holding of the Gold Standard Reserve, to be about £17·6 million or some £160,000 better than we anticipated in the Financial Statement.

8. Since I presented the Financial Statement, the Secretary of State's sales of councils have continued to be very large in view of the requirements of trade, a matter which I shall deal with more fully, presently, in connection with a Bill that I have to introduce, and are now estimated for the whole year at £20·1 million. Of these drawings our Treasury balances will meet £4·1 million, as compared with £3·7 million previously estimated. Our estimates of recoverable military expenditure in this and the following year have also been raised by £200,000 and £500,000, respectively.

9. These changes *pro tanto* diminish the extent to which it will be necessary for the Secretary of State to draw on us next year, and accordingly, we now estimate the amount to be met from Treasury balances in 1916-17 at £3·9 million or £1,200,000 less than the figure taken in the Financial Statement. But, as I said in my speech on that occasion (paragraph 104), this must for the present be regarded as a purely provisional announcement.

W. S. MEYER.

MEMORANDUM EXPLAINING THE DETAILS OF THE ESTIMATES.

Introductor

1. In this memorandum the variations between the Budget and the Revised estimates of the current year, and between the latter and the Budget estimates of next year, are explained in detail for the major heads of account. Under most of the heads details by provinces have been given, and it may be explained that the figures shown against "India General" represent the transactions of the Central Government, including all expenditure directly controlled by it, of the minor administrations of Ajmer-Merwara and Coorg, and of the convict settlement in the Andamans. The Budget estimates of Provincial and "Divided" expenditure in 1916-17 generally represent the allotments proposed by the several Governments and Administrations with whom regular provincial settlements have been concluded. More detailed information regarding the figures will be found in the Financial Statements presented by the Local Governments to their respective Councils.

2. The figures for the province of Delhi have been entered separately and explained under each major head of account. A *pro formâ* account of expenditure on Delhi and the Delhi province is also appended to this memorandum (Appendix I), together with a prefatory note explaining the scope of the *pro formâ* account and the relation between it and the regular accounts.

General resu

3. The broad totals of revenue and expenditure for the last year, the current year and the ensuing year, are as follows :—

	Accounts, 1914-15.
	£
Revenue	81,157,666
Expenditure charged to Revenue	82,942,936
Imperial deficit	1,785,270

	Revised, 1915-16.
	£
Revenue	83,325,800
Expenditure charged to Revenue	85,120,000
Imperial deficit	1,794,200

	Budget, 1916-17.
	£
Revenue	86,528,600
Expenditure charged to Revenue	85,702,900
Imperial surplus	825,700

These figures exclude all capital, debt, and remittance transactions.

Accounts, 19

4. The Accounts of 1914-15 are not discussed in this memorandum, but according to our usual practice in the past a brief explanation is given below of the principal divergences between the Revised estimates of revenue and expenditure as submitted to the Council twelve months ago, and the actual accounts of the year as closed, audited and compiled by the Comptroller and Auditor-General.

5. The broad results are brought out in the following table :—

	Revised, 1914-15.			Actuals, 1914-15.		
	Imperial.	Provincial.	Total.	Imperial.	Provincial.	Total.
	£	£	£	£	£	£
Revenue . . .	49,929,200	30,228,400	80,157,600	50,769,000	30,388,700	81,157,700
Expenditure . . .	52,715,000	32,483,400	85,198,400	52,554,300	32,578,800	85,133,100
Deficit . .	2,785,800	2,255,000	5,040,800	1,785,300	2,190,100	3,975,400

6. The Imperial revenue proved to be £839,800 higher, and the Imperial expenditure £160,700 less than the Revised estimate, with the result that the deficit was £1,000,500 smaller than was anticipated. The principal items contributing to this improvement are mentioned below. The net receipts of Railways advanced by £529,600. The effect of the unfavourable economic conditions created by the war on the earnings of railways in March was less marked than had been anticipated, and there was an increase of £464,600 in the gross traffic receipts on the Great Indian Peninsula, East Indian, Bombay Baroda and Central India and certain other lines. There was also a net saving of £65,000 in the grants for working expenses and payments of surplus profits to companies, etc. The Salt revenue showed a rise of £138,800 owing mainly to heavy payments of duty in Northern India in advance of actual clearances. There was an increase of £108,900 in the Marine receipts due to larger recoveries from the Imperial Government in connection with the fitting up of transports at the Indian dockyards. The revenue of the Postal and Telegraph Department improved by £77,700 in consequence of a rise in receipts in India and an advance payment by the Home Government under the Morley award in connection with the Eastern Mail Service. The reduction of £160,700 in the Imperial expenditure was mainly due to savings in the grants for salaries, etc., of Civil Departments and Miscellaneous Civil charges. The improvement in the Provincial section resulted chiefly from higher collections of Land Revenue in Burma in March than had been anticipated in the Revised estimate.

Authors of Memorandum.

7. Paragraphs 200 to 227 of this memorandum have been communicated by the Honourable Mr. G. B. H. Fell, C.I.E., Financial Adviser, Military Finance, and paragraphs 157 to 167 and 236 to 239 by Mr. H. N. Heseltine, Accountant General, Railways; the rest of the memorandum has been drafted by Mr. Bhupendra Nath Mitra, C.I.E., of the Indian Finance Department.

8. The Imperial expenditure shown against "Other Provinces" in the table at page 21 represents the cost of survey and record-of-right operations on a large scale in Bengal and in Bihar and Orissa, undertaken more for administrative than for fiscal purposes. The expenditure is of a temporary and varying character and was accordingly not considered suitable for inclusion in the financial settlements with the two provinces. Three-fourths of the charges are eventually recovered from landlords and tenants for the protection of whose rights the operations are primarily undertaken; and the recoveries are shown in the table as Imperial revenue against "Other Provinces."

REVENUE.

(*a*) *Wholly Imperial.*

evised, 1915-16. 9. The Revised estimate for 1915-16 is less than the Budget by R4·48 lakhs. There is a reduction of R4·17 lakhs in the recoveries of survey and settlement charges in Bengal owing to less rapid progress with the programme of operations; but, on the other hand, there is an increase of R1·50 lakhs in the receipts on the same account in Bihar and Orissa. There is also a decline in the Land Revenue collections in Baluchistan, Ajmer-Merwara and the North-West Frontier Province in consequence of unfavourable agricultural conditions.

udget, 1916-17. 10. The Budget estimate for 1916-17 is taken at R17·79 lakhs more than the Revised for 1915-16. An increase of R17·03 lakhs is anticipated in the receipts on account of survey and settlement charges in Bengal and in Bihar and Orissa. Provision has also been made for a rise of R·66 lakh in Baluchistan on the basis of normal collections.

(*b*) *Divided and wholly Provincial.*

evised, 1915-16. 11. The total collections in 1915-16 are likely to fall short of the Budget estimate by R43·74 lakhs. There will be a large deficiency of R22·65 lakhs in Bombay, due chiefly to scanty rainfall in Gujarat and low inundation in Sind and the grant of larger suspensions and remissions than were anticipated. There will also be shortages of R6·71 lakhs in the Punjab, R5·28 lakhs in the United Provinces, R2·31 lakhs in Bihar and Orissa and R1·86 lakhs in Assam, mostly in consequence of the damage done to the crops in certain districts by deficient or excessive rainfall; of R5·82 lakhs in the Central Provinces, due chiefly to the remission of certain outstanding arrears and to the postponement of the introduction of revised assessments in some of the districts; and of R3·06 lakhs in Madras and R1·01 lakhs in Burma owing mainly to improved collections in 1914-15 and a consequent reduction in the balance of the land revenue demand which remained outstanding at the end of that year. In Bengal alone, an improvement of R4·96 lakhs is expected over the Budget estimate, owing mainly to higher collections from Government estates in consequence of the improved prospects of the jute trade and to the sale of Government lands to the Calcutta Improvement Trust.

udget, 1916-17. 12. The total Budget for 1916-17 is less than the Revised estimate for 1915-16 by R9·57 lakhs. The estimates have been framed as usual on the basis of normal monsoon conditions in the ensuing year. An important increase over the Revised estimate of the current year is assumed in Bombay (R24·21 lakhs) where provision has been made for the recovery of a large slice of the revenue suspended in previous years. A rise in revenue is also anticipated in Assam (R3·08 lakhs), Burma (R3·01 lakhs), Bihar and Orissa (R1·93 lakhs) and the Central Provinces (R1·29 lakhs) in consequence of growth in the revenue demand, the absence of remissions and suspensions required in the current year, and larger recoveries of outstanding arrears. On the other hand, the collections in 1916-17 are likely to fall short of those in the current year in the Punjab (R20·99 lakhs) and the United Provinces (R18·36 lakhs), where allowance has been made for remissions and suspensions necessitated by a deficiency in the winter rainfall of the current year; and in Bengal (R3·32 lakhs) and Madras (R·42 lakh) where the Budget provides generally for normal receipts.

EXPENDITURE.

(a) *Wholly Imperial.*

Revised, 1915-16.

Budget, 1916-17.

13. The saving of R3·97 lakhs in the Budget estimate of 1915-16 is chiefly due to lapses in the grant for survey and settlement expenditure in Bengal and Bihar and Orissa. The Budget estimate for 1916-17 has been taken at R3·78 lakhs less than the Revised for the current year. The reduction is wholly due to a smaller provision for the same item of expenditure in consequence of a curtailment of the programme of operations.

(b) *Provincial.*

Revised, 1915-16.

14. The total expenditure in the current year will fall short of the Budget estimate by R17·79 lakhs. The reduction is distributed over all the provinces, considerable savings being expected in Madras (R6·84 lakhs), Burma (R2·58 lakhs) and the Punjab (R2·56 lakhs). The improvement is generally due to a partial relaxation of the restrictions on the grant of leave out of India to members of the Indian Civil Service, the temporary transfer of several of these officers to military duty, and the curtailment of expenditure in view of the pressing need for economy. A portion of it is also derived from (1) larger recoveries in Madras from private estates for surveys made on their behalf; (2) the total or partial non-utilisation of lump provisions for the revision of certain establishments in Madras and the Punjab and for the creation of a new district in the latter province; and (3) the reversion to military duty of the junior military members of the Burma Commission.

Budget, 1916-17.

15. The total Budget estimate for 1916-17 exceeds the Revised for 1915-16 by R5·97 lakhs. The increase is distributed over all the provinces with the exception of Bengal and Burma. Provision has generally been made on the basis of existing sanctions and commitments. Special allotments have been made in Madras for the revision of village establishments; in the United Provinces for the re-settlement of the Bulandshahr district and for the introduction of a further instalment of the scheme for the reorganisation of the cadre of deputy collectors; and in the Punjab for the payment of compensation in connection with the afforestation of certain tracts.

REVENUE.

(*i*) *Bengal opium.*

6. 16. The Budget estimate for 1915-16 provided for a revenue of ₹222·78 lakhs from the sale of 13,480 chests of Bengal opium, the bulk of which would be disposed of at the monthly auctions held at Calcutta while a certain number was to be supplied to the Government of the Straits Settlements or sold in England for medicinal purposes. 10,020 chests have been sold by public auction during the year and they have fetched a revenue of ₹172·24 lakhs, *i.e.*, an average of ₹1,719 a chest, the upset price having been raised from ₹1,600 to ₹1,800 a chest from 1st January 1916. Taking into account opium supplied to the Governments of Hong Kong and the Straits Settlements and sold in England for medicinal purposes, it is expected that about 13,660 chests will be disposed of in the current year, the proceeds amounting to ₹237·49 lakhs.

17. The Budget estimate for 1916-17 anticipates a revenue of R284·82 lakhs from a sale of about 15,600 chests of Bengal opium, of which about 9,840 chests will be sold by public auction and the balance will be supplied to the Governments of Hongkong and the Straits Settlements or sold in England for medicinal purposes. *Budget, 1916-*

(ii) Excise opium and other revenue.

18. The decline of R1·35 lakhs in the revenue in the current year, as compared with the Budget estimate, is mainly due to a heavier fall in the consumption of opium in Bengal than had been allowed for in the Budget. Only the amount charged to Local Governments on account of the cost of production of opium consumed in India is credited under this head, the difference between the actual price of issue and the cost of production forming an item of excise revenue. Owing to an increase in recent years in the price paid to cultivators for crude opium and to a rise in the charges of manufacture, it has been decided to raise the rate or cost price at which the opium is charged to Local Governments from R8·5 to R11 a seer, with effect from 1st April 1916. This accounts for the increase of R12·65 lakhs in revenue in the Budget for 1916-17 as compared with the Revised estimate for 1915-16. *Revised, 1915-* *Budget, 1916-*

EXPENDITURE.

19. The Revised estimate for 1915-16 exceeds the Budget provision by R28·90 lakhs. The increase is mainly due to additional purchases of Malwa opium undertaken towards the close of the current year The Budget estimate for 1916-17 also includes a special provision for purchases in Malwa to supplement the supply of Bengal opium. *Revised, 1915-* *Budget, 1916-*

(*a*) Chiefly excise on local manufacture. (*b*) Chiefly duty on imported Salt.

REVENUE.

evised, 1915-16.

20. The Revised estimate for 1915-16 exceeds the Budget by R23·25 lakhs. The increase is mostly due to speculative clearances in January and February in the expectation of an enhancement of the salt duty.

dditional taxation.

21. It has been decided to raise, with effect from the 1st March 1916, the duty on imported salt, and on locally produced salt generally, from R1 to R1¼ a maund. The duty on Mandi salt will be raised proportionately from 3 annas to 3¾ annas a maund; but no change will be made for the present in the duty (1) on salt locally manufactured in Aden and locally consumed or exported by land, and (2) on salt locally manufactured in Burma, the question of enhancement of the duty on the latter being reserved for separate consideration.

udget, 1916-17.

22. In view of the speculative clearances in the current year, and the enhancement of duty, the total issues of salt in 1916-17 have been taken at a moderate figure of 466 lakhs of maunds. Owing to the operation of the credit system of payment of duty, the revenue to be realised in 1916-17 will however consist of (1) duty mostly at the old rate on about 110 lakhs of maunds of salt cleared in 1915-16, (2) duty at the enhanced rate on 356 lakhs of maunds to be cleared in 1916-17, and (3) sale proceeds of Government salt and other miscellaneous receipts aggregating about R43 lakhs The Budget estimate of revenue for 1916-17 has accordingly been placed at R598·14 lakhs.

EXPENDITURE.

evised, 1915-16.

23. The Revised estimate for the current year is less than the Budget by R·99 lakh. The decrease is mainly due to a lapse in the grant for the purchase

udget, 1916-17.

of salt from private manufacturers in Madras. In the Budget estimate for 1916-17, provision has been made for the charges of sanctioned establishments, and for a larger outlay on the local manufacture of salt in Madras in consequence of a shortage in the Government stocks.

REVENUE.

(a) *Wholly Imperial.*

Revised, 1915-16. 24. The Revised estimate for 1915-16 exceeds the Budget by R·71 lakh. The bulk of the improvement occurs in the revenue from judicial stamps in the North-West Frontier Province. The Budget for 1916-17 does not differ materially from the Revised estimate of the current year.

Budget, 1916-17.

(b) *Divided.*

Revised, 1915-16. 25. The total Revised for 1915-16 is R45·40 lakhs higher than the Budget estimate. The latter provided for a moderate growth only on the revenue of the preceding year, in view of the uncertainty as to the effects of the war on trade and litigation generally. There has, however, been a partial revival of internal trade and business in most of the provinces; and the improvement in Stamp revenue is shared by all of them with the exception of Bihar and Orissa and Assam. Of the total rise of about R45 lakhs, R30 lakhs are expected in the revenue from court-fee stamps, and R15 lakhs in that derived from non-judicial stamps.

Budget, 1916-17. 26. The Budget for 1916-17 provides for a further moderate growth in revenue in almost all the provinces, and is taken at R10·31 lakhs higher than the Revised estimate for 1915-16.

EXPENDITURE.

27. The cost of all stamps and stamp paper supplied from England is charged under this head, and an adjustment is made in India transferring to Posts and Telegraphs the cost of stamps used for postal and telegraph purposes. Similarly the cost of revenue stamps supplied to Local Governments and Administrations is debited to them in the Provincial section of the accounts by *per contra* credit in the Imperial section under this head. The credits on both these accounts are shown against item 1 (*ii*) under expenditure in the table on page 27.

(a) *Wholly Imperial* (*including outlay in England*).

Revised, 1915-16. 28. The Revised estimate for 1915-16 exceeds the Budget by R·87 lakh; and the Budget for 1916-17 is R1·41 lakhs less than the Revised estimate for the current year. These variations occur mostly in the credits mentioned in paragraph 27 and in the outlay in England on the purchase of stamps.

Budget, 1916-17.

(b) *Divided.*

Revised, 1915-16. 29. The Revised estimate for 1915-16 does not differ materially from the Budget. The increase in expenditure provided in the Budget for 1916-17 is a necessary concomitant of the growth in revenue.

Budget, 1916-17.

REVENUE.

(a) *Wholly Imperial.*

30. The figures do not show any important variation. The Budget estimate for 1916-17 provides for R 20 lakh of extra revenue which is likely to be obtained in Baluchistan from the enhancement in taxation referred to in paragraph 32.

(b) *Divided and wholly Provincial.*

Revised, 1915-16.

31. The set-back in prosperity caused by the war, the unfavourable conditions of agriculture, and the high prices of food grains have depressed the Excise revenue in 1915-16 more heavily than had been allowed for in the Budget estimate; and the Revised estimate is less than the Budget by R37·18 lakhs. The decline is shared by all the provinces excepting Bombay and Burma, where some improvement is expected.

Budget, 1916-17.

32. The total Budget for 1916-17 exceeds the Revised estimate for 1915-16 by R1·24 lakhs. An additional revenue of R2·80 lakhs is expected from the enhancement in taxation which Local Governments will enforce as a corollary to the increased tariff rates on beer and spirits, the amount being distributed as shown below:—

Madras	·35	lakhs.
Bengal	·50	„
United Provinces	·40	„
Punjab	1·10	„
Burma	·45	„
	2·80	„

Otherwise, the estimates allow generally for a continuance of the adverse conditions created by the war; and in the Punjab a decline of about R6 lakhs, as compared with the probable collections in 1915-16, has been assumed in view of the failure of the winter rains in the current year.

EXPENDITURE.

(a) *Wholly Imperial.*

33. The figures show little variation.

(b) *Divided and wholly Provincial.*

vised, 1915-16.
dget, 1916-17.

34. The expenditure in 1915-16 is expected to fall short of the Budget by R1·93 lakhs owing to lapses in grants in several provinces. The Budget estimate for 1916-17 provides generally for normal charges of sanctioned establishments. Provision has been made in Bihar and Orissa and in the Central Provinces for a contemplated revision of the excise staff.

Imperial.

35. The figures show little variation.

Provincial.

36. The Revised estimate for 1915-16 exceeds the Budget by R1·28 lakhs. The increase is mainly due to the recovery in Bengal of arrears of the public works cess which remained outstanding on the 31st March 1913, when the revenue was surrendered to district boards. The Budget estimate for 1916-17 provides for normal collections in the various provinces.

Revised, 1915

REVENUE.

Additional taxation.

37. It has been decided to enhance, with effect from the 1st March 1916, the customs duties now levied on certain articles and to impose duties on others which are now exempt from the payment of customs revenue. The principal

changes proposed, and the amount of revenue expected therefrom in the two years 1915-16 and 1916-17, are shown in the following table :—

[Thousands of Rs.]

Items.	Change proposed.	Yield of additional taxation included in	
		Revised Estimate, 1915-16.	Budget Estimate, 1916-17.
I.—Special import duties.			
(1) Arms and ammunition	To be doubled, *i.e.*, raised to 20 per cent *ad valorem*	15	2,84
(2) Liquors—			
(*a*) Ale, beer, etc.	To be raised by 50 per cent, *i.e.*, to 4½ annas per gallon	15	1,78
(*b*) Spirits and liqueurs	To be raised by 20 per cent, *i.e.*, to R11¼ per proof gallon in the case of potable spirits and all spirits tested; and by 50 per cent, *i.e.*, to 7½ per cent *ad valorem* in the case of denatured spirits; with special rates for liqueurs, cordials and toilet preparations untested and perfumed spirits	1,10	14,00
(*c*) Wines	To be raised by 16⅔ per cent, *i.e.*, to R1¾ per gallon for still wines and R4⅜ per gallon for other classes	...	60
(3) Tobacco	The quantitative rate on cigars and cigarettes to be replaced by an *ad valorem* rate of 50 per cent; and the rate on manufactured tobacco, other sorts, to be raised from R1⅛ to R1½ per lb	37	4,55
II.—General import duties.			
(1) Articles of food and drink (excluding sugar)	To be raised by 50 per cent, *i.e.*, to 7½ per cent *ad valorem*	88	10,60
(2) Sugar	To be raised by 100 per cent, *i.e.*, to 10 per cent *ad valorem*	4,90	59,00
(3) Chemicals, drugs, etc.	To be raised by 50 per cent, *i.e.*, to 7½ per cent *ad valorem*	41	5,00
(4) Metals (excluding silver bullion and coin) and manufactures thereof.	To be raised generally by 50 per cent, *i.e.*, to 7½ per cent *ad valorem*, the duty on iron and steel being raised from 1 to 2½ per cent *ad valorem*	1,04	12,50
(5) Oils (excluding petroleum)	To be raised generally by 50 per cent, *i.e.*, to 7½ per cent *ad valorem*	5	58
(6) Manufactured articles	Ditto ditto	3,80	42,50
(7) Raw materials and unmanufactured articles	Ditto ditto	89	4,70
(8) Articles now free—			
(*a*) Grain and pulse; tea chests and lead sheets used in their manufacture and tea racks; firewood; printing and lithographing materials; machinery other than cotton spinning and weaving machinery; railway material; and ships	To be taxed at 2½ per cent *ad valorem*	2,00	24,00
(*b*) Coal, coke and fuel	To be taxed at 8 annas per ton		
(*c*) Fresh fruits, vegetables, fishmaws, bamboos, bristles and fibres, horn, raw jute, oilcakes, plants, precious stones and pearls, gum olibanum, motor cars for goods, earth, common clay and sand	To be taxed at 7½ per cent *ad valorem*		
III.—Export duties.			
(1) Tea†	To be taxed at R1½ per 100 lbs.	150	45,00
(2) Jute, raw†	To be taxed at R2½ per bale of 400 lbs., with special rates for cuttings and rejections.	...	87,00
„ manufactures†	To be taxed at R10 per ton for sacking and R16 per ton for hessians.*		
IV.—Land customs	Equivalent changes	37	4,50
	Total	17,11	3,19,15

* Exports under specific demand from His Majesty's Government will be exempted.
† All forward contracts entered into before 1st March will be exempted.

In calculating the yield of the additional taxation, due allowance has been made for a possible contraction in imports consequent on the enhancement of existing duties and the imposition of duties on articles which have hitherto been free.

Revised, 1915-16.

38. Apart from the yield of the additional duties, the Revised estimate of Customs revenue in 1915-16 amounts to R856·69 lakhs or R34·76 lakhs less than the Budget estimate. The latter provided for a substantial decline of revenue as compared with the actuals for 1914-15, so as to allow for the effects of war conditions throughout the year; but the fall under some of the tariff heads has been more serious than was anticipated. The largest deficiency occurs under the duty on the export of rice (R44·63 lakhs), which has declined heavily owing to the closure of the trade with the enemy countries, the absence of increased demands from other foreign markets, and a large demand for Burma rice for internal consumption in India. Considerable shortages are also anticipated under metals (other than gold and silver) and manufactures thereof (R10 lakhs), petroleum (R8·75 lakhs) and import duty on cotton manufactures (R7·75 lakhs); but these and also the less important losses under some of the other tariff heads will be more than counterbalanced by substantial improvements under manufactured articles (R17·21 lakhs), sugar (R15·28 lakhs) and by smaller increases under a few other heads.

Budget, 1916-17.

39. On the existing basis of taxation, the Budget estimate of Customs revenue in 1916-17 is taken at R835·55 lakhs or R21·14 lakhs less than the Revised estimate for 1915-16 calculated on the same basis. It is assumed that, but for the enhancement of taxation proposed, the revenue under several of the tariff heads in 1916-17 would be practically the same as in the current year, the important variations being as follows:—

(1) A decrease of R12·25 lakhs under import duty on cotton manufactures, of R10 lakhs under silver, of R5·37 lakhs under export duty on rice, and of R2·50 lakhs under excise duty on cotton goods.

(2) An increase of R11·72 lakhs under sugar, with reference to the new tariff valuation which came into force from January 1916, and which is based on the high prices that have ruled since the outbreak of the war.

EXPENDITURE.

Revised, 1915-16.

40 A saving of R1·68 lakhs is expected in the Budget provision for the current year, owing mainly to lapses in grants and a reduction in the payments of overtime allowances consequent on the slackness of the import trade.

Budget, 1916-17.

The Budget estimate for 1916-17 provides for normal charges of sanctioned establishments.

REVENUE.

(a) *Imperial.*

Revised, 1915-16.

41. The Revised estimate for 1915-16 falls short of the Budget by R1·62 lakhs. The decrease is mainly due to the non-recovery of the tax from the large body of military officers employed with the Indian Expeditionary Forces.

Budget, 1916-17.

The Budget estimate for 1916-17 exceeds the Revised for 1915-16 by R11·97 lakhs, the increase representing wholly the yield of the additional taxation mentioned in paragraph 44.

(b) *Divided.*

Revised, 1915-16.

42 The revenue in the current year has not suffered so seriously from the effects of the war as was anticipated in the Budget estimate, and the Revised estimate exceeds the Budget by R27·12 lakhs. The improvement is distributed over all the provinces excepting Bihar and Orissa; but the bulk of it occurs naturally in Bombay and Bengal.

Budget, 1916-17.

43. On the existing basis of taxation, the Budget estimate for 1916-17 is taken at R274·38 lakhs, *i.e.*, R5·29 lakhs less than the Revised for 1915-16. The estimates for next year are generally based on the probable collections in the current year; in Bombay and Bengal, decreases of R4 lakhs and R.. lakhs respectively are expected as compared with the favourable collections of the current year, while some allowance has been made for a normal growth in the Punjab (R·60 lakh) and the United Provinces (R·50 lakh).

Additional taxation.

44. It has been decided to enhance, with effect from the 1st April 1916, the existing rates of income-tax to the extent indicated below:—

(1) Incomes from R5,000 to R9,999 a year will pay 6 pies in the rupee instead of 5 pies.

(2) Incomes from R10,000 to 24,999 a year will pay 9 pies in the rupee instead of 5 pies.

(3) Incomes of R2.,000 a year and above will pay one anna in the rupee instead of 5 pies.

(4) The enhanced rates will apply generally to profits of companies and interest on securities, which will be taxed initially at the highest rate subject to abatement or reduction in the case of persons who can show that their total income is such as to warrant a lower rate of taxation or is below the taxable limit.

An extra sum of R123 lakhs is expected in 1916-17 from the additional tax (in addition to R12 lakhs which will be recorded in the accounts as wholly Imperial revenue), the amount being distributed as shown below:

	Lakhs of R.
Madras	12·50
Bombay	36·80
Bengal	40·80
United Provinces	8·00
Punjab	4·50
Burma	12·30
Bihar and Orissa	4·80
Central Provinces	2·30
Assam	1·00
Total	1,23·00

EXPENDITURE.

45. The figures show little variation.

Revenue.

(a) *Imperial.*

evised, 1915-16. 46. The increase of R·59 lakh in the revenue in the current year, as compared with the Budget estimate, is mainly due to higher sales of sandal-
udget, 1916-17. wood in Coorg and of padouk in Port Blair. The Budget estimate for 1916-17 does not differ materially from the Revised for 1915-16.

(b) *Provincial.*

evised, 1915-16. 47. The Revised estimate for 1915-16 is less than the Budget by R15·61 lakhs. There is a large decrease of R9·74 lakhs in Burma where the timber market has been disturbed in consequence of the war and the monthly auctions of Government timber at Rangoon have been restricted considerably so as avoid a heavy fall in prices. The slump in the timber market has affected the revenue in some of the other provinces also. On the other hand, an improvement is expected in the Punjab (R2 lakhs), owing to larger sales of trees and firewood in certain tracts, and to a smaller extent in the Central Provinces, in Bombay and in Bihar and Orissa.

udget, 1916-17. 48. The estimates for 1916-17 are generally based on the revenue likely to to be realised in the current year. The total Budget exceeds the Revised by R4·89 lakhs only, the bulk of the increase being expected in the United Provinces (R3·85 lakhs) mainly in connection with a scheme for the supply of sleepers to State railways.

Expenditure.

(a) *Imperial (including outlay in England).*

vised, 1915-16. 49. The expenditure in 1915-16 is expected to fall short of the Budget grant by R2·04 lakhs, owing mainly to the non-utilisation of an allotment for the construction of quarters for students in the Forest College at Dehra Dun
dget, 1916-17. and to savings in other directions. The Budget estimate for 1916-17 does not differ materially from the Revised for 1915-16.

(b) *Provincial.*

vised, 1915-16. 50. The Revised estimate for 1915-16 is less than the Budget by R1·13 lakhs. The decrease is mainly due to a curtailment of expenditure on works which are not immediately remunerative, in pursuance of the policy of economy. It is shared by all the provinces with the exception of Bombay and Burma. In these two provinces, the expenditure will exceed the Budget provision by R1·80 lakhs and R2·99 lakhs, respectively, owing chiefly to outlay on famine fodder operations in Bombay, and the payment in Burma of certain charges connected with the purchase of elephants which were expected to be disbursed in 1914-15.

dget, 1916-17. 51. The Budget estimate for 1916-17 exceeds the Revised estimate for the current year by R1·58 lakhs. There is an increase of R2·15 lakhs in the United Provinces, mainly in connection with the scheme for the supply of sleepers to State railways; and of R1·37 lakhs in the Central Provinces, due chiefly to the provision for certain urgent works. On the other hand, there is a decrease of R2·17 lakhs in Burma, owing to the absence of the payments made in the current year for the purchase of elephants. The estimates provide generally for the charges of sanctioned establishments and for normal working expenses, allotments for special outlay on the development of forests being restricted to measures which are urgent or are expected to prove immediately remunerative.

REVENUE.

Imperial.

52. The figures show little variation.

Provincial.

ised, 1915-16.

53. The total Revised estimate for 1915-16 does not differ materially from the Budget forecast. There is an improvement of R1 lakh in Bengal, where agricultural distress in certain districts has increased registrations; but it is more than counterbalanced by minor reductions in Madras, Bombay and certain other provinces. The estimates for 1916-17 are generally based on the revenue expected to be realised in 1915-16. The total Budget exceeds the Revised for the current year by R1·11 lakhs, owing mainly to provision for normal growth in Madras.

'get, 1916-17.

EXPENDITURE.

54. The figures show little variation.

55. The revenue recorded under this head represents tributes received from the protected States, in several cases as a result of exchanges of territory and settlement of claims, and contributions made chiefly in lieu of former obligation to supply or maintain troops. The figures do not ordinarily show any important fluctuations from year to year except for advance payment of sums falling due in the ensuing year, or arrears and their recovery. The Revised estimate for the current year is less than the Budget by R1·21 lakhs, the decrease being mainly due to the postponement of recoveries in Kathiawar in consequence of deficient rainfall. The Budget estimate for 1916-17 provides for normal receipts.

Revised, 1915-16.

Budget, 1916-17.

(a) *Imperial.*

56. The wholly Imperial expenditure shown against "Other provinces" represents refunds and drawbacks in respect of wholly Imperial revenue (*e.g.*, Opium, Salt, Customs and Tributes). The increase of R·92 lakh in the Revised estimate over the Budget for 1915-16 is mainly due to larger issues of duty-free salt and to special remission of tributes in Burma. The Budget estimate for 1916-17 provides for normal charges.

Revised, 1915-16.

Budget, 1916-17.

(b) *Divided and Provincial.*

57. The expenditure fluctuates considerably from year to year, and is difficult to estimate. In 1915-16 the Budget will be exceeded by R2·08 lakhs, owing chiefly to higher refunds of excise revenue in several provinces. For 1916-17, a normal expenditure has been assumed.

Revised, 1915-16.

Budget, 1916-17.

(a) *Imperial.*

58. The wholly Imperial expenditure shown against "Other Provinces" represents Opium, Salt and Customs compensations paid to Native States and Foreign Governments, as well as Miscellaneous compensations (*i.e.*, those of a general character and not intended to indemnify against loss of a particular kind of revenue) in provinces other than Bombay. The variations between the Budget and Revised estimates of the current year, and between the latter and the Budget of next year are due to the fact that the salt royalty payable to Jaipur and Jodhpur, and the customs compensation payable to Travancore and Cochin, fluctuate respectively with reference to the actual sales of salt and the actual realisations of customs revenue.

(b) *Provincial.*

59. The Revised estimate for 1915-16 is less than the Budget by R1 49 lakhs. The decrease is mainly due to the record under other heads of account of payments of *kadim* cash allowances in Bombay for which provision was made in the Budget under "Assignments and compensations." The Budget estimate for 1916-17 does not differ materially from the Revised for 1915-16. *Revised, 1915-16.* *Budget, 1916-17.*

(*a*) *India—Imperial.*

Revised, 1915-16.

60. The Revised estimate for 1915-16 is less than the Budget by R1·21 lakhs, the decrease being mainly due to smaller receipts of interest in the Punjab in respect of the unpaid balance of the sale price of Government lands.

Budget, 1916-17.

61. The total Budget for 1916-17 is taken at R1·28 lakhs less than the Revised estimate of the current year. The fall is mainly due to a decrease in the interest recoverable from Native States, consequent on a reduction in the outstanding balances of loans taken by them from Government.

(*b*) *India—Provincial.*

Revised, 1915-16.

62. The Revised for 1915-16 is R2·12 lakhs higher than the Budget. An increase of R4 lakhs is expected in the United Provinces in consequence of a prompter recovery of arrears; but this will be counterbalanced partly by a fall of R·80 lakh in Bombay, and of R·79 lakh in Bihar and Orissa, owing to the deficient rainfall in certain tracts, and by smaller reductions in some of the other provinces. The Budget estimate for 1916-17 provides generally for normal recoveries based on the current demand.

Budget, 1916-17.

(*c*) *England.*

Revised, 1915-16.

63. The receipts in England in 1915-16 are likely to exceed the Budget estimate by £32,800 mainly owing to an increase in the interest realised from investment of the cash balances of the Home treasury, which have proved to be larger and have earned a higher rate of interest than was anticipated. The Budget estimate for 1916-17 shows a rise of £121,200 over the Revised for 1915-16. A sum of £150,400 will be obtained from the additional investment of £3 million of the Paper Currency Reserve made in the current year. On the other hand, there will be a reduction in the interest realised from the investment of the cash balances of the Home treasury, which are not expected to remain as high as in 1915-16.

Budget, 1916-17.

Interest on ordinary debt.

64. The expenditure in 1915-16 on account of interest payable on the public debt as a whole will fall short of the Budget estimate by R1·51 lakhs (£10,100). There will be a saving of R15 lakhs in India, mainly in the provision made in the Budget for discount on the rupee loan to be raised in the year; but this will be partly counterbalanced by an excess of R13·49 lakhs (£89,900) in England, due chiefly to the payment of a higher rate of discount on India Bills. In the Budget for 1916-17 necessary provision has been made for a full year's interest on the rupee loan of R5 crores raised in the current year, and on the temporary loan of R6 crores from the Gold Standard Reserve which will remain unpaid at the end of the year, as well as for the service of the further borrowing in India which is contemplated in the ensuing year. The reduction in the charges, as compared with the current year, is mainly due to the contemplated discharge of £1½ million India bills and repayment of £3 million of the temporary loan from the Gold Standard Reserve.

Revised, 1915-1

Budget, 1916-17

65. The amount of interest transferred to the Railway and Irrigation sections of the accounts depends, firstly, on the capital expenditure; secondly, on the actual payment of interest on that portion of the debt which has been incurred specifically on account of the construction or purchase of railways or irrigation works; and, thirdly, on the rate at which interest is charged on that portion of the debt which has not been specifically raised for the above purpose. Our practice is to adopt, for this adjustment, the average rate of interest actually paid in respect of the whole of the non-specific debt in the latest year for which complete accounts are available. The result is that the rate adopted in calculating the Revised estimate for a year is generally different from that used for the Budget estimate: and this usually leads to a difference between the two estimates apart from that caused by a variation in the capital expenditure itself.

Transfers to Railway and Irrigation Accounts.

The large increase of R52·80 lakhs (£352,000) in the Revised estimate of total interest to be transferred in 1915-16, as compared with the Budget, is due partly to an increase in the rate, and partly to an increase in the capital at charge at the end of 1914-15 caused by certain adjustments made with reference to a recent contract with the Bengal Nagpur Railway Company. The increase in the total amount of interest to be transferred in 1916-17, over the Revised estimate for 1915-16, is almost wholly due to the progress of capital expenditure.

Revised, 1915-1

Budget, 1916-17

66. A portion of the interest on Ordinary Debt appears in the Provincial section of the accounts. Provincial Governments are authorised to grant advances to cultivators (as well as to certain other people in special cases) under various Acts, to native states, to landholders and notabilities apart from the provisions of any law, and to municipalities and local bodies (other than Presidency Corporations), out of amounts annually placed at their disposal by the Government of India. The interest actually levied on such advances is credited as Provincial revenue. But interest at 3½ per cent a year is charged to the Local Governments on the mean between the outstanding balances of the Provincial Loan Accounts at the commencement of the year and at its close; and this is done by transferring the amount so calculated from the Imperial to the Provincial section under Interest on Ordinary Debt. The differences between the Budget and the Revised estimates of the amount to be so transferred in the current year, and between the latter and the Budget estimate of 1916-17, are explained by the variations in the outstanding balances of the Provincial Loan Account as shown in the table at page 44.

Transfers to Provincial.

Interest on other obligations.

67. The total expenditure in 1915-16 is likely to exceed the Budget provision by R5·21 lakhs (£21,400). There will be a rise of R4·54 lakhs in the interest payable on the Savings Bank balance owing mainly to a reduction in the anticipated withdrawals from Post Office Savings Banks; but on the other hand, a portion of the interest payable on certain special loans is not likely to be claimed during the current year. The Budget estimate for 1916-17 provides for an increase of R3·50 lakhs (£23,300) over the Revised for 1915-16 chiefly in consequence of a further growth anticipated in the deposits in the State Provident funds.

REVENUE.

(a) *Indian Postal and Telegraph Department.*

Revised, 1915-16.

68. The Revised estimate for 1915-16 exceeds the Budget by R14·07 lakhs (£93,800). An improvement of R24·42 lakhs is expected in India owing to the more satisfactory conditions of internal trade. But there is a decrease of R10·35 lakhs in the receipts in England, as the Home Government will not make any payment in the current year under the Morley award in connection with the Eastern Mail Service.

Budget, 1916-17.

69. The Budget estimate for 1916-17 provides for a further moderate advance of R17·63 lakhs in the collections in India and for a receipt of R3 lakhs in England in connection with the Eastern Mail Service.

(b) *Indo-European Telegraph Department.*

Revised, 1915-16.

70. The rise of R13·77 lakhs (£91,800) in the revenue in the current year, as compared with the Budget estimate, is due to the diversion of traffic from foreign lines to those of the Indo-European Telegraph Department in consequence of interruptions on the former, as well as to an increase in the traffic owing to the war.

Budget, 1916-17.

The Budget estimate for 1916-17 provides for a fall of R3·81 lakhs (£25,400) in the receipts, owing mainly to a reduction in rates in the Persian Gulf section.

EXPENDITURE.

(a) *Indian Postal and Telegraph Department.*

Revised, 1915-16.

71. The expenditure in 1915-16 is likely to fall short of the Budget grant by R12·69 lakhs (£84,600). The reduction is mainly due to heavy credits for the value of stores supplied to the Indian Expeditionary Forces, the curtailment of expenditure with reference to the policy of economy, a smaller payment in connection with the Eastern Mail subsidy owing to the discontinuance of mail sorting at sea, and a lapse in the provision for payments to the Marconi Company.

Budget, 1916-17.

72. The Budget grant for 1916-17 exceeds the Revised estimate for 1915-16 by R31·63 lakhs (£210,900). The credits on account of the value of stores supplied to other departments will be less by R7·5 lakhs in consequence of smaller supplies to the Indian Expeditionary Forces, while the outlay on the purchase of stores in England will be higher by R8·63 lakhs mainly owing to the replacement of stores issued to the Forces in the current year and a rise in prices. A provision of R6 lakhs has also been made for certain payments to the Marconi Company which are being postponed in the current year. Apart from these special items, the Budget estimate provides for sanctioned establishments and normal working expenses, together with a margin for the development of the operations of the department which are generally remunerative in character.

(b) *Indo-European Telegraph Department.*

Revised, 1915-16.

73. The Revised estimate for 1915-16 exceeds the Budget by R1·68 lakhs (£11,200), the rise being mainly due to the re-construction of the line north of Karachi and the increased cost of stores.

Budget, 1916-17.

The Budget estimate for 1916-17 is taken at R10·74 lakhs (£71,600) more than the Revised for the current year. Provision has been made for an increase of R11·34 lakhs (£75,600) in the capital outlay, in consequence of a rise in the cost of stores and the contemplated reconstruction of a line in Persia; and for a normal growth of R·60 lakh (£4,000) in the working expenses. On the other hand, the net receipts in England in 1916-17 in connection with the Joint Purse arrangement, etc., will be R1·20 lakhs (£8,000) more than in 1915-16.

74. The figures do not show any important variation.

EXPENDITURE.

Revised, 1915-16.

75. The decrease of R2·41 lakhs in the expenditure in 1915-16, as compared with the Budget provision, is due partly to savings in establishment charges and in the grant for the purchase of stores, and partly to a reduction in the loss on the recoinage of uncurrent silver coin consequent on a fall in the withdrawals of such coin. The Budget estimate for 1916-17 provides for normal operations.

Budget, 1916-17.

*The figures have been corrected to include the charges of the Audit Office, Delhi.

(a) *India—Imperial.*

Revised, 1915-16. 76. The expenditure in 1915-16 is likely to exceed the Budget grant by ₹1·31 lakhs. The increase is wholly due to a rise in the charges of the Secretariats (₹1·30 lakhs) in consequence of the re-organisation of the Education Department and the employment of additional establishments in the Commerce and Industry and other departments to deal with questions arising out of the war. The Budget estimate for 1916-17 provides generally for sanctioned establishments and normal charges, and follows closely the Revised for the current year.

Budget, 1916-17.

(b) *Provincial.*

Revised, 1915-16. 77. The total Revised for 1915-16 falls short of the Budget estimate by ₹1·13 lakhs. Savings of ₹1·01 lakhs and ₹1 lakh are expected in the United Provinces and in Bihar and Orissa respectively, owing to the non-utilisation of the provision for the creation of an Executive Council in the former province and for railway saloons for the Lieutenant-Governor in the latter. On the other hand, there will be an excess of ₹·93 lakh over the Budget grant in Madras, due mainly to the employment of additional staff in the Secretariats and the purchase of furniture for the Government House. Unimportant variations from the Budget grants will occur in the other provinces.

Budget, 1916-17. 78. The total Budget estimate for 1916-17 is ₹·67 lakh more than the Revised for the current year, the more important variations being: (1) an increase of ₹·88 lakh in Bihar and Orissa due mainly to provision for furniture required for the Government House at Bankipore, and (2) a reduction of ₹·51 lakh in Madras caused by the absence of certain items of special expenditure which have been incurred in the current year.

(c) *England.*

Revised, 1915-16. 79. The Revised estimate for 1915-16 is less than the Budget by £29,100. There is an increase of £11,700 in the charges of the Home establishment owing to an increase in staff, a rise in the wages of labourers at the store depôt and the payment of overtime allowances; but it will be more than counterbalanced by a saving of £40,800 in the grant for the purchase of stores, etc., due chiefly to smaller requirements for stores and to a change in the system of submission of claims under which payment will be made in 1915-16 in respect of three quarters only and not for a full year.

Budget, 1916-17. 80. The Budget estimate for 1916-17 exceeds the Revised for 1915-16 by £15,100 mainly owing to a higher provision for outlay on stores.

EXPENDITURE.

(a) *Imperial.*

81. The figures show little variation.

(b) *Provincial.*

Revised, 1915-16. 82. The Revised estimate for 1915-16 exceeds the Budget by ₹9·96 lakhs. There is an increase of ₹4·16 lakhs in Bengal and of ₹2·78 lakhs in the United Provinces, chiefly in consequence of (1) special expenditure in connection with political cases, and (2) the payment of grain compensation allowance for which provision was made in the Budget under "Miscellaneous"; of ₹3·47 lakhs in Bihar and Orissa, mainly due to expenditure connected with the High Court at Bankipore for which no allowance was made in the Budget; and of ₹·93 lakh in Bombay owing to the grant of time-scale pay to those Joint and Assistant Judges who are members of the Indian Civil Service, the revision of pay of Judicial Commissioners, and a larger payment of leave allowances. In the Punjab also, there will be some excess over the Budget provision in consequence of special expenditure connected with political cases and the payment of grain compensation allowance, which will be met partially from savings in ordinary grants and in the allotment for the revision of clerical establishments. On the other hand, the expenditure will fall short of the Budget estimate in Burma (₹1·07 lakhs), owing mainly to the temporary return to military duty of the junior military members of the Burma Commission; and in the three remaining provinces owing to unimportant lapses in various grants.

Budget, 1916-17. 83. The total Budget for 1916-17 is ₹3·24 lakhs less than the Revised estimate for 1915-16. There is a reduction of ₹5·20 lakhs in Bengal, owing to: (1) the creation of a new High Court at Bankipore; and (2) the absence of (*a*) special expenditure incurred in the current year in connection with political cases, and (*b*) specific provision under this head for the payment of grain compensation allowance. There is also a decrease of ₹1·35 lakhs in the United Provinces, due to the second of the causes mentioned above. On the other hand, there is an increase of 3·85 lakhs in Bihar and Orissa, where the Budget provides for a full year's charges on account of the new High Court at Bankipore. Provision has generally been made in all the provinces for the normal charges of sanctioned establishments.

REVENUE.

(a) *Imperial.*

Revised, 1915-16. 84. The Revised estimate for 1915-16 does not differ from the Budget.

Budget, 1916-17. The Budget estimate for 1916-17 is taken at ₹1·65 lakhs less than the Revised for 1915-16, as it is unlikely that any sums will be transferred in the ensuing year by the Administrator General, Bengal, to credit of Government under Section 52 of Act III of 1913.

(b) *Provincial.*

Revised, 1915-16. 85. The total revenue in the current year is likely to fall short of the Budget estimate by ₹1·19 lakhs. The reduction is mainly due to smaller receipts on account of magisterial fines in the Punjab, Bengal, Burma and several other provinces, which are partly counterbalanced by increased recoveries on this account in Madras, Bihar and Orissa and the United Provinces and by a rise in the revenue from kurk-amins' fees and process-servers' fees in the last named province. The Budget for 1916-17 provides for normal receipts in all the provinces.

Budget, 1916-17.

EXPENDITURE.

(a) *Imperial.*

Revised, 1915-16. 86. The increase of R2·33 lakhs over the Budget grant for 1915-16 is mainly due to higher outlay on commissariat supplies, required for the convict settlement at Port Blair, in consequence of a rise in prices. The *Budget, 1916-17.* Budget estimate for 1916-17 does not differ materially from the Revised for 1915-16.

(b) *Provincial.*

Revised, 1915-16. 87. The total expenditure in 1915-16 is likely to exceed the Budget grant by R4·08 lakhs. The excess is wholly due to a rise in the dietary charges owing to the high price of food-stuffs and also to an increase in the jail population in some of the provinces. The cost of dietary is likely to exceed the Budget provision in almost every province; but in some of the provinces, it will be possible to meet the extra expenditure from savings in the grant for jail manufactures and in other directions.

Budget, 1916-17. 88. The Budget for 1916-17 is higher than the Revised estimate for 1915-16 by R2·03 lakhs. The grants are generally based on the sanctioned scales of establishment, the probable jail population and normal outlay on raw materials.

REVENUE.

(a) *Imperial.*

89. The figures show little variation.

(b) *Provincial.*

Revised, 1915-16. 90. The decrease of R1 04 lakhs in the revenue in the current year, as compared with the Budget estimate, is due to a reduced demand for jail-made articles in most of the provinces. Bengal is the only province in which a material improvement in the receipts (R1·73 lakhs) is expected, in consequence of heavy supplies of jail manufactures to the Military Department. *Budget, 1916-17.* The Budget estimate for 1916-17 provides generally for normal receipts.

EXPENDITURE.

(a) *Imperial (including outlay in England).*

Revised, 1915-16.

91. The Revised estimate for 1915-16 is higher than the Budget by R1·98 lakhs. There is an increase of R1·44 lakhs under "India—General," owing mainly to a rise in the charges of the Central Criminal Investigation Department; and of R1·09 lakhs in the North-West Frontier Province, due to the grant to the frontier constabulary of increased rates of pay, and of certain special concessions necessitated by the present conditions of service on the frontier. On the other hand, there is a lapse in the provision made in the Budget for police reforms in Baluchistan.

Budget, 1916-17.

92. The Budget estimate for 1916-17 exceeds the Revised for 1915-16 by R2·62 lakhs. The bulk of the increase occurs in the North-West Frontier Province and is due to provision for a full year's cost of the increased rates of pay and special concessions sanctioned for the frontier constabulary in the current year.

(b) *Provincial.*

Revised, 1915-16.

93. The Revised estimate for 1915-16 exceeds the Budget by R4·53 lakhs. There is an increase of R4·91 lakhs in Bengal and of R3·91 lakhs in the United Provinces, due partly to measures adopted to cope with the increase in political crime and partly to the payment of grain compensation allowance for which provision was made in the Budget under "Miscellaneous"; of R3·16 lakhs in Burma, owing to special precautionary measures necessitated by the war; and of R1·03 lakhs in the Punjab, caused chiefly by a higher payment of grain compensation allowance. On the other hand, there is a decrease of R5·04 lakhs in Bombay and of R2·17 lakhs in Assam, owing to lapses in ordinary grants and in special allotments for police reorganisation, and to the transfer of funds in the former province to the Public Works Department for the construction of police buildings. Less important savings in the Budget provision are also expected in Madras, Bihar and Orissa and the Central Provinces.

Budget, 1916-17.

94. The Budget estimate for 1916-17 is taken at R15·47 lakhs higher than the Revised for the current year. The estimates provide generally for the full cost of sanctioned establishments and of the various schemes already introduced. Some allotments have also been made for other urgent improvements. But no specific provision has been made under this head in the United Provinces and in Bengal for the payment of grain compensation allowance in the ensuing year, a lump allotment for this purpose being entered under "Miscellaneous" (see paragraph 146); this accounts for the apparent reduction of expenditure in the former province in the Budget for 1916-17 as compared with the Revised estimate for 1915-16, while the decrease in Bengal due to the same cause is more than counterbalanced by the provision made for certain urgent schemes.

REVENUE.

(a) *Imperial.*

95. The figures show little variation.

(b) *Provincial.*

Revised, 1915-16.

Budget, 1916-17.

96. The Revised estimate for 1915-16 does not differ materially from the Budget. The Budget estimate for 1916-17 exceeds the Revised of the current year by R·97 lakh, the increase being mainly due to higher recoveries in the Punjab on account of punitive police.

Equivalent in Sterling £	156,746	153,609	140,339	150,900	129,800	133,000

EXPENDITURE.

97. The total Revised estimate for 1915-16 does not differ materially from the Budget provision. There is an increase of R1·12 lakhs in Burma, due to a rise in prices of coal and marine stores; but it is counterbalanced largely by a saving of R·71 lakh in Bengal, caused by a reduction in the charges of pilot establishments consequent on the dislocation of trade. The Budget estimate for 1916-17 is taken at R2·56 lakhs less than the Revised for the current year. The reduction is mainly due to the absence of any provision in Burma for the construction of new launches.

Revised, 1915-16.

Budget, 1916-17.

REVENUE.

98. The falling of R3·16 lakhs in the revenue in 1915-16, as compared with the Budget estimate, is chiefly due to the unfavourable conditions of sea-borne trade. The Budget estimate for 1916-17 does not differ materially from the Revised for the current year.

EXPENDITURE.

(a) *Imperial—(India and England).*

Revised, 1915-16.

99. The Revised estimate for 1915-16 is less than the Budget by R1·83 lakhs. A portion of the saving is nominal and is caused by (1) the assignment to Provincial Governments of R·90 lakh out of the reserve for educational requirements, for which Budget provision was made under Education, and (2) the record under other heads of account of a grant of R·09 lakh made from this reserve for the improvement of Army schools. The balance of the decrease is due to lapses in the reserve and in ordinary grants.

100. Of the reserve of R2·19 lakhs provided in the Budget for 1915-16 out of the recurring appropriation of R124 lakhs from Imperial revenues for the improvement of education, R1·75 lakhs will be utilised as shown below, and R·44 lakh will lapse:

		Lakhs of Rupees.
(*i*) Assigned to Provincial Governments	Recurring	·04
	Non-recurring	·86
(*ii*) Allotted for non-recurring expenditure on Army schools		·09
(*iii*) Allotted for recurring expenditure in minor administrations		·01
(*iv*) Allotted for non-recurring expenditure in minor administrations, etc.:—		
(*a*) Delhi	·22	
(*b*) Other tracts	·53	
		·75
Grand Total		1·75

Budget, 1916-17.

101. The Budget estimate for 1916-17 exceeds the Revised for the current year by R2·49 lakhs, the increase being mainly due to the provision of R·42 lakh for grants to certain schools in Bangalore, and a reserve of R1·81 lakhs. Of the special appropriation of R124 lakhs mentioned in paragraph 100, R120·31 lakhs have already been distributed among the various provinces, etc., to meet recurring expenditure. The balance of R3·69 lakhs has been allotted as follows in the Budget estimate for the ensuing year:—

	Lakhs of Rupees.
(*i*) Assigned to Provincial Governments for non-recurring expenditure	1·74
(*ii*) Non-recurring expenditure in minor administrations, etc.	·14
(*iii*) Reserve	1·81
	3·69

(b) *Provincial.*

Revised, 1915-16.

102. The total expenditure in 1915-16 is expected to be R30·88 lakhs less than the Budget estimate. The latter included special allotments under this head, aggregating about R151 lakhs, from the recurring and non-recurring assignments made from Imperial revenues in recent years for the development and improvement of education. Out of these allotments, the expenditure expected in 1915-16 is about R139 lakhs only, of which R122 lakhs will be recorded under Education, while the balance will appear under Civil Works. Under the former head, there is thus a decrease of about R29 lakhs, as compared with the Budget provision, in the outlay from special Imperial grants; and the expenditure from other Provincial resources will accordingly fall short of the corresponding budget provision by about R2 lakhs only. This decrease is due to lapses in ordinary grants in almost all the provinces and in the special allotment of R1 lakh made in Assam for educational reforms.

Budget, 1916-17.

103. The Budget estimate for 1916-17 exceeds the Revised for the current year by R10·98 lakhs. The expenditure in 1916-17 from the special assignments made from Imperial revenues in recent years will, however, be about 9 lakhs less than in 1915-16, the provision made in the Budget under

Education for expenditure from these contributions amounting to R113 lakhs against a probable outlay of R122 lakhs in the current year. The provision in the Budget for 1916-17 for expenditure from ordinary Provincial resources is thus about R20 lakhs more than in the Revised of the current year. The increase is distributed over all the provinces excepting Burma. Provision has generally been made for the sanctioned scale of expenditure and for pressing requirements.

104. The following table shows the progress made by the Provincial Governments in utilising the various non-recurring grants given from Imperial revenues in recent years. To simplify the position, it has been assumed that the whole of the recurring grant for any year is fully utilised before any expenditure is debited against the non-recurring grant.

[In lakhs of Rs.]

Province.	Grants to end of 1916-17.	Expenditure.					Unspent balance on 31st March 1917.
		To end of 1914-15.	In 1915-16 (Revised) recorded under		In 1916-17 (Budget) recorded under		
			Education.	Other heads.	Education.	Other heads.	
1. Madras . .	64·44	45·10	·94	2·40	·45	3·05	12·70
2. Bombay . .	57·78	16·17	1·31	·98	1·92	·40	37·00
3. Bengal . .	1,46·24	44·15	7·02	3·76	—3·32	...	94·63
4. United Provinces .	65·57	39·68	...	2·81	...	1·12	21·96
5. Punjab . .	39·69	30·78	8·47	·05	·39	...	...
6. Burma . . .	33·75	14·46	—·99	...	...	...	20·28
7. Bihar and Orissa .	41·37	15·30	...	...	—3·39	...	29·46
8. Central Provinces .	23·40	7·17	1·19	2·24	3·38	...	9·42
9. Assam . .	15·70	8·79	...	·55	·50	1·04	4·82
Total .	4,87·94	2,21·60	17·94	12·59	—·07	5·61	2,30·27

Owing to the need for economy, no material progress with the spending of these grants is likely to be made in the ensuing year. The *minus* figures against some of the provinces indicate that it will not be possible to utilise fully the recurring grant from Imperial revenues for educational expenditure.

Revenue.

(*a*) *Imperial.*

105. The figures show little variation.

(*b*) *Provincial.*

Revised, 1915-16. 106. The increase of R2·65 lakhs in the Revised estimate over the Budget for the current year is mainly due to special receipts in Bombay from the sale of securities belonging to the Gujarat college and from a private donation for the Ahmedabad College of Science. *Budget, 1916-17.* The Budget estimate for 1916-17 provides for normal receipts.

EXPENDITURE.

(*a*) *Imperial* (*India and England*).

Revised, 1915-16.

108. The total Revised estimate for 1915-16 is less than the Budget by R9·27 lakhs, owing mainly to a decrease of R10·34 lakhs in India General and increases of R·67 lakh and R·85 lakh respectively in Delhi and the North-West Frontier Province. The decrease in India General is due (1) to the fact that no portion of the expenditure which is being incurred from the reserve of R7·70 lakhs entered in the Budget (see paragraph 109) will appear in the India General accounts; (2) to a reduction from R5 lakhs to R2·80 lakhs of the grant for the Indian Research Fund Association, in view, as regards R1·20 lakhs, of a grant of that amount from Imperial revenues made to the Government of the United Provinces for sanitary improvements in Lucknow, while a lapse also results from the temporary transfer to military duty of officers of the Indian Medical Service employed on research work; and (3) to lapses in ordinary grants. The increases in Delhi and in the North-West Frontier Province are caused by expenditure against the special allotments of R·70 lakh and R2 lakhs respectively which have been made to them from the reserve of R7·70 lakhs referred to above; and apart from this special expenditure, there will be a saving of R1·15 lakhs in the Budget provision in the latter province due to heavy lapses in ordinary grants.

109. The Budget estimate for 1915-16 included a reserve of R7·70 lakhs for the improvement of sanitation, being the portion of the special appropriation of R51 lakhs made for this purpose from Imperial revenues in recent years which had not been distributed among the provinces. From this sum, non-recurring allotments aggregating R3·70 lakhs have been made, *viz.*, (*i*) R1 lakh to the United Provinces for the improvement of the pilgrim route to Kedarnath and Badrinath, (*ii*) R2 lakhs to the North-West Frontier Province for the payment of a contribution to the Peshawar Municipality in aid of its scheme of drainage and water-supply, and (*iii*) R·70 lakh to Delhi for sanitary improvements. The balance of the reserve, amounting to R4 lakhs, will lapse in view of the need for economy, as no further allotments are required in connection with schemes of pressing urgency.

Budget, 1916-17.

110. The Budget estimate for 1916-17 exceeds the Revised for the current year by R3·63 lakhs. Provision has been made for the cost of sanctioned establishments and for normal charges generally; for a grant of R3 lakhs to the Indian Research Fund; for a further non-recurring contribution of R2 lakhs to the Peshawar Municipality in connection with its scheme of drainage and water-supply; and for a reserve of R3·70 lakhs. The reduction of R·68 lakh in the expenditure in Delhi is due to the absence of the special outlay mentioned in paragraph 109.

111. Out of the special appropriation of R51 lakhs referred to in paragraph 109, R38·30 lakhs have been assigned permanently to Provincial Governments or allotted for recurring outlay in minor administrations. From the balance of R12·70 lakhs, R3 lakhs will be paid in 1916-17 to the Indian Research Fund and R2 lakhs to the Peshawar Municipality; and R3·70 lakhs will be held in reserve to meet pressing demands that may come forward during the ensuing year. The residue of R4 lakhs will be temporarily resumed, in view of the financial situation, and will be made available for expenditure on sanitation later, on the return of normal conditions.

(*b*) *Provincial.*

Revised, 1915-16.

112. The Revised estimate for 1915-16 exceeds the Budget by R13·03 lakhs. The increase is wholly nominal and is due to a change in the classification of accounts, according to which grants to local and private bodies are recorded not under Civil Works, as used to be done in some of the provinces, but under the heads of service most closely connected with the objects for which the grants are given. In consequence of this change, expenditure amounting to about R25 lakhs* in Madras and R6 lakhs* in Burma for which provision was made in the Budget under Civil Works appears in the Revised under

* These figures include respectively R17 lakhs and R3 lakhs on account of outlay from special Imperial grants.

Medical. Eliminating this abnormal disturbance, the expenditure in 1915-16 is therefore, likely to be less than the Budget estimate by about ₹18 lakhs. The Budget included special allotments in provinces other than Madras and Burma aggregating about ₹34 lakhs, for outlay under Medical from recurring and non-recurring appropriations made from Imperial revenues for the development of sanitation. The amount of corresponding expenditure is now estimated at about ₹18 lakhs, *i.e.*, ₹16 lakhs less than the Budget provision. The Revised estimates also include a special grant of ₹4 lakhs to the Madras Corporation in connection with its water-supply and drainage scheme for which there was no provision in the Budget. Apart from the change in classification referred to above and excluding outlay from the special Imperial grants, and the grant to the Madras Corporation, the expenditure in 1915-16 will thus fall short of Budget allotments by about ₹6 lakhs. The saving is distributed over several provinces and is generally due to lapses in the ordinary grants and to a curtailment of expenditure with reference to the policy of economy.

Budget, 1916-17.

113. The Budget estimate for 1916-17 is less than the Revised for 1915-16 by ₹9·16 lakhs. Part of the decrease is explained by the absence of provision in the estimates for the next year for the grant to the Madras Corporation mentioned above, and the balance occurs in the outlay from special Imperial grants for which a provision of about ₹31 lakhs has been made in the Budget under Medical, against a probable expenditure of about ₹38 lakhs under the same head in the current year (inclusive of amounts likely to be spent in Madras and Burma). Provision has generally been made for the full cost of sanctioned establishments as well as for necessary outlay in other directions.

114. The following table shows the progress made by the Provincial Governments in utilising the various non-recurring grants made from Imperial revenues in recent years (beginning from 1911-12) in aid of sanitation. To simplify the position, it has been assumed that the recurring grant is fully utilised before any expenditure is debited against the non-recurring grant; and the *minus* figure in 1915-16 and 1916-17 against some of the provinces indicates that the recurring grant will not be spent in full during the year.

[In lakhs of ₹]

Province.	Grants to end of 1916-17.	Expenditure.					Balance.
		To end of 1914-15.	In 1915-16 (Revised) recorded under		In 1916-17 (Budget) recorded under		
			Medical.	Other heads.	Medical.	Other heads.	
Madras . . .	39·25	23·49	10·93	...	3·93	...	·90
Bombay . . .	37·95	19·95	—1·18	...	—4·20	...	23·38
Bengal . . .	40 55	12·35	—2·00	...	—2·50	...	32·70
United Provinces .	51·20	29·68	·89	...	1·00	...	19·63
Punjab . . .	28·97	21·07	—1·77	...	—2·50	...	12·17
Burma . . .	21·50	12·67	...	...	...	...	8·83
Bihar and Orissa .	17·82	12·90	—1.43	...	...	...	6·35
Central Provinces .	16·50	6·16	·71	...	1·99	...	7·64
Assam . . .	6·96	6·49	—·36	...	—·38	...	1·21
Total .	2,60·70	1,44·76	5·79	...	—2·66	...	1,12·81

The need for economy and the shortage in the superior medical staff will lead to a considerable curtailment of expenditure. Only three of the provinces expect to utilise in 1916-17 a portion of the unspent balances of the non-recurring grants; while in four others, the recurring grants will not be spent in full.

Revenue.

115. The figures of both Imperial and Provincial revenue do not show any important variations.

116. The Imperial outlay shown against "Other Provinces" consists of the charges of the Political Residency at Aden and certain other expenditure—mainly in connection with political refugees and State prisoners—in several provinces.

(*a*) *Imperial—India and England.*

117. The expenditure in 1915-16 is likely to exceed the Budget provision by R11·34 lakhs, owing mainly to special expenditure in connection with the diplomatic and consular services in Persia. The total Budget for 1916-17 is less than the total Revised estimate for 1915-16 by 6·77 lakhs, an expected reduction in the special expenditure in Persia being partly counterbalanced by an increase in the North-West Frontier Province, due to the grant of certain concessions to the frontier militia with reference to the present conditions of service on the frontier. *Revised, 1915-16.* *Budget, 1916-17.*

(*b*) *Provincial.*

118. The total expenditure in 1915-16 is expected to fall short of the Revised by R8·30 lakhs, while the Budget estimate for 1916-17 exceeds the Revised for 1915-16 by R7·05 lakhs. These variations occur mostly in the special expenditure in Burma and Assam in connection with the administration and proper control of the North-East frontier. *Revised, 1915-16.* *Budget, 1916-17.*

EXPENDITURE.

(a) *Imperial (India and England).*

119. The total expenditure in 1915-16 is likely to fall short of the Budget provision by R·89 lakh, owing to lapses in ordinary grants and the non-utilisation of the lump allotment for the creation of a separate Veterinary department in the North-West Frontier Province. The Budget estimate for 1916-17 provides generally for sanctioned establishments and repeats the lump allotment in the North-West Frontier Province. The absence of any provision against "Other Provinces" in the table on page 68 is due to the fact that the charges of the Camel Specialist in the Punjab will be recorded in the Provincial section of the accounts with effect from the ensuing year.

Revised, 1915-16.

Budget, 1916-17.

(b) *Provincial.*

120. The total Revised estimate for 1915-16 does not differ materially from the Budget, lapses in grants in some of the provinces being nearly counterbalanced by unimportant excesses in others. The Budget estimate for 1916-17 exceeds the Revised for 1915-16 by R3·01 lakhs owing to special allotments in the Punjab and in some of the other provinces for a necessary expansion of the operations of the agricultural and allied departments.

Revised, 1915-16.

Budget, 1916-17.

REVENUE.

(a) *Imperial.*

121. The figures show little variation.

(b) *Provincial.*

122. The Revised estimate for 1915-16 does not differ materially from the Budget. The Budget estimate for 1916-17 provides for a growth in the revenue in most of the provinces consequent on the opening of new experimental farms, etc.

Revised, 1915-16.

Budget, 1916-17.

TOTAL R	46,69,734	45,90,116	43,77,913	46,32,000	43,02,000	42,84,000

EXPENDITURE.

123. The figures shown against "Other Provinces" in the table at page 70 represent expenditure incurred in the several provinces in connection with ethnographical surveys and census operations, as well as the cost of the Archæological Department in Burma.

EXPENDITURE.

(a) *Imperial—India and England.*

Revised, 1915-16.

124. The total expenditure in 1915-16 will fall short of the Budget estimate by R4·14 lakhs, owing mainly to lapses in the grants of the Survey of India and Geological Survey Departments, consequent on a curtailment of operations, and in the provision for the purchase of stores in England.

Budget, 1916-17.

125. The Budget estimate for 1916-17 is higher than the Revised estimate for the current year by R1 lakh. The increase is wholly due to a higher provision for the purchase of stores in England.

(b) *Provincial.*

Revised, 1915-16.

Budget, 1916-17.

126. The Revised estimate for 1915-16 does not differ materially from the Budget provision. The Budget for 1916-17 is taken at R2·96 lakhs higher than the Revised estimate for the current year. The increase occurs mostly in Bengal (R1·80 lakhs) and Madras (R·71 lakh) and is chiefly due to lump provisions for the development of local industries.

REVENUE.

(a) *Imperial.*

127. The figures show little variation.

(b) *Provincial.*

Revised, 1915-16.

128. The improvement in revenue in 1915-16 over the Budget estimate occurs mainly in the receipts from the cinchona plantations in Bengal and Madras.

Budget, 1916-17.

The Budget estimate for 1916-17 anticipates a further rise of ₹·94 lakh in the revenue, owing chiefly to higher receipts in Madras from fisheries and other sources.

132. The figures of Imperial revenue shown against "Other Provinces" represent the receipts of certain abolished funds, the assets and liabilities of which were taken over by the Government, as well as the subscriptions paid by members of the Indian Civil Service for securing certain pensionary benefits for their families. The charges on account of such pensions as well as of the pensions of the abolished funds are recorded in the accounts as Imperial expenditure.

EXPENDITURE.

(*a*) *Imperial—India and England.*

133. The figures show little variation.

(*b*) *Provincial.*

ised, 1915-16. 134. The Revised estimate for 1915-16 is less than the Budget by R8·59 lakhs, owing to a smaller growth of pension charges, and reduced payments in connection with the commutation of pensions mostly in Bengal, the Punjab and the United Provinces. The Budget estimate for 1916-17 provides for the normal growth of the retired list.

ised, 1915-16.

REVENUE.

(*a*) *Imperial—India and England.*

ised, 1915-16. 135. The Revised estimate for 1915-16 exceeds the Budget by R2·02 lakhs, mainly owing to receipt of higher subscriptions towards Indian Civil Service family pensions. The Budget estimate for 1916-17 does not differ materially from the Revised for 1915-16.

lget, 1916-17.

(*b*) *Provincial.*

ised, 1915-16. 136. The Revised estimate for 1915-16 exceeds the Budget by R1·60 lakhs, the increase occurring mainly in the receipts of contributions from local bodies to secure pensionary benefits from general revenues for their servants. The Budget estimate for 1916-17 does not differ materially from the Revised for 1915-16.

lget, 1916-17.

EXPENDITURE.

(*a*) *Imperial, India and England.*

Revised, 1915-16.

137. The total Imperial expenditure in 1915-16, exclusive of the charges of the commercial departments, is likely to exceed the Budget provision by ₹2·09 lakhs, the increase being due to a higher outlay in England on the purchase of stores consequent on a rise in prices. The Budget estimate for 1916-17 anticipates a reduction in the expenditure on the purchase of stores in England in view of the need for economy.

Budget, 1916-17.

(*b*) *Provincial.*

Revised, 1915-16.

138. The Revised estimate for 1915-16 does not show any important variations from the Budget. The Budget estimate for 1916-17 anticipates a reduction of ₹·82 lakh in the total expenditure, as compared with the current year, this being the net result of a number of unimportant variations in the several provinces.

Budget, 1916-17.

REVENUE.

139. The figures do not show any important variation. The Imperial revenue shown against "Other provinces" represents recovery of the value of stationery supplied to railways and to municipalities and other local bodies.

Expenditure . . ₹	...	...	...	...	...	...
Equivalent in Sterling £	...	...	...	...	...	...

140. This head records the comparatively small sums which have to be brought to account owing to the fact that the remittances from India to England by means of council bills and transfers, and the remittances in the opposite direction by sterling bills and transfers, are not effected exactly at the rate of 16 pence to the rupee. It may be mentioned that any gain derived from remittances on account of the Gold Standard Reserve is credited to the Reserve and not to general revenues.

141. In the current year, the average rate to be obtained on the net remittance of funds from India to England is estimated at £1=R14·92, and there is accordingly a gain of R13 lakhs under this head. In the Budget estimate for next year, it is assumed, in accordance with the usual practice, that remittances will be effected at an average rate of par. *Revised, 1915-16* *Budget, 1916-17.*

TOTAL £	371,864	352,612	365,192	297,400	263,300	259,600

142. Charges in connection with the remittance of Government treasure are Imperial in all provinces; so is the discount paid, or the premium levied, in connection with the sale of bills at treasuries and currency offices to facilitate trade remittances of funds. Extraordinary items of revenue realised, or of expenditure incurred, under this head in the various provinces are also treated as Imperial, if they exceed R10,000 in amount.

EXPENDITURE.

(*a*) *India—Imperial.*

143. The Revised estimate for 1915-16 falls short of the Budget by R7·59 lakhs. Out of the reserve of R10·5 lakhs (including R·5 lakh for Delhi) for unforeseen charges, which was provided in the Budget under Miscellaneous, only R4·09 lakhs will be used to meet expenditure falling under this head, *viz.*, (1) a payment of R3·05 lakhs to the Mysore Durbar on account of surplus revenues of the Bangalore Assigned Tract, and (2) an outlay of R1·04 lakhs, in excess of the Budget allotment, on books and publications. The balance of the reserve, amounting to R6·41 lakhs, has been appropriated to meet sanctioned outlay under other heads of account. There is also a saving of R1·47 lakhs in the charges for the remittance of treasure, due to smaller movements of coin. *Revised, 1915-*

144. The Budget estimate for 1916-17 provides for normal charges; for miscellaneous expenditure connected with the war likely to be incurred in the ensuing year; and for a reserve of R15·5 lakhs for unforeseen expenditure, of which R·5 lakh is for Delhi. *Budget, 1916-*

(*b*) *India—Provincial.*

145. The Revised estimate for 1915-16 is less than the Budget by R6·07 lakhs. The decrease is mainly due to the record under other heads of account of most of the expenditure incurred against the lump provision for grain compensation allowance and against the various other reserves which were included in the Budget estimates of several provinces under Miscellaneous; and to a lapse in the allotment made in the Punjab for the general introduction of the new copying agency rules. A certain amount of unforeseen expenditure has been incurred in Bombay in connection with famine fodder operations; and in Bengal, Assam and the United Provinces, for relief of distress caused by floods, etc. *Revised, 1915*

146. The Budget estimate for 1916-17 provides generally for normal charges and for the usual reserve for unforeseen expenditure in most provinces. In Bengal and the United Provinces, lump allotments have again been made for grain compensation charges. *Budget, 1916-*

(*c*) *England.*

147. The Revised estimate for 1915-16 does not differ materially from the Budget, an increase of £5,600 in the charges of the Public Services Commission being partly counterbalanced by a fall in the miscellaneous expenditure connected with the supply of stores to India. The Budget estimate for 1916-17 is taken at £20,200 less than the Revised for the current year, owing to a further probable decrease in the latter item of expenditure and the absence of the charges of the Public Services Commission. *Revised, 1915* *Budget, 1916-*

REVENUE.

(*a*) *India—Imperial.*

148. The Revised estimate for 1915-16 is less than the Budget by R2·80 lakhs. The decrease is mainly due to a reduction in the special receipts from the sale of town sites in the Punjab, smaller recoveries of departmental charges in connection with the supply of stores to Provincial Governments and local bodies, and a fall in the revenue derived from premium on bills. The Budget estimate for 1916-17 provides generally for normal receipts. *Revised, 1915* *Budget, 1916-*

(*b*) *Provincial.*

ised, 1915-16. 149. The total revenue in 1915-16 is likely to fall short of the Budget estimate by R2·51 lakhs. The decline is mainly due to the postponement of the general introduction of the new copying agency rules in the Punjab, and to smaller receipts on account of unclaimed deposits in this province and also in *lget, 1916-17.* Bengal, Bihar and Orissa, and Assam. The Budget estimate for 1916-17 provides generally for normal receipts.

(*c*) *England.*

150. The figures show little variation.

33 TO 36.—FAMINE RELIEF AND INSURANCE.

	Accounts, 1912-13	Accounts, 1913-14	Accounts, 1914-15	1915-16. Budget.	1915-16. Revised.	Budget, 1916-17.

151 The expenditure in the current year under the head Famine Relief is now estimated at R6 lakhs, the principal items being an outlay of (1) R4 lakhs in the Punjab in connection with fodder concessions, and (2) R1·20 lakhs in Bihar and Orissa on relief operations in certain districts. *Revised, 1*

152. The amount available for famine insurance in 1915-16 accordingly amounts to R144 lakhs, of which R75 lakhs will be spent on protective works and R69 lakhs will be appropriated for the reduction or avoidance of debt.

153. In the Budget estimate for 1916-17 provision has been made, as usual, for a total grant of R150 lakhs under this group head. Out of this amount, a sum of R6·94 lakhs will be required to meet expenditure debitable to the head Famine Relief, in connection with relief operations and fodder concessions mainly in the Punjab, Bihar and Orissa and Ajmer-Merwara; and R64·90 lakhs have been allotted for the construction of protective works. The remainder, *viz.*, R78·16 lakhs, will be utilised for the avoidance of debt. Of the last named sum, R11·48 lakhs will appear in the Provincial section of the estimates as a result of the arrangements explained in the Financial Statement for 1907-08 (see also paragraph 231). *Budget, 19*

CONSTRUCTION OF PROTECTIVE RAILWAYS.

154. The small *minus* figures entered in the Revised estimate for 1915-16 and in the Budget for 1916-17 represent the value of surplus stores of the Dharmapuri-Hosur extension of the Morappur-Dharmapuri Railway. No outlay on the construction of Protective railways is contemplated in either of the two years.

CONSTRUCTION OF PROTECTIVE IRRIGATION WORKS.

155. In the Budget estimate for 1915-16, an allotment of R75 lakhs was made for outlay on Protective Irrigation works, the whole amount being met from the Famine Insurance grant. The probable expenditure, according to the Revised estimate, will amount to R78·30 lakhs, owing mainly to more rapid progress of work on the Ghaggar canal. R75·05 lakhs of the outlay will be recorded in the Famine Relief and Insurance section of the accounts; and the remaining 3·25 lakhs will appear in the Irrigation section. *Revised, 1*

t, 1916-17.

156. In the Budget estimate for 1916-17 the allotment for Protective Irrigation works has been reduced to R65 lakhs, with reference to the policy of retrenchment, the whole amount being met from the Famine Insurance grant. The distribution of the grant of R65 lakhs is given in the table below.

† The overdraft of, and advances to, the Bengal Nagpur Railway Company amounting to £13,451,400 on the 31st December 1910 have been transferred in the accounts of 1914-15, from "expenditure by companies" to "expenditure by Government".

157. The Gross Receipts and Working Expenses of State Railways include the following figures on account of the Jorhat State Railway in Assam. This is the only line the transactions of which are recorded in the Provincial section of the accounts:—

	Accounts, 1912-13.	Accounts, 1913-14.	Accounts, 1914-15.	Budget, 1915-16.	Revised, 1915-16.	Budget, 1916-17.
	R	R	R	R	R	R
Gross Receipts . . .	1,22,589	1,23,805	1,27,545	1,20,000	1,40,000	1,40,000
Working Expenses . . .	84,546	89,499	1,27,109	96,000	1,05,000	1,08,000

Revised, 1915-16.

Gross Receipts.

158. The Budget estimate of Gross Receipts for 1915-16 was taken at 53·01 crores, or 45 lakhs lower than the probable receipts of the previous year as then estimated. It was assumed that war conditions would continue to be operative throughout the year and would gravely prejudice the revenue. This anticipation has not been fully realised. The recovery in earnings which set in in March last has continued in a greater or less degree throughout the year and the Revised estimate is now placed at 57·15 crores. The improvement, which is shared in by all the principal railways—notably the Great Indian Peninsula, Bombay Baroda and Central India, Madras and Southern Mahratta and Bengal-Nagpur—is partly attributable to large movements of cotton and manganese ore, to diversion of coal traffic from over-sea routes to rail routes owing to scarcity of freight and to improved coaching receipts from the transport of troops.

Working Expenses.

159. The Revised estimate of Working Expenses for 1915-16 stands at 7·92 lakhs below the Budget estimate, a remarkable result for a year in which the estimate of receipts is expected to exceed the Budget anticipation by over 4 crores. The principal causes of this are the restriction of expenditure, and especially outlay on special renewals, to the amount which is imperative or immediately remunerative, and the increasing difficulty of obtaining railway material from the United Kingdom.

Surplus Profits.

160. The increase of 16·03 lakhs in the provision for payment of surplus profits to companies follows on the improvement in their net traffic receipts in the last quarter of the preceding year.

Budget, 1916-17.

Gross Receipts.

161 The Budget estimate of Gross Receipts for 1916-17 is taken at 56·37 crores, or about 80 lakhs less than the Revised estimate for the current year. It is not considered safe to assume that, with the further continuance of the war, the record earnings of this year will be fully maintained, though necessary allowance has been made for development of traffic on new lines and extensions.

Working Expenses.

162. The grant for Working Expenses in 1916-17 is more than the Revised for the current year by 34·16 lakhs and provides for a further rise in the price of imported materials required for railway working.

Surplus Profits.

163. Under Surplus Profits paid to companies there is an increase of 3·74 lakhs due to profits earned in the second half of the current year, payment of which will be made next year, being larger than those of the second half of 1914-15.

Interest Charges, etc.

Revised, 1915-16.

164. The excess over the Budget estimate of 1915-16 under Interest on debt is explained in paragraph 65. The decrease under Interest on capital deposited by companies is due mainly to the Great Indian Peninsula Railway not having raised Debenture Stock as provided for in the Budget and to the East Indian Railway having issued Debenture Stock later in the year than was anticipated.

Budget, 1916-17.

165. The increase in the total Interest charges in 1916-17 is a result of the continued growth of capital outlay on railways.

Other Receipts.

166. The receipts shown under this head represent recoveries from the Travancore Darbar of its share of the loss on the Travancore Branch of the

South Indian Railway; the Government share of the surplus profits of the Rohilkund and Kumaon, Southern Punjab and Amritsar Patti Railways, payable under the terms of their respective contracts; and dividends on certain shares of the Ahmedabad Dholka Railway allotted to Government in repayment of expenditure incurred by it on behalf of the railway. The improvement of R·53 lakh (£3,500) on the Budget estimate of receipts in the current year and the decrease of R1·10 lakhs (£7,300) provided in the Budget of 1916-17 are mainly due to the variation in the Government share of surplus profits of the Southern Punjab Railway Company.

Other Charges.

167. These consist of cost of land required by certain Companies, the contracts with which provide for the free supply of all land wanted for the purposes of the railways undertaken by them, and of miscellaneous items such as surveys and controlling establishments (including the Railway Board). A share of the cost of control is charged to the working expenses of each railway company and the recoveries thus made are adjusted by deduction from the miscellaneous expenditure. The details are :—

	Accounts, 1914-15.	1915-16. Budget.	1915-16. Revised.	1916-17 Budget.
Imperial.	R	R	R	R

2. Miscellaneous Expenditure	13,08,380	8,04,000	5,59,000	4,00,000
Provincial.				
1. Subsidized Companies—Land	7,760	17,000	14,000	15,000
2. Miscellaneous Expenditure	...	...	12,000	5,000
TOTAL R	27,78,227	38,21,000	32,35,000	39,20,000
TOTAL £	185,215	254,700	215,700	261,300

Land.—A lapse of R3·50 lakhs is expected in the Imperial Budget grant for the current year, due chiefly to short outlay on the Ahmedpur Katwa, Chaparmukh Silghat, Kalighat Fulta and Tinnevelly Tiruchendur Railways and to the postponement of acquisition of land for the Dindigul Palghat Railway, partly counterbalanced by increases on the Mymensingh Bhairab Bazar, Sara Serajgunj and Guzerat Railways. The principal allotments made in 1916-17 are for the Kalighat Fulta, Sara Serajgunj, Mymensingh Bhairab Bazar, Ahmedpur Katwa, Jaijou Extension, Katakhal Lalla Bazar and Mayavaram Tranquebar Railways.

Miscellaneous Expenditure.—The lapse of R2·45 lakhs in the Revised estimate for 1915-16 is due chiefly to survey operations being restricted in consequence of officers having been placed on military duty and to realization of unanticipated credits. The Budget for 1916-17 is made up as follows :—

	R
Allotment for surveys	5,81,000
Charges for Railway Board and other establishments	14,57,000
Deduct—Recoveries from Railway Companies on account of cost of supervision	*16,38,000*
TOTAL	4,00,000

General Result.

168. Taking India as a whole, the net revenue derived from Major Irrigation works in 1915-16 will be less than the Budget forecast by £151,300 (R22·69 lakhs). There will be a fall of R·13 lakh in the Direct Receipts and of R1·33 lakhs in the share of Land Revenue. There will also be a large increase of R21·23 lakhs in the expenditure, *viz.*, R15·08 lakhs under Working Expenses and R6·15 lakhs in the interest charges. An improvement of £14,600 (R2·18 lakhs) is expected in the net revenue in 1916-17. This allows for a rise of R8·29 lakhs in the gross revenue, made up of an increase of R14·34 lakhs in the Direct Receipts and a fall of R6·05 lakhs in the share of Land Revenue, and a small reduction of R·67 lakh in Working Expenses. But provision has been made for a growth of R6·78 lakhs in the interest charges, in consequence of the considerable outlay now being incurred on new projects in the Punjab and elsewhere the benefits of which will not be realised for some time to come. The net result under Minor Irrigation works in 1915-16 is better than the Budget estimate by £28,900 (R4·34 lakhs), a decline of R2·36 lakhs in revenue being more than counterbalanced by a saving of R6·70 lakhs in expenditure. The estimate for next year provides for a rise of R1·85 lakhs in the receipts and for a reduction of R2·63 lakhs in expenditure.

Major Irrigation.

Minor Irrigation.

169. The figures for Land Revenue due to Irrigation have already been examined in paragraphs 11 and 12 along with those for Land Revenue proper. The details of the other heads are exhibited in the following tables.

Direct Receipts.

(a) *Imperial.*

Revised, 1915-16. 170. The total Revised estimate for 1915-16 does not differ materially from the Budget, a fall of R·72 lakh in the revenue of the Upper and Lower Swat River Canals being more than counterbalanced by an improvement in the collections in the United Provinces (R·79 lakh), owing to an increased demand for irrigation from the Betwa Canal, and in Burma and in the Central Provinces.

Budget, 1916-17. 171. The Budget estimate for 1916-17 provides for normal receipts, and is R1·76 lakhs higher than the Revised estimate for the current year, chiefly in consequence of an expected development of irrigation on the Upper Swat River Canal and on the canals in Burma and the Central Provinces.

(b) *Divided and wholly Provincial.*

Revised, 1915-16. 172. The Revised estimate for 1915-16 does not differ materially from the Budget. There is a fall of R6·98 lakhs in the Punjab, due to a smaller supply of water during the *kharif* season from the Sirhind and the Western Jumna Canals in consequence of scanty rains, a contraction in the area under cotton and the grant of larger remissions; and of R·92 lakh in Bombay, owing chiefly to a reduced demand for water from the Godavari Canal consequent on favourable rainfall. On the other hand, there are improvements of R5·70 lakhs and 1·50 lakhs respectively in the United Provinces and Bihar and Orissa, where deficient rainfall in certain parts has led to a more extensive use of canal water.

Budget, 1916-17. 173. The total Budget for 1916-17 exceeds the Revised estimate for the current year by R12·58 lakhs. It is based generally on the demand for *rabi* irrigation in the current year and on normal requirements in connection with next year's *kharif*.

Working Expenses.

(a) *Imperial.*

Revised, 1915-16. 174. The total expenditure in 1915-16 is likely to exceed the Budget provision by R·57 lakh, the increase being wholly due to higher outlay on the canals in the North-West Frontier Province. Excesses over the Budget grants are also expected on the Imperial canals in other provinces; but they will be met from the reserve of R·63 lakh entered in the Budget for unforeseen requirements.

Budget, 1916-17. 175. The Budget estimate for 1916-17 provides for normal charges in all the provinces, and is less than the Revised estimate of the current year by R1·57 lakhs.

(b) *Divided and wholly Provincial.*

Revised, 1915-16. 176. The Revised estimate for 1915-16 exceeds the Budget by R14·51 lakhs. There is a large increase of R11·59 lakhs in the Punjab due to special expenditure, which could not be postponed without serious danger and a considerable loss of revenue, in connection with training works on the Lower Chenab Canal and the up-keep of the banks of the Triple project canals. Smaller excesses are also expected in Madras (R1·65 lakhs), Bihar and Orissa (R1·26 lakhs) and Bombay (R1·03 lakhs), chiefly in consequence of outlay on repairs of damages caused by floods and on certain pressing works for which no provision was made in the Budget. On the other hand, there will be unimportant lapses in the Budget grants in Bengal and in the United Provinces.

Budget, 1916-17. 177. The Budget estimate for 1916-17 provides generally for a normal scale of expenditure and for outlay on certain special works urgently required in the Punjab.

REVENUE.

(a) *Imperial.*

179. The figures do not show any important variation.

(b) *Divided and Provincial.*

180. The total Revised estimate for 1915-16 is less than the Budget by R2·06 lakhs. The decrease is mainly due to a fall in the revenue from certain canals in Burma. The Budget estimate for 1916-17 provides for normal collections in all the provinces. *Revised, 1915-16.* *Budget, 1916-17.*

EXPENDITURE.

(a) *Imperial—India and England.*

181. The Budget estimate of the current year included a grant of R5 lakhs in aid of special expenditure entailed by the recommendations of the Irrigation Commission. R1·75 lakhs out of this grant are being spent on the Surkhab River project in Baluchistan, while R1·15 lakhs have been allotted to the Government of the United Provinces for tank restoration works and placed at its credit by an assignment of Imperial revenue (*vide* paragraph 235). The balance of the special grant will lapse. Savings are also expected in the grants for ordinary expenditure in some of the minor administrations. These causes account for the decrease of R3·48 lakhs in the Revised estimate for 1915-16 as compared with the Budget. *Revised, 1915-16.*

182. The Budget estimate for 1916-17 exceeds the Revised estimate for the current year by R·97 lakh. Provision for new works has been curtailed as far as possible, and no specific allotment has been made for the Surkhab River project in Baluchistan; but a reserve of R2·89 lakhs has been entered to meet pressing requirements which cannot be foreseen at present. *Budget, 1916-17.*

(b) *Divided and Provincial.*

183. The Revised estimate for 1915-16 falls short of the Budget grant by R3·22 lakhs. The decrease is mainly due to the curtailment of programmes in Madras, Bihar and Orissa, and certain other provinces, in view of the need for economy. On the other hand, an excess of R1·74 lakhs over the Budget grant is expected in the United Provinces, due mainly to expenditure on tank restoration works which is being financed largely by a special assignment from Imperial revenue (*vide* paragraph 181). *Revised, 1915-16.*

184. The Budget estimate for 1916-17 is taken at R3·60 lakhs less than the Revised for the current year. Provision has generally been made for sanctioned establishments, for necessary repairs and for urgent works. *Budget, 1916-17.*

186. The Imperial revenue and expenditure shown against "Other Provinces" represent the transactions in connection with the buildings of the various departments, *e.g.*, Salt, Customs, etc., the receipts and charges of which are wholly Imperial.

EXPENDITURE.

(*a*) *Imperial—India and England.*

Revised, 1915-16.

187. The total expenditure in 1915-16 is expected to fall short of the Budget provision by R6·68 lakhs. The reduction is generally due to the curtailment of the expenditure programme in pursuance of the policy of retrenchment. There will, however, be an excess over the Budget estimate of R1·90 lakhs in Delhi owing to unforeseen outlay on land acquisition and other items; and of R4·02 lakhs in England due to a higher payment of leave allowances and a rise in the cost of stores.

Budget, 1916-17.

188. In 1916-17 the total Imperial grant has been fixed at R80 lakhs, exclusive of R4·36 lakhs allotted for expenditure incurred in the Civil Department, mostly in the several minor administrations, and of sums aggregating R31·34 lakhs to be spent by the administrations of the North-West Frontier Province (23·19 lakhs) and Baluchistan (8·15 lakhs). A large curtailment of grants has been made everywhere in view of the financial position, and the total Budget for 1916-17 is less than the Revised estimate for 1915-16 by R15·87 lakhs and less than the Budget grant for the latter year by R22·55 lakhs.

189. The purposes to which the grant of R80 lakhs mentioned in the preceding paragraph will be applied are shown below :—

In lakhs of Rupees.

(*a*) Ordinary Grant—		
(1) Establishment and Miscellaneous charges		12·30
(2) Repairs		18·60
(3) Works in progress		14·71
(4) New Works—		
(*a*) Costing up to R5,000		6·30
(*b*) Costing more than R5,000		6·21
(5) Payments in England for Stores, furlough allowances, etc.		5·93
(6) Reserve for Archæological expenditure		1·00
(7) Reserve for other unforeseen expenditure		4·14
		69·19
(*b*) Delhi Province—		
(1) Works in progress	0·63	
(2) New Works—		
(*a*) Costing up to R5,000	·06	
(*b*) Costing more than R5,000	0·46	
(3) Repairs	6·60	
(4) Establishment and Tools and Plant	1·76	
(5) Archæological expenditure	·18	
(6) Reserve for unforeseen expenditure	1·12	
		10·81
		80·00

190. Out of the ordinary grant mentioned in paragraph 189, allotments of R1 lakh or more will be made to carry on work already in progress on the following projects; and it is not proposed to start any important new work in the ensuing year.

Province.	Name of work.	Amount of grant.
		R
United Provinces .	Erection of certain buildings for the Imperial Bacteriological laboratory at Bareilly, including fencing, roads, drainage and water-supply . .	1,20,000
Bombay . .	New Customs House at Karachi	2,00,000
„ . .	„ „ „ „ Bombay	3,00,000
Burma . . .	„ Telegraph Office at Rangoon	1,24,000

191. The Budget grants for 1916-17 proposed for Baluchistan and the North-West Frontier Province do not differ materially from the Revised estimates for 1915-16.

(*b*) *India—Provincial.*

Revised, 1915-16.

192. The total Revised estimate for 1915-16 is less than the Budget by R26·97 lakhs. The Budget provided for an outlay of about R30½ lakhs on Civil Works from the special Imperial assignments made in recent years for education, sanitation and other beneficial services; but the total expenditure of this class in the current year, to be recorded under Civil Works, is now estimated at about R26½ lakhs. Eliminating this special expenditure as well as the Budget provision made for it, and making allowance for the fact that about R11 lakhs of ordinary expenditure for which provision was made in Madras and Burma under Civil Works will be recorded under Medical (with reference to the change in classification mentioned in paragraph 112), the Revised estimate under Civil Works falls short of the corresponding Budget grant by about R32 lakhs. The real saving is larger, for a portion of the expenditure against some of the ordinary grants provided in the Budget under Education, Medical and other heads is recorded in the accounts under Civil Works. Considerable lapses in the grants provided under the latter head, otherwise than from the special appropriations from Imperial revenues referred to above, are expected in almost all the provinces, owing to a further curtailment of the programme of construction contemplated in the Budget, which has become necessary in consequence of the financial situation. In Assam alone, the expenditure is likely to exceed the Budget grant, owing to outlay on relief works, and on the repair of flood damages, in the Surma Valley.

Budget, 1916-17.

193. The table below compares the details of the grants for 1916-17 in the various provinces, so far as settled at present, with the probable expenditure in the current year.

REVISED, 1915-16.

[Lakhs of Rupees.]

Provinces.	Grants to		Outlay in the Public Works Department on			Other items.	Total.

BUDGET, 1916-17.

[Lakhs of Rupees.]

PROVINCES.	GRANTS TO		OUTLAY IN THE PUBLIC WORKS DEPARTMENT ON			Other items.	TOTAL
	Local Boards and Municipalities.	Other local bodies.	Original Works.	Repairs.	Establishment charges.		
1. Madras	17·43	·01	39·05	9·57	15·29	1·34	82·69
2. Bombay	8·26	...	27·70	23·30	16·00	2·28	77·54
3. Bengal	9·45	1·55	15·10	24·00	13·00	·90	64·00
4. United Provinces	4·18	...	20·57	25·12	10·99	1·94	62·80
5. Punjab	11·94	...	12·31	18·20	9·01	2·39	53·85
6. Burma	10·50	...	27·03	29·00	19·52	6·21	92·26
7. Bihar and Orissa	6·73	1·00	40·62	8·50	9·00	4·74	70·59
8. Central Provinces	3·99	...	21·66	20·44	11·00	·91	58·00
9. Assam	2·81	...	6·65	16·36	7·06	1·07	33·95
TOTAL	75·29	2·56	210·69	174·49	110·87	21·78	595·68

194. The Budget estimate for 1916-17 is less than the Revised for the current year by R91·16 lakhs. The large decrease reflects the policy of severe retrenchment which has become necessary owing to the protracted duration of the war and the consequent financial dislocation. Allotments aggregating R9 lakhs only have been made for outlay on Civil Works from the special Imperial assignments made in recent years, against a corresponding outlay of R26$\frac{1}{2}$ lakhs included in the Revised estimate of the current year.

195. The total provision for original works in 1916-17 has been taken at about R77 lakhs less than the probable expenditure in the current year and R2,19 lakhs less than the expenditure in 1914-15. The grants have been restricted in all the provinces to pressing requirements. Provision has been made in Bihar and Orissa for the progress of work in connection with the Bankipore buildings.

196. It is not possible to make similarly large reductions in any of the other items of expenditure shown in the table in paragraph 193. The total provision for grants to local boards and municipalities in 1916-17 is, however, taken at about R5 lakhs less than the similar expenditure in 1915-16, in spite of the fact that the Budget provides for a fresh item of R4·50 lakhs for contributions to district funds in Burma for the maintenance of provincial roads made over to them; and a reduction in the allotment for non-recurring contributions to local boards and municipalities for roads, bridges and other public works has been made in almost every province. Of the provision under "Grants to other local bodies", R1·50 lakhs represent the grant from Imperial revenues to the Calcutta Improvement Trust.

197. The Budget grants for Repairs and for Establishment charges are generally based on normal requirements and sanctioned scales.

REVENUE.

(a) *Imperial.*

Revised, 1915-16. 198. The total Revised estimate for 1915-16 exceeds the Budget by R1 lakh, mainly in consequence of higher receipts in Delhi from the rent of buildings occupied by Government officials and the supply of electric energy.

Budget, 1916-17. The total Budget estimate for 1916-17 practically repeats the Revised for the current year.

(b) *Provincial.*

Revised, 1915-16. 199. The Revised estimate for 1915-16 shows a rise of R3·87 lakhs over the Budget estimate. Increased receipts are expected in almost all the provinces from the sale of old materials, rent of Government buildings and other sources.

Budget, 1916-17. The Budget estimate for 1916-17 provides generally for normal receipts.

XXXII and 46.—ARMY.

Revised, 1915-16, compared with Budget, 1915-16. Expenditure—India.

200. The Army expenditure in India during the current year will, it is anticipated, exceed the Budget estimate of R23,75·05 lakhs (£15,833,600) by R1,68·16 lakhs (£1,121,100). Foremost amongst the causes contributing to this large increase may be mentioned an enhanced outlay of R89·91 lakhs (£599,400) on account of various special services, *e.g.*, port defences, operations on the North-West Frontier, etc. The decision that India should bear the normal cost of the regular British and Indian garrison involves an additional charge of R88 lakhs (£586,700), including extra food charges. The formation of mechanical transport companies and units of the Royal Flying Corps accounts for an additional expenditure of R12·83 lakhs (£85,500). The Railway charges have risen by R6·28 lakhs (£41,900); the increase is chiefly due to the fact that all internal movements of stores and animals in consequence of the war have been borne by Indian revenues. The discharge of a large number of reservists who were found unfit for active service has necessitated an increased payment of R3·75 lakhs (£25,000) on account of gratuities, while a change in the system of paying Indian pensioners in the United Provinces has contributed to an extra outlay this year of R1·25 lakhs (£8,300). On the other hand, the non-effective payments in India arising out of the war, which are recoverable from the Imperial Government, are now anticipated to amount to only R12 lakhs (£80,000), or R33 lakhs (£220,000) below the budget figure. This decrease is, however, merely nominal since in the adjustment with the War Office for such payments a correspondingly higher payment will have to be made at Home. The foregoing causes account for a net increase of R1,69·02 lakhs (£1,126,800).

Among the variations of minor importance may be mentioned the following:—Decrease of Rs. 3·95 lakhs (£26,300) on dairy farm operations and a lapse of R1·65 lakhs (£11,000) in connection with the scheme for the establishment of a grass farm at Risalpur, which has been held in abeyance. The training grant has not been fully spent, and a saving of R2 lakhs (£13,300) has thus accrued. Credit has been afforded to the Imperial Government for the value of stores brought back by certain units from Hong Kong; outlay at home on stores for ordnance factories in India is being passed out to India for adjustment; increased prices have been paid for Australian remounts; and more horses have been purchased in order to supply chargers on hire to Indian Army Reserve officers. These four causes account for an increase of R8·15 lakhs (£54,300).

Home.

201. The expenditure at Home is also largely in excess of the Budget provision and is expected to amount to £4,895,500, or £755,400 over the Budget. The decision that the Imperial Government should be credited with the savings on the Indian Troop Service which accrued owing to the stoppage of ordinary reliefs entails an excess charge of £542,000, including arrears for the year 1914-15. The payments to the War Office on account of non-effective charges of British forces for service in India have been raised by £214,400, a figure which takes into account the smaller recovery from the War Office for non-effective war charges in India referred to in the preceding paragraph. Apart from aviation stores on which an outlay of £60,000 has been incurred, the store demands from India are lower than the Budget provision by £38,000, and the retired pay charges of officers of the Indian service fall below the Budget by £55,000, while the miscellaneous pension payments have risen by £29,000 in consequence of the war.

Receipts—India and Home.

202. The receipts during 1915-16 are expected to be R29·89 lakhs (£199,300) lower than the Budget in India and £17,600 better at Home. The worseness in India is mainly due to the fall in receipts, owing to the absence of troops from India, being greater than was anticipated; the decrease mainly occurs in sales of clothing stores, unserviceable and obsolete ordnance stores, and dairy produce.

Net Expenditure.

203. The net Army expenditure during the current year—Home and India—is thus expected to exceed the Budget provision of £18,898,600 by £2,058,200.

Special Expenditure.

204. The Special or Schedule provision was strictly limited, and a total sum of R17·53 lakhs (£116,900) only was allotted for expenditure falling to the Army head. The probable expenditure is now estimated at £97,500. Certain lapses have occurred and, on the other hand, fresh expenditure of an

absolutely urgent nature has been incurred. The supply to a small extent of certain equipment from Home has been postponed to a future year.

Budget, 1916-17 compared with Revised, 1915-16 Expenditure—India.

205. The allotment to meet Army expenditure in India in the ensuing year amounts to R26,84·47 lakhs (£17,896,500), which exceeds the Revised estimate of the current year by R1,41·26 lakhs (£941,800). It has been considered advisable to provide a reserve to meet unforeseen expenditure; but for this factor, the excess would have been only R62·81 lakhs (£418,800). Provision for ordnance factory stores from Home has been made in the Indian estimates instead of in the Home estimates, to the extent of R31·37 lakhs (£209,100), against R3·50 lakhs (£23,300) in the Revised for 1915-16, and the Secretary of State will pass the charges out for adjustment in this country. For mechanical transport companies the number of which is being increased in the ensuing year, additional funds to the extent of Rs 23·74 lakhs (£158,300) have been allotted; and Rs. 4·53 lakhs (£30,200) more have been provided for the Royal Flying Corps. A sum of Rs. 9·5 lakhs (£63,300) has been included for an ambulance convoy and Rs. 6 lakhs (£40,000) for an acetone factory. A larger provision to the extent of R15 lakhs (£100,000) has been made for war non-effective payments in India to correspond with the amount taken into account in the Home estimates as recoverable from the Imperial Government. On the other hand, the provision for special services, *e.g.*, port defences, etc., is R22·94 lakhs (£153,000) less than the expenditure anticipated in 1915-16. The foregoing causes, apart from the reserve, account for a net increase of R63·70 lakhs (£424,600).

Some of the minor variations are as follows:—Railway charges and travelling allowances indicate an increase of R5·01 lakhs (£33,400); and provision has been made for the full annual training grant, of which R2 lakhs (£13,300) lapsed in the current year. Certain abnormal pensionary charges in 1915-16 result in the allotment for next year being R4·5 lakhs (£30,000) lower, and a special credit of R2 lakhs (£13,300) to the Imperial Government in 1915-16 for stores returned from Hong Kong accounts for a corresponding decrease in 1916-17. A smaller provision has been made for clothing supplies and for purchase of animals by the Remount Department, but these decreases are more or less counterbalanced by increases, *e.g.*, in connection with dairy farms, extra ammunition for machine gun section training and bayonet fighting equipment.

Home.

206. The Home estimates for 1916-17 amount to £4,182,600, or a decrease of £712,900 as compared with the anticipated expenditure in the current year. This decrease is largely due to the exceptional cause mentioned in the preceding paragraph, namely the inclusion in the Indian estimate of provision for ordnance factory stores from Home. The payments to the War Office on account of savings in sea transport charges will be £270,000 less than in 1915-16 in which year the arrears of 1914-15 were also paid. The recovery from the War Office of war pensionary payments in India is expected to be more next year by £100,000, and the payments to the War Office for non-effective charges of British forces will be reduced by a like sum. No provision has been made in 1916-17 for aviation stores, on which an outlay of £60,000 has been incurred in 1915-16. These four causes account for a decrease of £663,000. The balance of £49,900 is accounted for chiefly by absence of provision (*a*) for payments to the Admiralty in connection with the gun-running operations in the Persian Gulf and, (*b*) for Aden re-inforcements; and by lower provision for pensionary charges of officers of the Indian Service.

Receipts. India and

207. A sum of R1,35·50 lakhs (£903,400) has been estimated as the probable receipts in 1916-17—an increase of £10,000 over the current year. This figure is made up of an increase of £41,600 in India and a decrease of £31,600 at Home.

Net Expe

208. The estimated net Army expenditure for 1916-17 thus amounts to £21,175,700, or £218,900 more than the Revised estimate of the current year. This is made up of an increase of £900,200 in India and of a decrease of £681,300 at Home.

Budget, 19 compared Budget, 19 India and

209. The gross Army expenditure for the coming year, as compared with the Budget estimate for 1915-16, shows an increase in gross expenditure of R3,15·80 lakhs (£2,105,400). The receipts show a falling off of R25·76 lakhs (£171,700) and the net expenditure is thus expected to exceed by

£2,277,100 the estimates of the current year as framed in March last. Apart from the reserve of £523,000 to meet unforeseen expenditure, extra provision to the extent of £446,400 has been made for various measures of internal defence necessitated by the war. The decision that Indian revenues should bear the normal cost of the regular garrison of India—British and Indian—accounts for an increase of £586,700, including extra food charges, while the further decision that the War Office should be credited with the savings in sea transport charges adds £272,000 to next year's estimates. A sum of R41·10 lakhs (£274,000) has been provided to meet outlay on mechanical transport companies and the Royal Flying Corps. The foregoing factors broadly account for the increase in expenditure next year; there are various other causes which largely counterbalance each other.

The worseness in receipts is attributable to war conditions and to the fact that the estimate for 1915-16 did not fully allow for the fall in receipts which resulted from the absence of troops from India.

rial penditure.

210. Only urgent and absolutely necessary measures are being provided for in the Schedule for 1916-17. The total amount allotted for the Army head is R13·19 lakhs (£88,000), of which £13,600 is for expenditure in India and £74,400 at Home. The latter figure represents liabilities of previous years, to the extent of £73,500, carried forward by the Secretary of State. The Indian figure includes the usual provision of £6,700 as an addition to the ordinary grant for the training of troops, and £5,800 for the extension and improvement of dairy farms.

XXXIII and 46-A.—MARINE.

ised, 1915-16, pared with dget, 1915-16.

211. The total expenditure (India and Home) in 1915-16 falls short of the Budget by £131,300, and there is an increase in receipts to the extent of £125,500; the net expenditure is thus £256,800 less than the Budget.

penditure, ipts and Net penditure. ia and Home.

212. The decrease in Indian expenditure is due chiefly to smaller purchases of coal on account of heavier issues from stock. Smaller outlay on Schedule measures, owing to delay in the construction of the new station ship for Rangoon, the dredger for the Bombay Dockyard and the despatch vessel required for duty in the Persian Gulf, partly counterbalanced by larger expenditure on miscellaneous stores demanded from India, accounts for the lower Home expenditure. The increase in receipts in India is mainly due to recoveries on account of dockyard services and supplies in connection with the fitting up of transports and on account of hire of Royal Indian Marine vessels, which were not taken into account in the Budget.

213. Out of £188,600 provided in the Budget for the new vessels mentioned above, a sum of £148,900 has lapsed and been carried forward to 1916-17. *Special Expenditure.*

214. The Budget for 1916-17, as compared with the Revised of 1915-16, shows an increase of £188,500 in expenditure, made up of £160,200 at Home and £28,300 in India. The former is mainly accounted for by larger provision for the construction of the three new vessels referred to above and for miscellaneous stores required to replenish stocks. The increase in India is chiefly due to provision for payments to the Admiralty on account of coal to be supplied to the Royal Navy subsidized vessels and to Royal Indian Marine vessels in the Persian Gulf, for additional expenditure on construction and repairs to Royal Indian Marine vessels, and for larger purchases of stores to replace issues from stock. The receipts in India are lower by £11,200, since smaller recoveries are anticipated on account of imported stores. *Budget, 1916-17 compared with Revised, 1915-16 India and Home*

215. An allotment of £148,900 has been made in 1916-17 for the completion of the three vessels referred to above. *Special Expenditure.*

ised, 1915-16, pared with dget, 1915-16, ia and Home dinary penditure.

216. Under this head the Ordinary expenditure and the expenditure on Military Works Schedule (Special Demands) measures are separately compiled in the ordinary course of accounting. Under Ordinary expenditure, the Revised anticipates an excess of £22,400, which is mainly due to expenditure connected with aviation units on the North-West Frontier R1·00 lakh (£6,700), and the provision of accommodation for the reception of Indian sick and wounded returning from the Indian Expeditionary Forces R1·20 lakhs (£8,000); and to the transfer of funds from other heads R·50 lakh (£3,300).

eipts.

217. The Military Works receipts represent the rents derived from military quarters and mess houses, recoveries for water supply and electrical power, the sale proceeds of stores, and the rental and repair recoveries from silladar cavalry units whose lines have been taken over by the Military Works Services. The increase is mainly due to additional recoveries, amounting to R1·10 lakhs (£7,300), realized by the sale of "The Terrace" at Murree, and compensation for the buildings, etc., comprising the Chilkulgudiam Indian infantry lines, which have been handed over to the Nizam's Government.

cial Demands, nditure.

218. Under Special Demands an increase of R9·53 lakhs (£63,500) is expected over the budget allotment of R24·65 lakhs (£164,300). This is mainly due to additional expenditure sanctioned during the year on the improvement of frontier roads, R4·60 lakhs (£30,700); additional accommodation for Ordnance subordinates at Ishapore, R·84 lakh (£5,600); and the construction of a subsidiary reservoir and settling tanks for additional storage of water at the Cordite Factory, Aruvankadu, R1·41 lakhs (£9,400).

t Expenditure. al.

219. On Military Works expenditure as a whole, a net increase of £76,900 is expected.

dget, 1916-17, pared with dget, 1915-16. lia and Home. dinary penditure.

220. The Ordinary Military Works grant for 1916-17 has been fixed at R92·00 lakhs (£613,300), as compared with R87·00 lakhs (£580,000) in the current year. The allotment for the latter year was restricted to a minimum but there are certain urgent works which cannot be longer postponed, and consequently the grant for 1916-17 has been raised by R5 lakhs to provide for such as have become obligatory. In addition, a sum of R6 lakhs has been included to meet the expenditure on works in connection with aviation units.

ceipts.

221. The increase of R·45 lakh (£3,000) in receipts anticipates an improvement in the rental recoveries with reference to past actuals.

cial Demands, penditure.

222. The allotment made for Special Demands amounts to R30·74 lakhs (£204,900), or R6·09 lakhs (£40,600) more than the Budget figure for 1915-16. Existing conditions have again rendered it necessary to confine expenditure to urgent works in progress. The main allotments are R10 lakhs for works in the new cantonment at Delhi; R6·34 lakhs for the reconstruction of lines of Indian troops, R4 lakhs on improvement of frontier roads, and R1 lakh for volunteer armouries, etc.

t Expenditure. al.

223. The total net expenditure of R1,16·74 lakhs (£778,300) in 1916-17 is more than the Budget provision of 1915-16 by R16·64 lakh (111,000).

47A.—SPECIAL DEFENCES.

Expenditure.	Accounts, 1912-1913.	Accounts, 1913-1914.	Accounts, 1914-1915.	1915-1916. Budget.	1915-1916. Revised.	1916-1917, Budget.

Total Receipts .	£	1,387,634	1,369,652	1,374,688	1,220,300	1,173,100	1,165,900
NET EXPENDITURE	£	19,565,466	19,896,113	20,434,714	20,169,200	22,042,700	22,500,000

226. The total net military expenditure in the current year is anticipated to exceed the estimates prepared last March by £1,873,500. Two decisions which were arrived at during the currency of the year, firstly, that India should pay to the War Office the savings in sea transport charges resulting from the cessation of ordinary reliefs and, secondly, that India should bear the normal cost of the ordinary garrison—British and Indian—account for an increase of £1,129,000. A sum of £614,000 is also expected to be spent, over and above the Budget provision of £357,000, for various measures arising from war conditions, *e.g.*, port defences, protection of the North-West Frontier, etc. It has also been necessary to embark on fresh expenditure to the extent of £152,000 in connection with the organisation of aviation units and mechanical transport companies.

227. The Budget estimate for the ensuing year has been fixed at £22½ millions net, on the assumption that war conditions will continue throughout that period. The strictest economy has been observed and, beyond the ordinary maintenance charges, only absolutely necessary measures have been provided for. In view, however, of the ever changing military situation and the possible demands which may be made upon the Army in India, a margin of about half a million sterling has been included for expenditure which cannot at present be accurately foreseen.

(*ii*) For Education . . .	3,81,70,000	8,000	11,87,000	1,51,000	2,37,000	1,74,000
(*iii*) For Sanitation . . .	1,50,00,000	1,00,000	5,70,000	...	2,30,000	...
(*iv*) For medical relief, agriculture and allied objects . .	...	25,35,000	...	...	...	...
(*v*) For public works expenditure and discretionary outlay .	1,50,00,000	...	15,00,000	...	...	...
(*vi*) Other items . . .	14,44,000	53,00,000	39,09,000	27,89,000	32,97,000	23,02,000
Total Transfers .	8,10,59,000	3,80,46,000	3,72,25,000	3,42,77,000	3,59,78,000	2,70,87,000

(*a*) *Recurring assignments excluding special grants for Education and Sanitation.*

228. The increases of (*a*) R1·98 lakhs in the Revised estimate over the Budget of the current year and (*b*) R·87 lakh in the Budget for 1916-17 over the Revised for 1915-16 are made up as follows :—

	Lakhs of rupees. 1915-16.	1916-17.
(1) Increase in assignment to Bihar and Orissa in connection with the new High Court at Bankipur .	2·70	3·10
(2) Reduction in assignment to Bengal in consequence of saving in expenditure which will result from the establishment of a High Court at Bankipur . .	...	—2·00
(3) Minor adjustments of a recurring nature . .	—·72	—·23
	1·98	·87

The annual assignment payable to Bihar and Orissa in connection with the High Court at Bankipur is estimated at R5·80 lakhs.

(b) Recurring assignments from Provincial to Imperial in connection with the new scheme of taxation.

229. The reason for the recovery of contributions aggregating R63·25 lakhs from the several Provincial Governments in connection with the financial arrangements for 1916-17 is that the increased taxation credited to "divided" heads has to be wholly appropriated to Imperial revenues. The distribution of the total sum is given below :—

	Lakhs of R
Madras	6·43
Bombay	18·40
Bengal	20·90
United Provinces	4·80
Punjab	2·80
Burma	6·37
Bihar and Orissa	2·40
Central Provinces	1·15
Assam	50
Total	63·25

(c) Special recurring grants for Education.

230. The unimportant variation between the Budget and the Revised estimates for the current year is due to the allotment of a small sum for recurring outlay on specific items of Provincial expenditure, from the undistributed balance of the recurring appropriation of R124 lakhs made from Imperial revenues in recent years for the improvement of education (see paragraph 100).

(d) Assignments in connection with the scheme for the incidence of Famine Relief expenditure.

231. The variation in the amount of assignments for the famine insurance of Provincial Governments provided in the Revised estimate for 1915-16 and the Budget for 1916-17 arises from the circumstances mentioned below. Under the scheme for the incidence of famine relief expenditure introduced in 1907, the details of which were explained in paragraphs 48 to 57 of the Financial Statement for 1907-08, certain annual assignments are made to Provincial Governments, and the latter use the funds so placed at their disposal to build up a reserve of credit with the Imperial Government which can be utilised when necessary to meet famine relief expenditure. To avoid the possible accumulation of an unnecessarily high credit, it was decided (1) to fix a maximum limit to the reserve of each province, and (2) when that limit was reached in any province, to discontinue the annual assignment until the credit had been reduced by expenditure on famine relief. The limit for Bombay was fixed at R80 lakhs; and it is estimated that this figure will be reached in 1916-17 with an assignment of R3·48 lakhs, which is R10·22 lakhs less than the normal assignment for the province. The maximum limit has already been reached in the Central Provinces and no further assignment is now made to it in this connection.

(e) Non-recurring grants under the terms of the Provincial Settlements.

232. The non-recurring grants to be made in the two years under the terms of the settlements represent contributions to the Punjab to bring its net Irrigation revenue up to the amount guaranteed in its provincial settlement.

(*f*) *Non-recurring assignments for Education.*

233. The following contributions will be paid for Provincial expenditure from the undistributed balance of the recurring appropriation of ₹124 lakhs made from Imperial revenues in recent years for educational expenditure :—

	Lakhs of rupees. 1915-16.	1916-17.
(1) Additional grant to the Dacca University	1·00	1·00
(2) Contribution in aid of research work by Dr. J. C. Bose	·40	·32
(3) Grant to the Hindu University for acquisition of land	·50	...
(4) Grant to the Islamia College, Lahore, for the equipment and maintenance of science laboratories	·30	·30
(5) Other petty items	·17	·12
Total	2·37	1·74

(*g*) *Non-recurring grants for Sanitation.*

234. The following allotments have been sanctioned during the current year from the undistributed balance of the special recurring appropriation of ₹51 lakhs made from Imperial revenues in recent years for the improvement of sanitation :—

	Lakhs of rupees.
(1) To the United Provinces, for sani ry improvement of Lucknow	1·20
(2) To the United Provinces, for sanitary improvement of the pilgrim route to Badrinath and edarnath	1·00
Total	2·20

(*h*) *Miscellaneous non-recurring grants.*

235. The following are the details of the miscellaneous non-recurring grants which will be given in the two years :—

	Lakhs of rupees. 15-16.	1916-17.
(1) Contribution to meet provincial expenditure in Burma and Assam in connection with the North-East Frontier	18·49	24·14
(2) Assignment to Bihar and Orissa in respect of cost of High Court buildings at Bankipur	15·00	...
(3) Grant to the United Provinces for tank restoration works, out of the special provision made in the Imperial Budget under Minor Irrigation Works for the improvement of irrigation	1·15	...
(4) Yearly instalments of the contribution to the Calcutta Improvement Trust for a period of 60 years	1·50	1·50
(5) Grant for five years to the Chittagong Port in aid of dredging and revetment operations	·75	·75
(6) Miscellaneous adjustments, representing mainly refund of expenditure undertaken on behalf of the Imperial Government or of Provincial revenue erroneously credited as Imperial	—3·92	—3·37
Total	32·97	23·02

CAPITAL EXPENDITURE ON RAILWAYS AND IRRIGATION AND OTHER WORKS NOT CHARGED TO REVENUE.

RAILWAY CONSTRUCTION.

236. In the Budget for 1915-16, a sum of R12 crores was allotted for expenditure on railway construction for which the Government of India undertake financial responsibility. During the course of the year the Secretary of State withdrew R35 lakhs which represented the provision for certain new lines, thus reducing the budget grant to R11,65 lakhs. The expenditure of the year is now estimated at R731·51 lakhs or R468·49 lakhs less than the original grant, the lapse being due partly to non-supply of English material owing to congestion in the workshops at home, and partly to restriction of all but necessary expenditure both at home and in India. For 1916-17 a grant of 450 lakhs has been provided, of which R151·96 lakhs is for rolling stock. *Revised, 1915-16.* *Budget, 1916-17.*

237. The distribution of the total expenditure on Railway Construction between State and Companies' agency in each of the three years from 1914-15 to 1916-17 is as follows:—

		1914-1915. Accounts.	1915-1916. Budget.	1915-1916. Revised.	1916-1917. Budget.
1. Outlay on State Lines:					
(*a*) India	R	12,12,86,978	9,28,13,000	5,79,58,000	3,06,53,000
	£	8,085,799	6,187,500	3,863,800	2,043,500
(*b*) England	£	2,424,059	1,450,200	929,400	758,400
TOTAL	£	10,509,858	7,637,700	4,793,200	2,801,900
2 Outlay of Companies:					
(*a*) India	R	—88,51,716	—1,27,22,000	—89,81,000	—31,82,000
	£	—590,114	—848,100	—598,700	—212,100
(*b*) England	£	1,513,292	1,210,400	682,200	410,200
TOTAL	£	923,178	362,300	83,500	198,100
Total of Programme	£	11,433,036	8,000,000	4,876,700	3,000,000

The following outlay in England on account of purchased lines worked by companies is included in the Indian figures under outlay on State lines:—

4,567,398	3,031,300	2,097,500	1,252,600

238. The details of the Budget grant for 1916-17 are shown below :—

The bulk of the restricted programme grant for 1916-17 will be devoted to the improvement of open lines of railway.

239. The figures in the table in paragraph 237 do not include the expenditure on Protective Railways met from the Famine Insurance grant, nor that on Branch Line Companies. Including this outlay and also some small expenditure from Provincial revenues the total expected outlay on railway construction in the three years ending 1916-17 is as follows :—

	Accounts, 1914-15.	Revised Estimate, 1915-16.	Budget Estimate, 1916-17.
	R	R	R
Total as in table on page 109 . . .	17,14,95,532	7,31,51,000	4,50,00,000
Famine Protective lines	—19,669	—5,000	—10,000
Branch lines	62,86,131	1,18,09,000	1,12,96 000
Provincial State lines	6,887	22,000	26,000
Grand Total in Rupees .	17,77,68,881	8,49,77,000	5,63,12,000
Grand Total in sterling at R15 to the £ .	11,851,259	5,665,100	3,754,100

CONSTRUCTION OF PRODUCTIVE IRRIGATION WORKS.

240. The figures are—

	Accounts, 1914-15.	Budget, 1915-16.	Revised, 1915-16.	Budget, 1916-17.
Total in Rupees . . .	1,68,47,703	1,65,00,000	1,33,80,000	1,35,00,000
Equivalent in Sterling . .	1,123,180	1,100,000	892,000	900,000

evised, 1915-16.

241. The expenditure in 1915-16 is expected to fall short of the Budget grant by R31·20 lakhs. There will be a lapse of about R17 lakhs in the allotments for works in operation, mainly on canals in the Punjab and on the permanent head works of the Ganges Canal, owing to a curtailment of programme in consequence of the financial situation and other causes. There will also be a saving of about R4 lakhs in the grants for works under construction, due chiefly to a slower progress on the Toludur project in Madras and the non-utilisation of the allotment for the Seharwah project in Bombay which has not yet been sanctioned; and the whole of the reserve of R10·53 lakhs will lapse.

udget, 1916-17.

242. The Budget grant for 1916-17 has been fixed at R1,35 lakhs, *i.e.*, the amount of the probable expenditure in 1915-16, with reference to the financial situation and after due consideration of the requirements of the various canals under construction most of which are now nearing completion. The following statement shows the distribution of the expenditure in 1915-16 and the grant for 1916-17 :—

Name of Project.	Expenditure in 1915-16.	Expenditure in 1916-17.
	R	R
Works in operation—		
Godavari Delta System	1,35,000	1,42,000
Kistna „ „	79,000	13,000
Kurnool-Cuddapah Canal	86,000	79,000
Cauvery Delta System	73,000	45,000
Eastern Narâ Works	1,05,000	2,22,000
Jamrao Canal	1,25,000	2,37,000
Ganges Canal, including Mat and Hathras branches and permanent headworks . .	7,33,000	8,79,000
Agra Canal	59,000	45,000
Upper Bari Doab „	2,76,000	1,50,000
Sirhind Canal	1,07,000	1,70,000
Lower Chenab Canal	1,04,000	2,00,000
Lower Jhelum „	50,000	3,00,000
Indus Inundation Canals	1,60,000	—5,000
Upper Chenab Canal	13,48,000	28,20,000
Lower Bari Doab Canal	10,38,000	7,80,000
Upper Swat River Canal	13,98,000	10,30,000
Mandalay Canal	73,000	6,000
Mon Canals	1,05,000	21,000
Asola Mendha Tank works	67,000	62,000
Other Projects	3,38,000	2,75,000
Works under construction—		
Toludur Project	2,85,000	7,52,000
Gorai Canal	2,74,000	3,16,000
Upper Jhelum Canal	21,80,000	10,29,000
Ye-u Canal	5,44,000	7,01,000
Twante Canal	7,84,000	8,93,000
Mahanadi „	18,63,000	13,01,000
Wainganga Canal	9,93,000	5,57,000
Reserve	...	10,00,000
TOTAL R .	1,33,80,000	1,35,00,000
Equivalent in Sterling £ .	892,000	900,000

Of the total grant of ₹1,35 lakhs, about ₹55 lakhs will be allotted to canals under construction; about ₹70 lakhs will be devoted to the completion and development of canals in operation; and ₹10 lakhs will be held in reserve to meet unforeseen requirements.

243. The figures mentioned above do not include the expenditure on Protective Irrigation Works, whether financed from the Famine Insurance grant or from ordinary revenues outside that grant. Including this outlay, and also some small expenditure on works which were originally classed as productive but have since ceased to belong to that class, the total expected outlay on the construction of irrigation works in the three years ending 1916-17 is as follows :—

	Accounts, 1914-15.	Revised Estimate, 1915-16.	Budget Estimate, 1916-17.
	₹	₹	₹
Outlay on Productive Irrigation Works . .	1,68,47,695	1,33,80,000	1,35,00,000
Outlay on Protective Irrigation Works met from Famine Insurance grant.	73,30,560	72,92,000	62,34,000
Outlay on Protective Irrigation Works outside the Famine Insurance grant.	8,97,948	3,25,000	...
Other outlay from ordinary revenues . .	1,40,035	2,26,000	52,000
Total ₹ .	2,52,16,238	2,12,23,000	1,97,86,000
Equivalent in Sterling £	1,681,082	1,414,900	1,319,100

INITIAL OUTLAY ON THE NEW CAPITAL AT DELHI.

244. The figures are :—

	Accounts, 1914-15.	Budget, 1915-16.	Revised, 1915-16.	Budget, 1916-17.
Total in Rupees . . .	54,05,418	40,00,000	50,00,000	40,00,000
Equivalent in sterling . . . £	360,361	266,700	333,300	266,700

Revised, 1915-16.

245. The expenditure in the current year will exceed the Budget grant owing largely to existing commitments, and it is now expected to amount to R50 lakhs made up as follows :—

[Lakhs of Rupees.]

(*i*) Works Expenditure	48·06
(*ii*) Acquisition of land	—·53
(*iii*) Establishment and miscellaneous charges . . .	7·47
TOTAL . . .	50·00

Of the works expenditure, about R10 lakhs are being spent on the preparation of sites, the laying out of service roads, the provision of a temporary supply of water and of electric power, and other preliminary work; R8 lakhs on the purchase of tools, and plant and other stores; and R23 lakhs on work on the Government House and the Secretariat, and the construction of certain residential buildings and roads.

Budget, 1916-17.

246. The provisional distribution of the Budget estimate of R40 lakhs is given below :—

[Lakhs of Rupees.]

(*i*) Works expenditure	31·12
(*ii*) Establishment charges and other miscellaneous expenditure .	8·88
	40 00

Of the grant of R31·12 lakhs for works outlay, about one-fourth will be required for the preparation of sites and other preliminary work and for the further purchase of tools, plant, and other stores. The balance will be applied mainly to the construction of roads and buildings, work on which has already been commenced.

WAYS AND MEANS.

HOME TREASURY.

Introductory.

247. The bulk of the payments made in England on account of the Government of India consist of expenditure chargeable to the Indian revenues; and if such payments represented the only transactions, the Ways and Means programme would be a simple arrangement, as the whole of the expenditure would ordinarily be met by remittance of funds from India. The capital outlay on the construction of railways and irrigation works, however, necessitates heavy borrowing; and when practicable, a large portion of the money required is raised in England, either direct or through the agency of Companies. A further complication is introduced by the practice under which all payments made in England to Railway Companies working purchased lines, for purchase of stores and other capital purposes, as well as all moneys raised by them and paid into the Home treasury, are brought to account under the appropriate heads in this country and are treated in the Home accounts and estimates as remittances to or from India, respectively. Operations connected with the Gold Standard Reserve, and with the replacement of one particular form or item of direct or indirect debt by another, also largely swell the receipts and charges of the Home Treasury without affecting ordinarily the general Ways and Means programme.

248. The items mentioned in the preceding paragraph constitute the bulk of the transactions of the Home treasury in normal years. The conditions created by the war have led to certain abnormal transactions which have considerably affected the Ways and Means position in 1915-16 and will continue to affect it in 1916-17. Large sums are being received in England (1) from the Imperial Government and the Government of Australia in repayment of expenditure incurred on their behalf in India; and (2) by the sale of wheat purchased from Government funds in India. These indirect remittances from India have largely increased the resources of the Home treasury and reduced the need for direct remittances by Councils to finance its requirements.

249. The following are the details of the transactions appearing in the Budget and Revised estimates of the Home treasury for 1915-16 and in the Budget estimate of 1916-17.

	Budget, 1915-16.	Revised, 1915-16.	Budget, 1916-17.

* The heads marked with an asterisk appear on both the receipt and payment sides. As the receipt and disbursement under each of them are generally equal, they do not affect the Ways and Means of the year to any material

Revised, 1915-16.

250. The table in paragraph 249 shows that there will be a net receipt of £2,501,300 in the Home treasury in 1915-16 and that its balances at the end of the year will amount to about £14½ millions. These figures do not, however, represent the true position in respect of the transactions and balance of the treasury proper. To meet possible demands for payments of Reverse Councils in England, £7,779,100 of the funds of the Gold Standard Reserve has been temporarily paid into the Home treasury and is being let out on short loans to banks instead of being invested in securities. Eliminating this special receipt, the transactions of the Home treasury in 1915-16 are expected to result in a net disbursement of £5,277,800 of which £4,061,000 will be financed from Council Bills drawn against treasury balances in India, and £1,216,800 will be met by a reduction of the cash balances of the Home treasury proper. Allowing for the fact that the net disbursement of £10,703,100 in the Budget estimate for 1915-16 included a small net payment of £4,000 to the Gold Standard Reserve, the Revised estimate shows an improvement of £5,421,300 over the Budget, apart from the transactions connected with the Gold Standard Reserve. This improvement is the net result of the following variations from Budget anticipations :—

	£
(1) Larger recoveries from the War Office in respect of expenditure incurred in India on its behalf . .	6,122,000
(2) Net receipts in England under the "Wheat Scheme" .	3,044,400
(3) Receipt of gold from India . . .	2,000,000
(4) Savings in total grants for capital expenditure on railways, irrigation works and Delhi (inclusive of the net outlay of the various companies) . . .	2,056,800
(5) Increase in net receipts in connection with miscellaneous deposit and remittance transactions . . .	1,056,700
Total increase in receipts or reduction in outgoings	14,279,900
(6) Payment from treasury balances of Reverse Councils .	4,668,000
(7) Decrease in net receipts of capital from railway companies	3,415,600
(8) Increase in net expenditure chargeable to revenue .	775,000
Total decrease in receipts or increase in outgoings .	8,858,600
NET IMPROVEMENT .	5,421,300

251. The principal items working up to the increase of £1,056,700 in the net receipts from miscellaneous deposit and remittance transactions, shown in the table in the preceding paragraph, are: (*i*) recoveries aggregating £1,250,000 from public departments in England other than the War Office on account of expenditure incurred on their behalf in India in connection with the war; (*ii*) receipts amounting to £392,200 in connection with the employment of enemy ships, inclusive of sums received in England on account of vessels under the control of authorities in India; (*iii*) a receipt of £100,000 from the Egyptian Government in repayment of funds supplied to it from India; and (*iv*) a higher payment of £531,700 on account of family allotments and remittances of troops on the Indian establishment including those serving with the Indian Expeditionary Forces, and of £92,100 on account of certain advances. There will also be a net rise of £74,700 in the recoveries from various public departments in England of miscellaneous payments made on their behalf in India; but this will be more than counterbalanced by an increase in the expenditure incurred in England on account of Provincial Governments, local bodies, etc., which is recovered from them in India.

252. The total drawings of Council bills on India in 1915-16 are expected to amount to £20,061,000. Of this sum, £4,061,000 will be utilised, as already stated, to meet the disbursements of the Home treasury; while £7,533,000 will be appropriated as a remittance of the Gold Standard Reserve, and £8,467,000 as a remittance of the Paper Currency Reserve. The drawings of Reverse Councils in India on London during the year amounted to £4,893,000. Of these, £225,000 was paid from the funds of the Gold Standard Reserve; and £4,668,000 was paid from the Home treasury, in view of the considerable improvement in its balances particularly with reference to the wheat transactions, and the need for strengthening the treasury balances in India.

The cash balance of the Home treasury at the end of 1915-16, exclusive of the sum held on account of the Gold Standard Reserve, is now estimated at about £6·7 million against a Budget forecast of £4 million.

253. The details of the transactions in respect of capital raised and deposited by Railway Companies are as follows :— *1915-16 Capital raised and deposited by Railway Companies.*

Receipts.	Budget, 1915-16. £	Revised, 1915-16. £
(a) *Subscribed Capital*—		
To discharge Debentures—		
Assam-Bengal Railway	650,000	...
Bengal-Nagpur Railway	1,239,600	...
Rohilkhund and Kumaon Railway	107,000	...
	1,996,600	...
(b) *Miscellaneous*—		
Transfer fees, etc.	2,400	9,500
Total Receipts	1,999,000	9,500
Issues.	£	£
For discharge of Debentures	1,996,600	375,200
For Capital outlay, *i.e.*, Stores, Establishment Charges, etc.	1,212,800	691,700
Total	3,209,400	1,066,900

The Budget estimate provided for the renewal or replacement by fresh capital of £1,996,600 debentures of the Assam-Bengal, Bengal-Nagpur, and Rohilkhund and Kumaon Railway Companies. Debentures to the value of £1,621,400 only have been renewed; and the remaining £375,200 has been discharged from funds supplied by the Secretary of State.

254. The following are the details of the Railway remittance transactions. As already explained, they occur almost wholly in connection with the capital account of the purchased lines worked by companies :— *1915-16. Railway remittances.*

Receipts.	Budget, 1915-16. £	Revised, 1915-16. £
Debenture Capital—		
East Indian Railway	3,500,000	3,459,600
Great Indian Peninsula Railway	3,000,000	...
South Indian Railway	510,000	...
Miscellaneous—		
Transfer fees, etc.	6,500	28,300
Total	7,016,500	3,487,900
Issues.		
Advances for purchase of stores—		
East Indian Railway	752,300	524,200
South Indian Railway	372,800	308,500
Bengal and North-Western Railway	47,700	14,700
Great Indian Peninsula Railway	1,415,300	158,100
Bombay, Baroda and Central India Railway (including Rajputana-Malwa Railway)	449,700	320,300
Total	3,037,800	2,125,800
Discharge of Debentures—		
South Indian Railway	510,000	...
Miscellaneous payments—		
East Indian Railway: rental paid to South Behar Railway Company	30,000	30,000
Rohilkhund and Kumaon Railway: Interest on Debenture Stock allocated to State works	17,300	17,800
Total Issues	3,595,100	2,173,600

255. The Budget estimate for 1915-16 provided for (1) the issue of new capital of £3·5 million by the East Indian Railway Company, and of £3 million by the Great Indian Peninsula Railway Company, and (2) the replacement by fresh capital of £510,000 debentures of the South Indian Railway Company which would mature during the year. New 4½ per cent. debenture stock of the face value of £3½ million has been issued by the East Indian Railway Company producing the amount shown above; and the debentures of the South Indian Railway Company have been renewed. The Great Indian Peninsula Railway Company was not asked to raise any fresh capital during the year.

Loans, 1915-16.

256. In accordance with the Budget programme, £500,000 India bonds and £407,500 Indian Midland Railway debentures have been discharged; and £7 million India bills which matured during the year have been replaced by fresh issues, *viz.*:—

(1) £3½ million in September with a currency of 12 months at an average rate of £94-17-0·44;

(2) £3½ million in November with a currency of 12 months at an average rate of £94-12-11·87.

1916-17. The Budget Estimate.

257. The Budget estimate provides for a net disbursement of £3,977,500. The deterioration of £6,478,800 as compared with the net receipt of £2,501,300 in the current year's Revised is the net result of the following variations:—

Worse.

	£
Temporary Debt renewed, *less*	1,500,000
Receipts on account of the Gold Standard Reserve (net), *less*	6,021,600
Receipts in connection with purchase and sale of wheat (net), *less*	3,044,400
Net payments to Railway Companies, *more*	1,968,300
Gold received from India, *less*	2,000,000
Outlay on new Capital at Delhi, *more*	38,300

Better.

	£
Net expenditure on Revenue account, *less*	472,700
Permanent Debt discharged, *less*	407,500
Receipt from the War Office in respect of recoverable outlay incurred in India in connection with the war, *more*	2,464,000
Outlay on State Railways, *less*	171,000
Deposits, Advances and Miscellaneous Remittance transactions, *net*	892,700
Outlay on Irrigation Works, *less*	17,900
Reverse Bills, *less*	4,668,000

258. The details working up to the increase of £1,968,300 in the net payments to Railway Companies shown in the preceding paragraph are given below:—

	Revised, 1915-16.	Budget, 1916-17.
RECEIPTS—	£	£
Capital deposits by Railway Companies—		
For capital outlay	9,500	2,000
For discharge of debentures	...	2,930,400
Remittance account between England and India—		
Railway transactions	3,487,900	506,500
Total receipts	3,497,400	3,438,900
DISBURSEMENTS—		
Capital expenditure not charged to Revenue—		
Outlay of Railway Companies	691,700	412,300
Payments for discharge of debentures	375,300	2,930,400
Remittance account between England and India—		
Railway transactions	2,178,600	1,807,700
Total disbursements	3,240,500	5,150,300
NET DISBURSEMENTS	−256,900	1,711,400
Increase	1,968,300	

259. The reduction in the net receipts on account of the Gold Standard Reserve in 1916-17, as compared with 1915-16, arises from variations in the amount of funds of the Reserve held in the balances of the Home treasury at the beginning and at the end of each of the two years. The amount so held stood at £8,300 on the 1st April 1915, and is expected to stand at £7,787,400 at the end of the current year and at £9,044,900 at the end of 1916-17. Full details of the transactions of the Reserve in the two years are given in paragraph 263.

260 The improvement of £392,700 under Deposits, Advances and Miscellaneous Remittance transactions mentioned in paragraph 257 is the net result of the following principal causes of variation: (1) higher recoveries from public departments in England other than the War Office on account of expenditure incurred on their behalf in India in connection with the war (2) a decrease in the net receipts in connection with enemy vessels; and (3) smaller payments of family allotments of troops.

Loans, 1916-17.

261. Provision has been made in the Budget for the discharge of £500,000 India Bonds and of £1,500,000 India Bills which will mature during the year, and for the replacement of the remaining £5,500,000 India Bills.

262. Of the net disbursement of £3,977,500 in 1916-17, it is proposed to meet £3,885,000 by Council Bills, and £92,500 by drawing on the cash balances of the Home Treasury which are estimated to stand at the end of 1916-17 at £14,383,000 inclusive of £9,044,900 held on behalf of the Gold Standard Reserve.

1915-16 and 1916-17.

263. The following are the details of the transactions of the Gold Standard Reserve in England:—

Permanent Debt discharged .	907,500	907,500	500,000
Temporary Debt discharged .	7,000,000	7,000,000	7,000,000
Discharge of Railway Companies' Debentures (inclusive of Debentures of Companies working purchased lines) .	2,506,600	875,200	3,430,400

The programme herein announced of the probable drawings on India and of the transactions in connection with the Government Sterling Debt and the borrowings of Railway Companies, represents the present intentions of the Secretary of State. But in view of the varying conditions of Indian finance and of the London money market, no assurance can be given that this programme will be adhered to either in amount or in form. The Secretary of State reserves to himself the right to vary the programme to any extent that may be considered necessary during the course of the year. The estimate of Council drawings is for the amount necessary to provide for the Secretary of State's requirements, but additional Bills will as usual be sold if needed to meet the demands of trade.

INDIA.

266. The following is a summary of the Estimates of Ways and Means in India during 1915-16 and 1916-17 :—

Closing Balance	18,64,99,000	12,433,300	17,17,79,000	11,451,900	18,39,03,000	12,260,200

* Head (10) represents expenditure defrayed by reduction of Provincial balances.

† The figures shown under head (13) differ from those given in the Home Treasury Ways and Means statement, as Bills drawn by the Secretary of State towards the end of one year are paid in India in the next. The figures of the present statement represent payments in India.

1915-16. Main features of Budget estimates.

267. In the Budget estimate for 1915-16, the cash balance in the Indian Treasuries on the 1st April 1915 was taken at R20,79 lakhs. It was estimated that (1) the net Imperial revenue in India would amount to R23,71 lakhs, (2) a sum of R74 lakhs would be available from the Famine Insurance grant for the avoidance of debt, (3) the remittance and capital transactions of railway companies, etc., would result in a net credit of R4,77 lakhs, and (4) a net receipt of R39 lakhs would accrue in connection with Imperial and Provincial loans. On the other hand, provision was made for: (1) a net expenditure of R1,62 lakhs from Provincial balances, (2) a net payment of R33 lakhs on account of Unfunded Debt, (3) capital expenditure in India on railways (inclusive of outlay by companies) and canals to the extent of R9,60 lakhs, (4) an outlay of R27 lakhs on the construction of the new Capital at Delhi, (5) the discharge of R12 lakhs of the permanent debt, (6) a net payment of R55 lakhs on account of miscellaneous deposit and remittance transactions, (7) a recover-

[illegible] (8) a net expenditure

from our stock to the Imperial Government and (9) the payment of Council Bills to the extent of R10,89 lakhs. The total payments mentioned above aggregate R36,24 lakhs, against a total receipt of R29,61 lakhs; and it was proposed to meet the net disbursement of R6,63 lakhs by raising a rupee loan of R4 5 crores and by drawing on the cash balances to the extent of R2,13 lakhs.

1915-16. Main featu Revised est

268. The results, according to the Revised estimate, show considerable variations from this forecast. The year opened with a cash balance which was R1,39 lakhs more than the Budget forecast, the increase being due almost wholly to the improvement in the revenue account in 1914-15 over the Revised estimate (see paragraph 6). The full amount of the contemplated rupee loan of R4 5 crores was duly raised in August, and an additional R50 lakhs, supplementing the main issue, was raised through the Post Office. The unsatisfactory collections of revenue in the earlier months of the year and the heavy indirect remittances to the Home treasury, in the shape of outlay on the purchase of wheat and recoverable expenditure in connection with the war, however, led to a considerable reduction in the treasury balances in India; and to relieve the strain, the bulk of the receipts from Reverse Councils sold in India on London was credited to Treasury, the opposite payment in England being made from treasury balances (see paragraph 252). The recoverable war expenditure has continued to rise heavily in the later months of the year. But, on the other hand, there has been a satisfactory improvement in railway returns and in other revenue collections in recent months; while expenditure has been curtailed in all directions in pursuance of a policy of strict economy. It will accordingly be possible to make direct remittances in aid of the Home treasury, either by payment of councils or by actual shipment of gold, to the extent of about £6·6 million during the whole of the year, to repay £3 million of the temporary debt to the Gold Standard Reserve, and to close the year with a balance of R17·18 crores.

269. Taking the year as a whole, the net disbursements from treasuries in India in 1915-16, after allowing for the receipts from the new rupee loan will amount to R4,99 lakhs against a Budget estimate of R2,13 lakhs, the increase being due to the following variations:—

	Lakhs of R.
(1) Increase in expenditure incurred on behalf of the War Office	10,33
(2) Outlay in connection with the Wheat Scheme	4,31
(3) Repayment of a portion of temporary loan from Gold Standard Reserve	4,50
(4) Remittance of gold to London	3,00
(5) Reduction in net credits on account of remittance and capital transactions of railway companies, etc., owing mainly to a decrease in the capital expenditure which is incurred in England and is passed on to India for adjustment in the Indian accounts	1,39
(6) Increase in Delhi capital expenditure	21
(7) Increase in net issues in connection with miscellaneous deposit and remittance transactions	96
(8) Reduction in amount available from the Famine Insurance grant for the avoidance of debt	5
Total increase in outgoings or reduction in receipts	24,75
(9) Receipts on account of Reverse bills	7,00
(10) Reduction in payment of Council bills	4,08
(11) Lapse in the grant for capital expenditure on railways (inclusive of outlay by companies) and irrigation works	8,42
(12) Improvement in the combined revenue account of the Imperial and Provincial Governments	3,07
(13) Reduction in outlay on replacement of military stores and *materiel* supplied from stock to the Imperial Government	1,40
(14) Improvement under Unfunded Debt owing chiefly to smaller withdrawals from Post Office Savings Banks	1,61
(15) Increased receipts on account of the new rupee loan	50
(16) Increase in net recoveries on account of Imperial and Provincial loans	10
(17) Saving in provision for discharge of debt, mainly owing to the postponement of the repayment of the Gwalior loan of 1887 which fell due during the year	7
Total increase in receipts or reduction in outgoings	21,80
INCREASE IN NET DISBURSEMENTS	2,86

The increase of 96 lakhs in the net issues in connection with miscellaneous deposit and remittance transactions, shewn in the above analysis, results from a number of variations. Recoverable outlay amounting to R1,87 lakhs will be incurred in connection with the war on behalf of certain public departments in England other than the War Office. But on the other hand, special receipts amounting to R1,28 lakhs and R22 lakhs respectively will be obtained from the liquidation of hostile firms and the employment of captured enemy vessels, apart from the sums realised on the latter account in England and passed on to India for adjustment. There will also be material increases in other directions in the net issues under the deposit and remittance heads owing to (*i*) higher drafts on the banking accounts maintained with our treasuries by various local bodies, (*ii*) a reduction in the balance of uncashed railway cheques at the end of the year as compared with that at its beginning, (*iii*) larger advances for the payment of troops in the field, and various other causes; but these will be partly counterbalanced by an increase in the receipts on account of family allotments and remittances of troops and under certain other items.

15-16. pee loan.

270. It was announced last year, subject to the usual reservations, that a rupee loan of R4½ crores would be raised in 1915-16. By a notification issued on the 28th July 1915, subscriptions were invited to a 4 per cent. short-term loan, to be issued at par, which would be redeemed after eight years in any case, while the Government reserved the right of redeeming it at any time after five years. Tenders for this loan were opened on the 17th August, the total sum tendered amounting to about R664 lakhs. Under the terms of the loan notification, R450 lakhs out of this sum were taken, all valid applications for R2,000 and under being accepted in full, while those in excess of that amount were allotted to the extent of 67·667 per cent. A commission of 1 per cent. on the amount of the loan was paid to the Presidency Banks in connection with its flotation. A supplementary section of the loan was issued for receiving subscriptions from small investors through the Post Office, and about R50 lakhs were received from this section which remained open till the end of October.

16-17. ain features of udget estimates.

271. In 1916-17 the net Imperial revenue in India is estimated at R29,84 lakhs; a sum of R78 lakhs will be available from the Famine Insurance grant for the avoidance of debt; the remittance and capital transactions of Railway Companies, etc., are likely to result in a net credit in India of R2,06 lakhs; and net receipts of R38 lakhs and R59 lakhs are anticipated respectively in connection with Unfunded Debt and Imperial and Provincial loans. On the other hand, provision has been made: (1) for an expenditure of R53 lakhs from Provincial balances; (2) for a payment of R2 lakhs in connection with the discharge of permanent debt; (3) for capital expenditure of R4,07 lakhs in India on railways and canals and of R32 lakhs on Imperial Delhi; (4) for a recoverable outlay of R25,27 lakhs to be incurred on behalf of the War Office; (5) for a net issue of R2,90 lakhs in connection with miscellaneous deposit and remittance transactions, of which R2,63 lakhs represent recoverable expenditure incurred in connection with the war on behalf of certain public departments in England other than the War Office; and (6) for the payment of Council Bills to the extent of R5,83 lakhs. The total amount of funds required by the Government of India next year therefore aggregates R38,94 lakhs, while the receipts at its disposal amount to only R33,65 lakhs.

New rupee loan.

272. It will not be possible to provide any portion of the net disbursement of R5,29 lakhs mentioned in the preceding paragraph from the cash balances which are expected to stand at the beginning of the year at R17,18 lakhs. It is accordingly proposed to budget for a new rupee loan of R6½ crores inclusive of the Post Office Section which is estimated to yield R50 lakhs. With a loan of this amount, it will be possible to close the year, according to the present estimate, with a balance of about R18,39 lakhs. It is also proposed to associate a scheme for the conversion of Government of India 3½ per cent and 3 per cent. securities with the proposed loan, and to accept subscriptions in excess of the minimum of R6 crores for which the main loan will be issued up to a maximum limit of R12 crores in all, utilising any excess over the minimum in paying off the balance of the temporary debt to the Gold

Standard Reserve. The announcement now made regarding the rupee loan is in accordance with present intentions; but full liberty is reserved, as usual, to vary the programme now announced to any extent that may be considered desirable.

273. The following table gives details of the transactions of Savings Banks and Provident Funds during a series of years, and the estimated transactions for 1915-16 and 1916-17 :— *1915-16 and 1916-17.*

Post Office Savings Bank, etc.

Year.	Net additions to deposits, cash.	Interest.	Total addition.
1905-06	31,49,000	46,80,000	78,29,000
1906-07	50,94,000	52,25,000	1,03,19,000
1907-08	14,86,000	53,50,000	68,36,000
1908-09	—26,22,000	54,63,000	28,41,000
1909-10	51,82,000	57,20,000	1,09,02,000
1910-11	1,05,06,000	60,82,000	1,65,88,000
1911-12	1,95,69,000	67,79,000	2,63,48,000
1912-13	1,68,26,000	73,79,000	2,42,05,000
1913-14	2,37,05,000	84,07,000	3,21,12,000
1914-15	—8,35,53,000	78,82,000	—7,56,71,000
1915-16 (Revised)	49,66,000	70,18,000	1,19,84,000
1916-17 (Budget)	—42,34,000	73,04,000	30,70,000

274. The net withdrawals from Postal Savings Banks in the current year are now estimated at ₹5 lakhs. The Budget estimate for 1916-17 anticipates a further net withdrawal of ₹1,00 lakhs from these Banks, including withdrawals for the purpose of subscription to the Post Office Section of the new loan and a growth of ₹57½ lakhs in the deposits in the various Provident funds for Government servants.

J. B. BRUNYATE.

The 21st March 1916.

Appendix I.

PRO FORMA ACCOUNT OF EXPENDITURE ON DELHI AND THE DELHI PROVINCE.

Prefatory Note.

I.—Scope of pro formâ account.

The following *pro formâ* account, with its supporting statements, exhibits the expenditure, initial and annual, on Delhi and the Delhi Province and also any receipts and savings which form a direct set-off to that expenditure. The account has been prepared in consultation with the Comptroller General and carries his approval as regards both its form and its substantial completeness at the present date subject to the qualifications implied in the following prefatory remarks ; it will be added to, or amplified later, if experience should show this to be necessary.

2. The main item of the account, as regards non-recurring expenditure, is the Delhi project proper, the figures for which appear against item 1 of Part I—*Initial Outlay*. The principal recurring charge is that representing the expenditure in the new province, which appears as item 1 of Part II.—*Annual Expenditure.*

3. The account necessarily exhibits any expenditure occurring under the named heads, without qualification on account of contributory causes. It must, therefore, be clearly understood that the increase of expenditure, including that in the Delhi Province, is not wholly due to the change of Capital. Thus, an increase of the garrison at Delhi on strategic grounds had been already independently and strongly recommended to the Government of India by the Chief of the General Staff and endorsed by His Excellency the Commander-in-Chief in July 1911, before the transfer of the Capital had been officially proposed, and the reconstruction of the accommodation of the troops already there had long been recognised as pressing. Similarly, the recent advance in the policy relating to education and sanitation, particularly the latter, would, under any circumstances, have involved increased expenditure in this city. For practical purposes, these considerations must be ignored in the figured statements, as well as various similar points of minor pecuniary significance. The same principle will be applied to the Railway expenditure, *i.e.*, the cost of any remodelling of the railway system which is connected with the constitution of the new Capital will be exhibited in full in the *pro formâ* account. A wholly independent railway requirement, such as the permanent marshalling yard which will eventually replace the temporary yard now in use, will not be shown.

II.—Relation between the pro formâ account and the regular accounts.

4. A brief explanation is added below connecting the various items in the *pro formâ* account with the entries in the published accounts and estimates. Some further explanations are also to be found in the account itself and in its supporting statements.

5 The capital expenditure directly incurred on the construction of the new Imperial Capital at Delhi is shown in the regular accounts under the special head "51—Initial Expenditure on the new Capital at Delhi." The only other item of expenditure which will be recorded in the capital section of the regular accounts is that arising from diversions or re-arrangements of the railway system, which will appear under the head "48—State Railways." Item 1 of Par of *pro formâ* account. Item 3 (*b*), *ibi*

6 The initial expenditure incurred during the years 1911-12 and 1912-13 in connection with the provision of temporary accommodation for the Government of India at Delhi, pending the construction of the new Capital, has been treated, on the advice of the Comptroller General, as a revenue charge, under a special minor head styled "Temporary Delhi" subordinate to the major head "45—Civil Works." Any non-recurring receipts which may eventually be obtained in connection with these temporary works, *e.g.*, from the sale of lands and buildings when no longer required by the Government of India, will be similarly credited under a special head subordinate to the major head "XXXI—Civil Works." Item 2, *ibid.* Item II, *ibid.*

7. The remaining expenditure is mainly brought to account in one of two ways: either, first, as expenditure of the new Province; or, secondly, as departmental expenditure chargeable to the Department in which it is incurred.

Items 1 and I of Part II of *pro formâ* account.

8. The expenditure and receipts appertaining to the *quasi*-provincial administration of the Imperial area are brought to account in the same way as in the case of other minor administrations, and are eventually published separately, like the figures for Coorg and Baluchistan, in an appendix to the Civil Estimates. But as the Civil Estimates are not published till late in the year, a special arrangement has been made by which the figures for the Delhi province under each major head are separately shewn in the various sections of the Financial Secretary's memorandum (*e.g.*, I and 3, Land Revenue, page 21). It will be noted that any grants which may specially be given from Imperial revenues in aid of the Delhi Municipality or other local funds will be brought into the regular accounts and, consequently, into the *pro formâ* account also, since they will appear as charges of the Delhi administration.

9. Expenditure which does not appertain to provincial administration is recorded, as in the case of other provinces, under its appropriate departmental head in the regular accounts. Thus expenditure on the land and buildings required for the new Cantonment, and any corresponding receipts, appear under the Army and Military Works heads, respectively, under both of which a special Delhi sub-head has been opened. Railway capital outlay has already been referred to. Railway revenue charges and receipts similarly come under the Railway account head. In these cases, the *pro formâ* account necessarily exhibits only initial expenditure and non-recurring receipts, as Military expenditure is not being permanently increased and the influence of the new Capital on the ordinary daily receipts and working expenses of the Railways cannot evidently be satisfactorily isolated. This latter consideration also applies to the case of Postal and Telegraph expenditure, which moreover represents ordinary administrative expenditure of the department, and is relatively insignificant in amount. For these reasons, in the case of this department, neither the initial outlay nor the recurring receipts and expenditure have been included.

Items 3 (*a*) and III of Part I of *pro formâ* account.

Items 4 to 7 and I and IV of Part I, and Items 2 and 3 and II to V of Part II of *pro formâ* account.

10. There are also a few items of expenditure and of actual receipt or of definite saving which are not recorded in the accounts of the Delhi Province or in the departmental accounts, but which it is necessary to take into consideration in calculating the expenditure in Delhi and the Delhi Province. Most of these are self-explanatory, but attention may be called to the intended treatment of the sale-proceeds of vacated lands and buildings at Calcutta (if any) and elsewhere. These will be credited under the major heads "XXV—Miscellaneous" and "XXXI—Civil Works", and the *pro formâ* account will take credit only for actual Imperial receipts. No account will be taken, in the statements themselves, of book transactions, or of the considerable savings obtained from the vacation of rented accommodation, *i.e.*, of relief in respect of rental payments which the Local Government obtains by giving up private buildings previously leased for provincial establishments, and moving the latter into offices formerly occupied by the Government of India. Any reference made to such saving will, therefore, be found in an explanatory footnote. [See Part I, Note 5.]

Item I of Part I.

11. Outlay on stores and all other expenditure incurred in England under a capital head or as a revenue charge, which can be distinguished as appertaining to the construction of Delhi or to the administration of the Delhi Province, have been included in the *pro formâ* account.

PRO FORMA ACCOUNT OF EXPENDITURE ON DELHI AND THE DELHI PROVINCE.

PART I.—INITIAL OUTLAY.

[Figures in thousands of Rupees.]

EXPENDITURE.	Actuals to end of 1914-15.	Revised Estimate, 1915-16.	Budget Estimate, 1916-17.
1. DELHI PROJECT: Capital outlay on permanent Delhi chargeable to Head "51" (for details see Statement I-A)	1,39,11	50,00	40,00
2. Temporary Delhi *	54,33	...	...
3. Initial expenditure of non-Civil Departments :—			
(a) Military services †	35,97	9,86	10,00
(b) Railways ‡	2,73	2,35	11
4. Non-recurring grant to the Punjab Government in compensation for expenditure incurred on new headquarters buildings for the Commissionership transferred from Delhi	1,26	...	...
5. Cost of withdrawal to Delhi of Imperial offices previously located at Calcutta or elsewhere	2,03	6	6
6. Special non-recurring monetary concessions to establishments of the Government of India and attached offices on the occasion of their first move to Delhi	88	37	37
7. Miscellaneous items §	2,03	50	49
TOTAL	2,38,34	63,14	51,03
Total Expenditure to end of 1916-17		3,52,51	
Net expenditure to end of 1916-17		3,52,46	

RECEIPTS.	Actuals to end of 1914-15.	Revised Estimate, 1915-16.	Budget Estimate, 1916-17.
I.—Receipts which may be obtained on account of Imperial buildings vacated by the Government of India or attached offices in consequence of the move‖	...	...	...
II.—Non-recurring receipts on account of Temporary Works	...	...	...
III.—Recoveries on account of land or buildings vacated in the old Cantonment of Delhi ‖	...	...	...
IV.—Miscellaneous items	3	2	...
TOTAL	3	2	...
Total receipts to end of 1916-17		5	

* NOTE 1.—The head "Temporary Delhi" has been closed from 1st April 1913, subsequent expenditure being treated as part of the expenditure of the Delhi Province—see Part II of Account.

† NOTE 2.—The expenditure included under item 3 (a) is that relating to the formation of the new Cantonment. Its details are as follows :—

	To end of 1914-15.	1915-16.	1916-17.
Acquisition of land	12,83	...	...
Cost of buildings	20,41	8,94	10,00
Establishment charges	1,53	82	
Tools and Plant	1,20	10	...
TOTAL	35,97	9,86	10,00

‡ NOTE 3.—The figures relate to charges for the acquisition of land and outlay on railway facilities at Nangal Raya.

§ NOTE 4.—The expenditure shown against item 7 represents mainly the proportionate cost of the Delhi Audit Office and the cost of temporary establishments employed in the Secretariats in connection with the change of Capital.

‖ NOTE 5.—These heads record only actual receipts obtained from the sale of the vacated buildings and land. As explained in paragraph 10 of the prefatory note, this procedure has the effect of excluding a substantial true saving in respect of rented accommodation. Thus in 1913-14 and 1914-15 the Government of Bengal, by moving its offices into the vacated Imperial buildings in Calcutta, saved R1,36,000, partly by being enabled to dispense with private accommodation previously leased, and partly by being relieved from the necessity of renting further accommodation.

PRO FORMÁ ACCOUNT OF EXPENDITURE ON DELHI AND THE DELHI PROVINCE.

PART II.—ANNUAL EXPENDITURE.

[Figures in thousands of Rupees.]

Expenditure.	Actuals, 1914-15.	Revised Estimate, 1915-16.	Budgt Estimate, 1916-17.	Receipts.	Actuals, 1914-15.	Revised Estimate, 1915-16.	Budget Estimate, 1916-17.
1. Expenditure of Delhi Province* . .	40,65	34,07	29,46	I.—Revenues of Delhi Province*	16,88	16,12	16,24
2. Compensatory assignment to Punjab Provincial revenues in respect of extra expenditure incurred in administering territories which have been transferred from the old Delhi district to the districts of Rohtak and Gurgaon . .	23	13	13	II.—Assignment from Punjab Provincial revenues to Imperial on account of the creation of the new Province of Delhi, with effect from the 1st October 1912† .	1,91	1,91	1,91
3. Miscellaneous items .	4	3	4	III.—Saving under Calcutta house allowances‡ .	41	41	42
				IV.—Saving under hill journey and travelling allowances and contingencies on account of shorter move of Secretariat and attached offices§ . . .	2,50	2,50	2,50
Total expenditure .	40,92	34,23	29,63	V.—Miscellaneous items .	3	3	3
Net expenditure .	19,69	13,26	8,53	Total receipts .	21,23	20,97	21,10

* NOTE 1.—The details of this item are given in Statement II-A.

† NOTE 2.—This assignment represents the amount by which the Provincial outlay on the Delhi area exceeded the Provincial revenue obtained therefrom prior to the constitution of the Imperial enclave, *i.e.*, the net expenditure incurred on the area of which the Local Government has now been relieved.

‡ NOTE 3.—The figures shown against item III will be subject to increase as additional offices are successively transferred from Calcutta to Delhi.

§ NOTE 4.—The figure shown against item IV is a minimum figure calculated once for all on the assumption that all offices or portions of offices which previously moved between Calcutta and Simla have subsequently moved regularly between Delhi and Simla. The actual saving throughout has been larger owing to certain establishments which previously moved to Calcutta being retained in Simla throughout the cold weather.

STATEMENT I.-A.

Details of Capital outlay on the Delhi Project working up to the total figures shown against item 1 in Part I of pro forma account.

CIRCULAR No. 4 F.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

(FORESTS.)

Delhi, the 24th March 1916.

The following regulations for the selection and training of probationers for the Indian Forest Service are published :—

INDIAN FOREST SERVICE.

REGULATIONS AS TO THE APPOINTMENT OF PROBATIONERS, 1916.

1. *Appointments.*—In making appointments, the Secretary of State for India in Council will act with the advice of a Selection Committee.

2. *Applications for Appointment.*—Applications for appointment must be made on a printed form to be obtained from the Secretary, Revenue Department, India Office, Whitehall, London, S.W., and to be returned to him not later than **Saturday, the 1st July 1916.** Candidates must be prepared, if called upon, to attend at the India Office, at their own expense, for a personal interview with the Selection Committee within three weeks from that date.

3. *Age Limit.*—Candidates must, save as provided in Appendix I., be not less than 19 but under 22 years of age on the 1st January 1916.

4. *Nationality, &c.*—Every candidate must be a natural-born subject of His Majesty. He must be prepared to give an undertaking, if selected, that he will not marry before he reaches India. If he does so, he will forfeit his appointment. He must be of good physique, and must produce evidence of character to satisfy the Secretary of State for India in Council that he is suited for the Indian Forest Service.

5. *Qualifications.*—Candidates must have obtained a degree *with Honours* in some branch of Natural Science* in a University of England, Wales, or Ireland, or have passed the Final Bachelor of Science Examination in Pure Science in one of the Universities of Scotland.† A degree in Applied Science will not be considered as fulfilling these conditions. Candidates will be required to produce evidence that they have a fair knowledge of either German or French.

Note.—Applications for appointment will be accepted from candidates who on the 1st July 1916 have already sat at an examination for a degree as mentioned above, but have not learned the result of the examination.

6. Should there be more candidates considered to be qualified in every respect than vacancies to be filled, the Secretary of State reserves the right to require them to pass a competitive examination conducted by the Civil Service Commissioners, on the results of which their final selection would depend. Particulars of this examination, which would be held in August, will be found in Appendix II.

7. *Medical Examination.*—Selected candidates will be required to undergo a strict examination by a Medical Board at the India Office, at which particular stress will be laid on good vision and hearing, and to satisfy the Secretary of State for India that they are physically fit for service in the Indian Forest Department (*see* Appendix VII).

Candidates who do not satisfy the Secretary of State for India that they are physically fit for appointment to the Indian Forest Service will not be admitted to the competitive examination mentioned in Regulation 6.

8. *Period of Probation.*—Before appointment to the Indian Forest Department, a probationer will be required :—

(i) to have obtained, either before selection as probationer, or within the period of two years' probation, the degree or diploma in Forestry at one of the Universities named in the margin ;‡

‡ Oxford, Cambridge, or Edinburgh.

* A Moderatorship in Natural Science or in Experimental Science at the University of Dublin will be considered as fulfilling these conditions.

† Graduates in Forestry at the University of Edinburgh are regarded as satisfying the requirements of this paragraph if they pass the Final Examination of that University in some one branch of Natural Science embraced in the degree in Pure Science.

(*ii*) to have undergone a special course of instruction in Forestry, under the direction and supervision of the Director of Indian Forest Studies appointed by the Secretary of State for India in Council, in such British and Continental localities as may be selected for the purpose;

(*iii*) to have passed an examination in certain special subjects, namely, Systematic Botany of Indian trees, Indian Geology, Forest Law, Indian Working Plans, and, if required, an Indian vernacular language;

(*iv*) to have undergone a final competitive examination in Forestry (*see* Appendix III);

(*v*) to have satisfied the Secretary of State, in such manner as may be determined, of his ability to ride.

The period of probation will in ordinary cases be two years. The Director of Indian Forest Studies will instruct probationers in each case as to the order and manner in which they should fulfil these various requirements.

9. *Charges.*—The probationers will be required to defray all expenses of lodging, board, tuition, and excursions, while at the University, and on practical instruction in Great Britain and on the Continent, with the exception of fees payable to local forest officers in Great Britain and on the Continent.

10. *Allowances.*—The Secretary of State for India in Council will make payments to each probationer at the rate of 120*l.* annually, not exceeding a total of 240*l.* (besides the fees to local officers mentioned above). These payments will ordinarily be made on the following dates in each year:—

	£
On the 1st December	30
On the 1st March	30
On the 1st June	60

The cases of probationers whose probation does not extend over the full two years will be specially considered.

The grant of the allowances is subject to the following conditions:—

(*a*) that the progress of the probationer in his studies is satisfactory;

(*b*) that the probationer gives security to refund the payments in respect of this advance, as well as such payments, not exceeding 60*l.* in all, as may have been incurred by the Secretary of State on the probationer's behalf in respect of fees to local forest officers, in the event of his failing to qualify for an appointment in the Indian Forest Service, or not signing the articles of agreement as specified in paragraph 13, or failing to join the Indian Forest Service at the end of the period of probation.

11. *Conduct.*—Every probationer will be required to conduct himself during the period of probation in a manner satisfactory to the Secretary of State, and to give evidence of satisfactory progress in his studies in such a manner as may be required, failing which, or in the event of serious misconduct, he will be liable to have his name removed from the list of probationers.

12. *Appointment and Seniority.*—Probationers who comply with the requirements of Regulation 8 within the sanctioned period of time, and also satisfy such other tests as may be prescribed, will be appointed Assistant Conservators in the Indian Forest Department, provided they are of sound constitution and free from physical defects which would render them unsuitable for employment in the Indian Forest Service. Their position in the provincial Forest Lists will be determined by the Secretary of State for India in Council on the report of the Director of Indian Forest Studies; but in making selections for the post of Conservator, officers joining the service in the same year are reckoned as equal in seniority, unless the Secretary of State for India in Council shall for special reasons have directed otherwise in any particular case or cases.

Probationers will be allowed at the end of the period of probation to state their preference in respect to the Provinces to which they desire to be allotted; but the distribution will be made to the several Provinces according to the needs of the public service, at the discretion of the Secretary of State for India in Council. Officers are, however, at all times liable to be transferred from one Province to another at the pleasure of the Government of India.

13. *Articles of Agreement.*—A probationer is required, on qualifying for appointment as Assistant Conservator, to sign articles of agreement setting forth the terms and conditions of his appointment; he must embark for India when required to do so by the Secretary of State. Failure to embark at the stated time will, in the absence of satisfactory explanation, lead to forfeiture of appointment.

14. *Passage to India.*—Each probationer on appointment to the Indian Forest Service will be provided with a free first-class passage to India.

15. *Salary.*—An Assistant Conservator of Forests will draw pay at the rate of Rs.380 a month (equivalent to 304*l.* a year, when the rupee is at 1*s.* 4*d.*) from the date of his reporting his arrival in India.

16. *Promotion, Leave, Pension, and Provident Fund.*—Promotion, leave, and pension will be governed by the regulations laid down by the Government of India, and applicable to Forest officers, such regulations being subject to any modifications or alterations which may be made in them from time to time by the Government of India, and their interpretation in case of any doubt arising being left to that Government. A copy of the existing regulations can be seen on application at the India Office.

Certain information regarding appointments in the upper controlling staff of the Indian Forest Service, the pay of which has been recently improved, will be found in Appendix IV.; a summary of information regarding Leave is contained in Appendix V.; and regarding Pensions and the Provident Fund in Appendix VI.

INDIA OFFICE,
January 1916

APPENDICES.

APPENDIX I.—Deductions from Age in respect of Military Service.

1. Any person who has joined since the 4th August 1914, or may join during the present war, the Army or Navy or Royal Marines, or has rendered or may render during the same period actual military service in the Special Reserve or Territorial Force, Royal Naval Reserve or Royal Naval Volunteer Reserve, may, if eligible in point of age under the Regulations as they now stand for admission to the competition held in 1915, 1916, or 1917 (but over age in 1916, 1917, or 1918 respectively), deduct from his actual age at the time of the competition held in 1916, 1917, or 1918, as the case may be :—

(*a*) The actual period of such service, if it has not exceeded three months.

(*b*) One year, if the actual period of service has exceeded three months. No candidate will be allowed to deduct more than one year from his actual age.

2. The same concession may also be granted to those who have been employed during the same period in connection with the armed forces of the Crown at home or abroad giving their whole time and under obligation to serve for the duration of the war or until their discharge, or for any period not terminable at their own option, provided that their employment be not on ordinary commercial terms, such as that of Assistant Paymasters, clerks, artisans, and the like.

3. The grant of the concession described in paragraph (2) will be at the discretion of the Secretary of State for India in Council, whose decision in each case will be final. Candidates who contemplate applying for an age deduction under (2) will do well to apply to the India Office for a ruling on their case.

4. Candidates to be eligible for the concessions in (1) or (2) must furnish an official certificate of the period and satisfactory character of their service, and if any doubt arise whether the service of any candidate is of the kind contemplated by this Notice, the Secretary of State for India in Council reserves the right to decide the case upon its merits.

APPENDIX II.—Competitive Examination.

In the event of the Civil Service Commissioners being requested by the Secretary of State for India in Council to hold an examination in any year of candidates nominated by him to compete for appointment as probationers for the above Service, the following will be the subjects in which such candidates will be examined :—

	Maximum marks.		Maximum marks.
1. English Composition . .	100	5. Physics . .	100
2. German *or* French . .	100	6. Geology . .	100
3. Elementary Chemistry . .	50	7. Botany . . .	100
4. Higher Chemistry . . .	100	8. Zoology . .	100

Not more than three of the subjects numbered 4 to 8 may be offered.

Candidates must pass to the satisfaction of the Civil Service Commissioners in the first three subjects.

In the subjects numbered 4 to 8, only marks showing real attainment will be counted towards the order of merit, so that a candidate who has a thorough knowledge of one or two of the optional subjects may obtain on that knowledge alone as many marks as a candidate who offers the maximum number of the optional subjects on a lower standard.

SYLLABUS.

Languages.—The examination in German and French will include translation, composition, and conversation.

Sciences.—The standard of the examination in Higher Chemistry, Physics, Geology, Botany and Zoology will be that of the Honours Schools of the Universities.

The examination in Elementary Chemistry will consist of a written paper on the more elementary parts of Inorganic Chemistry, together with the outlines of Organic Chemistry

APPENDIX III.—Final Examination.

1. With a view to the allocation of the annual Currie Scholarship for Indian Forest Students (value about 35*l.*), and to facilitate the allotment of probationers to the several provinces in accordance with paragraph 12 of the Regulations as to appointments in the Indian Forest Service, probationers who have completed their prescribed course of training will be required to undergo a competitive final examination in Forestry.

2. A list of the probationers in order of merit will be prepared by adding together (*a*) the marks obtained at the final examination, and (*b*) the marks obtained during the course of practical training in forestry under the control of the Director of Indian Forest Studies. The maximum of marks obtainable under (*a*) will be the same as under (*b*).

3. The final examination will consist of an oral examination and three or more papers, as follows :—

(*i*) One or more papers in Silviculture, Forest Protection (including Forest Botany and Forest Entomology), and Forest Utilisation (including Forest Engineering).

(*ii*) One or more papers in Forest Management, Forest Mensuration, Forest Valuation, and Forest Administration.

(*iii*) A paper in General Forestry (Practical) dealing with the work done and with the forests visited during the course of practical training.

4. The final examination will be held at the beginning of October. Arrangements as to the date and place of examination will be made by the Director of Indian Forest Studies Probationers will not be required to pay any fee for the examination.

APPENDIX IV.—List of Appointments open to Members of the Imperial Branch of the Indian Forest Service.

Note.—*This list is liable to alteration at any time.*

	Appointment.	Salary. Rs.
(*a*)	1 Inspector-General of Forests	2,650 a month.
(*b*)	*1 Assistant Inspector-General of Forests	...
(*c*)	4 Chief Conservators (Bombay, United Provinces, Burma and Central Provinces).	2,150 ,,
(*d*)	22 Conservators, in three grades (including President, Forest Research Institute and College)	1,900 ,, / 1,700 ,, / 1,500 ,, respectively.
(*e*)	208 Deputy and Assistant Conservators	‡ Rs. 380 a month, rising by annual increments of Rs. 40 a month to Rs. 700 a month; thereafter, by annual increments of Rs. 50 a month to Rs. 1,250 a month, in the twentieth year of service.
Total	236†	
These appointments are included in (*d*) and (*e*).	5 Foreign Service appointments	
	§12 Officers employed at the Forest Research Institute and College, Dehra Dun	

APPENDIX V.

[Note.—Appendices V and VI are intended merely to show the principal leave and pension rules in the Civil Service Regulations at present applicable to officers appointed to the Indian Forest Service by the Secretary of State from the United Kingdom, without going into minute details, and do not profess to deal with every case that may arise. The rules are subject to alteration, and any disputed question must be decided with reference to the authorised text of the Civil Service Regulations for the time being.]

Leave.

Long Leave.

1. Furlough and special leave with allowances (*see* paragraph 5) are admissible to an aggregate maximum amount of six years during an officer's service. The amount of furlough "earned" is one-fourth of an officer's active service, and the amount "due" is that amount less any enjoyed.

---

* The officer holding this appointment draws in addition to the pay of his grade a minimum local allowance of Rs. 200 a month.

† These appointments are allotted to the various provinces as follows :—Burma, 66; Madras, 32; Bombay, 38; Central Provinces, 24; United Provinces, 30; Punjab, 12; Bengal, 12; Assam, 18; and Bihar and Orissa, 6; and 4 Imperial Instructors and 2 Assistants at Dehra Dun.

‡ Until he has passed the prescribed Departmental examinations, an Assistant Conservator is liable to stoppage of increments of pay. On passing the examinations he will resume drawing pay under the time scale at the rate to which his length of service entitles him.

§ Of these officers, the President, Forest Research Institute and College, draws a local allowance of Rs. 200 a month in addition to his grade pay; nine of the remainder draw a local allowance of Rs. 150 a month, and two a local allowance of Rs. 100 a month, in addition to their grade pay. Of these 12 appointments, the four posts of Imperial Instructors have been sanctioned for five years from 1912, for the present.

Note.—Under the improved scale of salary shown above, no Exchange Compensation Allowance is granted.

2. Furlough without medical certificate can, if due, be generally taken after eight years' active service and again after intervals of not less than three years' continuous service. It is limited to two years at a time.

3. Furlough on medical certificate may be granted (*a*) to an officer who has rendered three years' continuous service, for not more than two years, but capable of extension up to three years; and (*b*) to an officer who has not rendered three years' continuous service up to one year in any case, and up to such longer period, if any (but not exceeding two years in all), as the officer may have furlough "due" to him.

4. The allowances admissible during furlough are:

(1) During the first two years of furlough without medical certificate and during so much of furlough with medical certificate as may be "due"—half average salary, subject to certain maximum and minimum limits.

(2) After the expiration of the period for which the foregoing allowances are admissible—one quarter of average salary, subject to certain maximum and minimum limits.

5. Special Leave may be granted at any time for not more than six months, with intervals of six years' service; allowances, calculated as during furlough, are given during the first six months only, whether taken in one or more instalments.

Short Leave.

6. Privilege Leave is a holiday which may be granted to the extent of one-eleventh part of the time that an officer has been on duty without interruption; and it may be accumulated up to three months, earned by 33 months' duty. During privilege leave, the officer retains a lien on his appointment, and receives the salary which he would have received if on duty. An interval of not less than six months must elapse between two periods of absence on privilege leave.

Privilege leave may be prefixed to furlough, special leave, or extraordinary leave without allowances. The whole period of leave thus taken in combination is known as combined leave. Combined leave may not be granted for a period of less duration than six months, nor, except on medical certificate, may it be extended beyond two years.

7. Subsidiary Leave in India for a minimum of 10 days, usually with half average salary, is granted to an officer proceeding on or returning from leave out of India, or on retirement, to enable him to reach the port of embarkation or to rejoin his appointment. It is admissible only at the end and not at the beginning of combined leave.

8. Short Leave is also granted to enable officers to appear at examinations, &c.

9. Extraordinary Leave without allowances may be granted in case of necessity, and except in certain specified cases, only when no other kind of leave is by rule admissible. It may be granted in continuation of other leave.

General Rules.

10. Leave of absence can never be claimed as of right, and is given or refused at the discretion of Government.

11. When leave allowances other than privilege leave pay are paid at the Home Treasury, or in a Colony where the standard of currency is gold, rupees are converted into sterling at the rate of exchange fixed for the time being for the adjustment of financial transactions between the Imperial and Indian Treasuries, unless any other rate has been exceptionally authorised. But for the present the rate of conversion is subject to a minimum of 1*s.* 6*d.* to the rupee. Privilege Leave pay when issued from the Home Treasury (this is only admissible when privilege leave is combined with other leave) is converted at 1*s.* 4*d.* to the rupee.

APPENDIX VI.

(See Note under Appendix V.)

PENSIONS AND PROVIDENT FUND.

1. An officer of the Indian Forest Service is eligible for a pension on voluntary retirement after completing 20 years' qualifying service or attaining the age of 55 years. If at an earlier date he is compelled to retire from the service through ill-health, not occasioned by regular or intemperate habits, he becomes eligible for an invalid pension or a gratuity according to the length of his service.

The amount of pension or gratuity is regulated as follows:—

After a service of less than 10 years, an invalid gratuity not exceeding one month's emoluments for each completed year of service.

After a service of not less than 10 years an invalid pension not exceeding the following amounts :—

Years of Completed Service.	Maximum Limit of pension.
10	Rs. 1,000 a year.
11	1,400 ,,
12	1,800 ,,
13	2,200 ,,
14	2,600 ,,
15, 16, 17, 18, 19	3,000

After a service of not less than 20 years, a retiring pension not exceeding the following amounts :—

Years of Completed Service.	Scale of Pension. Sixtieths of Average Emoluments.	Maximum Limit of Pension.
20 to 24	30	Rs. 4,000 a year.
25 and above	30	5,000 ,,

Officers who have shown special energy and efficiency during an effective service of three years as Inspector-General of Forests or Conservator may, at the discretion of the Government of India, be allowed an additional pension of Rs. 1,000 a year, subject to the condition that the officer must not retire voluntarily before the completion of a total qualifying service of 28 years.

Subject to certain prescribed conditions, rupee pensions are now issued to pensioners residing in countries where the Indian rupee is not legal tender at the rate of exchange of 1*s.* 9*d.* the rupee.

2. A General Provident Fund has also been established on the following basis :—

(*a*) The contribution is compulsory up to 6¼ per cent. on salaries, with voluntary contributions of not more than a further 9⅜ per cent. Subscriptions on leave of any kind are optional.

(*b*) Compound interest on such payments is annually credited by Government to each officer subscribing, the rate being at present 4 per cent. per annum.

(*c*) The sum which thus accumulates to the credit of an officer is his absolute property, subject to the rules of the Fund, and is handed over to him, unconditionally, on quitting the service ; or, in the event of his death before retirement, to his legal representatives or such other person or persons as, under and subject to the rules of the Fund for the time being in force, may be entitled thereto.

(*d*) Other forms of life insurance will, however, if they fulfil certain conditions, be accepted in lieu of the contributions in (*a*).

APPENDIX VII.

General Physical Requirements.

Note.—These Regulations are published for the convenience of candidates and in order to enable them to ascertain the probability of their coming up to the required physical standard. But it must be clearly understood that the Secretary of State reserves to himself an absolute discretion to reject as unfit any candidate whom he may consider, after hearing the opinion of his medical advisers, to be physically disqualified for the public service ; and that his discretion is in no respect limited by these Regulations.

1. A candidate must be in good mental and bodily health, and free from any physical defect likely to interfere with efficient performance of duty.

2. In the examination of candidates the Medical Board will apply the following table of correlation of age, height, and chest girth :—

Age.	Height without Shoes.	Chest. Girth when expanded.	Chest. Range of Expansion.
	Inches.	Inches.	Inches.
19 to 20	62½ and under 65	35	2
	65 ,, 68	35	2
	68 ,, 70	35½	2
	70 ,, 72	36	2
	72 and upwards	36½	2½
21 and upwards	62½ and under 65	35	2
	65 ,, 68	35½	2
	68 ,, 70	36	2
	70 ,, 72	36½	2½
	72 and upwards	37	2½

3. *Measurement of Height.*—The candidate will be placed against the standard with his feet together, and the weight thrown on the heels, and not on the toes or outside of the feet. He will stand erect without rigidity, and with the heels, calves, buttocks, and shoulders touching the standard; the chin will be depressed to bring the vertex of the head level under the horizontal bar, and the height will be noted in parts of an inch to eighths. No fixed limit of height is imposed.

4. *Measurement of Chest.*—The candidate will be made to stand erect with his feet together, and to raise his hands above his head. The tape will be carefully adjusted round the chest, the posterior upper edge touching the inferior angles of the shoulder blades, and its anterior lower edge the upper part of the nipples. The arms will then be lowered to hang loosely by the side, and care will be taken that the shoulders are not thrown upwards or backwards so as to displace the tape. The candidate will then be directed to empty his chest of air as much as possible. This is best done by continuous whistling with the lips as long as sound can be produced. The tape is carefully gathered in during the process, and when the minimum measurement is reached it is recorded. The candidate will then be directed to inflate his chest to its utmost capacity. This maximum measurement will likewise be noted. The girth with the chest fully expanded and the range of expansion between the minimum and the maximum will then be recorded.

5. The hearing must be good.

6. The speech without impediment.

7. The teeth in good order, *i.e.*, decayed or broken teeth must be properly stopped or crowned, and deficient teeth replaced by artificial teeth where necessary for effective mastication.

8. The chest must be well formed, the lungs and heart sound.

9. Rupture, hydrocele, varicocele, varicose veins in a severe degree, or other condition likely to cause inefficiency will disqualify a candidate, unless such condition is cured by operation.

10. The limbs, feet, and toes must be well formed and developed, with free and perfect motion of all the joints.

11. A candidate must have no congenital malformation or defect likely to interfere with efficiency.

12. A candidate must not be the subject of chronic skin disease.

13. Evidence of previous acute or chronic disease pointing to an impaired constitution will disqualify.

14. Candidates may, if they wish it, undergo a preliminary examination as to their physical fitness by the Medical Board, which meets at the India Office every Tuesday, under the following conditions:—

(*a*) Applications must be addressed to the Under Secretary of State, India Office, Whitehall, London, accompanied by a fee of two guineas.

(*b*) Candidates must pay their travelling expenses.

(*c*) It must be understood that the opinion of the Medical Board, which will be communicated by the Board to the candidate at the end of the examination, is solely for the candidate's own information and is not an official finding. The Board, if they consider a candidate unfit, will exercise their discretion as to informing him of the particular grounds on which their opinion is based. No further information can in any case be given as to the Medical Board's opinion which will be confined solely to the physical fitness of the candidate; and any question as to the eligibility of the candidate, if found physically fit, to be admitted to the particular Indian service which he desires to enter, should be addressed in writing to the Under Secretary of State.

(*d*) Candidates considered to be unfit by the Medical Board at this preliminary examination are not bound to accept its opinion, but may, *at their own risk*, continue their studies, with the knowledge that they will have to submit themselves for a final medical examination by the Medical Board prior to their appointment.

(*e*) As the preliminary examination by the Medical Board is held solely for the candidate's information, a candidate who is informed after such an examination that he is physically fit will have on that account no claim to be accepted as physically fit when he presents himself for the final medical examination, upon which alone his acceptance or rejection will depend. Candidates may be considered fit for the Service at the preliminary examination, but may be found at the final examination to be unfit, either on account of some physical defect which did not exist or passed undetected at the preliminary examination, or for other reasons.

Regulations as to the Standard of Vision for the Indian Forest Service.

1. If myopia in one or both eyes exists, a candidate may be passed, provided the ametropia does not exceed 2·5 D, and if with correcting glasses, not exceeding 2·5 D, the acuteness of

vision in one eye equals $\frac{6}{9}$ and in the other $\frac{6}{6}$, there being normal range of accommodation with the glasses.

2. Myopic astigmatism does not disqualify a candidate for service, provided the lens or the combined spherical and cylindrical lenses required to correct the error of refraction do not exceed—2·5 D; the acuteness of vision in one eye, when corrected, being equal to $\frac{6}{9}$, and in the other eye $\frac{6}{6}$, together with normal range of accommodation with the correcting glasses, there being no evidence of progressive disease in the choroid or retina.

3. A candidate having total hypermetropia not exceeding 4 D is not disqualified, provided the sight in one eye (when under the influence of atropine) equals $\frac{6}{9}$, and in the other eye equals $\frac{6}{6}$ with + 4 D or any lower power.

4. Hypermetropic astigmatism does not disqualify a candidate for the service, provided the lens or combined lenses required to cover the error of refraction do not exceed 4 D, and that the sight of one eye equals $\frac{6}{9}$ and of the other $\frac{6}{6}$, with or without such lens or lenses.

5. A candidate having a defect of vision arising from nebula of the cornea is disqualified if the sight of one eye be less than $\frac{6}{12}$. In such a case the better eye must be emmetropic. Defects of vision arising from pathological or other changes in the deeper structures of either eye, which are not referred to in the above rules, may exclude a candidate for admission into the service.

6. Squint, or any morbid condition, subject to the risk of aggravation or recurrence, in either eye, may cause the rejection of a candidate. The existence of imperfection of colour sense will be noted on the candidate's papers.

To

1. The Secretary to the Government of Madras, Revenue Department.
2. „ Chief Secretary to the Government of Bombay, Revenue Department.
3. „ Secretary to the Government of Bengal, Revenue Department.
4. „ Chief Secretary to the Government of the United Provinces.
5. „ Chief Secretary to the Government of the Punjab.
6. „ Revenue Secretary to the Government of Burma.
7. „ Secretary to the Government of Bihar and Orissa, Revenue Department.
8. „ Honourable the Chief Commissioner of Assam.
9. „ Honourable the Chief Commissioner of the Central Provinces.
10. „ Chief Commissioner of Coorg.
11. „ Chief Commissioner of Ajmer.
12. „ Honourable the Agent to the Governor-General and Chief Commissioner in Baluchistan.
13. „ Honourable the Chief Commissioner and Agent to the Governor-General in the North-West Frontier Province.
14. „ Superintendent of Port Blair.
15. „ Chief Commissioner, Delhi Province.

Ordered that a copy of the foregoing regulations be forwarded, for information, to the Local Governments and Administrations noted in the margin, the Inspector-General of Forests, and the Comptroller, India Treasuries. Also that the regulations be published in the supplement to the *Gazette of India*.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Season and Crop Prospects for the week ending Saturday, 18th March 1916.

Burma.—The week was rainless. Cultivation of spring and summer rice and harvesting of tobacco and other miscellaneous crops are progressing. Standing crops are in satisfactory condition. Cattle are healthy. The price of unhusked rice at Rangoon has fallen further to Rs. 106 per hundred baskets but is still above normal.

Assam.—The weather was dry, windy and practically rainless. Rain is generally wanted for agricultural operations. Harvesting of mustard has been nearly finished. Pressing of sugarcane, preparation of land for *jhum* cultivation and hoeing of land for and pruning of tea still continue. Ploughing of land for and sowing of autumn rice and jute are going on but the operations are being impeded in some places on account of drought. Prospects of tea are fair and those of spring rice moderate. Cattle disease is reported from five districts. Scarcity of fodder is reported from Cachar, Kamrup and Lakhimpur and that of water from the latter two districts. The price of common rice has risen slightly.

Bengal.—No rain fell during the week. The weather was extremely hot and dry. The agricultural operations for the next autumn crops are being greatly hampered by the continued want of rain especially in western Bengal. Harvesting of spring crops is proceeding. Cutting and pressing of sugarcane are nearly over and planting for the next year's crop has commenced. Sowing of jute and autumn paddy is going on in the low lands of eastern Bengal. The prospects and the probable outturn of the standing spring crops are reported to be only fair on account of the drought. Scarcity of fodder and water is being felt in some districts of the Burdwan division. Cattle disease is reported from nine districts. The average price of common rice for the Province rose by about 0·2 per cent as compared with that of the preceding week.

The weekly report on scarcity is as follows:—In the Bankura district distress is tending to increase. Scarcity of fodder and water continues. Wells are being sunk. Private charitable funds are giving assistance. Loans continue to be given freely. The price of rice is 9 seers per rupee. The number of persons on relief works was 15,911 and on gratuitous relief 19,812, total 35,723. The number of persons relieved on private works was 7,048. In the Tippera district the state of affairs in affected areas is generally unchanged. Rain is wanted for the standing *boro* paddy and for ploughing. Distribution of loans continues. But for sporadic cases of cholera the public health is good. The Sarail Wards Estate is giving gratuitous relief to 476 persons. The price of rice is 7½ seers per rupee. The number of persons on relief works was 3,849 and on gratuitous relief 5,579, total 9,428.

Bihar and Orissa.—There was no rain during the week. Harvesting of spring crop is in progress. Pressing of sugarcane continues and planting for the next season's crop has commenced. Preparation of lands for the autumn crops is going on. Standing crops are doing well. The average price of common rice has remained almost stationary as compared with that of the preceding week. The supply of fodder and water is sufficient except in parts of Hazaribagh where the water supply is reported to be poor. Cattle disease is reported from twelve districts. The attendance of persons on test works in Manbhum was 2,665 and in Singhbhum 1,586. Gratuitous relief was given to 589 persons in Manbhum. The condition of standing crops in the Feudatory States of Orissa is good.

United Provinces.—The week was practically rainless. Rain is still wanted in the hill districts where crops are suffering from drought. Harvesting and threshing of spring crops, pressing of sugarcane, sowing of sugarcane and extra crops, irrigation of poppy and extraction of opium continue. Standing crops are generally doing well. The condition of agricultural stock is good and cattle disease is practically confined to a few tahsils in the hill and the Bundelkhand districts. Fodder and water are sufficient everywhere except in a few western districts where the former is dear and scarce. Markets are full. The fall in prices has become more general.

Punjab.—Light showers were received in nearly all the reporting districts except in parts of the south-east. They were insufficient and more rain is wanted everywhere. The condition and prospects of irrigated wheat and other crops are generally average and of unirrigated crops bad in the south-east and poor elsewhere. Strong winds have also damaged

the crops in parts of the south-east. Sowings of extra spring crops and of sugarcane continue and are generally normal. Germination of extra spring crops is good. Cattle are generally healthy but are weak in some districts owing to scarcity of fodder. Water for drinking and canal irrigation is generally sufficient. Prices are falling generally. In the case of wheat they range between normal and warning rates and in other cases between warning and scarcity rates. Price of wheat:—Rawalpindi 9¾, Ambala and Lahore 10, Ferozepore 11 and Lyallpur 11½ seers per rupee.

North-West Frontier Province.—The week was cloudy and beneficial rain fell. More rain is required in Dera Ismail Khan. The weather is temperate. Standing crops are average in Peshawar and in irrigated areas of Dera Ismail Khan, above average in Bannu and poor on unirrigated areas of Dera Ismail Khan. Harvesting of sugarcane is still proceeding in the Bannu tahsil with outturn below average. Sowings of sugarcane in the Bannu tahsil and of sugarcane, tobacco, melons and vegetables in Peshawar continue. The condition of cattle is good except in unirrigated tracts of the Lakki tahsil of the Bannu district where it is bad. Fodder is sufficient except in unirrigated areas of the Lakki tahsil and dear in Dera Ismail Khan The public health is good. Prices are high but falling.

Jammu.—Slight rain fell during the week. Prices are fluctuating. Wheat sells from 8 to 10 and maize from 12 to 18 seers per rupee. The condition of standing crops is average. There is no cattle disease. Fodder is sufficient except in a few places.

Kashmir.—The rainfall during the week was good. The condition of standing crops is fair. Cattle are generally healthy. Water is inadequate. Fodder is insufficient in Baramula. Prices are high.

Rajputana.—The weather is hot and clear. Harvesting of spring crops is progressing and standing crops on wet areas are in fair to good condition. Fodder is generally scarce. Cattle are generally growing weaker owing to the deficiency of fodder in the affected areas. Cattle disease is reported from Karauli and Kotah and great mortality from disease is reported from Kotra. Cattle are also dying of starvation in Dungarpur. The water supply is generally sufficient except in Kotah and Tonk. Prices are falling in Shahpura, Partabgarh, Jaipur, Kishengarh, Tonk and Ajmer, rising in Marwar, Mewar and Dungarpur and stationary elsewhere. Scarcity has been declared in Merwara from 1st March 1916. The number of persons on test works in Merwara was 1,915 and on gratuitous relief 1,451.

Central India.—No rain fell during the week. Rain has been insufficient in Gwalior and in some parganas of the Mehidpur and Rampura-Bhanpura districts of the Indore State and sufficient elsewhere. Sugarcane is being sown in Gwalior and watered in Malwa. Harvestind of spring crops is in progress almost everywhere. Standing crops are generally in good condition except on dry tracts of northern Gwalior. The probable outturn is fair in Indore and generally good elsewhere except on unirrigated lands in Gwalior where it is much below the mark and where frost has damaged gram and linseed. Damage to crops is also reported from the Paldeo Estate in the Baghelkhand Agency. Agricultural stock is generally in good condition except for cattle disease in parts of Gwalior, Indore, Bhopal and the Southern States. The fodder supply is generally good except in parts of Gwalior. Prices are high in Baghelkhand, normal in Bhopal, fluctuating in Indore, falling in parts of Bundelkhand and steady elsewhere.

Central Provinces.—The weather has been clear and warm but the nights and the mornings continue cool. Harvesting of spring crops is well advanced and threshing is in progress. Preparation of land for autumn sowings continues. Fodder and water are adequate and cattle are in good condition. The price of wheat continues to fall. Other fluctuations are unimportant.

Feudatory States.—Harvesting of spring crops is in full swing.

Bombay.—Standing crops are generally in good condition except for slight damage by frost in parts of Kathiawar. Cotton picking continues in Gujarat, West Khandesh, Bijapur, Dharwar, Baroda, Kolhapur, Kathiawar and Rewa Kantha. Harvesting of spring crops is generally progressing. The fodder supply is deficient in parts of Sind, Cutch, Kathiawar and Baroda. Agricultural stock is sufficient. Cattle are in good condition except in Hyderabad, Thar and Parkar, Poona, Ahmedabad and Palanpur. Drinking water is generally adequate. Water for irrigation is deficient in Kaira, Ahmedabad, Broach, Dharwar, Kathiawar and Baroda. Prices of food grains have risen slightly in Sind, the Karnatak and the Deccan. Gratuitous relief was given to 143 persons in Kathiawar where the existence of scarcity has been declared.

Hyderabad.—No rain fell during the week. Spring crops are in fair to good condition generally but they have been damaged somewhat by rats in parts of the Usmanabad

district. Late rice crops are in fair to good condition and are being weeded but they are suffering from insufficiency of water in parts of the Karimnagar district. Cattle disease prevails in five talukas. Prices of grains are almost constant. The highest price of *juar* in districts is 9½ seers per rupee in Gulbarga and the lowest 24 seers per rupee in Adilabad.

Mysore.—No rain fell during the week. The price of rice and *ragi* has risen in Tumkur and of rice in Kolar. Markets are well supplied. Standing crops are in good condition. The outturn of the harvested sugarcane, paddy, *ragi*, wheat and cotton is fair to good. Planting of sugarcane and sowing of paddy are in progress in parts. Prospects of the season are good. Cattle are generally healthy. Water and fodder are available.

Coorg.—Prices of food grains are high. The public health is fair. Water and fodder for cattle are sufficient.

Madras.—The rainfall during the week was fair in Tinnevelly and Travancore and *nil* elsewhere. Standing crops are in fair to good condition generally except in parts of Bellary, Chingleput, South Arcot, Ramnad and Tinnevelly and require more rain in parts of Nellore and North Arcot. Harvesting of paddy, sugarcane and dry crops is proceeding or is nearing completion normally. The condition of cattle is generally good. The water supply is sufficient except in parts of Bellary, Anantapur, the Carnatic and the central and southern parts. Pasture is generally sufficient but it is scanty in Kurnool, Bellary and Malabar and in parts of eight other districts. Fodder is generally available but it is scarce in parts of five districts. Prices are steady.

R. A. MANT,
Secretary to the Government of India.

GOVERNMENT OF INDIA.

DEPARTMENT OF REVENUE AND AGRICULTURE.

Rainfall Summary for the seven days ending at 8 hrs. on Thursday, the 23rd March 1916, based on the Indian Daily Weather Reports of the period.

1. The chief feature of the weather of the week was the advance of a disturbance from the west into northwest India. In conjunction with the abnormally high temperatures prevailing over northern India for some time previously it gave rise to series of dust and thundershowers, and widespread rain occurred in northeast Baluchistan, the North-West Frontier Province and the Punjab and snowfall in Kashmir. There was also some rain in Assam, but elsewhere the weather was dry.

2. *Burma.*—No rain fell.

Northeast India, including Orissa.—Rain fell locally in Assam.

The United Provinces, Central India and the Central Provinces.—Light falls occurred at Mussooree and Chakrata.

Northwest India.—Rainfall was nearly general on the 17th in northeast Baluchistan, the North-West Frontier Province and the Punjab, while local snowfall occurred in Kashmir from the 17th to the 19th.

The Peninsula.—The week was rainless.

3. The chief amounts of precipitation were as follows :—

March 17th. Rawalpindi 1·06″, Multan 0·30″, Chaman 0·44″, Murree 1·81″, and Cherat 1·50″.

„ 18th. Sibsagar 3·02″, Rawalpindi 3·21″, Khushab 0·24″, Sonamarg 1·62″, Peshawar 0·63″, Murree 3·16″ and Drosh 0·64″.

„ 19th. Silchar 0·70″, Cherrapunji 3·34″ and Sonamarg 2·11″.

4. The week's rainfall was confined to Kashmir, the North-West Frontier Province, the Punjab, Baluchistan and Assam, and was more than 20 per cent in excess in the first three divisions ; it was normal in Assam, but in defect by 33 per cent in Baluchistan No rain usually falls at this time of year in the United Provinces East, Sind, Rajputana, Gujarat, Central India West, Berar, the Konkan and the Bombay Deccan.

The rainfall from the 3rd December to date is 20 per cent or more in defect over by far the greater part of the country, the actual defect amounting to two inches or over in the United Provinces West, the Punjab, Kashmir, Chota Nagpur, Orissa, Bengal, Assam, Madras Southeast and the Madras Coast North. Rainfall is 20 per cent or more in excess in the Bay Islands, Burma, Central India West and the Bombay Deccan, and is within 20 per cent of the normal in Berar. The absence of rainfall is a normal feature of the weather in the Konkan.

Division.	Rainfall data for week ending on 23rd March 1916.			Rainfall data from 3rd December 1915 to 23rd March 1916.			Percentage departure from normal.	
	Actual rainfall in inches.	Normal rainfall in inches.	Excess or defect in inches.	Actual rainfall to date in inches.	Normal rainfall in inches.	Excess or defect in inches.	This week.	Last week.

The Gazette of India.

EXTRAORDINARY.

PUBLISHED BY AUTHORITY.

DELHI, MONDAY, MARCH 20, 1916.

MILITARY SECRETARY'S OFFICE.

NOTIFICATIONS.

Delhi, the 18th March 1916.

No 1248-M.—His Excellency the Viceroy and Governor General will leave Delhi at 6-15 P.M. on Friday, the 31st March 1916. His Excellency's departure will be public.

His Excellency the Commander-in-Chief in India and Staff, the Members of the Governor General's Executive Council and all the principal Civil and Military officers in Delhi will be in attendance at Viceregal Lodge by 5-15 P.M. Ladies and gentlemen on the Government House list desirous of attending are also invited to be present at the same hour.

Guards of Honour of British and Indian Infantry will be drawn up at Viceregal Lodge.

His Excellency will be escorted to the Station by a Battery of Royal Horse Artillery, a Territorial Battery, His Excellency the Governor General's Body Guard and a Regiment of Indian Cavalry. The route will be *viâ* the Flagstaff Tower, Flagstaff Road, Alipore Road, Kashmir Gate, Lothian Road and Queen's Road and will be lined by troops from the main gate of Viceregal Lodge to the Flagstaff Tower under the orders of the General Officer Commanding at Delhi.

The Chief Commissioner, Delhi Province, the General Officer Commanding at Delhi and Staff, the Deputy Commissioner, Delhi, and the Senior Superintendent of Police, Delhi, will be in attendance at the Delhi Main Station.

A Guard of Honour of Volunteers will be drawn up on the platform.

A Royal salute will be fired as the Special train moves out of the Station

Levee dress (cloth) will be worn by Civil and Review Order (Summer clothing) by Military officers. Gentlemen not entitled to wear uniform will appear in Morning Dress.

The Viceroy will arrive at Bombay on the morning of the 2nd April, His Excellency's arrival being private.

The party accompanying His Excellency will be:—

The Hon'ble Diamond Hardinge.
Sir James DuBoulay, K.C.I.E., I.C.S., Private Secretary.
Lt.-Colonel F. A. Maxwell, V.C., C.S.I., D.S.O., Military Secretary.
Captain W. A. Brown, A.-D.-C.
Captain the Hon'ble A. Hardinge, A.-D.-C.

All communications intended to reach His Excellency the Viceroy and party should be addressed to "Viceroy's Camp" without the addition of any post town; all others to the headquarters of the several departments at Delhi.

By Command,
F. A. MAXWELL, *Lieut.-Colonel,*

Delhi, the 18th March 1916.

No. 1249-M.—His Excellency the Viceroy and Governor General will arrive at Delhi at 7-30 A.M. on Thursday, the 6th April 1916. His Excellency's arrival will be public.

A Royal salute will be fired as the Special train arrives at the Station.

The Chief Commissioner, Delhi Province, the General Officer Commanding at Delhi and Staff, the Deputy Commissioner, Delhi, and the Senior Superintendent of Police, Delhi, will receive His Excellency at the Delhi Main Station.

A Guard of Honour of Volunteers will be drawn up on the platform.

His Excellency will be escorted to Viceregal Lodge by a Battery of Royal Horse Artillery, a Territorial Battery, the Governor General's Body Guard and a Regiment of Indian Cavalry. The route will be *viâ* Queen's Road, Lothian Road, Kashmir Gate, Alipore Road, Flagstaff Road and the Flagstaff Tower and will be lined by troops from the Flagstaff Tower to the main gate of Viceregal Lodge under the orders of the General Officer Commanding at Delhi.

His Excellency is due to arrive at Viceregal Lodge at about 8 A.M., and will be received there by His Excellency the Commander-in-Chief in India and Staff, the Members of the Governor General's Executive Council and all the principal Civil and Military officers in Delhi. Ladies and gentlemen on the Government House list desirous of attending are also invited to be present at Viceregal Lodge by 7-45 A.M.

Guards of Honour of British and Indian Infantry will be drawn up at Viceregal Lodge.

Levee dress (cloth) will be worn by Civil and Review Order (Summer clothing) by Military officers. Gentlemen not entitled to wear uniform will appear in Morning Dress.

By Command,

F. A. MAXWELL, *Lieut.-Colonel,*
Military Secretary to the Viceroy.
